Calcutta.

M. C. MCALPIN,
Under-Secy. to the Govt. of Bengal.

NOTIFICATION.

No. 2015A.—The 27th March 1906.—With the sanction of the Government of India, the following rules for the examination of officers of the Opium Department are substituted for those contained in Appendix VII to the Rules for the Departmental Examination of Assistant Magistrates and others, dated the 28th May 1895. They will come into effect at the examination to be held in June 1906.

1. All Probationary Assistant Opium Agents are required to pass a Departmental examination held under the control of the Central Examination Committee who will arrange for the setting of examination papers in communication with the Opium Agents, and the Accountant-General, Bengal and will, on receipt of the reports of the examiners and of the Local Committees, report to Government the subjects in which each candidate has passed.

2. This examination will be held at Bankipore and Ghazipur twice a year, ordinarily in June and in November, on dates which will be duly notified, and will be conducted by a Local Committee consisting of the Opium Agent, the local Sub-Deputy Opium Agent and a native Civil Officer to be selected by the Commissioner of Patna or Benares, as the case may be.

3. The subjects in which probationers will be examined are:—

(*a*) Opium Laws and Procedure.
(*b*) The language of the Province in which they are serving.
(*c*) Practical work.
(*d*) Certain portions of the Civil Account Code, volume I, and Manual of Treasury and Accounts Rules and Procedure.*

4. The text-books for (*a*) Opium Laws and Procedure will be volumes I, II, III, VI, VII and VIII of the Opium Manual.

5. The examination in (*b*) Vernacular will consist of—

(i) translation from the Vernacular into English and from English into the Vernacular;

(ii) the reading of (*a*) an official document taken at random from the local Sub-Deputy Opium Agent's office, and (*b*) vernacular accounts, in such a manner as to satisfy the Local Committee that the candidate can read accurately and fluently and, in the accounts, that he understands the bearing of the accounts upon his work;

(iii) conversation with natives upon agricultural, official or miscellaneous topics carried on in such a way as to satisfy the Local Committee of the examinee's ability to make himself understood and to understand fully what is said to him.

6. The examination in practical work (which can be conducted only at the June examination) will consist of an examination, after instruction at the Patna or Ghazipur Factory (as the case may be) in examining and classifying opium and leaf.

7. Candidates in the Bihar Agency will be required to translate from and into Hindi (Kaithi character) and candidates in the Benares Agency will be required to translate from and into Urdu (Persian character) and Hindi (Nagri character).

8. Assistant Opium Agents are liable to transfer from one Agency to the other. On such transfer, if otherwise qualified, they will be considered as eligible for promotion without passing in the Vernacular of the Agency to which they have been transferred for a period of two years from the time of their arrival in the Agency to which they have been transferred. After the expiry of that period they will not be eligible for promotion until they pass in the Vernacular of the Agency.

* The Manual is at present under preparation Until it is ready, the portion of the examination relating to Accounts will be omitted.

9. The maximum and the pass marks in each subject and the time allowed for the examination are as follows :—

Subject.	Maximum marks.	Pass marks.	Time allowed.
I.—Opium Laws and Procedure ...	120	60	3 hours.
II.—Vernacular—			
Translation from the Kaithi, Nagri or Persian character into English.	50 for each	30 for each	1 hour for each.
Translation from English into the Kaithi, Nagri or Persian character.	50 „	30 „	1 hour for each.
Reading Vernacular documents.	50	40	20 minutes.
Conversation	50	30	10 „
III.—Practical test—			
Parakhing of Opium ...	100	80	3 hours.
Examination of Leaf ...	30	25	
IV.—Civil Account Code, volume I (certain chapters), and Manual of Treasury and Accounts Rules and Procedure.	120	60	3 „

10. The rules for the conduct of Departmental Examinations of Assistant Magistrates and others are, as far as practicable, applicable to the examinations of Opium Officers.

11. The Central Examination Committee, after perusing the reports and the examination papers with the assistance of the examiners who set the papers, will report to Government the names of such officers as, in their opinion, have passed, noticing specially the subjects in which they passed.

R. W. CARLYLE,
Chief Secretary to the Government of Bengal.

REVENUE DEPARTMENT.

NOTIFICATIONS

Singhbhum.

No. 1592For.—The 20th March 1906.—In exercise of the powers conferred by sections 41 and 42 of the Indian Forest Act, VII of 1878, as amended by Act V of 1890, and with the previous sanction of the Governor-General in Council, the Lieutenant-Governor of Bengal is pleased to make the following rules to regulate the registration of property marks on timber in the Singhbhum district and also the transit of timber and firewood in and through that district :—

Rules for the Registration of Property Marks on Timber in the Singhbhum district.

1. Any person who desires to register a property mark to be placed on timber which he intends to transport in or through the Kolhan or Porahat estate, Singhbhum district, may apply in writing to the Forest Officer in charge of the Singhbhum Forest Division, submitting with his application—

(*i*) a copy and description of the mark which he wishes to be registered ;
(*ii*) a statement of the period for which he wishes the mark to be registered ; and
(*iii*) the amount of the fee due under these rules for registration.

II. Every registration of a property mark by the Forest Officer shall hold good for one or for three years from the 1st July preceding the date of registration, whichever the applicant may desire, and the fee payable by him shall be Rs. 2 for each registration for one year and Rs. 4 for each registration for three years. Double fees shall be charged for any additional property mark in excess of the first one registered in the name of an applicant.

III. The Forest Officer may refuse to register any mark—

(*a*) which he considers resembles too closely any Government property mark, or any mark he has previously registered in favour of another person ; or
(*b*) if he is of opinion that the applicant does not possess and is unlikely to obtain possession of timber requiring to be marked with a property mark ; or

(*c*) if, on account of a previous conviction of the applicant of any serious forest offence, or for any other reason which seems to him sufficient, he is of opinion that the applicant cannot be trusted with a registered property mark; or

(*d*) if he has already registered one or more property marks in the applicant's favour, and is of opinion that the latter has not shown sufficient cause for the registration of an additional mark.

IV. An appeal shall lie from any order by the Forest Officer refusing to register a mark to the Conservator of Forests in Bengal; and, if the applicant owns timber outside the boundaries of the Kolhan and Porahat estates and desires to transport it through either or both of these estates, from any such order passed on appeal by the Conservator of Forests in Bengal to the Commissioner of the Chota Nagpur Division.

FORM OF CERTIFICATE OF REGISTRATION OF A PROPERTY MARK.

Certificate of registration of a property mark for use in the Singhbhum district.

Person in whose favour the mark is registered—
Date of registration—
Date up to which registration will hold good—
Registration fees received— (Counterfoil.)
Copy of mark—
Signature of the Forest Officer—

Rules for the transit of timber and firewood in and through the Singhbhum district.

I. In these rules—

"Timber" includes all pieces of wood of the undermentioned kinds, viz.—

Sál (Shorea robusta);
Asan (Terminalia tomentosa);
Paisar or *Hid* (Pterocarpus Marsupium);
Karam (Adina cordifolia);
Ruta (Ougeinia dalbergioides),

which are sawn or squared with the axe, or which are over 6′ in length and 9″ in girth.

"The Forest Officer" means the Forest Officer in charge of the Singhbhum Forest Division.

II. (1) No timber shall be imported into the tracts respectively called the Kolhan estate and the Porahat estate, situated in Singhbhum district, from any place outside the said tracts without a written permit previously obtained from the Forest Officer showing:—

(*a*) the name or designation of the owner of the timber;
(*b*) the descriptions and amounts of timber which may be imported;
(*c*) the property mark or marks which each piece of timber must bear;
(*d*) the road or roads by which the timber must be transported and its destination or destinations; and
(*e*) the period during which the permit holds good.

III. No piece of timber shall be imported into the said tracts, or removed from any reserved forest in the said tract, or transported from any other part of the said tracts to any railway station on the Bengal-Nagpur line, or to the towns of Chaibassa or Chakradharpur unless it bears a property mark which has been registered by the Forest Officer.

IV. Nothing in rules II and III shall apply to timber imported into the tracts or places therein mentioned by *bond fide* raiyats of the same for their own use, but not for sale or barter.

V. Every person transporting timber out in any forest or other land in the Kolhan estate, or any reserved or protected forest in the Porahat estate to any railway station or town referred to in rule III shall previously obtain, and shall present for examination on demand by any Forest Officer or Police Officer, a permit signed by the Forest Officer or any other Forest Officer authorised by the Forest Officer in this behalf showing:—

(*a*) the name of the owner of the timber;
(*b*) the number and dimensions of the pieces of timber of which the transport is permitted;
(*c*) the mark or marks to be borne by each piece of timber;
(*d*) the railway station or town to which the timber must be transported; and
(*e*) the date up to which transport is permitted.

VI. Every person transporting timber under cover of a permit granted under rule V shall, on arrival at the destination mentioned in his permit, present the timber for examination at the forest checking station established by the Forest Officer, and shall present the permit authorising its transport at the said checking station on or before the date of expiry of the permit.

VII No person shall transport firewood, charcoal or bamboos cut or manufactured in any part of the Kolhan estate or in any reserved or protected forest in the Porahat estate to the town of Chaibassa or Chakradharpur without a permit issued by a Forest Officer authorised by the Forest Officer to issue such permits showing:—

(*a*) the kind and amount of firewood and charcoal or bamboos he is authorised to transport; and

(*b*) the date up to which the permit holds good; and before entering either of the said towns such person shall proceed to one or other of the forest checking stations established by the Forest Officer and present the firewood, charcoal or bamboos and the permit to the Officer in charge of such checking station for examination.

VIII. Any person who, in contravention of these rules or of the conditions of any permit issued thereunder,—

(*a*) imports or transports timber; or

(*b*) transports firewood, charcoal or bamboos; or

(*c*) fails or refuses to present his permit or timber in the manner required by these rules

shall be punished with simple imprisonment for a term which may extend to one month or with fine which may extend to five hundred rupees, or with both.

No. 1637For.—The 24th March 1906.—Mr. B. B. Osmaston, Deputy Conservator of Forests, Bengal, is granted combined leave for six and-a-half months, viz, privilege leave for three months under articles 246 and 260 of the Civil Service Regulations, and furlough for the remaining period under articles 233 and 308 (*b*) of the said Regulations, with effect from the 22nd March 1906, or any subsequent date from which he may avail himself of it.

Khurda.

No. 1685For.—The 26th March 1906.—In exercise of the powers conferred by section 31 of the Indian Forest Act, 1878 (VII of 1878), as amended by Act V of 1890, and with the previous sanction of the Governor-General in Council, the Lieutenant-Governor is pleased to direct that in Rule 6 of the Rules for the management of the protected forests of the Government estate of Khurda in Orissa, published with the notification of the Government of Bengal, in the Revenue Department, No. 5401 (Forests), dated the 16th December 1895, after the word "whatever" the words "with the exception of fruit produced by trees which have been leased or may be hereafter leased by the Subdivisional Officer, Khurda," shall be inserted.

FINANCIAL DEPARTMENT.

NOTIFICATIONS.

No 466S.R.—The 23rd March 1906.—In exercise of the powers conferred by sections 9, 105 and 130 of the Sea Customs Act, 1878 (VIII of 1878), the Lieutenant-Governor is pleased to make the following modifications in the rules prescribed under Notification No. 1390 F.F., dated the 6th July 1903, published at pages 922-26, Part I of the *Calcutta Gazette* of the 15th idem, for the purpose of regulating the weighment and removal by rail or water under bond of non-duty-paid salt from shipboard, or from Government salt golas to a warehouse appointed or licensed under the Sea Customs Act, 1878, or under the Inland Bonded Warehouses Act, 1896 (VIII of 1896), and for the clearance of such salt from such warehouse, namely :—

(1) For rule 13 (*a*) the following shall be substituted :—

"13 (*a*) Salt taken from shipboard or from the golas in order to be conveyed partly by boat and partly by rail, or partly by boat and partly by steamer, may be carried either in bulk or in bags; and the boat in question shall be a lighter provided with hatches, which are capable of being securely fastened down. It shall be the duty of the Preventive Officer to satisfy himself that the lighter is in a serviceable condition before permitting any salt to be placed in it."

(2) For rule 18 the following shall be substituted :—

"18. Immediately after the arrival of the wagons or of the steamer at their destination, notice shall be given by the bonder or his agent to the officer authorised by the Collector of the district or the Collector of Customs, if there be any, to supervise the transit of the salt to the warehouse. This officer shall thereupon note the date and hour of arrival, and shall bring any unreasonable delay to the notice of the Collector; he shall examine the seals, and if they are found intact, shall take over from the railway guard or from the officer in charge of the steamer the pass accompanying the salt endorsed by the Preventive Officer; and he shall superintend the removal of the salt to the appointed warehouse, where it shall be stored without reweighment, unless the bonder or his agent shall desire reweighment. The expense of such reweighment shall be borne by the bonder."

(3) After rule 39 the following rule shall be inserted :—

"39 (A) In the case of salt stored in bags, the tare weight of the bag shall be ascertained and delivery shall be given by weighing the salt in bags and then deducting the tare weight."

No. 471-S.R.—The 27th March 1906.—In modification of the orders contained in Government Notification No. 3018-S.R., dated the 30th June 1903, it is hereby notified for general information that, in exercise of the powers conferred upon him by section 5 of the Opium Act, I of 1878, the Lieutenant-Governor of Bengal, with the previous sanction of the Government of India, has fixed the

Orissa Division.

selling price of excise opium in the districts of the Orissa Division in Bengal at the rates specified below, with effect from the 1st April 1906 :—

Division.	Districts.	Selling price per seer
		Rs
Orissa	Sambalpur	25
	Other districts	33

No. 472S.R.—The 27th March 1906.—It is hereby notified for general information that, in exercise of the power conferred on the Local Government by section 13 of the Excise Act, 1896 (XII of 1896), read with Act VII of 1905, the Lieutenant-Governor of Bengal, with the previous sanction of the Government of India, is pleased to fix the rate of duty on all descriptions of ganja in the district of Sambalpur at Rs 6 a seer, with effect from the 1st April 1906. This supersedes previous notifications on the subject.

Offg. Secy. to the Govt. of Bengal.

DECLARATION.

No. 2148J.—The 27th March 1906.—Whereas certain land was acquired by the Benga Government, under the provisions of Act I of 1894 and Act XVIII of 1885, for a public purpose, viz., for the Bhalgora siding of the East Indian Railway Company, leaving the Damuda Branch at mile 174, 781 feet from Calcutta, in district Manbhum, and whereas coal mines are situate under the said landl and whereas the Bhalgora Coal Company, Limited have given notice to the Government of Bengal, in accordance with the provisions of Act XVIII of 1885, that the said Company, intend to work the said mines, and whereas the mines have been inspected by the officer appointed by the Bengal Government for the purpose under section 5 (1) of Act XVIII of 1885, and whereas it appears to the Bengal Government that the working out of the coal of the mines underlying the said land is likely to cause damage to the surface of the said land and to the works constructed thereon, and whereas the said Bhalgora Coal Company, Limited, have agreed not to work and get minerals underlying the land acquired for their siding or underlying the land acquired for the branch or other lines with which the siding is connected, or underlying the land of the branch or branches connecting the said siding with the main line, in such a manner as to injure or to endanger the safety of the undertaking or any part thereof, nor to claim any compensation for any restricted working:

Manbhum.

Now, therefore, the Lieutenant-Governor of Bengal is pleased to declare under section 5, sub-section (2), clause (*b*) of the abovementioned Act, XVIII of 1885, that the working shall be carried on by the said Bhalgora Coal Company, Limited, in No. 14 seam in the manner and subject to the restrictions below specified, viz.:—

(*a*) A gallery B. E. may be driven in the coal commencing at or near the point B. in the incline A. B. in the direction of the strike of the seam, to meet the extension of the incline C. D. It shall be so driven that the distance from the top of the gallery to the natural surface of the land shall at no point be less than 50 feet, and it shall be at no point exceed 7 feet in width by 8 feet in height.

(*b*) Two galleries W. X. and Y. Z. may be driven off the gallery B. E. abovementioned on the line of full dip and rise of the seam. These galleries shall at no point exceed 7 feet in width and 6 feet in height.

(*c*) No other drivings or galleries shall be made or driven in the area bounded by the line of the gallery B. E. by a line drawn parallel to B. E. from the point where the gallery Y. Z. intersects the boundary of the acquired land, 65 feet from B. E. measured in the direction of the dip of the seam, and by the two portions of the boundaries of the land acquired which lie between these two lines, this area being coloured pink on the plan.

(*d*) A gallery, being an extension of the incline C. D., may be driven in stone or coal in the direction marked approximately on the plan. It shall be so driven that the distance from the top of the gallery to the natural surface of the land shall be not less than 30 feet at the point where it crosses the centre of the land acquired. For a distance of 20 feet on each side of the centre line of the land acquired, an arch of at least five rings of brickwork, set in mortar, shall be built upon side-walls not less than 2 feet 6 inches thick, of brickwork or dressed stone, set in mortar. The width of the arch to be not more than 6 feet when finished, and the height from the floor of the gallery to be not more than 6 feet when finished. The remaining portions of the gallery shall not exceed 6 feet in width by 6 feet in height.

(*e*) No other drivings or galleries shall be permitted in the area bounded by lines drawn parallel to the centre line of the gallery C. D. above mentioned, on each of it, and 34 feet from it, and by the two portions of the boundaries of the land acquired which lie between these two lines, this area being coloured blue on the plan.

(*f*) The positions of the inclines and the approximate positions of the abovementioned galleries are marked on the plan L. A. M. A. No. 47.

(*g*) In the remaining portions of the land acquired the galleries may be driven as follows :—

Where the distance from the natural surface of the land to the top of the gallery, if driven, is more than 50 feet and less than 150 feet, the centres of the galleries to be not less than 40 feet apart.

Where the distance is more than 150 and less than 200 feet, the centres to be not less than 50 feet apart.

Where the distance is more than 200 feet, the centres to be not less than 60 feet apart.

All such galleries shall not exceed 12 feet in height and 12 feet in width, except in the case of the gallery, joining the two proposed new pits marked C. and B. on the plan, and being extended beyond them, on either side, under the land acquired. This gallery may be driven 14 feet wide, provided that the height does not exceed 10 feet in any part, and that the first line of pillars formed on each side are not less than 68 feet square.

(*h*) Where required by any rules made under the Indian Mines Act, manholes not exceeding 5 feet in height by 3 feet in width and 4 feet in depth may be made in any of the galleries or arches.

The plan referred to marked L. A. M. A. No. 47, signed by the Chief Inspector of Mines, may be seen by the parties interested in his office.

T. W. RICHARDSON,
Offg. Secy. to the Govt. of Bengal.

POLITICAL DEPARTMENT.

NOTIFICATION.

'*No. 761P.—The 23rd March 1906.*—The services of J. C. White, C.I.E., Executive Engineer, first grade, now employed as Political Officer in Sikkim, are placed at the disposal of the Government of India, in the Home Department, with effect from the 1st April 1906.

R. W. CARLYLE,
Chief Secy. to the Govt. of Bengal.

MARINE DEPARTMENT.

NOTIFICATION.

No. 30 Marine, dated the 20th March 1906.

UNDER section 10 of Act I of 1859 (an Act for the amendment of the law relating to merchant seamen), the Lieutenant-Governor is pleased, with the sanction of the Governor-General in Council, to make the following rules for the conduct of examinations for Masters and Mates of Foreign-going ships and Home-trade ships and as to the qualifications to be required. These rules are in supersession of the rules issued under notification No. 183 Marine, dated the 28th September 1899.

The new rules will come into force from the 1st May 1906.

W. A. INGLIS,

Secy. to the Govt. of Bengal.

RULES.

CHAPTER I.

Time and place of examinations.

1. The times and places at which examinations are held are shown in Appendix A, page 30.

How to apply.

2. Candidates for examination must fill up a Form of application (Form Exn. 2) at the Port Office. The Form properly filled in, together with the Candidate's testimonials and discharges, must be lodged with the Port Officer of Calcutta, not later than the day before the day of examination, and the Candidate must conform to any regulations in this respect which may be laid down by the Government. The discharges and testimonials should be handed in, together with the Form of application as many days as possibly before the date of the examination which the Candidate desires to attend. In the absence of the necessary verification the Candidate cannot be examined The Port Officer should be particularly careful to ascertain that there are no gaps in the Candidate's service which are not properly accounted for before he is allowed up for examination.

How to apply in special cases.

3. In cases where the services of the Candidate require verification, or where he is in doubt whether his service complies with the regulations, and wishes to submit his case for special consideration, all Certificates, discharges, testimonials, &c., together with the Form of application* properly filled in, should be submitted to the Port Officer of Calcutta. If necessary, the Port Officer will, after seeing that all the required information is clearly set forth in the papers, forward them with his observations to the Government who will deal with the case, or transmit it to the Board of Trade for decision.

Inquiries.

4. All other inquiries regarding examinations should be made and dealt with in the same way. The point on which information is sought should be clearly stated, and Certificates, discharges, testimonials, &c., should be forwarded when they are material to the inquiry.

* Form Exn. 2 which can be obtained at the Port Office.

Services determined by Articles.

5. Services which cannot be verified by proper entries in the Articles of the ships in which the Candidates have served cannot be counted For instance, a man may state that his service has been as Second or only Mate, and to support his assertion may produce a Certificate of Discharge or of employment from the Master, to the effect that he served as Mate, when on reference to the Articles it appears that he has actually been rated as Boatswain ; the service in such a case will not be regarded as having been in the capacity of Mate.

Age

6. Should any doubt exist as to the age of a Candidate, he will be required to produce a certificate of birth.

Fraud and misrepresentation.

7. It is provided by section 104 of the Merchant Shipping Act, 1894, that any person who makes, assists in making, or procures to be made, any false representation for the purpose of procuring either for himself or for any other person a Certificate of Competency, shall, in respect of each offence, be guilty of a misdemeanour,—the punishment for which is imprisonment for any period not exceeding six months, with or without hard labour, or a fine not exceeding one thousand rupees.

Testimonials required.

8. Testimonials to character, including sobriety, and to experience and ability on board ship for at least the twelve months of service immediately preceding the date of application to be examined, will be required of all Candidates, and without producing them no person will be examined.

Penalty for misconduct

9. Candidates who have neglected to join their vessels after having signed Articles, or who have deserted their vessels after having joined, or who have been found guilty of gross misconduct on board, will be required to produce satisfactory proofs of two years' subsequent service and good conduct at sea, unless the Local Government, after having investigated the matter, should see fit to reduce the time.

10. Every Candidate for a certificate of competency of any grade must pass the three tests before he can proceed to the examination in navigation and seamanship.

(1) The sight tests are open to all persons serving or intending to serve in the Mercantile Marine, and all such persons are recommended to take the earliest opportunity of ascertaining by means of these tests whether their vision is such as to qualify them for service in that profession.

(2) The three tests are:—

(*a*) Form Vision Test (*see* page 61).
(*b*) Colour Vision Test (*see* page 62).
(*c*) Colour Ignorance Test (*see* page 68).

No Candidate will be examined in the Colour Vision Test until he has passed the Form Vision Test, or in the Colour Ignorance Test until he has passed the Colour Vision Test.

This rule must be observed whether the candidate has or has not on any previous occasion passed the sight tests.

(3) Any person serving or intending to serve in the Mercantile Marine, if desirous of undergoing the Form Vision, Colour Vision, and Colour Ignorance Tests only, must make application to the Port Officer on the Form Exn. 2A, and must pay a fee of one rupee.

This fee will be payable on each occasion upon which a candidate is examined in Form Vision and Colour tests.

(4) Candidates who fail to pass the Form Vision Test or Colour Ignorance Test can be re-examined at intervals of three months, but Candidates who fail to pass the Colour Vision Test cannot be re-examined. It is open, however, to any Candidate who has failed to pass the Colour Vision Test to appeal to the Government, who may, if they think fit, remit the case to a special Examiner or body of Examiners for final decision.

(5) The expenses of Candidates who are examined by such special Examiner, or body of Examiners, and are reported by them to have passed, will, under certain circumstances, be paid by the Government, at a rate which will be notified to the Candidate; but no payment whatever will be made towards the expenses of Candidates who, upon their own application, are examined by the special Examiners and are reported by them to have failed, unless the Government consider that the particular circumstances of the case justify such payment. The special examinations will be held in Calcutta only.

(6) When a Candidate fails to pass the Colour Vision Test, the Examiner will point out to him the conditions under which he can appeal. Appeals are to be made through the Examiner, and forwarded to the Government with the Examiner's remarks.

(7) The fee paid for examination for a Certificate of Competency includes the fee of one rupee for examination in Form Vision, Colour Vision, and Colour Ignorance, and if the Candidate fails to pass those tests, this fee will, with the exception of one rupee, be returned to him.

(8) Only Examiners who have themselves passed the Colour Test are to undertake these examinations.

(9) Whenever the holder of a certificate of competency fails to pass any of the three tests, there is reason to believe that he is from incompetency unfit to discharge his duties, and in the public interest the Government may cause an inquiry to be held by a Court, having jurisdiction to cancel or suspend such certificate; but in the alternative the Government may accept the voluntary surrender of the certificate until such time as the applicant succeeds in passing the tests in which he failed.

Foreigners must know English

11. Foreigners must prove, to the satisfaction of the Examiners, that they can speak and write the English language sufficiently well to perform the duties required of them on board a British vessel (*see* paragraph 19). In the case of candidates for Home Trade Certificates, the Certificates of Asiatics who may not be able to speak English shall be endorsed to the effect that they are valid only for vessels manned and officered entirely by Asiatics.

Issue of Certificate.

12. If the Candidate passes, he will receive a Form (Form Exn. 16), authorising the Port Officer to whom it is addressed to issue the Certificate. The Candidate's testimonials and other papers will be returned to him with the Certificate. It is therefore important that the port at which the Certificate is to be issued should be the same on both the Form Exn. 16 and the Form Exn. 2. If circumstances should make any alteration necessary, the Examiner should see that it is made in both Forms, otherwise delay in the issue of the Certificate may be caused.

Service found to be insufficient.

13. If, after a Candidate has passed the examination, it is discovered on further investigation that his services are insufficient to entitle him to receive a Certificate of the grade for which he has passed, the Certificate will not be granted to him; but if the Government is satisfied that the error in the calculation of the Candidate's services did not occur through any fault or wilful misrepresentation on his part, he may either have the fee returned to him, or have it placed to his credit. Should his services entitle him to a Certificate of a lower grade, it may be granted to him, and the difference, if any, between the fee paid by him for the superior Certificate and the fee payable for the inferior Certificate will be returned to him or placed to his credit. The superior Certificate will not be granted until the Candidate has performed the amount of service in which he was deficient, and has been re-examined in all the subjects unless the Government see fit to dispense with the re-examination.

Failure in examination.

14. In all cases of failure the Candidate must be examined anew. If a candidate fails in Seamanship, he will not be re-examined until after a lapse of six months. Whether the whole or part of this period must be served at sea must depend upon the subjects in Seamanship in which the Candidate failed, but the amount of further sea service to be required will be left to the discretion of the Port Officer, Calcutta.

Examiner's Report.

15. The Examiner, in making his report on Form Exn 14, should state what amount, if any, of further sea service the Candidate must perform, and he should also insert this information in Form Exn. 2.

Failure in Navigation.

16. If a Candidate fails three times in Navigation within three months, he will not be re-examined until after a lapse of THREE MONTHS from the date of the last failure.

Failure in Extra Examinations.

17. Candidates for Extra Certificates will not be allowed to present themselves for examination more than three times within a period of twelve months.

Lower Certificate may be granted.

18. If a Candidate has failed in his examination, but the subjects in which he has failed are not included in the subjects required for a Certificate of a lower grade, he may, if he so desires, proceed with the examination for the lower

grade certificate without further formal application or payment of fee, but in this case he will be required to complete the whole of the work prescribed for such lower grade, that portion (if any) already done standing good. No part, however, of the fee he has paid will be returned to him, and on presenting himself, when qualified, for re-examination for the higher Certificate, he will be required to pay a further full fee.

Failure for spelling, &c.

19. If a Candidate fails for bad spelling or writing, he will not be re-examined until after a lapse of at least three months. If he fails for ignorance of the English language, he will not be re-examined until after a lapse of six months.

Failure in Seamanship.

20. If a Candidate fails in Seamanship so far as regards the management of square-rigged Sailing Vessels, in his examination for an Ordinary Certificate, he may, if qualified as to service, without further formal application or further payment of fee, proceed with the examination for a Certificate of Competency for Foreign-going Steamships, or for Fore and Aft-rigged Vessels. And if a Candidate fails in the same manner in his examination for an Extra Master's Certificate, he may, under the same conditions as above, proceed with the examination for an Extra Certificate for Steamships.

Fee always paid first.

21. Candidates for examination, in making their application on Form Exn. 2, will be required to pay the examination fee before any step is taken in the way of inquiring into their services or testing their qualifications. If the Candidate is found not to be qualified, the fee will either be returned to him or placed to his credit until he is qualified.

Where to pay fees.

22. The fee for examination must be paid to the Port Officer in the cash office. If a Candidate offers a gratuity to any officer of the Department, he will be regarded as having committed an act of misconduct, and will be rejected, and not allowed to be again examined for twelve months either at the port where the offence was committed, or at any other port.

Fee not returned on failure.

23. If a Candidate fails to pass the examination, no part of the fee will be returned to him.

Table of fees.

24. The fees are as follows :—

FOR "FOREIGN-GOING SHIPS"

	Rs.
Second Mate	12
First and Only Mate if previously possessing an inferior Certificate, either granted by the Board of Trade, or by the Government of a British Possession *under section 8 of "The Merchant Shipping (Colonial) Act, 1869"* ...	6
If not	12
Master	24
Where a Candidate is in possession of a Certificate for Fore and Aft-rigged Vessels, and requires an Ordinary or Steamship Certificate of the same grade; or where a Candidate is in possession of a Steamship Certificate, and requires an Ordinary Certificate of the same grade	Half the usual fee.
Master, Extra, if possessing an Ordinary Master's Certificate; or Master, Extra, for Steamships if possessing a Master's Certificate for Steamships	12*

* If the examination for the Extra Master's Certificate takes place at the same time as the examination for the Ordinary Master's Certificate, the usual fee for the Ordinary Master's Certificate in addition to the fee for the Extra Certificate must be paid. This rule as to fees also applies to the extra examinations for Steamships and yachts.

	Rs.
Where a Candidate is in possession of a Certificate for Foreign-going Ships, not granted under the *Merchant Shipping (Colonial) Act, 1869*, or section 102 of the Merchant Shipping Act, 1894; or of a Provisional Certificate of qualification obtained after examination on board one of His Majesty's Ships; for an Imperial Certificate of same grade, for first attempt	No fee.
Every subsequent attempt ...	Usual fee

FOR "HOME TRADE PASSENGER SHIPS."

	Rs.
Mate	6
Master	12

FOR VOLUNTARY EXAMINATION IN STEAM.

	Rs.
Any Master or Mate holding a Certificate of any grade, whether for the Foreign or Home Trade, or as Master of his own Pleasure Yacht ...	12

FOR VOLUNTARY EXAMINATION IN DEVIATION OF THE COMPASS.

	Rs.
Any Master or Mate holding a Certificate of any grade, whether for the Foreign or Home Trade, or as Master of his own Pleasure Yacht ...	12

FOR "YACHTS."

	Rs.
Master	24
Master, Extra, if possessing a Master's Certificate	12

NOTE.—No abatement will be made in the fee charged to a Candidate for a Certificate for Foreign-going Ships in consequence of his possessing a Master's or Mate's Certificate for Home Trade Passenger Ships.

CHAPTER II.

QUALIFICATIONS REQUIRED FOR THE VARIOUS GRADES.*

Certificates for "Foreign-going" Ships or Ordinary Certificates.

Square rigged service required.

25 A Candidate for an Ordinary Certificate of any grade, who has not previously held an Ordinary Certificate of a lower grade, must prove that he has served 12 months in the Foreign Trade, or 18 months in the Home or Coasting Trade in a square-rigged sailing vessel.

Value of ordinary certificates.

26. Ordinary Certificates will entitle the holders to go to sea as Mates or Masters of any vessel, sailing or steam.

Second Mate, ordinary.

27. SECOND MATE.—A Candidate must be not less than seventeen years of age, and must have served four years at sea.

* These qualifications are shown in a tabular form in Appendix P, page 69.

SECOND MATE.

Navigation.

28. *Examination in Navigation.*—A Candidate for a Second Mate's Certificate will be required —

(*a*) To write a legible hand and spell correctly; this will be tested by not less than a quarter-of-an-hour's dictation.

(*b*) To write a short definition of various astronomical and other terms and to draw a rough sketch or diagram to illustrate their meaning. (*See* Appendix C and paragraph 156.)

(*c*) To show a competent knowledge of the first five rules of arithmetic and the use of logarithms.

(*d*) To work a day's work complete, correcting the courses for leeway, deviation and variation.

(*e*) To find the latitude by the meridian altitude of the sun.

(*f*) To work any practical problem in parallel sailing.

(*g*) To find the true course and distance from one given position to another by Mercator's method; also the compass course, the variation and deviation being given.

(*h*) To find the time of high water at a given port.

(*i*) To find the true amplitude of the sun and the error of the compass therefrom; also the deviation, the variation being given.

(*j*) To find the longitude by chronometer from altitude of the sun by the usual methods, computing the daily rate of chronometer from errors observed when acquired; also to find the true azimuth of the sun, and the error of the compass; and the deviation, the variation being given.

(*k*) To find the true azimuth of the sun by the "Time-Azimuth" tables; the error of the compass; also the deviation, the variation being given.

(*l*) To find on either a "true" or "magnetic" chart* the course to steer and the distance from one given position to another; to find the ship's position on the chart from cross-bearings of two objects; from two bearings of the same object, the course and distance run between taking the bearings being given; also the distance of the ship from the object at the time of taking the second bearing. (*See* Appendix G.)

He will be required to answer viva voce *questions on the following subjects:*—

(*m*) The use and adjustments of the sextant, read off and on the arc, and the mode of finding the index error by both horizon and sun.

(*n*) The International Code of Signals.

(*o*) The construction, use and principle of the barometer, thermometer and hydrometer.

(*p*) Weights and measures.

Second Mate, ordinary Seamanship.

29. *Examination in Seamanship.*—He must understand and give satisfactory answers on the following subjects:—

(*a*) The standing and running rigging of ships.

(*b*) Bending, unbending, setting, reefing, taking in and furling sail.

(*c*) Sending masts and yards up and down, &c.

(*d*) Management of a ship when under canvas.

(*e*) Management of ship's boats in heavy weather.

(*f*) Dunnaging and stowing cargo, &c.

(*g*) The Rule of the Road as regards both steamers and sailing vessels, their regulation lights and fog and sound signals.

(*h*) The signals of distress, and the signals to be made by ships wanting a Pilot, and the liabilities and penalties incurred by the misuse of these signals

* The terms "true" and "magnetic" are used for brevity and convenience throughout the Regulations to indicate charts which have compasses engraved upon them showing the true or magnetic points of the compass respectively.

(*i*) The marking and use of the lead and log lines.
(*j*) The use and management of the rocket apparatus in the event of a vessel being stranded.
(*k*) Any questions of a like nature appertaining to the duties of a Second Mate that the Examiner may think necessary to ask.
(*l*) Also questions on the additional subjects which are specified in the Rules of Examination for Second Mates' Certificates of Competency for Foreign-going Steamships (*see* paragraph 44).

Only Mate ordinary.

30. ONLY MATE.—A Candidate must be not less than nineteen years of age, and have served five years at sea.

First Mate ordinary.

31. FIRST MATE.—*A Candidate must be not less than nineteen years of age, and have served five years at sea, of which—

(*a*) One year must have been in a capacity not lower than Fourth Mate of a Foreign-going Vessel, whilst holding a Second Mate's Certificate for Foreign-going Vessels;
If his service was as Third or Fourth Mate, proof will be required that he had during the whole year *charge of a Watch* (*see* para. 106):
(*b*) *or* one year and a-half must have been in a capacity not lower than Only Mate in a Home Trade or Coasting Vessel whilst holding a Second Mate's Certificate for Foreign-going Vessels, or a Mate's Certificate for Home Trade Passenger Ships;
(*c*) *or* one year must have been as Pilot with a First Class Pilot's Certificate (*see* para. 103).
(*d*) or eighteen months' active service as Chief Officer with a Second Mate's Certificate on a Bengal Pilot Brig.

Mate, ordinary Navigation.

32. *Examination in Navigation.*—A Candidate for an Only or First Mate's Certificate will be required—

(*a*) To work out any *three* of the nautical problems perscribed for the Second Mates' examination which may be given him by the Examiner, in addition to the chart paper (*l*) and the oral subjects (*m*, *n*, *o*, *p*) prescribed for that grade.
(*b*) To compute the time at which a given star will be on the observer's meridian. [Occasionally by inspection.]
(*c*) To describe where tables giving the names of the principal stars passing the meridian may be found.
(*d*) To describe where the meridian passage of the principal planets may be found.
(*e*) To determine what bright stars will be within an hour or more of the observer's meridian above the pole and above the horizon at any given time; also the hour angle, east or west of each of the stars, and whether to the north or south of the observer's zenith when passing the meridian.
(*f*) To describe any maps or diagrams which the Candidate knows, and prefers for further facilitating the recognition of the stars and planets.
(*g*) To compute the approximate meridian altitude of one of the stars just found, for setting the sextant.
(*h*) To find the latitude from the meridian altitude of the same star.
(*i*) To find the longitude by chronometer by altitude of a star.
(*j*) To find the true azimuth of a star by the "Time Azimuth" tables, and get the deviation therefrom.
(*k*) To find the latitude by ex-meridian altitude of the sun or a star.
(*l*) To find the *line of position* and the true bearing of the sun, and the ship's position, by Sumner's method by projection.

*For convenience of calculation the service required is stated in a tabular form in Appendix P page 69

(*m*) To answer certain questions relative to cyclones or revolving storms. (*See* Appendix H, page 59.)

He will be required to answer viva voce *questions on the following subjects*:—

(*n*) How to keep a ship's log book.
(*o*) How to calculate the capacity of a given bunker or hold.
(*p*) How to calculate a freight and its commissions

First Mate, Ordinary Seamanship

33. *Examination in Seamanship.*—In addition to the qualifications required for a Second Mate's Certificate, an Only or First Mate will be required to show a knowledge of the following subjects:—

(*a*) Shifting large spars, rigging sheers, taking lower masts in and out.
(*b*) How to moor and unmoor ship; to keep a clear anchor; and to carry out an anchor.
(*c*) How to manage a ship in stormy weather, and to cast a ship on a lee shore.
(*d*) How to secure the masts in the event of accident to the bowsprit.
(*e*) How to rig purchases for getting heavy weights, anchors, machinery, &c., in or out.
(*f*) How to dispose various kinds of cargo and weights in a stiff, and in a tender vessel.
(*g*) The ventilation of holds and the stowage of explosives.
(*h*) How to rig a sea anchor, and what means to employ to keep a vessel disabled or unmanageable, out of the trough of the sea, and lessen her lee drift.
(*i*) How to get a cast of the deep sea lead in heavy weather.
(*j*) Accidents, and how to deal with them.
(*k*) Any other questions appertaining to the duties of an Only or First Mate which the Examiner may think necessary to ask.
(*l*) Also questions on the additional subjects which are specified in the Rules of Examination for Only and first Mate's Certificates of Competency for foreign-going Steamships (*see* para. 48)

Master, Ordinary

34. MASTER.*—A Candidate must be not less than twenty-one years of age, and

(*a*) he must have served six years at sea, of which one year must have been in a capacity not lower than Only Mate of a Foreign-going Vessel whilst holding a Certificate not lower than an Only Mate's Certificate for Foreign-going Vessels, provided that this service as officer was not performed whilst holding a First Mate's Certificate for Foreign-going Vessels, the Candidate will also be required to prove the officer's service prescribed for that grade (para 31);
(*b*) *or*, he must have served six years at sea, of which one year and-a-half must have been in a capacity not lower than Only Mate of a Home Trade or Coasting Vessel whilst holding a Certificate not lower than an Only Mate's Certificate for Foreign-going Vessels provided that if this service as officer was not performed whilst holding a First Mate's Certificate for Foreign-going Vessels, the Candidate will also be required to prove the Officer's service prescribed for that grade (para. 31):
(*c*) *or*, he must have served six and a-half years at sea, one year of which must have been in a capacity not lower than Second Mate of a Foreign-going Vessel whilst holding a First Mate's Certificate for Foreign-going Vessels, provided that if this service as Second Mate was

* For convenience of calculation the service required is stated in a tabular form Appendix P, page 169.

performed under an Additional or Auxiliary First Mate it will only be accepted if a Third and Fourth Mate were also carried, and one year and-a-half not lower than Third or Fourth Mate of a Foreign-going Vessel *in charge of a Watch* whilst holding a Second Mate's Certificate for Foreign-going Vessels;

(*d*) *or*, he must have served nine years at sea in the Home or Coasting Trade, of which three years must have been as Master, *or* one year as Master and three years in a capacity not lower than that of Mate, *provided that in either case* he has served in such capacity for not less than one year with a Second Mate's Certificate for Foreign-going Vessels or a Master's Certificate for Home Trade Passenger Ships.

Master, Ordinary. Navigation

35. *Examination in Navigation.*—A Candidate for an Ordinary Master's Certificate will be required to work out any *twelve* of the nautical problems prescribed for the grades of Second and First Mate that may be given him by the Examiner, in addition to the chart paper, the cyclone paper, and the oral subjects prescribed for the grades of Second and First Mate. He will also be required—

(*a*) To find the latitude by the altitude of the polar star at any time.

(*b*) To find the latitude by the meridian altitude of the moon.

(*c*) To find the magnetic bearing of any fixed object when at sea or at anchor from bearings of the object taken with the ship's head on equidistant compass points, and to compute the deviation therefrom; to construct a deviation curve upon a Napier's diagram which will be furnished by the Examiner, and show that he understands its practical application; to give satisfactory written *and oral* answers to certain practical questions as to the effect of the ship's iron upon the compasses, and the method of determining the deviation, and show how to compensate the deviation by magnets and soft iron by the aid of Beall's Compass Deviascope (*see* Appendix I, page 50).

(*d*) To find on a chart the course to steer by compass in order to counteract the effect of a given current, and find the distance the ship will make good towards a given point in a given time, and to work out practically the correction to apply to soundings taken at a given time and place to compare with the depth marked on the chart, (*see* Appendix G, page 49).

He will be required to answer vivâ voce *questions on the following subjects.*—

(*e*) The law as to the engagement and discharge and management of the crew, and the entries to be made in the official log.

(*f*) How to prevent and check an outbreak of scurvy on board ship.

(*g*) The law as to load line marks, and the entries and reports to be made respecting them.

(*h*) Invoices, charter party, bills of lading, Lloyd's agent, nature of bottomry, bills of exchange, surveys, averages, &c.

(*i*) The prevailing winds and currents of the globe.

(*j*) The trade routes.

(*k*) Tides.

Master, Ordinary. Seamanship.

36. *Examination in Seamanship.*—In addition to the qualifications required for the grades of Second and First Mate, an Ordinary Master will be required to show a knowledge of the following subjects:—

(*a*) Construction of jury rudders for both wooden and iron vessels, also rafts.

(*b*) Resources for the preservation of the ship's crew in the event of wreck

(*c*) Management of ship in heavy weather.

(*d*) Rescuing the crew of a disabled vessel

(*e*) Steps to be taken when a ship is on her beam ends, or in any danger or difficulty, or disabled or unmanageable and on a lee shore.

(*f*) Heaving a keel out.

(*g*) How to proceed when placing a ship in dry dock, and directing repairs, and when putting into port in distress with damage to cargo and ship.

(*h*) Any other question of a like nature appertaining to the management of a ship which the Examiner may think it necessary to ask.

(*i*) Also questions on the additional subjects which are specified in the Rules of Examination for Masters' Certificates of Competency for Foreign-going Steamships. *See* para. 51.

CERTIFICATES FOR FOREIGN-GOING FORE AND AFT-RIGGED VESSELS.

Fore and aft Certificates

37. Certificates for the grades of Master, First Mate, Only Mate and Second Mate of fore and aft rigged vessels will be issued to Candidates who have not complied with the regulation which requires them to have served at least one year in square-rigged sailing vessels, or who prove in course of examination that they are ignorant of the management of square-rigged ships. In other respects the qualifications for examination for such Certificates are the same as for Ordinary Certificates.

Character of examinations.

38 The examinations for the grades of Second Mate, Only Mate, First Mate, and Master of fore and aft-rigged vessels will be precisely the same as for the Ordinary Certificates, excepting that in seamanship a knowledge of the management of square-rigged vessels is not required.

Value of Certificates.

39. A Certificate for "Fore and Aft-rigged vessels" will not entitle the possessor to act in any case in which a Certificate for square-rigged vessels is required. Amongst square-rigged vessels are classed full-rigged ships, barques, brigs, barquentines, brigantines, and steamships carrying square sails

How certificates may be changed

40. A Candidate possessing a Certificate for fore and aft-rigged vessels, and desiring to be examined for an Ordinary Certificate, must prove that he has served at sea at least one year in a square-rigged sailing vessel, *unless* he has previously held an Ordinary Certificate of a lower grade.

CERTIFICATES FOR FOREIGN-GOING STEAMSHIPS.

Steamship Certificates

41. Certificates applying only to steamships are issued to Candidates who are either unable to comply with the regulation which requires them to have passed one year in square-rigged sailing vessels, or who prove in course of examination that they are ignorant of the management of square-rigged sailing vessels. All the qualifying Officers' service prescribed for these Certificates must have been performed in steamships.

These Certificates will entitle the holders to go to sea as Masters or Mates of Foreign-going Steamships, but will not entitle them to go to sea as Masters or Mates of Foreign-going Sailing Ships.

There will be no distinction in these Certificates between "Fore and Aft-rigged" Steamships and "Square-rigged" Steamships

Second Mate Steamships.

42. SECOND MATE.—The qualifications as to age and service are the same as for an Ordinary Second Mate's Certificate (*see* para 27), excepting that no service in square-rigged sailing vessels is required.

43. *Examination in Navigation.*—The examination in navigation for a Second Mate's Certificate for Foreign-going Steamships will be precisely the same as that prescribed for an Ordinary Second Mate's Certificate. Navigation.

44. *Examination in Seamanship.*—The Candidate must understand and be able to give satisfactory answers as to the following subjects:— Seamanship.

(*a*) The standing and running rigging of steamships.
(*b*) Bending, unbending, setting, reefing, taking in and furling sail.
(*c*) Sending masts and yards up and down, &c.
(*d*) Seeing everything in readiness and clear for getting under way, and the precautions to be then observed with regard to engines, propeller, &c.
(*e*) Management of a steamship when under canvas.
(*f*) Management of a ship's boat in heavy weather.
(*g*) Dunnaging and stowing cargo, &c.
(*h*) The Rule of the Road as regards both steamers and sailing vessels, their regulation lights and fog and sound signals.
(*i*) Signals of distress, and signals to be made by ships wanting a Pilot, and the liabilities and penalties incurred by the misuse of these signals.
(*j*) The marking and use of the lead and log lines
(*k*) The construction, use and action of the sluices, and of the water-ballast tanks.
(*l*) Engine-room, telegraph, &c.
(*m*) Use and management of the rocket apparatus in the event of a vessel being stranded
(*n*) Any other questions of a like nature appertaining to the duties of the Second Mate of a steamship which the Examiner may think necessary to ask.

45. ONLY MATE.—The qualifications as to age and service are the same as for an Only Mate's Ordinary Certificate (*see* para 30), excepting that no service in square-rigged vessels is required. Only Mate, Steamship.

46. FIRST MATE.—The qualifications as to age and service are the same as for a First Mate's Ordinary Certificate (*see* para. 31), excepting that the service required as officer must have been in Steamships, and that no service in square-rigged vessels is required. First Mate, Steamships

47. *Examination in Navigation.*—The examination in navigation for an Only or First Mate's Certificate for Foreign-going Steamships will be precisely the same as that prescribed for an Ordinary First Mate's Certificate (*see* para. 32). Navigation.

48. *Examination in Seamanship.*—In addition to the qualifications required for a Second Mate's certificate, an Only or First Mate will be required to show a knowledge of the following subjects:— Seamanship.

(*a*) Shifting large spars; rigging sheers; and taking lower masts in and out.
(*b*) How to moor and unmoor ship, keep a clear anchor, and to carry out an anchor.
(*c*) Management of a steamship in stormy weather.
(*d*) How to rig purchases for getting heavy weights, anchors, machinery, &c., in and out.
(*e*) How to dispose various kinds of cargo and weights, in a stiff and in a tender vessel.
(*f*) Ventilation of holds and the stowage of explosives.
(*g*) The effects of the screw race upon the rudder; and the effect produced on the direction of the head of the ship by going [ahead] [astern] with a [right] [left] handed screw when the rudder is [ported] [starboarded]; also the effect of twin-screws under the same conditions, and when going ahead with one and reversing the other, &c., &c.
(*h*) How to rig a sea anchor, and what means to employ to keep a steamer, with her machinery disabled,

out of the trough of the sea and to lessen her lee drift.

(*i*) How to turn a steamship short round.

(*j*) How to get a cast of the deep sea lead in heavy weather.

(*k*) Any other questions of a like nature appertaining to the duties of a First Mate of a steamship which the Examiner may think necessary to put to him.

Master, Steamships

49. MASTER.—The qualifications as to age and service are the same as for a Master's Ordinary Certificate for a Foreign-going Ship (*see* para. 34), excepting that the service required as officer must have been performed in steamships, and that no service in square-rigged vessels is required.

Navigation.

50. *Examination in Navigation.*—The examination in navigation for a Master's Certificate for Foreign-going Steamships will be precisely the same as that prescribed for an Ordinary Master's Certificate (*see* para 35)

Seamanship.

51. *Examination in Seamanship.*—In addition to the qualifications required for the grades of Second and First Mate, a Master will be required to show a knowledge of the following subjects:—

(*a*) Construction of rafts and jury rudders suitable for screw steamships.

(*b*) The preservation of the ship's crew in the event of wreck.

(*c*) Management of steamships in heavy weather.

(*d*) Rescuing the crew of a disabled ship.

(*e*) Steps to be taken when a vessel is on her beam ends or disabled and on a lee shore.

(*f*) How to use steam appliances in the event of fire.

(*g*) The best arrangement for towing vessels under different circumstances.

(*h*) Placing ship in dry dock, directing repairs, and the mode of procedure when putting into port in distress with damage to cargo and ship.

(*i*) Any other questions of a like nature appertaining to the management of a steamship which the Examiner may think it necessary to put to him.

Steamship Certificates, how changed.

52. A Candidate possessing a Certificate for "Foreign-going Steamships" and desiring to be examined for an Ordinary Certificate, must prove that he has served at sea at least one year in a square-rigged sailing vessel *unless* he has previously held an Ordinary Certificate of a lower grade

CERTIFICATES FOR HOME TRADE PASSENGER SHIPS.

Mate, Home Trade.

53. MATE.—A Candidate must be not less than nineteen years of age and have served four years at sea.

Navigation.

54. *Examination in Navigation*—He must write a legible hand and spell correctly, and understand the first five rules of arithmetic, both simple and compound. He must be able to take a bearing by compass, be conversant with the use of Mercator's Chart, and be able to find, on either a "true" or "magnetic" chart, the course to steer, and the distance from one given position to another; to find the ship's position on the chart from cross bearings of two objects and from two bearings of the same object, the course and distance run between taking the bearings being given; and the distance of the ship from the object, at the time of taking the second bearing. He must also pass an examination in the International Code of Signals.

Seamanship.

55. *Examination in Seamanship.*—He must possess a thorough knowledge of the Rule of the Road as regards both steamers and sailing vessels, their regulation lights, and fog and sound signals. He must be able to describe the signals of distress and the signals to be made by ships

wanting a Pilot, and the liabilities and penalties incurred by the misuse of these signals; also the use and management of the rocket apparatus in the event of his vessel being stranded. He must be able to mark and use the lead and log lines, to moor and unmoor a vessel, and to manage a ship's boat in heavy weather, etc., etc. He must also understand the construction, use and action of the bulkhead sluices, the engine room, telegraph, etc., and to answer any other questions of a like nature appertaining to the duties of the Mate of a Home Trade Passenger Ship which the Examiner may think proper to put to him.

Master, Home Trade.

56. MASTER*—A Candidate must be not less than twenty years of age and have served five years at sea of which—

(*a*) one year must have been in a capacity not lower than that of only Mate of a Home Trade or Coasting Vessels whilst holding a Mate's Certificate for Home Trade Passenger Ships, or a Second Mates's Certificate for Foreign going Vessels;

(*b*) *or*, two and-a-half years must have been in a capacity not lower than Second Mate of a Home Trade or Coasting Vessel *in charge of a Watch* whilst holding a Mate's Certificate for Home Trade Passenger Ships, or a Second Mate's Certificate for Foreign-going Vessels (*see* para. 106);

(*c*) *or*, one year must have been as Pilot with a First Class Pilot's Certificate (*see* para. 103).

Master Home Trade Navigation.

57 *Examination in Navigation.*—In addition to the qualifications required of a Mate of a Home Trade Passenger Ship a Master will be required to find on a chart the course to steer by compass in order to counteract the effect of a given current and to find the distance the ship will make good towards a given point in a certain time, and to *work out practically* the correction to apply to soundings taken at a given time and place, to compare with the depth marked on the chart, etc. He will also be required to understand the use of the quadrant, to be able to observe with it, to read *off* and *on* the arc, and to find the index error by horizon. He will also be required to find the latitude by a meridian altitude of the sun, and to give written answers to certain practical question on the subject of the deviation of the compass. (*See* also supplementary *viva voce* test, para 157.)

Master, Home Trade Seamanship

58. *Examination in Seamanship.*—In addition to the qualifications required of a Mate of a Home Trade Passenger Ship, a Master must understand how to rig a sea anchor and what means to apply to keep a steamship with machinery disabled out of the trough of the sea; also how to get a cast of the lead in heavy weather, etc. He will be examined as to his resources for the preservation of the crew and passengers in the event of wreck and the steps to be taken if his vessel is disabled and drifting towards a lee shore, and will be required to answer any other questions appertaining to the management of a Home Trade Passenger Ship which the Examiner may think necessary to put to him.

EXTRA CERTIFICATES.

Extra Master Foreign going

59. *Certificates as Extra Master.*—An Extra Master's Certificate will entitle the holder to go to sea as Master of any vessel, sailing or steam.

The examination is voluntary and intended for such persons as wish to prove their superior qualifications and are desirous of having Certificates of the highest grade granted by the Board of Trade.

The extra examination may take place when the Applicant is qualified to go up for examination for an Ordinary

* For convenience of calculation, the service required is stated in a tabular form in Appendix P, page 69.

Master's Certificate, or at any time subsequent to his having passed the examination for that Certificate.

Extra Master, Navigation.

60 *Examination in Navigation.*—The Candidate will be required to work out and show the construction of any four of the problems,* prescribed for the Ordinary Certificates and to satisfy the Examiner in the oral subjects prescribed for those Certificates. He must also be prepared to be examined in any of the following subjects, showing the construction of all problems† :—

(*a*) To work a lunar‡ observation by either sun, star, or planet; and to compute the altitudes when they are not given.

(*b*) To find the latitude from double altitudes of the sun or of a star.

(*c*) To determine, from simultaneous observations of two different stars, the position of the ship, and the true bearing of the stars, by Sumner's method. The Candidate may either determine the four longitudes from the two assumed latitudes which will be given, or solve the question in any other way he may choose.

(*d*) To find the error of a chronometer from the altitude of the sun or of a star, observed with an artificial, or with the natural, horizon.

(*e*) To explain clearly in writing the principles of—(1) Great Circle sailing; (2) Windward Great Circle sailing; (3) Composite Great Circle sailing; and their advantages and disadvantages.

(*f*) To show approximately on a terrestrial globe the Great Circle track and the distance from one given position to another; also the latitude and longitude of vertex; and the longitude from vertex; and to explain how the track can then be transferred to a Mercator's chart. Occasionally the Candidate will be required to lay the tract down on a chart.

(*g*) To determine the initial Great Circle course, and the distance, from one given position to another the latitude and longitude of vertex, the longitude from vertex and the latitudes and longitudes through which the Great Circle will pass; laying the track, composite or otherwise, down on a Mercator's chart, and explaining briefly how the course and distance from one point to another on this track is then found. This problem may, subject to the decision of the Examiner, be solved, either by calculation, or by any tables, graphic method, or Great Circle chart, known to and preferred by the Candidate, and it will usually be set so as to leave the choice of method to the Candidate.

(*h*) To draw a figure, and write down the trigonometrical ratios.

(*i*) Right-angled plane trigonometry; deducing and writing down the formula for each computation in the problem given.

(*j*) Oblique-angled plane trigonometry; deducing and writing down the formula, or the rule, for each computation in the problem given.

(*k*) To give Napier's rules for circular parts for the solution of right-angled spherical triangles, explaining clearly how the different angles and sides are considered in deducing the formulæ.

(*l*) Right-angled spherical trigonometry.

(*m*) The laws of the deviation of the compass in iron ships. (*See* Appendix K, page 52.)

(*n*) To construct a Mercator's chart.

(*o*) The law of storms. The Candidate to write a paper of what he knows of this subject.

---

* Either of the chart papers Exn. 9*c*. or Exn. 9*d*. may be given as one of these four problems.

Two or three of those problems may usually be omitted, but all those set in the examination papers given to the Candidate must be worked.

‡ See Board of Trade notice of May 1905 on page 29.

He must be prepared to answer viva voce *questions on the following subjects* :—

(*p*) The leading principles of the construction of the sextant and of the vernier

(*q*) The civil duties of a Shipmaster in which he will be expected to show a more extensive knowledge than a Candidate for an Ordinary Master's Certificate.

The construction of the problems mentioned above and those in the compass syllabus, must be shown as follows:—

(*a*) A circle should be drawn projected on the plane of the horizon—unless the problem can be shown better otherwise—and a correct figure drawn in it, the magnitude of the sides and angles being estimated approximately by the eye

(*b*) The sides and angles used in solving the problem should be marked by distinguishing letters in the figure, and the Candidate should for each fresh computation write down clearly what is given and what he is required to find, together with the formula which he proposes to use

(*c*) Opposite each quantity in the computation he should put the letters denoting the part of the triangle which it represents, writing 'comp' before the letters when the quantity is the complement of that part of the triangle.

Candidates will not be required to enter into the mathematical investigation of the rules and formulæ used in the solution of problems, involving oblique-angled spherical triangles, but credit will be given to any Candidate showing such knowledge. When, however, a problem or part of a problem is solved by right-angled spherical trigonometry, the simple process of deducing the formula from the figure, by Napier's rules for circular parts or other method, must be shown.

Where a problem is solved by right-angled plane trigonometry, the simple process of deducing the formula from the figure for each of the computations in it must be shown.

The rule for finding the latitude by meridian altitude must be proved by the figure

Extra Master Seamanship.

61. *Examination in Seamanship*.—In addition to the qualifications required of an Ordinary Master, the Extra Master will be expected to give satisfactory answers to any questions in practical seamanship that the Examiner may put to him.

Extra certificates, Steamships.

62. Extra Certificates for Steamships will also be issued, subject to the examination described below to Officers who can show the necessary service in Steamships. The certificates will be marked "For Steamships only," and will only entitle the holders to go to sea as Masters of *Steamships*.

The examination is open to all who are qualified to go up for a Certificate as Master of a Foreign-going Steamship, or who have already obtained this Certificate. It is open also to Candidates who have failed in the examination for an Extra Master's Certificate to show the requisite knowledge of the management of square-rigged sailing vessels, provided they can prove the necessary amount of Officer's service in Steamship (*see* para. 20).

Extra Master, Steamship, Navigation

63. *Examination in Navigation*.—The examination in navigation for an Extra Master's Certificate for steamships will be precisely the same as that prescribed for an Extra Master's Certificate.

Seamanship.

64. *Examination in Seamanship*.—In addition to the qualifications required of a Master of a Foreign-going Steamship, the Extra Master will be expected to give satisfactory answers to any questions appertaining to the management of a steamship that the Examiner may put to him.

CERTIFICATES FOR PLEASURE YACHTS.

Yacht Certificates

65. The examination for these Certificates is purely voluntary, and is confined to persons who command their own

sea-going pleasure yachts. A Master of yacht who is not also the sole owner, or who is under 21 years of age, is not eligible for examination.

Description of Certificate.

66. Only one description of Certificate will be issued whether the yacht is foreign-going or cruises within the home trade limits.

The Certificate will not entitle the holder to command any vessel except the pleasure yacht or yachts of which he is at the time the sole owner.

No sea service required.

67. Candidates are not required to have served any specified time afloat, as it is believed that their sea knowledge will be sufficiently tested by the examination they will have to pass in seamanship.

Statutory declaration necessary.

68. Testimonials of service need not be shown, but a Candidate for examination will be required to produce a statutory declaration to the effect (1) that he is sole owner of the yacht; (2) that the yacht is sea-going; (3 that it is not to be used for trading purposes. He will also be required to fill up the form of application (Form Exn. 2) and pay the fee of Rs 24 at the Port Office, as in paragraph 3.

In other respects ordinary regulations apply.

69. In all other respects the regulations relating to examinations of Masters of Foreign-going ships will apply in these cases.

Yacht Master, Navigation.

70. *Examination in Navigation.*—The examination in navigation for a Yacht Master's Certificate will be precisely the same as that prescribed for an Ordinary Master's Certificate, except that in the Civil duties of a Ship Master the Master of a yacht will only be expected to possess a knowledge of what he is required to do by the Merchant Shipping Act.

Yacht Master, Seamanship.

71. *Examination in Seamanship.*—He must give satisfactory answers as to his knowledge of making and taking in sail, and as to the management of a yacht under canvas in moderate and in stormy weather He must have a thorough knowledge of the Rule of the Road at sea as regards both steamers and sailing vessels; their regulation lights, and fog and sound signals; and be able to describe the signals of distress and the signals to be made by ships wanting a Pilot, and the liabilities and penalties incurred by the misuse of these signals He must also understand the use and management of the rocket apparatus in the event of his vessel being stranded. He must be able to mark and use the lead and log lines; to cast a vessel on a lee shore; to moor and unmoor a ship; to keep a clear anchor, and to carry out an anchor. He must know how to keep his vessel out of the trough of the sea in the event of accident; how to rig rafts and jury rudders, &c., and what steps to take if his vessel is disabled or unmanageable and drifting towards a lee shore. He will also be examined as to his resources for the preservation of the crew in the event of wreck. He must also possess a knowledge of the measures he should adopt for preventing and checking an outbreak of scurvy on board, and be prepared to answer any other questions relating to the management of a yacht either steam or sailing which the Examiner may ask.

Extra Master, Yachts.

72. EXTRA MASTER OF YACHT.—An Extra Certificate will be issued to the owner of a yacht who either holds, or is qualified to be examined for a Yacht Master's Certificate, subject to the following examination.

Navigation.

73. *Examination in Navigation.*—The examination in navigation will be precisely the same as that prescribed for an extra Master's Certificate. (*See* paragraph 60.)

Seamanship

74. *Examination in Seamanship.*—The subjects of examination in Seamanship will be the same as those prescribed for a Yacht Master's Certificate, but the Candidate for an Extra Certificate will be expected to show a more extensive practical knowledge than is required of a Candidate for the Yacht Master's Certificate.

PROVISIONAL CERTIFICATES.

Provisional Certificates.

75 Provisional Certificates for Foreign-going ships or for Foreign-going Steamships, according to the Candidate s

qualifications, are granted on the conditions stated below to any officer of the Mercantile Marine who may require such a Certificate to qualify him for appointment to or promotion in the Royal Naval Reserve These Certificates are only issued for Royal Naval Reserve purposes, and do not authorise the holders to go to sea as First Mate or Master.

How to apply.

76. Candidates for these Certificates must apply to the Port Officer of Calcutta, fill up the form of application (Exn 2), and pay the usual fee They must produce their First or Second Mate's Certificates of Competency, and an authority from the Government before they can be examined. This authority should be obtained through the Port Officer.

Provisional Certificates, First Mate.

77. *Provisional Certificates as First Mate.*—Provisional Certificates as First Mate are granted to Candidates who can prove that they have served five years at sea, and that during one year of this period they have served in a capacity not lower than Fourth Mate while holding a Second Mate's Certificate. They must pass the usual examination for First Mate and pay the usual fee. The provisional Certificate is exchangeable for the full Certificate as First Mate, without further payment or examination, on production to the Port Officer of satisfactory proofs that the holder has served at sea not less than 12 months in a Foreign going Vessel in a capacity not lower than Fourth Mate, *and that during the whole of that period he has been in regular charge of a Watch* and in possession of a Certificate of Competency as Second Mate.

Provisional Certificates, Master

78. *Provisional Certificates as Master.*—Provisional Certificates as Master are granted to Candidates who can prove not less than six-and-a-half years' service at sea, and who pass the usual examination for Master and pay the usual fee. Of this service two and a-half years must have been served in a capacity not lower than Fourth Mate of an Ocean going Steamship, during the last 12 months of which the Candidate must have been in possession of a full Certificate as First Mate. These Certificates will be exchanged for the full Certificates as Master, without further payment or examination, on production to the Port Officer of satisfactory proofs that the holder has served at sea not less than two and a-half years in a Foreign going Vessel *in charge of a Watch* in a capacity not lower than Fourth Mate, and that during 12 months of this period he has served as Second Mate while in possession of a full Certificate of Competency as First Mate.

VOLUNTARY EXAMINATION IN COMPASS DEVIATION.

Compass deviation.

79. Any person holding a Certificate of any grade in the Foreign or Home Trade, or as Master of his own Pleasure Yacht, who wishes to pass a *voluntary* examination in Compass Deviation,* can at any time be examined upon filling up the usual form of application and paying to the Port Officer the fee of Rs 12. If the Candidate passes the examination, a note to that effect will be made upon his Certificate.

VOLUNTARY EXAMINATION IN STEAM.†

Examination in steam.

80. These examinations are provided for the purpose of giving Masters and Mates who are possessed of Certificates of Competency an opportunity of undergoing a voluntary examination as to their practical knowledge of the use and working of the steam-engine. They are conducted on the premises, and under the superintendence of the Port Officer at such times as he may appoint for the purpose ; and the Examiners are selected by the Government from the Engineer Surveyors appointed under the Indian Steam Ships' Act, 1884.

*See Appendix K, page 52.
†See also Appendix N, page 60.

Persons eligible. 81. The examination is open to any person who holds a Certificate of any grade in the foreign or Home trade, o

How to app'y. as master of his own Pleasure Yacht. Candidates should fill up the Form of application, Form (Exn. 2) at the Port Office, pay the fee of Rs. 12 and deposit their Certificates with the Port Officer. The Port Officer will inform the applicant when and where to attend to be examined. If the Candidate fails to pass, his certificate will be at once returned to him.

Result of Examination. 82. If he passes, the Report (Exn. 14) will be sent to the Port Officer, and the Certificate together with the Form Exn. 2 will be sent to the Government; the words "certified to have passed in steam," with the date and place of examination, will then be entered on the Certificate and its counterpart, and the certificate will be sent to the Superintendent of the Mercantile Marine Office of the port named in the Form Exn. 2, and be delivered to the Candidate in the usual manner.

In case of failure. 83. If a Candidate fails, he may not present himself for re-examination until the expiration of three months from the date of failure.

Character of Examination. 84. The examination is for the most part *viva voce*, and extends to a general knowledge of the practical use and working of the steam-engine, and of the various valves, fittings, and pieces of machinery connected with it and of the way in which electric lighting is carried out on board ship. Intricate theoretical questions on calculations of horse power or areas of cylinders and valves, or any of the more difficult questions relating to steam-engines and boilers, will not be asked. The examination will in fact be confined to the duties which a master of a steam-vessel may be called upon to performed in the case of the death, incapacity or delinquency of the Engineer.

Practical knowledge required. 85. Examiners are to satisfy themselves that the Candidates know the names and understand the use of the various parts of engines and boilers and their connecting pipes, valves, cocks, &c. Practical knowledge, as distinguished from theories and abstruse calculations, is to be the test of the Candidate's fitness to have his Certificate endorsed.

Examination on boardship. 86. The Examiner should arrange to conduct part of the examination in the engine-room of a Steamship, unless from circumstances, he finds it impossible to do so; but in the event of the Candidate passing, the Examiner should state in writing what circumstances prevented a visit to an engine-room. If an opportunity offer, the candidate should be permitted, under the guidance of the Examiner, to start and stop the engine of some vessel which may have her steam up.

Place of Examination to be reported. 87. The Examiner, in sending in his report of the examination, should state where the examination has been held.

Elementary questions to be answered. 88. Candidates will be required to give written answers to sixteen out of twenty questions taken from a book of Elementary Questions published by the Government.* These questions will be altered from time to time without notice. The twenty questions are not to be difficult, theoretical or book questions, but are to be such as any man of ordinary capacity who has any *practical knowledge of the use and working of the steam-engine* ought to answer.

Answers to be sent to Govt. 89. These questions, with the Candidate's answers, should be sent to the Government, with the reports, after each examination.

Copying. 90. If a Candidate refers to any book or paper or memorandum, or obtains information from another Candidate during the examination, he will be treated as having failed, will forfeit his fee, and will not be allowed to be re-examined for a period of three months.

Report on failure. 91. The Examiners will report, in the case of failure, the nature of the question or questions that decided the failure, or the point in the management of the engine in which the Candidate was deficient.

---

*Printed at the end of the Regulations relating to the examination of Engineers, Exn. 1A.

92. There is nothing in the regulations requiring that Applicants for the voluntary examination shall have served on board Steamships; all that is required is that they shall have a practical knowledge of the use and working of the steam-engine. Examiners will not fail to appreciate the fact that practical knowledge is best gained in the engine-room; and the examination of an Officer who does not produce official evidence of service in steamships, and of experience of engines, must necessarily be more searching than in the case of one who produces evidence of such service and experience. Service on Steamships not essential.

CERTIFICATES OF SERVICE.

93. A person who has attained the rank of Lieutenant, Sub-Lieutenant, Navigating Lieutenant or Navigating Sub-Lieutenant in His Majesty's Navy, or of Lieutenant in His Majesty's Indian Marine Service, is entitled to a Certificate of Service as Master of a Foreign-going Ship without examination. This Certificate will not entitle the holder to go to sea as Master or Mate, of a Home Trade Passenger Ship. Persons qualified.

94. Applications for Certificates of Service must be made on a printed form, Exn. 18, to be obtained free of charge of the Registrar General of Seamen, Custom House, London, E. C., or of the Port Officer. Form of application.

95. Applications for certificates of Service by Officers of the Royal Navy on the active list must be made through their Commanding Officers, and applications from officers of the Royal Navy on half pay must be made to the Secretary of the Admiralty, who will, in either case, forward the application to the Board of Trade. How to apply.

Ambulance Certificate, &c.

96. Any person holding a Certificate from the St. John's or St. Adrew's Ambulance Association, as qualified to render first aid to the injured can have the fact stamped on his Board of Trade Certificate or Certificate granted by an authority in British Possession abroad by forwarding the two Certificates to the Government either direct or through the Port Officer. Ambulance Certificates.

Recipients of Government awards can also have the fact stamped on their Certificates on application in a similar manner.

CHAPTER III.

RULES FOR ESTIMATING SEA SERVICE.

97. In these regulations sea service is reckoned from the commencement to the termination of the voyage. The Certificates of Discharge for service in the Foreign Trade will generally be accepted as proof of sea service, but Certificates of Discharge for service in the Home or Coasting Trade must always be sent to the Port Officer for verification. The Port Officer and Examiners will be careful to see that these discharges have not been in any way tampered with, and will report any suspicious cases to the Government. Sea service.

98. For Foreign-going Certificates the term "Sea service" means, unless otherwise stated, service performed in Foreign-going Vessels. Sea service for Foreign-going Certificates.

99. For Home Trade Passengers Ship Certificates, service in the Home or Coasting Trade is regarded as equivalent to service in the Foreign Trade; but for Foreign-going Certificates, it is regarded as only equivalent to two-thirds of the time served in the Foreign Trade, except in the case of Indian Coasting Voyages extending beyond a distance of 500 miles from the port of departure in vessels commanded by Masters holding Foreign-going Certificates, when such service will count as foreign voyages, and will be Service in Home Trade.

reckoned as full time; but the time spent in the port of departure or Home Port will not be allowed to count. In all cases the length of service is deemed to commence on the date of sailing from the port of departure or Home Port and to end on the date of arrival at the Home Port. Such service must be vouched for in the form laid down in Appendix P, page 69.

Certificate—Meaning of.

100. By the word "Certificate" is meant a Certificate of Competency granted by the Board of Trade under the Merchant Shipping Act, or by the Government of a British Possession under an Order in Council issued in pursuance of the Merchant Shipping Act. A list of the Colonial Certificates, referred to, will be found in Appendix T, page 76. They are of the same force as the corresponding Certificates granted by the Board of Trade.

Colonial Local Certificates.

101. The holder of a Colonial Certificate for Foreign-going Ship not granted under the Merchant Shipping Act, who desires to be examined for an Imperial Certificate of the same grade, must prove that he has performed the amount of service required by these regulations to entitle him to hold such a Certificate. He must also produce satisfactory testimonials as to character for at least the 12 months immediately preceding his application to be examined.

Foreign-going Certificates.

102. Where a Foreign going Certificate is required in order to qualify a Candidate for examination, the Certificate may be either an Ordinary Certificate, or a Certificate for Fore and Aft-rigged Vessels, or a Certificate for Foreign-going Steamships.

Pilot defined.

103. The term "Pilot" in these regulations (*see* paras. 31 and 56) means a pilot who is employed in general pilotage and holds a First Class Pilot's Certificate from some competent authority authorising him to pilot vessels outside harbour and partially smooth water limits. A Hooghly Master Pilot is for the purpose of this rule to be considered as First Class Pilot.

Officer's service.

104. Officer's Service, to be recognised as qualifying for purposes of examination must be performed with the requisite Certificate as specified in Appendix P, page 69. The Officer's service performed by men who have been duly promoted during the course of a voyage (*see* paragraph 108), or who, in consequence of serving in vessels plying between ports all round, have been unable to obtain the necessary Certificates, may, however, be recognised, provided that it is in other respects satisfactory.

Foreign officers.

105. Foreign Officers who wish to apply for a British Certificate of Competency must in all cases have performed their qualifying Officer's service with the requisite British Certificate. The service may have been performed in Foreign Vessels if the Candidate can produce satisfactory testimonials to conduct and character, and is able to prove that the service has been in the required capacities, and that during the period of service he has held a British Certificate of Competency of the rank required by the regulations (*see* paragraph 110).

In charge of Watch.

106. When service "in charge of a Watch" in either the Foreign or Home Trade, is specified in the regulations, the Candidate will have to prove that during the whole of the time claimed he had the *regular* charge of a Watch or Watches, which, if in the Foreign Trade, must amount to not less than 8 hours of each 24 hours of service. It must be distinctly understood that occasional service in charge of a Watch, will not be accepted as Mate's service under the regulations. Great care must be exercised by the Port Officer in regard to such service, and unless the Candidate produces a clear and satisfactory Certificate, specially setting forth the above facts, from the Master or Owner of the Vessels in which the service was performed, it must not be accepted.

Additional Mates.

107. Service as Additional or Auxiliary First or Second Mates, in large Foreign-going vessels when in both of which Third and Forth Mates are also carried, will count as First Mate's or Second Mate's service, as the case may be, provided that the Candidate was entered on the Articles in one of these

capacities, and that he produces the necessary Certificate (see paragraph 106) showing that he was in charge of a watch or watches during the whole time claimed.

Promotion during Voyage.

108. Whenever a man has, from any cause, been regularly promoted, on the occurrence of a vacancy in the course of the Voyage, from the rank in which he first shipped, and such promotion, with the ground on which it has been made, is properly entered in the Articles and in the Official Log Book, he will receive credit for his service in the higher grade for the period subsequent to his promotion.

Officer's Service, Home Trade.

109. Service in a lower grade than First or Only Mate in the Home or Coasting Trade will not be recognised as Officer's service towards qualifying a Candidate for examination for a Foreign Trade Certificate

Evidence as to Service in Foreign Vessels.

110. The testimonials of service of Foreigners and of British Officers and Seamen serving in foreign vessels, which cannot be verified by the Port Officer, must be confirmed either by the Consul of the country to which the ship in which the Candidate served belonged, or by some other recognised official authority of that country, or by the testimony of some credible person on the spot having personal knowledge of the facts required to be established. The production, however, of such proofs will not of necessity be deemed sufficient. Each case will be decided on its own merits, and, if the sufficiency of the proofs given appears to be at all doubtful, it must be referred to the Government for decision.

Auxiliary Screw Ships.

111. Service in Auxiliary Screw Whaling Ships and in Vessels with auxiliary steam power, which use their screws only in calms or during light winds, is considered as service performed in Sailing Vessels.

Excursion Steamers.

112. In the case of Excursion Steamers only such service as can be proved to have been performed at sea will be accepted.

Service as Carpenter, Sailmaker, Cook, Steward, etc.

113. Candidates whose service has been performed in capacities other than Apprentice, Midshipman, Cadet, Ordinary Seaman, or Able Seaman, *e.g.*, men who have served as Carpenter, or Sailmaker, or as Cook in small vessels where cooking is only a part of a man's duty, will be required to satisfy the Port Officer that they have, during the whole time claimed, performed deck duties in addition to their own particular work, and that they have a good knowledge of Seamanship. These facts may possibly be proved by the production of satisfactory Certificates from the Masters with whom the Applicant has served; but such service will only be accepted as equivalent to two-thirds of the time served as ordinary deck hand. Failing satisfactory evidence, the Applicant will be required to perform additional service in the capacity of Seaman. Service as Cook (under other conditions than the above), or as Steward, or as Purser, will not be accepted.

Service in fishing or Pilot Vessels.

114. Service performed exclusively in Trawlers and other deep sea-fishing vessels or in Pilot Vessels will not qualify a Candidate for examination He must, in addition, prove the following service :—

(1) For a *Foreign-going Certificate*, service for at least eighteen months in an ordinary trading vessel in the Foreign Trade, or the equivalent period (27 months) in the Home or Coasting Trade.

(2) For a *Home Trade Passenger ship Certificate* service for at least twelve months in an ordinary trading vessel in the Foreign, Home or Coasting Trade.

Service in Yachts.

115. Service in Pleasure Yachts will be accepted as qualifying service under the following conditions :—

(*a*) It must in all cases be verified by satisfactory proofs, which must set forth clearly and in detail the nature and duration of the service claimed, and it must be distinctly understood that only actual sea service will be accepted, and that service in harbour or port is inadmissible.

(*b*) Service in foreign-going Yachts will be accepted in full; and service performed within Home Trade

limits in Sailing Yachts of not less that 50 tons net register or in Steam Yachts of not less than 80 tons gross register will be accepted in the proportion stated in para. 99; but Candidates must also show (1) for a *Foreign-going Certificate*, service for at least eighteen months in an ordinary trading vessel in the Foreign Trade, or for the equivalent period (27 months) in an ordinary trading vessel in the Home or Coasting Trade; (2) for a *Home Trade Passenger Ship Certificate*, service for at least twelve months in an ordinary trading vessel in the Foreign, Home, or Coasting Trade.

(*c*) Service within Home Trade limits in Sailing Yachts of 20 tons net register, or in Steam Yachts of 40 tons gross register, will be accepted towards qualifying a candidate for a Foreign-going Certificate as equivalent to half the same time served in the Foreign Trade, but no amount of such service shall count as more than two years' service in the Foreign Trade, and no such service shall count as Officer's service to qualify Candidates for Foreign-going Certificates.

(*d*) Service within Home Trade limits in Sailing Yachts of not less than 20 tons net register, or in Steam Yachts of not less than 40 tons gross register will be accepted at the ordinary rate as qualifying service for Home Trade Passenger Ship Certificates, but Candidates must prove that they have in addition served for at least twelve months in an ordinary trading vessel in the Foreign, Home or Coasting Trade.

(*e*) Service within Home Trade limits in Sailing Yachts of less than 20 tons net register, or in Steam Yachts of less than 40 tons gross register, will not be accepted as qualifying service for any class of Certificate.

Service in Tugs.

116. Service performed in Tugs employed in Channel Service or outside partially smooth water limits (*see* Appendix S, page 72) may be accepted as sea service for the purpose of qualifying a Candidate for a Mate's or Master's Certificate for Home Trade Passenger Ships.

Service in dredgers

117. Service in Steam Hopper Barges may, subject to the provisions of para. 119, be allowed to count towards qualifying a Candidate for a Mate's Certificate of Competency for Home Trade Passenger Ships, provided the Candidate can prove at least two years' service in an ordinary trading vessel in either the Home, Coasting, or Foreign Trade. Service in these Steam Hoppers will not be accepted as Officer's service towards qualifying a Candidate for a Master's Certificate.

Service in Light-ships or Engine-room.

118. Service in Light-ships or in an Engine-room will not be accepted as sea service.

Service on rivers.

119. Service performed on rivers, no matter of what size, and service performed within smooth or partially smooth water limits (see Appendix S, page 72) will not be accepted.

Where any doubt whatever exists on this point, the Candidate will be required to produce a Certificate from the Master or Owner of the vessel in which the service was performed before the service can be accepted.

Service on Training Ships.

120. Half the time served on board a training ship will be allowed to count as service at sea up to a limit of one year (*i.e.*, no length of service will be allowed to count as more than one year at sea), provided that the Candidate can produce a Certificate from the Committee that he has conducted himself creditably and passed a good examination in seamanship so far as it is practised in the training ship, as well as in other matters, down to the time of his leaving the ship, but this service will not be regarded as equivalent to service in square-rigged vessels.

Apprentices.

121. The *whole* of the time claimed under Indentures of Apprenticeship will be accepted as actual sea service

to qualify under para. 27 for a second Mate's Certificate provided (*a*) that the Indentures have not been cancelled through some fault of the Candidate, but are endorsed by the Owner or Master to whom he was bound, to the effect that he has performed his service faithfully during the time he remained as Apprentice; and (*b*) that the Candidate has served at sea four-fifths of the time claimed, that is to say, has not spent more than one-fifth of the time in Home Ports. In cases where an Apprentice is qualified for examination before the expiration of his Indentures, *e.g.*, where he has had training ship or other sea service prior to being bound, which together with his actual time as Apprentice makes up the required four years, or where his Indentures are for a period of more than four years, a letter from the Owner or Master will be accepted in place of the endorsement referred to above.

In the event of the Candidate being short of the required four-fifths of the time claimed as Apprentice out of the United Kingdom, he will be required to show sufficient additional sea service, either as seaman or junior officer, to make up the four-fifths of the time claimed.

Midshipmen and Cadets.

122. The whole of the time served as midshipman or cadet under indentures will also be accepted subject to the same conditions as those laid down for apprentices; and the same will be the case even when not bound by indentures, provided that the service as midshipman or cadet has been continuous, and that on the date of the termination of the period of service claimed in this capacity the candidate was on articles of agreement, and that he is able to comply with the requirements laid down in the matter of serving or making up the four-fifths period at sea during the time claimed.

Light-house tenders.

123. Service performed in the sea-going Steam Vessels of the Trinity House, of the Commissioners of the Northern Light-houses, or of the Commissioners of Irish Lights, will be accepted as sea service for the purpose of qualifying a Candidate for examination for a Home Trade Passenger Ship Certificate, but for a Foreign-going Certificate a Candidate must show in addition to this service calculated in accordance with paragraph 99 at least twelve months in an ordinary Trading Vessel. In order to qualify a Candidate for an Ordinary Certificate, this twelve months must have been performed in a square-rigged Sailing Vessel. (*See* para. 25.)

Service in Royal Navy.

124. Officers of the Royal Navy are at liberty to apply for Certificates of Service and to be examined for Certificates of Competency in the Mercantile Marine, but the Lords Commissioners of the Admiralty have directed that the applications of officers on the active list should be made through their commanding officers, and that the applications of officers on half-pay should be made to the Secretary of the Admiralty, who, in either case, will forward the application to the Board of Trade. In the case of Royal Marine officers, applications for certificates of service should be made on a printed form Examination 18, which will be supplied free of charge on application to the Director of the Royal Indian Marine. Applicants on duty in India should submit their claims to the Director for transmission to the Government of India and the India Office. Officers on leave in England should submit their claims to the India Office, on the printed form which may be obtained from that office.

The conditions on which Certificates of service are issued are stated at page 19.

Qualifications required of Naval officers.

125. Officers of the Royal Navy or of the Royal Indian Marine who wish to be examined for Certificates of Competency in the Mercantile Marine will be required to prove the following service; and if an officer wishes to obtain the Ordinary Certificate for Foreigngoing Ships, he must prove that at least twelve months of this required period was served under sail alone:—

(*i*) For Second Mate.—The officer must prove four years' service at sea or that he has attained the rank of Acting Sub-Lieutenant.

(*ii*) For Only Mate.—Five years' service at sea.

(*iii*) For First Mate or Master.—The officer must prove that he has attained the rank of Sub-Lieutenant in the Royal Navy, or of Lieutenant in the Royal Indian Marine.

Service in Royal Naval Reserve.

126. Lieutenants, Sub-Lieutenants, and Acting Sub-Lieutenants of the Royal Naval Reserve who perform sea service on board His Majesty's ships will be allowed to count such service as if it had been performed in Foreign-going Merchant Ships; and the service will rank according to the Certificate of Competency held by the Candidate at the time. Midshipmen of the Royal Naval Reserve, possessing a First Mate's Certificate, and temporarily granted the rank of acting Sub-Lieutenant whilst undergoing twelve months' training afloat in the Royal Navy, will only be allowed to count such service as if it had been performed in the capacity of Second Mate of a Foreign-going Merchant Ship with a First Mate's Certificate.

Service in drill and harbourships.

127. If accompanied by a good report, half the time spent in Drill in the Royal Naval Reserve, and in Harbour Ships of the Royal or Colonial Navies, will be allowed to count as sea service, subject to the limit that no such service must amount to more than one-fourth of the time required for the particular grade of Certificate applied for.

CHAPTER IV.

CONDUCT OF THE EXAMINATIONS.

Commencement and duration of examinations.

128. The examinations will commence early in the forenoon, and will be continued from day to day until all the Candidates whose names appear upon the Port Officer's list on the day of examination are examined.

Candidates to be punctual.

129. Candidates are required to appear at the examination room punctually at the time appointed.

Loose paper and books removed.

130. Before commencing the examination, the tables or desks must be cleared of all scraps of paper or books that are not used in the examination, and care should be taken that the Candidates do not bring into the examination room any book or paper.

No strangers admitted.

131. No person will be allowed in the room during the examination, other than those whose duties require them to be present. No instructors will be allowed on the premises.

Books and papers strictly forbidden.

132. Candidates are prohibited from bringing into the examination room, books or papers of any kind whatever. The slightest infringement of this regulation will subject the offender to all the penalties of a failure, and he will not be allowed to present himself for re-examination for a period of three months.

All work to be shown.

133. No Candidate will be allowed to work out his problems on a slate or on waste paper, or to write on the blotting paper supplied for his use in the examination. Violation of this rule will subject the Candidate to all the penalties of a failure.

A sheet of blotting paper should be issued to each Candidate with the first examination paper, and it must be returned to the Examiner when the last paper is completed each day. The Examiner will be careful to see that the blotting paper has not been used by the Candidate in solving his problems or for conveying information to other Candidates.

Instruments are provided.

134. All instruments necessary for use in the examinations are supplied by the Government.

Leaving room or building.

135. No Candidate may leave the examination room without permission and without giving up the paper on which he is engaged. Under no circumstances will a Candidate be allowed to leave the building while the examination is proceeding. Violation of this rule will subject the Candidate to all the penalties of a failure.

Copying, &c., to be prevented.

136. Candidates should be so placed as to prevent one copying from the other, and no communication whatever between the Candidates should be allowed.

Penalty for copying, &c.

137. In the event of any Candidate being discovered referring to any book or paper, or copying from another, or affording any assistance or giving any information to another, or communicating in any way with another, during the time of examination, or copying any part of the problems for the purpose of taking them out of the examination room, he will subject himself to all the penalties of a failure, and will not be allowed to be examined for a period of six months.

Injury to books.

138. If a Candidate defaces, blots, writes in or otherwise injures any book or form belonging to the Board, his papers will be retained until he has replaced the damaged book or document. He will not be allowed to remove the damaged book or document, and will be subjected to all the penalties of a failure.

Silence.

139. Perfect silence is to be preserved in the examination room.

Penalty for breach of rules.

140. Any Candidate violating any of the regulations, or being guilty of insolence to the Examiner, or of disorderly or improper conduct in or about the room, will render himself liable to the postponement of his examination; or if he has passed, to the detention of his Certificate for such period as the Government may direct.

Examination papers, how to be dealt with.

141. The examination papers of Candidates must in all cases be sent to the Port Officer, Calcutta, for his approval, together with the report of the examination on the Form, Exn. 14. Should the envelope containing the examination papers appear to have been opened, or in any way tampered with, the Examiner should, if he thinks it necessary, defer the examination until the following day. In the event of any case of this kind occurring, a full report of the circumstances, and of the steps taken in the matter, should be immediately forwarded to the Port Officer, Calcutta.

Papers to be issued singly.

142. The examination papers should be issued to the Candidates in half sheets only and one at a time. This will prevent a Candidate from spreading out the sheets on the table so as to enable his neighbour to look over the problems. It will also enable the Examiner to look over and report upon the work on one-half sheet, while the Candidate is at work upon another. When the errors are not too numerous, the incorrect problems may be returned to the Candidate for correction, but in no case should the errors be pointed out by the Examiner, neither should any marks be made which would indicate how far or to what extent, the work is incorrect. The incorrect problems are not to be returned to the Candidate for correction a second time, and should more than one of the problems—or two, if the errors are only slight—be still incorrect, this would involve a failure. It must be understood, however, that the day's work, latitude by meridian, altitude of sun and star, chronometer problem by sun and star, and the Sumner problem must always be correct.

Extra hour allowed in certain cases.

143. When, from the large number of the Candidates, it may sometimes be found impossible to look over the work on the day of examination during the office hours, an hour in the morning of the following day may be allotted for the purpose of correcting the problems, but in no case should a Candidate have his problem returned to him for correction after he has made the second attempt.

Extra certificates.

144. In the examinations for Extra Certificates for Foreign-going Ships and for Steamships, the Candidate will be required to complete the whole of his problems and other papers, which must not be returned to the Candidate for correction, but will then be dealt with by the Examiner on the mark system. If the Candidate does not obtain 85 per cent. of the total number of marks allotted for the papers, he will be declared to have failed. (See Appendix Q, page 70.)

Dictation.

145. The examination will commence with not less than a quarter of an hour's dictation to test handwriting and spelling. This, however, is only to be given to those Candidates who present themselves for examination for the first time for a Foreign-going Certificate. The spelling must be reasonably and fairly good, and the writing clear and legible. The spelling and writing of all Candidates must be satisfactory, and in cases where there is any doubt about the ability of a Candidate to spell correctly, he will be specially tested by dictation.

Definitions.

146. The paper of definitions (*see Appendix C, page 31*) is only for those Candidates who present themselves for examination for the first time for a Foreign-going Certificate. In using this paper, the Examiner will place a mark against the questions which he wishes to be answered, not less

than ten questions being so selected. The Candidate will then write against the questions so marked his definition of the terms in a clear and legible hand, and so as to prevent the possibility of any letter being mistaken, and also draw a rough sketch or diagram opposite to each of the questions to which he has given written answers in further illustration of its meaning. The *viva voce* questions will be asked on the answers given. (See para. 156.)

Compass deviation

147. In the questions on the Diviation of the Compass (*see Appendix I, page 60*), the Examiner will mark at least twelve of the questions, *including the problems*. The selected questions will be varied frequently, and no two Candidates will have precisely the same questions. The Candidate will be furnished with sheets of the blank ruled paper which is supplied for the purpose, with instructions that he is to write only on one side of the paper, and to answer in a clear and legible hand each of the questions against which a mark is placed, and to commence each answer by writing down the number of the question to which it relates in the margin. In answering question 39 on the tentative method of compass adjustment, the Candidate will be tested by Beall's Compass Deviascope, and it will not therefore be necessary for him to give the written answer and sketches. A Candidate for an Extra Master's Certificate will not be required to answer the questions on Compass Deviation on Form Exn. 7, but will be examined in the Syllabus *shown in Appendix K, page 52*, and with the Compass Deviascope.

Barometer, tides, &c

148. The examination on the Barometer, Thermometer, and Hydrometer, prevailing winds and currents of the globe, Trade routes and Tides will for the present be conducted orally, and the questions asked by the Examiner, which will be constantly varied, will be confined to and based on the information given in the test-books mentioned in Appendix R, page 71 Candidates will be required to have a fair and intelligent knowledge of the contents of those books.

Adjustment of sextant.

149. Particular attention should be paid to the adjustments of the sextant, the examination in which subject will be conducted orally and practically. Every candidate will be examined practically as to his knowledge of the adjustments, and the use of the various screws, he must be able to read correctly off the arc, a supposed index error being given by the Examiner, as additive, as well as reading on the arc in the usual way; he must also be able to find the index error both by the horizon and by the sun.

Corrections.

150. Candidates will find it more convenient, both during the examination and at sea, to correct the declination and other elements from the Nautical Almanac by the hourly differences given in that work; they will thereby render themselves independent of any proportional or logarithmic table for that purpose.

Corrections by tables.

151. The corrections by inspection of tables given in some of the works on navigation, *e.g.*, Tables IX, XI, and XXI in Norie's Epitome, will not be allowed; every correction must appear on the papers of the Candidates.

Minor corrections to be shown

152. All outstanding or minor corrections should appear in the margin of each problem paper, and on the chart papers, and the papers of the Candidate will not be considered complete without these corrections.

Problems are tests

153. Examiners should bear in mind that the problems to be solved are required as tests, and for the purposes of an examination, and not for sea-going or practical purposes alone.

Candidates may use own method.

154. The Candidates will be allowed to work out the various problems according to the method and the tables they have been accustomed to use.

Problems to be varied.

155. All the problems given in the examinations, both for the Ordinary and for the Extra Certificates, will be constantly varied; and the mode of stating the times in the astronomical problems, and the mode of wording and setting these and all other problems will be varied in every possible way, so as to ensure that the Candidate has a proper knowledge of the subject.

Supplementary *viva voce*

156 Candidates are expected not only to give correct written answers to the questions set in the papers, but also to possess an intelligent knowledge of the various subjects prescribed in the regulations. The Examiner will therefore put a few *viva voce* questions to the Candidate as the papers are brought up for inspection or during the course of the examination. The questions, which will be based on the papers set, will be such that the Examiner may satisfy himself that the Candidate possesses a real knowledge of what he has written.

Failure in supplementary *viva voce*.

157. When an Examiner finds it necessary to fail a Candidate in this supplementary *viva voce* test, a statement to that effect will be made on the Candidate's examination papers before they are forwarded to the Port Officer, Calcutta

Time allowed.

Second Mate.

158. Candidates for Second Mate's Ordinary Certificates must complete the whole of the examination in Navigation in *nine hours*, including the time allowed for writing the definitions on Form Exn. 4*a*, the paper on the *chart*, and the correction of *all* errors and oversights; but *the quarter of an hour's dictation and all* the nautical problems, *excepting the chart paper*, must be completed within six hours, and without the Candidates leaving the premises during that period

Only and First Mates

159. Candidates for Only and First Mates' Ordinary Certificates must complete the whole of the examination in Navigation in *twelve hours*,* including the time allowed for the papers on the chart; cyclones or revolving storms; and for the correction of all errors and oversights; but the nautical problems *up to and including (k) of the Syllabus*, prescribed for Only and First Mate must be completed within six hours and without the Candidates leaving the premises during that period.

Masters, Ordinary

160. Candidates for Ordinary Certificates as Master must complete the whole of the examination in Navigation in fifteen hours, including the time allowed for the papers on the chart; compass deviation; cyclones or revolving storms, and for the correction of all errors and oversights; but the problems given, *up to and including (k) of the Syllabus prescribed for Only and first Mate*, must be completed within six hours, and without the Candidates leaving the premises during that period.

Time allowed Steamship Certificates.

161. Candidates for Certificates for Foreign-going Steamships will be allowed the same amount of time to complete their navigation work as is allowed in the case of Ordinary Certificates.

Yacht Masters

162 Candidates for Certificates as Masters of pleasure Yachts will be allowed the same amount of time for completing the examination as the Candidates for Ordinary Masters' Certificates.

Home Trade Mates.

163. Candidates for Home Trade Mates' Certificates must complete the whole of their arithmetical chart, and other papers, within eight hours, and Candidates for Home Trade Masters' Certificates within ten hours.

Masters, extra certificates

164 The time allowed to Candidates for Extra Certificates to complete the whole of the problems and writings, including the Compass Syllabus, must not exceed 26 hours.

Compass syllabus.

165 A period not exceeding eleven hours will be allowed to Candidates for the completion of the whole of the examination in the Compass Syllabus, including the correction of all errors and oversights in both the problems and writings.

Papers to be collected punctually.

166. Punctually at the expiration of the prescribed time all papers will be collected whether completed or not If the papers are not completed, the Candidate will be declared to have failed, unless the Port Officer should see fit to lengthen the period in any special case. Where such an extension of time is granted, the case must be fully reported to the Government on the Form Exn 14

* A Candidate who is not applying for a Second Mate's Certificate, and who has not previously passed an examination, may be allowed the time allotted to dictation and writing the definitions on form Exn. 4*a*, in addition to the above.

Viva voce time extra

167. The periods prescribed in the foregoing paragraphs are not intended to include the time occupied by the *viva voce* part of the examination.

Viva voce time allowed.

168. In the *viva voce* examination a reasonable time should be allowed for the Candidate to give his answers No assistance should be given or leading question put.

Time allowed for navigation.

169. It is anticipated that few Candidates will require the whole of the time allowed for completing the examination in Navigation, but ample time has been given so that the work may be done carefully and be clear and legible, and to the entire satisfaction of the examiners.

Order of work.

170. Candidates, after finishing the problems required in the various grades on the first day of examination, should proceed, until the end of that day, with such subjects as the definitions, chart, *questions relating to cyclones and compass deviation.*

Sumner problem.

171. The Sumner problem (Exn. 6C) must on no account be given out to any of the Candidates on the first day of the examination, but should form the commencement of the Candidates' work on the second day On completion of this problem the Candidates for Masters' Certificates should proceed with the problems (*a*), (*b*), (*c*) *of the Syllabus for that Grade.*

Degree of precision required.

172. Degree of precision required in the solution of the problems:—

(*a*) Candidates are expected to work out their answers to all problems where the answer required is a latitude, longitude or distance within 1½′ of position from a correct result: in finding the ship's position by Sumner's method a margin of 2½′ will be allowed.

(*b*) In such problems as the "Amplitude" and "Alt-Azimuth," where the bearing, deviations, &c., only are required, a margin of *3′* or *4′* from a correct result will be sufficiently accurate.

(*c*) Candidates for Ordinary Certificates are not required to correct for *second differences* in taking out the quantities from the Nautical Almanac; and even Candidates for extra Certificates are only required to show that they are acquainted with the method of second differences by correcting the elements for same in the lunar problem

(*d*) In solving the Time Azimuth problems an answer not exceeding half a degree from the exact result will be sufficiently near But in all cases the actual latitude, declination, and time used, together with the exact bearing from the North or South as given in the tables, must be clearly shown by the Candidate on his papers.

(*e*) In computing the time at which a given star will be on the observer's meridian, and the name of the stars near the meridian [sections (*b*) and ( ) of paragraph 32], an approximation only is required, and it will be sufficiently precise if the Candidate works throughout with the nearest minute of time. In computing the approximate meridian altitude of a star [section (*g*)], working throughout with the nearest minute of arc will also be sufficiently close.

(*f*) In interpolating for the correct deviation to be applied in solving the chart questions, it will usually be sufficient if the Candidate works throughout with the nearest degree of deviation taken from the Deviation Card; and even in cases where the deviations may vary but little, the nearest half degree used throughout will be sufficiently precise It is not necessary that the Candidate should waste his time in solving the course to odd minutes, as is sometimes done.

(*g*) In calculating the correction to apply to Soundings, the Candidate is not required to work to the exact inch, as is sometimes done. It will be sufficient if he brings his answer within half a foot or so of a precise result.

(*h*) In the Lunar problem a difference of 3′ in the longitude from the correct answer as deduced by a rigorous method by spherical trigonometry will be allowed.

It must be clearly understood in reading the foregoing instructions as to the precision required, that they only apply when the work of the Candidate is correct in principle.

Two candidates to be examined wice in a week.

173. A Candidate will not be allowed to undergo examination twice in the same week, unless under very special and urgent circumstances the Port Officer should see fit to relax this rule In that case a special set of problems should be supplied to the Candidate

Consecutive Office No 649, Departmental, 1375, Superintendents, 59, Examinations, 2.

BOARD OF TRADE,
MARINE DEPARTMENT.
May 1905.

EXAMINATIONS OF MASTERS AND MATES

INSTRUCTIONS TO EXAMINERS AND NOTICE TO CANDIDATES

Extra Masters' Certificates.

ON and after the 1st January 1907, the following alteration will be made in the examination of Extra Masters' Certificates.

The Lunar Problem referred to in paragraph 61 (*a*) of the Regulations relating to the examination of Masters and Mates will no longer be set in this examination. In its place a paper on Naval Architecture will be given, the Candidate being required to give written answers to six or ten questions on this subject, and also to satisfy the Examiner in the supplementary *viva voce* test For the purpose of this examination the Board of Trade have adopted "The Modern Practice of Shipbuilding in Iron and Steel"* as a text-book, from which the questions will be set, and they advise intending Candidates to take this or other books on the subject to sea with them, so that they can study at their leisure.

FRANCIS J. S. HOPWOOD,
Secretary.

WALTER J. HOWELL,
Asstt. Secretary.

APPENDIX A

EXAMINATION DAYS

Places.	For Masters and Mates
Aberdeen*	2nd and 4th Tuesday in each month.
Belfast*	1st and 3rd Tuesday in each month
Bristol*	2nd Tuesday in each month
Cardiff*	1st and 5th Tuesday in each month
Cork	1st and 3rd Tuesday in each month
Dublin*	2nd and 4th Tuesday in each month
Dundee*	1st, 3rd, and 5th Tuesday in each month
Glasgow*	1st 3rd and 5th Tuesday in each month*
Greenock*	2nd and 4th Tuesday in each month
Hartlepool, West	1st Thursday in each month
Hull*	2nd and 4th Tuesday in each month
Leith*	2nd and 4th Tuesday in each month.
Liverpool*	Monday in each week
London*	Monday in each week Examination in steam held on Friday in each week
Newport, Mon*	3rd Tuesday in each month.
Plymouth*	Monday in each week
Shields, So*	1st, 3rd, and 5th Tuesday in each month
Southampton	1st and 3rd Thursday in each month.
Sunderland*	2nd and 4th Tuesday in each month.
Swansea*	4th Tuesday in each month
Calcutta*	1st Monday in January April, July and October, and 3rd Monday in February, May, August and November

* At these places examinations for Extra Masters Certificates are held

N B—The examination days are liable to occasional alteration, and Candidates are therefore advised to ascertain the actual date of examination from the Port Officer.

APPENDIX B.

EXAMINATION DAYS, SIGHT TESTS

ABERDEEN—Every Monday, by the Examiner of Masters and Mates.

BELFAST—Every Saturday morning from 10 to 12 o'clock, by the Examiner of Masters and Mates

BRISTOL—Monday in examination week, * by the Examiner of Masters and Mates.

CARDIFF—Any day by the Principal Officer of the Board of Trade Monday in examination week by the Examiner of Master and Mates.

CORK—Any day, by the Examiner of Masters and Mates

DUBLIN—Monday in examination week, by the Examiner of Masters and Mates

DUNDEE—Any day, by the Superintendent of the Mercantile Marine Office, or by the Examiner of Masters and Mates

GLASGOW—Monday in examination week, by the Examiner of Masters and Mates

GREENOCK Monday in examination week, by the Examiner of Masters and Mates

GRIMSBY.—Any day, by the Superintendent of the Mercantile Marine Office.

HARTLEPOOL, WEST—Wednesday or Thursday in examination week, by the Examiner of Masters and Mates

HULL—Any day, by the Principal Officer of the Board of Trade Saturday preceding the examination of Masters and Mates, by the Examiner of Masters and Mates

LEITH—Any day, by the Superintendent of the Mercantile Marine Office, or by the Examiner of Masters and Mates

LIVERPOOL—Every Thursday, Friday and Saturday, by the Examiner of Masters and Mates

LONDON (DOCK ST, E)—Every Friday and Saturday, by the Examiner of Masters and Mates.

LONDON (TILBURY, ESSEX)—Any day, by the Superintendent of the Mercantile Marine Office.

LONDON (VICTORIA DOCKS).—Any day, by the Superintendent of the Mercantile Marine Office.

NEWPORT—Monday in examination week, by the Examiner of Masters and Mates.

NORTH SHIELDS.—Second and fourth Tuesday in each month, by the Principal Officer of the Board of Trade.

PLYMOUTH—Every Saturday, by the Examiner of Masters and Mates.

* *i.e.*, the week in which Masters and Mates examinations take place. *See* Appendix A.

APPENDIX B—*concluded*

SOUTHAMPTON.—Wednesday in examination week, by the Superintendent of the Mercantile Marine Office.

SOUTH SHIELDS.—Monday in examination week, by the Examiner of Masters and Mates.

SUNDERLAND.—Monday in examination week, by the Examiner of Masters and Mates.

SWANSEA.—Any day, by the Board of Trade Officer. Monday in examination week, by the Examiner of Masters and Mates.

CALCUTTA.—First Monday in January, April, July and October, and third Monday in February, May, August and November, by the Examiner of Masters and Mates, and any day, by the Port Officer.

APPENDIX C.

DEFINITION PAPER.

THE Candidate is required to write a short definition or answer, accompanied by a rough sketch or diagram, where applicable in the case of so many of the following questions as may be marked with a cross by the Examiner. The Examiner will mark not less than ten. Candidates must write clearly and pay attention to the spelling —

1. Great circles
2. Vertex of a great circle.
3. Small circles.
4. Vertical circles.
5. Right angle
6. Oblique angle.
7. Obtuse angle
8. Spherical angle.
9. Arc.
10. Complement of an arc or angle.
11. Supplement of an arc or angle
12. The equator.
13. The poles
14. A meridian.
15. The ecliptic.
16. The Tropics
17. Equinoctial
18. The visible horizon.
19. The sensible horizon.
20. The rational horizon
21. Artificial horizon, and its use
22. Parallels of latitude.
23. Difference of latitude
24. Meridional parts
25. Longitude
26. Difference of longitude
27. Departure.
28. Nautical mile
29. Rhumb line.
30. Prime meridian
31. First point of Aries.
32. Prime vertical
33. Civil time
34. Astronomical time.
35. Sidereal time.
36. Mean time.
37. Apparent time
38. Equation of time, why it is used, and when it is at a maximum, and when at a minimum
39. Hour angle of a celestial object
40. Observed altitude.
41. Apparent altitude.
42. True altitude.
43. Zenith distance.
44. Azimuth.
45. Amplitude.
46. Declination.
47. Polar distance.
48. Right ascension.
49. Dip or depression of the horizon
50. Refraction.
51. Parallax.
52. Semi-diameter.
53. Augmentation of moon's semi-diameter
54. Magnetic meridian.
55. True course of a ship.
56. Magnetic course.
57. Compass course
58. Variation of the compass.
59. Deviation of the compass, and how it is caused
60. The error of the compass.
61. Leeway.
62. Does the variation change with time?
63. Is the variation the same all over the world?
64. Where do you find the variation?
65. Does the deviation change; if so, when?
66. Where is the North magnetic pole situated?
67. Where is the south magnetic pole situated?
68. Should the compass needle point to the magnetic or the true pole of the earth?
69. When is the altitude of an object most seriously affected by refraction?
70. Where is the Pole star situated?
71. Which is the most favourable time for determining the hour angle of a celestial body, and thence the longitude, and state the reason why?
72. Describe the construction of a mariner's compass.
73. Describe an Azimuth compass.
74. Describe a Pelorus, and its use
75. Describe a Chronometer, and its use.

APPENDIX D

INTERNATIONAL CODE OF SIGNALS.

Examiners are recommended to frame the examination in the International Code of Signals upon the instructions and illustrations given at the commencement of Parts I and II of the Signal Book. The information there given will be found sufficient to indicate all the characteristics of the Code.

By the form of the hoist, an observer can at sight understand the nature of any signal he sees flying; the examination should, therefore, tend to elicit a clear knowledge of all the distinctive features of the Code.

With this object in view, the Examiners should question the candidates as to the distinguishing forms of the respective hoists, which will be indicated according as a burgee, a pennant, or a square flag is uppermost, and also with regard to the number of flags, and the position of the Code flag when used in the hoist, making the 1, 2, 3 and 4 flag signals on the models supplied for the purpose, and varying the signals made, showing 2 and 3 flag signals, with and without the Code flag included, or a Geographical or a Vocabulary signal, the name of a merchant ship, or of a ship of war.

As the two latter signals would not be found in the Signal Book, the candidate should know where to find them and then be required to read them from the Code List of Ships.

The candidate should—(*a*) Be able to read a signal at sight, so far as to name the flags composing the hoist. (*b*) Know the use of the Code pennant and of the pennants C and D, "Yes" and "No," also of the two burgees A and B and the square flags S and P, and the flags used to indicate cholera, plague, &c., on board, and the Quarantine flag. (*c*) Be required to signal some word or words not included in the Vocabulary of the Code either by letters or by the Spelling Table (page 516) or both. (*d*) Have a knowledge of the Distant Signals and of their object, and the different modes of signalling therewith; and be required to make, and read off, one or two signals on the models supplied for this purpose. (*e*) Understand the Morse Code and know the special signals indicated by certain letters as given on page 550. (*f*) Have a good knowledge of the Distress Signals and understand the penalty which may be incurred by their improper use.

The ball being the distinguishing symbol of the Distant Signal, any pennants or flags may be used in conjunction with it irrespective of colour, when employed as an alternative for the cone and drums, but the latter should always be used where practicable.

The International Code is used on board His Majesty's ships, and it has been adopted by all the principal Maritime Powers for their public as well as their private ships.

SEMAPHORES.

Plates 1 and 2, Part II, of the Signal Book explain the method by which the arms of the Semaphore are made to represent by their position with respect to the indicator the four symbols used for distant signalling, viz., a ball, a cone point upwards, a cone point downwards and a drum

Before making signals with the Semaphore, the black disc with a white ring should be placed on the top of the Semaphore mast and the indicator shown on the proper side.

A list of the countries to which messages will be forwarded by the French Semaphore Stations, with the tariff, will be found on page 548 of the Signal Book.

Note.—The International Code of Signals, with the Code List, is prepared by the Registrar-General of Shipping and Seamen, and may be obtained of the Publishers, Messrs. Spottiswoode & Co, 54 Gracechurch Street, London, and the principal Booksellers at the various ports.

The Official Mercantile Navy List and Maritime Directory, may be obtained in like manner, price 1s.

APPENDIX E.

REGULATIONS FOR PREVENTING COLLISIONS AT SEA.

I. Order in Council of November 27, 1896.

SCHEDULE I.

Preliminary.

These Rules shall be followed by all vessels upon the high seas and in all waters connected therewith, navigable by sea-going vessels.

In the following rules every steam-vessel which is under sail and not under steam is to be considered a sailing vessel, and every vessel under steam, whether under sail or not, is to be considered a steam-vessel

The word "steam-vessel" shall include any vessel propelled by machinery.

A vessel is "under way" within the meaning of these Rules when she is not at anchor, or made fast to the shore or aground.

Rules concerning Lights, &c.

The word "visible" in these Rules, when applied to lights, shall mean visible on a dark night with a clear atmosphere.

Article 1.—The Rules concerning lights shall be complied with in all weathers from sunset to sunrise, and during such time no other lights, which may be mistaken for the prescribed lights, shall be exhibited.

Article 2.—A steam-vessel when under way shall carry—

(*a*) On or in front of the foremast, or if a vessel without a foremast, then in the fore part of the vessel, at a height above the hull of not less than 20 feet, and if the breadth of the vessel exceeds 20 feet, then at a height above the hull not less than such breadth, so, however, that the light need not be carried at a greater height above the hull than 40 feet, a bright white light, so constructed as to show an unbroken light over an arc of the horizon of 20 points of the compass, so fixed as to throw the light 10 points on each side of the vessel, viz., from right ahead to 2 points abaft the beam on either side, and of such a character as to be visible at a distance of at least 5 miles.

(*b*) On the starboard side a green light so constructed as to show an unbroken light over an arc of the horizon of 10 points of the compass, so fixed as to throw the light from right ahead to two points abaft the beam on the starboard side, and of such a character as to be visible at a distance of at least 2 miles

(*c*) On the port side a red light so constructed as to show an unbroken light over an arc of the horizon of 10 points of the compass, so fixed as to throw the light from right ahead to 2 points abaft the beam on the port side, and of such a character as to be visible at a distance of at least 2 miles.

(*d*) The said green and red side-lights shall be fitted with inboard screens projecting at least 3 feet forward from the lights, so as to prevent these lights from being seen across the bow.

(*e*) A steam-vessel when under way may carry an additional white light similar in construction to the light mentioned in subdivision (*a*). These two lights shall be so placed in line with the keel that one shall be at least 15 feet higher than the other, and in such a position with reference to each other that the lower light shall be forward of the upper one. The vertical distance between these lights shall be less than the horizontal distance.

Article 3.—A steam-vessel when towing another vessel shall, in addition to her side-lights, carry two bright white lights in a vertical line, one over the other, not less than 6 feet apart, and when towing more than one vessel shall carry an additional bright white light 6 feet above or below such lights, if the length of the tow, measuring from the stern of the towing vessel to the stern of the last vessel towed exceeds 600 feet. Each of these lights shall be of the same construction and character, and shall be carried in the same position as the white light mentioned in Article 2 (*a*), except the additional light, which may be carried at a height of not less than 14 feet above the hull.

Such steam-vessel may carry a small white light abaft the funnel or aftermast for the vessel towed to steer by, but such light shall not be visible forward of the beam.

Article 4 (*a*).—A vessel which from any accident is not under command shall carry at the same height as the white light mentioned in Article 2 (*a*), where they can best be seen, and if a steam-vessel, in lieu of that light two red lights, in a vertical line one over the other, not less than 6 feet apart, and of such a character as to be visible all round the horizon at a distance of at least 2 miles, and shall by day carry in a vertical line one over the other, not less than 6 feet apart, where they can best be seen, two black balls or shapes each 2 feet in diameter

(*b*) A vessel employed in laying or in picking up a telegraph cable shall carry in the same position as the white light mentioned in Article 2 (*a*), and if a steam-vessel, in lieu of that light, three lights in a vertical line one over the other, not less than 6 feet apart. The highest and lowest of these lights shall be red and the middle light shall be white, and they shall be of such a character as to be visible

all round the horizon, at a distance of at least 2 miles. By day she shall carry in a vertical line, one over the other, not less than 6 feet apart, where they can best be seen, three shapes not less than 2 feet in diameter, of which the highest and lowest shall be globular in shape and red in colour, and the middle one diamond in shape and white.

(*c*) The vessels referred to in this Article, when not making way through the water, shall not carry the side lights, but when making way shall carry them.

(*d*) The lights and shapes required to be shown by this Article are to be taken by other vessels as signals that the vessel showing them is not under command and cannot therefore get out of the way.

These signals are not signals of vessels in distress and requiring assistance. Such signals are contained in Article 31.

Article 5.—A sailing vessel under way, and any vessel being towed shall carry the same lights as are prescribed by Article 2 for a steam-vessel under way, with the exception of the white lights mentioned therein which they shall never carry.

Article 6—Whenever, as in the case of small vessels under way during bad weather, the green and red side-lights cannot be fixed, these lights shall be kept at hand lighted and ready for use; and shall, on the approach of or to other vessels, be exhibited on their respective sides in sufficient time to prevent collision, in such manner as to make them most visible, and so that the green light shall not be seen on the port side, nor the red light on the starboard side, nor, if practicable, more than 2 points abaft the beam on their respective sides.

To make the use of these portable lights more certain and easy, the lanterns containing them shall each be painted outside with the colour of the light they respectively contain, and shall be provided with proper screens.

Article 7—Steam-vessels of less than 40, and vessels under oars or sails of less than 20 tons gross tonnage, respectively, and rowing boats, when under way, shall not be obliged to carry the lights mentioned in Article 2 (*a*). (*b*) and (*c*), but if they do not carry them, they shall be provided with the following lights:—

1. Steam-vessels, of less than 40 tons shall carry:

(*a*) In the fore part of the vessel, or on or in front of the funnel where it can best be seen and at a height above the gunwale of not less than 9 feet, a bright white light constructed and fixed as prescribed in Article 2 (*a*), and of such a character as to be visible at a distance of at least 2 miles.

(*b*) Green and red side-lights constructed and fixed as prescribed in Article 2 (*b*) and (*c*), and of such a character as to be visible at a distance of at least 1 mile, or a combined lantern showing a green light and a red light from right-a-head to 2 points abaft the beam on their respective sides. Such lantern shall be carried not less than 3 feet below the white light.

2. Small steam-boats, such as are carried by sea going vessels, may carry the white light at a less height than 9 feet above the gunwale, but it shall be carried above the combined lantern, mentioned in subdivision 1 (*b*).

3. Vessels under oars or sails, of less than 20 tons, shall have ready at hand a lantern with a green glass on one side and a red glass on the other, which, on the approach of or to other vessels, shall be exhibited in sufficient time to prevent collision, so that the green light shall not be seen on the port side nor the red light on the starboard side.

4. Rowing boats, whether under oars, or sail shall have ready at hand a lantern showing a white light, which shall be temporarily exhibited in sufficient time to prevent collision.

The vessels referred to in this Article shall not be obliged to carry the lights prescribed by Article 4 (*a*) and Article 11, last paragraph.

Article 8.—Pilot vessels, when engaged on their station on pilotage duty, shall not show the lights required for other vessels, but shall carry a white light at the masthead, visible all round the horizon, and shall also exhibit a flare-up light or flare-up lights at short intervals, which shall never exceed 15 minutes.

On the near approach of or to other vessels they shall have their side lights lighted, ready for use, and shall for flash or show them at short intervals, to indicate the direction in which they are heading, but the green light shall not be shown on the port side, nor the red light on the starboard side.

A pilot-vessel of such a class as to be obliged to go alongside of a vessel to put a pilot on board, may show the white light instead of carrying it at the masthead, and may, instead of the coloured lights above-mentioned, have at hand ready for use a lantern with a green glass on the one side and a red glass on the other, to be used as prescribed above.

Pilot vessels, when not engaged on their station on pilotage duty shall carry lights similar to those of other vessels of their tonnage.

*Article 9.**

* *This Article will deal with regulations affecting fishing boats, and will be the subject of another order, which will be submitted to His Majesty for approval at a later date.*

Article 10.—A vessel which is being overtaken by another shall show from her stern to such last-mentioned vessel a white light or a flare-up light.

The white light required to be shown by this Article may be fixed and carried in a lantern, but in such case the lantern shall be so constructed, fitted, and screened that it shall throw an unbroken light over an arc of the horizon of 12 points of the compass, viz., for 6 points from right aft on each side of the vessel so as to be visible at a distance of at least 1 mile Such light shall be carried as nearly as practicable on the same level as the side lights.

Article 11.—A vessel under 150 feet in length, when at anchor, shall carry forward, where it can best be seen, but at a height not exceeding 20 feet above the hull, a white light in a lantern so constructed as to show a clear uniform and unbroken light visible all round the horizon at a distance of at least 1 mile.

A vessel of 150 feet or upwards in length, when at anchor, shall carry in the forward part of the vessel, at a height of not less than 20, and not exceeding 40 feet above the hull, one such light and at or near the stern of the vessel and at such a height that it shall be not less than 15 feet lower than the forward light, another such light.

The length of a vessel shall be deemed to be the length appearing, in her certificate of registry.

A vessel aground in or near a fair way shall carry the above light or lights and the two red lights prescribed by Article 4 (*a*).

Article 12.—Every vessel may, if necessary, in order to attract attention, in addition to the lights which she is by these rules required to carry, show a flare-up light or use any detonating signal that cannot be mistaken for a distress singal

Article 13.—Nothing in these Rules shall interfere with the operation of any special rules made by the Government of any nation with respect to additional station and signal lights for two or more ships of war or for vessels sailing under convoy, or with the exhibition of recognition signals adopted by ship-owners, which have been authorized by their respective Governments and duly registered and published.

Article 14.—A steam-vessel proceeding under sail only, but having her funnel up, shall carry in day time, forward, where it can best be seen, one black ball or shape 2 feet in diameter.

Sound Signals for Fog, etc.

Article 15.—All signals prescribed by this Article for vessels under way shall be given :

1. By "steam-vessels" on the whistle or siren.
2. By "sailing vessels and vessels towed" on the fog-horn.

The words "prolonged blast" used in this Article, shall mean a blast of from 4 to 6 seconds' duration.

A steam-vessel shall be provided with an efficient whistle or siren, sounded by steam or some substitute for steam, so placed that the sound may not be intercepted by any obstruction, and with an efficient fog-horn, to be sounded by mechanical means, and also with an efficient bell.* A sailing vessel of 20 ton gross tonnage or upwards shall be provided with a similar fog-horn and bell.

In fog, mist, falling snow or heavy rain-storms, whether by day or night the signals described in this Article shall be used as follows, viz. :—

(*a*) A steam-vessel having way upon her, shall sound, at intervals of not more than 2 minutes, a prolonged blast.

(*b*) A steam-vessel under way, but stopped and having no way upon her, shall sound at intervals of not more than 2 minutes, 2 prolonged blasts, with an interval of about 1 second between them.

(*c*) A sailing-vessel under way shall sound, at intervals of not more than 1 minute, when on the starboard tack one blast, when on the port tack two blasts in succession, and when with the wind abaft the beam three blasts in succession.

(*d*) A vessel, when at anchor, shall, at intervals of not more than 1 minute, ring the bell rapidly for about 5 seconds.

(*e*) A vessel, when towing a vessel employed in laying or in picking up a telegraph cable, and a vessel under way, which is unable to get out of the way of an approaching vessel through being not under command, or unable to manœuvre as required by these Rules shall, instead of the signals prescribed in subdivisions (*a*) and (*c*) of this Article, at intervals of not more than 2 minutes, sound three blasts, in succession, viz., one prolonged blast followed by two short blasts. A vessel towed may give this signal and she shall not give any other.

Sailing vessels and boats of less than 20 tons gross tonnage shall not be obliged to give the above-mentioned signals, but if they do not, they shall make some other efficient sound-signal at intervals of not more than 1 minute.

* In all cases where the Rules require a bell to be used, a drum may be substituted on board Turkish vessels, or a gong where such articles are used on board small seagoing vessels

Speed of ships to be Moderate in Fog, etc.

Article 16 —Every vessel shall in a fog, mist, falling snow, or heavy rain-storms, go at a mod rate speed having careful regard to the existing circumstances and conditions.

A steam-vessel hearing, apparent y forward of her beam the fog-signal of a vessel the position of which is not ascertained, shall, so far as the circumstances of the case admit, stop her engines, and the n navigate with caution until danger of collision is over.

STEERING AND SAILING RULES.

Preliminary—Risk of Collision.

Risk of collision can, when circumstances permit, be ascertained by carefully watching the compass bearing of an approaching vessel. If the bearing does not appreciably change such risk should be deemed to exist.

Article 17.—When two sailing vessels are approaching one another so as to involve risk of collision, one of them shall keep out of the way of the other, as follows, viz.: —

(*a*) A vessel which is running free shall keep out of the way of a vessel which is close-hauled.

(*b*) A vessels which is close-hauled on the port tack shall keep out of the way of a vessel which is close-hauled on the starboard tack.

(*c*) When both are running free, with the wind on different sides, the vessels which has the wind on the port side shall keep out of the way of the other.

(*d*) When both are running free, with the wind on the same side, the vessel which is to windward shall keep out of the way of the vessel which is to leeward.

(*e*) A vessel which has the wind aft shall keep out of the way of the other vessel.

Article 18.—When two steam-vessels are meeting end on, or nearly end on so as to involve risk of collision, each shall alter her course to starboard, so that each may pass on the port side of the other.

This Article only applies to cases where vessels are meeting end on, or nearly end on, in such a manner as to involve risk of collision, and does not apply to two vessels which must, if both keep on their respective courses, pass clear of each other.

The only cases to which it does apply are when each of the two vessels is end on, or nearly end on, to the other; in other words, to cases in which, by day, each vessels sees the masts of the other in a line, or nearly in a line, with her own; and, by night, to cases in which each vessel is in such a position as to see both the side-lights of the other.

It does not apply, by day, to cases in which a vessel sees another ahead crossing her own course; or, by night, to cases where the red light of one vessel is opposed to the red light of the other, or where the green light of one vessel is opposed to the green light of the other, or where a red light without a green light, or a green light without a red light, is seen ahead, or where both green and red lights are seen anywhere but ahead.

Article 19.—When two steam-vessels are crossing, so as to involve risk of collision, the vessel which has the other on her own starboard side shall keep out of the way of the other.

Article 20.—When a steam-vessel and a sailing-vessel are proceeding in such directions as to involve risk of collision, the steam vessel shall keep out of the way of the sailing-vessel.

Article 21.—Where by any of these Rules one of two vessels is to keep out of the way, the other shall keep her course and speed.

Note.—When, in consequence of thick weather or other causes, such vessel finds herself so close that collision cannot be avoided by the action of the giving-way vessel alone, she also shall take such action as will best aid to avert collision. (See Articles 27 and 29.)

Article 22 —Every vessel which is directed by these Rules to keep out of the way of another vessels shall, if the circumstances of the case admit, avoid crossing ahead of the other.

Article 23.—Every steam-vessel, which is directed by these Rules to keep out of the way of another vessel, shall, on approaching her, if necessary, slacken her speed or stop or reverse.

Article 24.—Notwithstanding anything contained in these Rules, every vessel, overtaking any other, shall keep out of the way of the overtaken vessel.

Every vessel coming up with another vessel from any direction more than two points abaft her beam, *i. e.*, in such a position, with reference to the vessel which she is overtaking that at night she would be unable to see either of that vessel's side-lights, shall be deemed to be an overtaking vessel: and no subsequent alteration of the bearing between the two vessels shall make the overtaking vessel a crossing vessel within the meaning of these Rules or relieve her of the duty of keeping clear of the overtaken vessel until she is finally past and clear.

As by day the overtaking vessel cannot always know with certainty whether she is forward of or abaft this direction from the other vessel, she should, if in doubt, assume that she is an overtaking vessel and keep out of the way.

Article 25.—In narrow channels every steam-vessel shall, when it is safe and practicable, keep to that side of fair way or mid channel which lies on the starboard side of such vessel.

Article 26.—Sailing-vessels under way shall keep out of the way of sailing vessels or boats fishing with nets or lines, or trawls. This rule shall not give to any vessel or boat engaged in fishing the right of obstructing a fairway used by vessels other than fishing vessels or boats.

Article 27.—In obeying and construing these rules, due regard shall be had to all dangers of navigation and collision, and to any special circumstances which may render a departure from the above rules necessary in order to avoid immediate danger.

Sound Signals for Vessels in Sight of one another.

Article 28.—The words "short blast" used in this Article shall mean a blast of about one second's duration.

When vessels are in sight of one another, a steam-vessel under way, in taking any course authorised or required by these rules, shall indicate that course by the following signals on her whistle or siren, viz:—

One short blast to mean, "I am directing my course to starboard."

Two short blasts to mean, "I am directing my course to port."

Three short blasts to mean, "My engines are going full speed astern.

No Vessel under any Circumstances to neglect proper Precautions.

Article 29.—Nothing in these rules shall exonerate any vessel, or the owner, or master, or crew, thereof, from the consequences of any neglect to carry lights or signals, or of any neglect to keep a proper look-out or of the neglect to any precaution which may be required by the ordinary practice of seamen, or by the special circumstances of the case.

Reservation of Rules for Harbours and Inland Navigation.

Article 30.—Nothing in these rules shall interfere with the operation of a special rule, duly made by local authority, relative to the navigation of any harbour, river, or inland waters.

SCHEDULE II.

*Distress Signals.**

Article 31.—When a vessel is in distress and requires assistance from other vessels or from the shore, the following shall be the signals to be used or displayed by her, either together or separately, viz.:—

In the day time—

1. A gun or other explosive signal fired at intervals of about minute;
2. The International Code signal of distress indicated by N. C;
3. The distance signal, consisting of a square flag, having either above or below it a ball or anything resembling a ball;†
4. A continuous sounding with any fog-signal apparatus.

At night—

1. A gun or other explosive signal fired at intervals of about a minute;
2. Flames on the vessel (as from a burning tar barrel, oil-barrel etc.);
3. Rockets or shells, throwing stars of any colour or description fired one at a time, at short intervals;
4. A continuous sounding with any fog-signal apparatus.

*If a master of a vessel uses or displays, or causes or permits any person under his authority to use or display, any of those signals of distress, except in case of a vessel being in distress, he shall be liable to pay compensation for any labour undertaken, risk incurred, or loss sustained in consequence of that signal having been supposed to be a signal of distress, and that compensation may, without prejudice to any other remedy, be recovered in the same manner in which salvage is recoverable [Merchant Shipping Act, Section 434(2)].

†A further distress signal is provided in the new International Code of Signals It is a distant signal consisting of a cone point upwards having either above it or below it a ball or anything resembling a ball. This signal has not been sanctioned by order in Council under the provisions of section 434 of the Merchant Shipping Act, 1894.

2. Fishing vessels' lights. Article 10 of the order in Council of August 11th, 1884.

Article 10.—Open boats and fishing-vessels of less than 20 tons net registered tonnage, when under way and when not having their nets, trawls, dredges, or lines in the water, shall not be obliged to carry the coloured side lights; but every such boat and vessel shall in lieu thereof have ready at hand a lantern with a green glass on the one side, and a red glass on the other side, and on approaching to or being approached by another vessel such lantern shall be exhibited in sufficient time to prevent collision, so that the green light shall not be seen on the port side nor the red light on the starboard side.

The following portion of this Article applies only to fishing-vessels and boats when in the sea off the coast of Europe lying north of Cape Finisterre :—

(*a*) All fishing-vessels and fishing-boats of 20 tons net registered tonnage or upwards, when under way and when not required by the following regulations in this Article to carry and show the lights therein named shall carry and show the same lights as other vessels under way.

(*b*) All vessels when engaged in fishing with drift nets shall exhibit two white lights from any part of the vessel where they can be best seen. Such lights shall be placed so that the vertical distance between them shall be not less than 6 feet and not more than 10 feet; and so that the horizontal distance between them measured in a line with the keel of the vessel shall be not less than 5 feet and not more than 10 feet. The lower of these two lights shall be the more forward, and both of them shall be of such a character, and contained in lanterns of such construction as to show all round the horizon, on a dark night with a clear atmosphere, for a distance of not less than three miles.

(*c*) A vessel employed in line fishing with her lines out shall carry the same lights as a vessel when engaged in fishing with drift nets.

(*d*) If a vessel when fishing becomes stationary in consequence of her gear getting fast to a rock or other obstruction, she shall show the light and make the fog-signal for a vessel at anchor.

(*e*) Fishing-vessels and open boats may at any time use a flare-up in addition to the lights which they are by this Article required, to carry and show. All flare-up lights exhibited by a vessel when trawling, dredging, or fishing with any kind of drag net shall be shown at the after part of the vessel, excepting that if the vessel is hanging by the stern to her trawl, dredge, or drag net, they shall be exhibited from the bow.

(*f*) Every fishing-vessel and every open boat when at anchor between sunset and sunrise shall exhibit a white light visible all round the horizon at a distance of at least one mile.

(*g*) In fog, mist, or falling snow, a drift net vessel attached to her nets and a vessel when trawling, dredging or fishing with any kind of drag net, and a vessel employed in line fishing with her lines out, shall at intervals of not more than two minutes make a blast with her fog horn and ring her bell alternately.

---

3. ORDERS IN COUNCIL OF 30TH DECEMBER 1884 AND 24TH JUNE 1885.

ALTERNATIVE LIGHT FOR TRAWLERS WHEN ENGAGED IN TRAWLING HAVING THEIR TRAWLS IN THE WATER AND NOT BEING STATIONARY.

1884—PART I—STEAM-VESSELS OF 20 TONS GROSS REGISTER TONNAGE OR UPWARDS.

(1) On or in front of the foremost head and in the same position as the white light which other steam-ships are required to carry, a lantern showing a white light ahead, a green light on the starboard side and a red light on the port side; such lantern shall be so constructed, fitted, and arranged as to show an uniform and unbroken white light over an arc of the horizon of four points of the compass, a uniform and unbroken green light over an arc of the horizon of 10 points of the compass, and a uniform and unbroken red light over an arc of the horizon of 10 points of the compass, and it shall be so fixed as to show the white light from right ahead to two points on the bow on each side of the ship, the green light from two points on the starboard bow to four points abaft the beam on the starboard side, and the red light from two points on the port bow to four points abaft the beam on the port side: (*a*) a white light in a globular lantern of not less than 8 inches in diameter, and so constructed as to show a clear uniform and unbroken light all round the horizon; the lantern containing

such white light shall be carried lower than the lantern showing the green, white, and red lights as aforesaid; so, however, that the vertical distance between them shall not be less than 6 feet and not more than 12 feet.

1884—PART II—SAILING VESSELS OF 20 TONS NET REGISTER TONNAGE OR UPWARDS

(1) On or in front of the foremast head a lantern having a green glass on the starboard side and a red glass on the port side, so constructed, fitted, and arranged that the red and green do not converge, and so as to show a uniform and unbroken green light over an arc of the horizon of 12 points of the compass, and a uniform and unbroken red light over an arc of the horizon of 12 points of the compass, and it shall be so fixed as to show the green light from right ahead to four points abaft the beam on the starboard side, and the red light from right ahead to four points abaft the beam on the port side: and (2) a white light in a globular lantern of not less than 8 inches in diameter, and so constructed as to show a clear uniform and unbroken light all round the horizon; the lantern containing such white light shall be carried lower than the lantern showing the green and red lights as aforesaid; so, however, that the vertical distance between them shall not be less than 6 feet and not more than 12 feet.

1885.—SAILING TRAWLERS OF ANY TONNAGE.

As regards sailing-vessels engaged in trawling, such vessels having their trawls in the water and not being stationary in consequence of their gear getting fast to a rock or other obstruction, if they do not carry and show the lights carried by sailing-vessels under way, or the other lights of the description set forth in Part 2 of the schedule to the order in Council of the 30th of December, 1884, shall carry and show, in lieu of these lights, other lights as follows, that is to say:—

A white light in a globular lantern of not less than 8 inches in diameter, and so constructed as to show a clear uniform and unbroken light all round the horizon, and visible on a dark night, with a clear atmosphere, for a distance of at least 2 miles; and also a sufficient supply of red pyrotechnic lights which shall each burn for at least 30 seconds and shall, when so burning, be visible for the same distance under the same conditions as the white light. The white light shall be shown from sunset to sunrise, and one of the red pyrotechnic lights shall be shown on approaching, or on being approached by another ship or vessel in sufficient time to prevent collision.

---

4. ORDER IN COUNCIL OF 7TH JULY 1897.

LIGHTS TO BE CARRIED BY STEAM PILOT VESSELS.

A steam pilot vessel exclusively employed for the service of Pilots licensed or certified by any Pilotage Authority or the Committee of any Pilotage District in the United Kingdom, when engaged on her station on pilotage duty, and in British waters and not at anchor, shall, in addition to the lights required for all pilot boats, carry at a distance of eight feet below her white masthead light a red light visible all round the horizon, and of such a character as to be visible on a dark night, with a clear atmosphere, at a distance of at least two miles, and also the coloured side lights required to be carried by vessels when under way.

When engaged on her station on pilotage duty and in British waters and at anchor, she shall carry, in addition to the light required for all pilot boats, the red light above mentioned, but not the coloured side lights.

When not engaged in her station on pilotage duty, she shall carry the same lights as other steam vessels.

EXAMINATION IN THE REGULATIONS FOR PREVENTING COLLISIONS AT SEA.

All applicants for examination, whether for Certificates as Masters or Mates, are to be examined as to their knowledge of the Regulations each time they present themselves for examination.

Questions suggested by the following heads of examination are to be asked in addition to, and are not to supersede, any other questions proper and necessary, to be asked by the Examiner.

The following questions need not be adhered to literally by the Examiner, and are not all to be asked; but the substance of the leading questions should be asked, and all that are asked should be satisfactorily answered, before an applicant is reported to have passed his examination. The Examiner should make such selection of the questions as each case appears to him to require.

1. Where and by what vessels are the rules to be followed?

The rules are to be followed by all vessels upon the high seas and in all waters connected therewith, navigable by sea-going vessels.

2. When is the steam-vessel considered a sailing-vessel, and when a steam-vessel?

Under the rules every steam-vessel which is under sail and not under steam is to be considered a sailing-vessel, and every vessel under steam, whether under sail or not, is to be considered a steam-vessel.

3. What does the word "steam-vessel" in the rules include ?

The word "steam-vessel" as used in the rules includes any vessel propelled by machinery.

4. When is the vessel considered to be under way by these rules

When she is not at anchor, or made fast to the shore, or aground.

5. What does the word "visible" in these rules, when applied to lights, mean ?

Visible on a dark night with a clear atmosphere.

6. During what time must the rules, concerning lights be complied with ?

In all weathers from sunset to sunrise, and during such time no other lights which may be mistaken for the prescribed lights shall be exhibited.

7. What light or lights are required by the regulations to be exhibited by sailing-vessels at anchor ?

If they are under 150 feet in length, one white light; if of 150 feet or upwards, two white lights, one forward and one aft.

8. What light or lights are required by the regulations to be exhibited by steam-ships at anchor ?

The same as for sailing-vessels.

9. where is the anchor light to be exhibited in a vessel under 150 feet in length ?

Forward where it can best be seen. It must be placed where there is the least chance of obstruction from spars, ropes, &c.' and must not be more than 20 feet above the hull.

10. Where must the two anchor lights be shown in vessels of 150 feet and upwards ?

In vessels of 150 feet or upwards in length one light must be carried in the forward part of the vessel at a height of not less than 20 feet and more than 40 feet above the hull; and another light at or near the stern not less than 15 feet lower than the forward light.

11. In what direction or directions must the anchor lights show ?

They must show a clear, uniform, and unbroken light, visible all round the horizon.

12. At what distance must they be visible ?

At least one mile.

13. What shall be deemed to be the length of a vessel ?

The length appearing in the certificate or registry.

14. What light or lights must a vessel aground in or near a fairway carry ?

The light or lights prescribed for a vessel at anchor, and in addition the two red lights prescribed for a vessel not under command.

15. What is the number of lights required by the regulations to be carried by sailing ships when under way at night ?

Two side lights, and to have in readiness a white light or a flare-up light to show from their stern to any vessel overtaking them.

16. Of what colour are these lights, and how are they to be placed on board the ship ?

A green light on the starboard side, and a red light on the port side.

17. What description of lights must be shown from the sides of sailing vessels under way; and over how many points of the compass, and in what directions, and how far, are they required to show ?

Each light must be so constructed as to show an unbroken light over an arc of the horizon of 10 points of the compass; so fixed as to throw the light from right ahead to two points abaft the beam on the starboard and port sides, respectively; and of such a character as to be visible at a distance of at least two miles.

18. What lights are they to carry when being towed at night ?

The same.

19. Are the side lights required to be fitted with screens; and if so, of what length, and how ?

Yes, on the inboard side; at least 3 feet in length, measuring forward from the light so as to prevent the lights from being seen across the bow.

20. What is the number of lights required by the regulations to be carried by steam-vessels when under way at night.

Three lights, and to have in readiness a white light or flare-up light to show from their stern to any vessel overtaking them.

21. Of what colour are these lights, and how are they to be placed on board the ship ?

A white light on or in front of the foremast, or if a vessel without a foremast, then in the forepart of the vessel at a height above the hull of not less than 20 feet, and if the breadth of the vessel exceeds 20 feet, then at a height above the hull not less than such breadth, so, however, that the light need not be carried at a greater height than 40 feet. A green light on the starboard side, and a red one on the port side.

22. Over how many points of the compass, in what direction and how far, is the foremast-head light of a steam-vessel required to show ?

Over 20 points, viz., from right ahead to two points abaft the beam on each side. It must be of such a character as to be visible at a distance of at least five miles.

23. Are the side lights required to be fitted with screens; and if so, of what length?

The green and red lights are to be fitted with screens on the inboard side, extending at least 3 feet forward from the light, so as to prevent these lights from being seen across the bow.

24. Over how many points of the compass, in what directions, and how far, are the coloured side lights of steam-vessels required to show?

The side lights must be so constructed as to show an unbroken light over an arc of the horizon of 10 points of the compass, on each side of the ship, *i.e.*, from right ahead to two points abaft the beam on the starboard and port sides, respectively, and of such a character as to be visible at a distance of at least two miles.

25. May a steam-vessel when under way carry any additional light or lights?

Yes. A steam-vessel may carry a similar white light to the masthead light. These two lights must be so placed in line with the keel, that one shall be at least 15 feet higher than the other, and the lower light shall be forward of the upper one, and that the vertical distance between them shall be less than the horizontal distance.

26. What description of lights are steam-vessels required to carry when they are not under steam, but under sail only?

Side lights only, the same as sailing-vessels.

27. What exceptional lights may small vessels carry?

Whenever, as in the case of small vessels during bad weather, the green and red side lights cannot be fixed, these lights shall be kept at hand, lighted and ready for use; and shall, on the approach of or to other vessels, be exhibited on their respective sides in sufficient time to prevent collision, in such manner as to make them most visible, and so that the green light shall not be seen on the port side, nor the red light on the starboard side; nor, if practicable, more than two points abaft the beam on their respective sides.

To make the use of these portable lights more certain and easy, the lanterns containing them shall each be painted outside with the colour of the light they respectively contain, and shall be provided with proper screens.

28. Are steam-vessels of less than 40 tons gross tonnage compelled to carry the same lights as other steam-vessels; if not, what lights may they carry instead?

No; but if they do not carry the ordinary lights they must carry in the forepart of the vessel or on or in front of the funnel where it can best be seen, and at a height above the gunwale of not less than 9 feet, a bright white light to show over the same arc as the ordinary masthead light, and to be visible at a distance of at least two miles. Also a combined lantern showing a green light and a red light from right ahead to two points abaft the beam on their respective sides, such lantern to be carried not less than 3 feet below the white light.

29. Are small steam boats, such as are carried by sea-going vessels obliged to carry the white light 9 feet above the gunwale?

No; but it must be carried above the combined lantern.

30. What lights may vessels under oars or sails of less than 20 tons gross tonnage carry?

They shall have ready at hand a lantern with a green glass on one side and a red glass on the other, which, in the approach of or to other vessels, shall be exhibited in sufficient time to prevent collision, so that the green light shall not be seen on the port side nor the red light on the starboard side.

31. What lights must rowing boats, whether under oars or sails, carry?

They must have ready at hand a lantern showing a white light which shall be temporarily exhibited in sufficient time to prevent collision.

32. What description of lights are pilot vessels required to carry when on their stations on pilotage duty?

A pilot vessel, when engaged on her station on pilotage duty shall not show the lights required for other vessels, but shall carry a white light at the masthead, visible all round the horizon and shall also exhibit a flare-up light or flare-up lights at short intervals, which shall never exceed fifteen minutes. Also on the near approach of or to other vessels they shall have their side lights lighted ready for use and shall flash or show them at short intervals, to indicate the direction in which they are heading, but the green light shall not be shown on the port side nor the red light on the starboard side.

33. What lights may pilot vessels which are obliged to go alongside of a vessel to put a pilot on board, carry?

They may show the white light instead of carrying it at the masthead, and may, instead of the coloured side lights, have at hand ready for use a lantern with a green glass on the one side and a red glass on the other, to be used as prescribed for the colour side lights.

34. What description of lights are steam pilot vessels required to carry when on their stations on pilotage duty in British waters and not at anchor?

A steam pilot vessel, when engaged on her station on pilotage duty and in British waters, and not at anchor, shall, in addition to the lights required for all pilot vessels, carry at a distance of 8 feet below her white masthead light a red light visible all round the horizon for at least two miles, and also the coloured side lights required to be carried by vessels under way.

36. What description of lights are steam pilot vessels required to carry when on their stations on pilotage duty in British waters, and at anchor ?

A steam pilot vessel, when engaged on pilotage duty in British waters and atd anchor, shall carry, in addition to the lights required for all pilot vessels, the red light 8 feet below her white light, but not the coloured side lights.

36. What description of lights are pilot vessels required to carry when not on their station on pilotage duty ?

A pilot vessel, when not engaged on her station on pilotage duty, shall carry lights similar to those of other vessels of her tonnage.

37. What lights are open boats and fishing vessels of less than 20 tons net register required to carry when under way and not actually engaged in fishing ?

Open boats and fishing-vessels of less than 20 tons net registered tonnage, when under way and when not having their nets, trawls, dredgers, or lines in the water, shall not be obliged to carry the coloured side lights; but every such boat and vessel shall in lieu thereof have ready at hand a lantern with a green glass on the one side and a red glass on the other side, and on approaching to or being approached by another vessel, such lantern shall be exhibited in sufficient time to prevent collision, so that the green light shall not be seen on the port side nor the red light on the starboard side.

38. What lights are fishing-vessels and fishing-boats of 20 tons net register, or upwards, required to carry when under way and not actually engaged in fishing ?

They must carry similar lights to those of other ships when under way.

39 What lights are steam trawlers of 20 tons gross register, or upwards, whilst actually engaged in trawling, and not being stationary, required to carry ?

All steam-vessels engaged in trawling must carry either one of the two following arrangements of lights :—

(*a*) The usual green and red side lights, and foremast head light, similar to those carried by other steamships; or

(*b*) They must carry on or in front of the foremast head, and in the same position as the white light which other steamships are required to carry, a lantern showing a white light ahead, a green light on the starboard side, and a red light on the port side; such lantern shall be so constructed, fitted, and arranged as to show a uniform and unbroken white light over an arc of the horizon of four points of the compass a uniform and unbroken green light over a arc of the horizon of 10 points of the compass, and an uniform and unbroken red light over an arc of the horizon of 10 points of the compass, and it shall be so fixed as to show the white light from right ahead to two points on the bow on each side of the ship, the green light from two points on the starboard bow to four points abaft the beam on the starboard side, and the red light from two points on the port bow to four points abaft the beam on the port side: and (2) a white light in a globular lantern of not less than eight inches in diameter, and so constructed as to show a clear, uniform, and unbroken light all round the horizon; the lantern containing such white light shall be carried lower than the lantern showing the green, white, and red lights as aforesaid, so, however, that the vertical distance between them shall not be less than 6 feet nor more than 12 feet.

(40) What lights are sailing trawlers, whilst actully engaged in trawling, and not being stationary, required to carry ?

All sailing vessels, of whatever tonnage, whilst engaged in trawling, must carry either one of the three following arrangements of lights :—

(*a*) They may carry the green and red side lights similar to those of other sailing ships; or

(*b*) They may carry on, or in front of the foremast head, a lantern having a green glass on the starboard side and a red glass on the port side, so constructed, fitted, and arranged that the red and green do not converge, and so as to show a uniform and unbroken green light over an arc of the horizon of 12 points of the compass, and an uniform and unbroken red light over an arc of the horizon of 12 points of the compass, and it shall be so fixed as to show the green light from right ahead to four points abaft the beam on the starboard side, and the red light from right ahead to four points abaft the beam on the port side; and (2) a white light in a globular lantern of not less than eight inches in diameter, and so constructed as to show a clear, uniform, and unbroken light all round the horizon; the lantern containing such white light shall be carried lower than the lantern showing the green and red lights as aforesaid, so, however, that the vertical distance between them shall not be less than 6 feet and not more than 12 feet; or

(*c*) They may carry a white light in a globular lantern of not less than eight inches in diameter, and so constructed as to show a clear uniform and unbroken light all round

the horizon, and visible on a dark night, with a clear atmosphere, for a distance of at least 2 miles; and also a sufficient supply of red pyrotechnic lights which shall each burn for at least 30 seconds, and shall, when so burning, be visible for the same distance under the same conditions as the white light. The white light shall be shown from sunset to sunrise, and one of the red pyrotechnic lights shall be shown on approaching, or on being approached by, another ship or vessel in sufficient time to prevent collision.

41. What lights are vessels whilst actually engaged in drift net fishing required to carry?

All vessels when engaged in fishing with drift nets shall exhibit two white lights from any part of the vessel where they can be best seen. Such lights shall be placed so that the vertical distance between them shall be not less than 6 feet and not more than 10 feet; so that the horizontal distance between them, measured in a line with the keel of the vessel, shall be not less than 5 feet and not more than 10 feet. The lower of these two lights shall be the more forward, and both of them shall be of such a character, and contained in lanterns of such construction, as to show all round the horizon, on a dark night, with a clear atmosphere, for a distance of not less than three miles.

42. What lights are vessels whilst actually engaged in the line fishing required to carry?

A vessel engaged in line fishing is required to carry the same lights as a vessel engaged in drift net fishing.

43. If a vessel, when fishing, becomes stationary in consequence of her gear getting fast to a rock or other obstruction, what signal must she make?

She must show the same light, and if a fog, mist, or falling snow or heavy rain storms prevail, she must make the same fog-signal as if she were at anchor.

44. What lights are fishing vessels and open boats required to exhibit when at anchor?

Between sunset and sunrise they must exhibit a white light, visible all round the horizon at a distance of at least one mile.

45. What sound signals are fishing vessels required to make whilst engaged in fishing in thick weather?

In fog, mist, or falling snow, a drift net vessel attached to her nets and a vessel when trawling, dredging, or fishing with any kind of drag net, and a vessel employed in line fishing with her lines out, shall, at intervals of not more than two minutes, make a blast with her fog-horn and ring her bell alternately.

46. May fishing vessels and open boats use flare-up lights, and if so, at what part or parts of the vessel should they be exhibited?

Yes. Fishing vessels and open boats may at any time use a flare-up in addition to the lights which they are required to carry and show. All flare-up lights exhibited by a vessel when trawling, dredging, or fishing with any kind of drag net shall be shown at the after-part of the vessel, excepting that if the vessel is hanging by the stern to her trawl, dredge, or drag net, they shall be exhibited from the bow.

47. Do these regulations referring specially to fishing vessels and boats apply in all parts of the world?

No; with the exception of the *first paragraph* of Article 10 of the Order in Council of the 11th August 1884, they apply only to fishing vessels and boats when in the sea off the coast of Europe lying north of Cape Finisterre.

48. What lights are steam-ships required to carry when towing other vessels?

A steam-vessel when towing another vessel shall in addition to her side lights carry two bright white lights in a vertical line one over the other, not less than 6 feet apart and when towing more than one vessel shall carry an additional bright white light 6 feet above or below such lights, if the length of the tow, measuring from the stern of the towing vessel to the stern of the last vessel towed, exceeds 600 feet. Each of these lights shall be of the same construction and character, and shall be carried in the same position as the white light [Article 2 (*a*)] which other steam-vessels are required to carry, except the additional light which may be carried at a height not less than 14 feet above the hull.

49. May a vessel towing carry any other light?

Yes. A small white light abaft the funnel or aftermast for the vessel towed to steer by, but such light shall not be visible forward of the beam.

50. What light is a vessel which is being overtaken by another required to show?

A vessel which is being overtaken by another shall show from her stern to the other vessel a white light or a flare-up light.

51. May the white light be fixed?

Yes. But if so, it must be so constructed and screened to show an unbroken light over an arc of the horizon of 12 points of the compass, viz, for six points from right aft on each side of the vessel so as to be visible at a distance of at least one mile. This light shall be carried as nearly as practicable on the same level as the side lights.

52. Describe the lights and to the day signals that vessels employed in laying or picking up a telegraph cable are required to carry.

A vessel employed in lying or in picking up a telegraph cable, shall at night carry in the same position as the white light which steam-vessels are required to carry, and if a steam-vessel in place of that light, three lights, in a vertical line over one another not less than 6 feet apart; the highest and lowest of these lights shall be red and the middle light shall be white, and they shall be of such a character as to be visible all round the horizon at a distance of at least two miles. By day she shall carry in a vertical line one over the other not less than 6 feet apart where they can best be seen, three shapes not less than 2 feet in diameter, of which the top and bottom shall be globular in shape and red in colour, and the middle one diamond in shape and white.

63. Describe the lights and the day signals that vessels which from any cause are not under command, are required to carry?

A vessel, which from any accident is not under command, shall at night carry at the same height as the white light which steam-vessels are required to carry, where they can best be seen, and if a steam-vessel, in place of that light, two red lights in a vertical line one over the other, not less than 6 feet apart, and of such a character as to be visible all round the horizon at a distance of at least two miles; and shall by day carry in a vertical line one over the other, not less than 6 feet apart, where they can best be seen, two black balls or shapes, each 2 feet in diameter.

64. Are the above-mentioned vessels to carry side-lights?

The above vessels, when not making any way through the water shall not carry the side-lights, but when making way shall carry them.

65. What are the shapes and lights carried by telegraph-ships and ships not under command intended to indicate to approaching vessels?

These shapes and lights are to be taken by approaching vessels as signals that the ship using them is not under command and cannot therefore get out of the way.

66 Do these rules prevent squadrons and convoys from carrying special lights, or vessels exhibiting recognition signals?

No. Nothing in these rules shall interfere with the operation of any special rules made by the Government of any nation with respect to additional station and signal lights for two or more ships of war, or for vessels sailing under convoy, or with the exhibition of recognition signals adopted by ship-owners, which have been authorized by their respective Governments, and duly registered and published.

67. May vessels exhibit any other lights in order to attract attention?

Yes. In addition to the lights which she is required to carry, she may show a flare-up light, or use any detonating signal that cannot be mistaken for a distress signal.

68 What signal must a steam-vessel proceeding under sail only, but having her funnel up, carry in the day time?

She must carry forward, where it can best be seen, one black ball or shape, 2 feet in diameter.

69. What sound signals are steam-vessels and sailing-vessels of 20 tons gross tonnage or upwards required by the regulations to be provided with?

A steam-vessel shall be provided with an efficient whistle or siren sounded by steam or some substitute for steam, so placed that the sound may not be intercepted by any obstructions and with an efficient fog horn to be sounded by mechanical means, and also with an efficient bell. A sailing-vessel of 20 tons gross tonnage or upwards shall be provided with a similar fog-horn and bell.

60. When are these signals to be used?

In fog, mist, falling snow, or heavy rain storms, whether by day or night.

61. What does a prolonged blast mean?

A blast of from 4 to 6 seconds' duration.

62. On what are the fog signals to be made by steam-vessels under way?

On the whistle or siren.

63. On what are the fog signals to be made by sailing-vessels and vessels towed?

On the fog-horn.

64. What sound signal is to be made by vessels at anchor?

Vessels at anchor shall, at intervals of not more than one minute, ring the bell rapidly for about five seconds.

65. What sound signal is required to be made by a steam-vessel having way upon her?

A steam-vessel having way upon her shall sound at intervals of not more than two minutes, a prolonged blast.

66. What sound signal is required to be made by a steam-vessel under way, but stopped, and having no way upon her?

A steam-vessel under way, but stopped, and having no way upon her, shall sound at intervals, of not more than two minutes, two prolonged blasts, with an interval of about one second between them.

67. What sound signals are required to be made by sailing-vessels when under way?

A sailing-vessel under way shall sound at intervals of not more than one minute, when on the starboard tack one blast, when on the port tack two blasts in succession, and, when with the wind abaft the beam three blasts in succession.

68. What sound signals are required to be made by a vessel when towing a vessel employed in laying or in picking up a telegraph

cable, or a vessel under way which is unable to get out of the way of an approaching vessel through not being under command or unable to manœuvre as required by the rules?

A vessel towing, or when laying or picking up a telegraph cable, or when unable to get out of the way, shall, at intervals of not more than two minutes, sound three blasts in succession, viz, one prolonged blast followed by two short blasts.

69. What sound signal may a vessel being towed make?

A vessel towed may give the same signal as a vessel towing, and she shall not give any other.

70. What sound signal must sailing vessels and boats of less than 20 tons gross tonnage make?

If they do not give the signal prescribed for other vessels, they must make some other efficient sound signal at intervals of not more than one minute.

71. Do the regulations require vessels to take any other precaution during thick weather?

Yes. Article 16 says every vessel shall, in a fog, mist, or falling snow or heavy rain-storms go at a moderate speed having careful regard to the existing circumstances and conditions.

72. What action must be taken by a steam-vessel hearing apparently forward of the beam the fog signal of another vessel the position of which is not ascertained?

She shall, so far as the circumstances of the case admit, stop her engines, and then navigate with caution until danger of collision is over.

73. How can you generally ascertain whether there is risk of collision in approaching another vessel?

By carefully watching the compass bearing of the other vessel, and if it does not appreciably change, such risk should be deemed to exist.

74. When a steam-vessel under way takes any course required by these rules, must she indicate that course to any vessel she has in sight?

Yes. Article 28 provides that in taking any course authorized or required by the regulations, a steam-vessel under way may indicate that course to any other vessel which she has in sight by the following signals on her whistle or siren, viz:—

One short blast to mean "I am directing my course to starboard."

Two short blast to mean "I am directing my course to port."

Three short blasts to mean "My engines are going full speed astern."

75. What does the expression "short blast" used in the preceding Article mean?

It means a blast of about one second's duration.

76. What precaution is to be taken by steam-vessels which are directed by these rules to keep out of the way when approaching another vessel?

They shall, if necessary, slacken speed, or stop and reverse.

77. If you see two white lights in a vertical line one over the other, what do they denote as regards the vessel carrying them?

They may denote the presence of a steam-vessel end on with her side-lights not within sight on account of distance, fog, &c., or a steam-vessel towing with her side-lights not within sight on account of distance, fog, &c.; or a vessel end on to me engaged in drift net fishing, or in line fishing; or it may be a steam trawler end on, or within two points of being end on to me, or a vessel of 150 feet or upwards in length at anchor and end on to me.

78. If you see a green, or a red light with a white light below, what do they.

They denote the presence of a steam-vessel engaged in trawling.

79. If you see both the green and red lights with a white light below them, what do they denote?

They denote the presence of a sailing trawler coming end on to me.

80. If you see a white light alone, what does it denote as regards the ship carrying it?

It denotes the presence of a vessel or boat at anchor; or a pilot vessel on her station; or the masthead light of a vessel, under steam with her side-lights not within sight on account of distance, fog, &c.; or a fishing vessel stationary through her gear getting fast to some obstruction, or a sailing trawler engaged in trawling, or it may be a light shown from the stern of a vessel which is being overtaken.

81. If you see a green or a red light without a white light, or both a green and a red light without a white light, is the vessel carrying the light or lights seen, a vessel under steam or a vessel under sail?

A vessel under sail.

82. How do you know?

Because there is no white mast-head light.

83. If you see a white light over a coloured light, is the vessel a vessel under sail or a vessel under steam?

A vessel under steam. The mast-head light denotes that the vessel is under steam.

[The Examiner will then take one model of a vessel, which he will place on the table, and call it A. He will then take the mast or stand with a white and red ball on it, and place it at the other end of the table, and call it B.

The Examiner should be careful that the model of one vessel only is used when the questions numbered 84 to 89 are asked.

84. A is a steam-vessel going north, seeing a white light and red light right ahead at B. Are A and the vessel B showing the two lights meeting end on, or nearly end on, or is B passing A, or is B crossing the path of A, and in what direction, and how do you know ?

Passing to port, because if I see a red light ahead, I know that the head of the vessel carrying that red light must be pointing away in some direction to my own port or left hand. The vessel showing the red light has her port or left side more or less open to A.

85 If A is going north, within what points of the compass must the vessel B showing the white and red lights be steering ?

B must be going from a little W. of S. to W. N. W.

86 How do you know this ?

Because, the screens being properly fitted. I could not see the red light of B at all with the vessel's head in any other direction.

87. A is a steam vessel going north, and seeing a white and green light head. Are A and B meeting, or is B passing A, or is B crossing the course of A, and in what direction ; and how do you know ?

B is passing to starboard of A, because if I see a green light ahead, I know that the head of the vessel carrying that green light must be pointing away in some direction to my starboard or right hand.

The ship showing the green light has her right or starboard side more or less open to me.

88. As A is going north, within what points of the compass must the vessel showing the white and green lights be steering ?

B must be going from a little E of South to E N.E.

89. How do you know ?

Because, the screens being properly fitted, I cannot see the green light at all with the vessel's head in any other direction.

90. If a steam-vessel A sees the *three or four* lights of another steam-vessel B ahead or nearly ahead, are the two steam-vessels meeting, passing or crossing ?

Meeting end on, or nearly end on.

91. Do the regulations expressly require the course of a vessel to be altered to starboard in any case ; any, if so, when ?

Yes ; in the case of two steam-vessels meeting end on, or nearly end on

92. Do they expressly require the course of a vessel to be altered to starboard in any other case ; and if so, in what other ?

No, it is not in any other case expressly required by the regulations

[The Examiner should see that the Candidate places the models in the position indicated by the question 93 and following]

93. If a steam-vessel A sees another steam-vessel's red light B, on her own starboard side, are the steam-vessels meeting, passing, or crossing, and how do you know ?

Crossing, because the red light of one is opposed to the green light of the other ; and whenever a green light is opposed to a red light, or a red light to a green light, the vessels carrying the lights are crossing vessels.

94 Is A to stand on ; and if not, why not ?

A has the other vessel B on her own starboard side. A knows she is crossing the course of B because she sees the red light of B on her (A's) own starboard side. A also knows she must get out of the way of B, because Article 19 expressly requires that the steam-vessel that has the other on her own starboard side shall keep out of the way of the other.

95. Is A to starboard or to port in such a case ?

A must do what is right so as to get herself out of the way of B ; and must, if the circumstances 'of the case permit' avoid crossing ahead of B.

96. If A gets into collision by porting, will it be because she is acting on any rule ?

No ; the rule does not require her either to port or to starboard. If she ports, and gets into collision by porting, it is not the fault of any rule.

97. If a steam-vessel A sees the green light of another steam vessel B on her own (A's own) port bow, are the two steam-vessels meeting, passing or crossing ; and how do you know ?

Crossing, because the green light of one vessel is shown to the red light of the other.

98. What is A to do, and why ?

By the rule contained in Article 21 of the regulations, A is required to keep her course and speed subject to the qualification that due regard must be had to all dangers of navigation and collision ; and that due regard must also be had to any special circumstances which may exist in any particular case rendering a departure from that rule necessary in order to avoid immediate danger. The crossing vessel B on A's port side must get out of the way of A, because A is on B's starboard side.

99. A, a steam-vessel, sees the green light of another steam vessel. B, a point on her, A's port bow. Is there any regulation requiring A to port in such a case, and if so, where is it to be found ?

There is not any.

100. Are steam-vessels to get out of the way of sailing-vessels ?

If a steam-vessel and a sailing-vessel are proceeding in such direction as to involve risk of collision, the steam vessel is to get out of the way of the sailing-vessel unless the sailing vessel is overtaking the steam-vessel.

101. What is to be done by A, whether a steam-vessel or sailing vessel if overtaking B ?

A is to keep out of the way of B

102. When is a vessel considered to be an overtaking vessel ?

Every vessel coming up on another vessel from more than two points abaft her beam, *i.e.*, in such a position, with reference to the vessel which she is overtaking that at night she would be unable to see either of that vessel's side-lights, is an overtaking vessel; and no subsequent alteration of the bearing between the two vessels can make the overtaking vessel a crossing vessel within the meaning of the rules, or relieve her of the duty of keeping clear of the overtaking vessel until she is finally passed and clear.

103. In the day time how do you know when you are an overtaking vessel ?

It is often hard to judge with any degree of certainty, but if in doubt assume you are an overtaking vessel and keep out of the way.

104. Have sailing-vessel under way to keep out of the way of sailing-vessels and boats fishing ?

Yes; they have to keep out of the way of sailing-vessels or boats fishing with nets, or lines or trawls; but this rule does not give to and vessel or boat engaged in fishing the right of obstructing a fairway used by vessels other than fishing vessels or boats.

105. When by the rules one of two ships is required to keep out of the way of the other, what is the other to do ?

To keep her course and speed.

106. Is there any qualification or exception to this ?

Yes. Due regard must be had to all dangers of navigation and collision, and to any special circumstances which may exist in any particular case, and require a departure from the regulations to avoid immediate danger.

107. Is there any general direction in the steering and sailing rules, and if so, what is it ?

Yes, it is this: that nothing in the rules shall exonerate any vessel or the owner, master, or crew thereof, from the consequences of any neglect to carry lights or signals, or of any neglect to keep a proper look-out, or of the neglect of any precaution which may be required by the ordinary practice of seamen, or by the special circumstances of the case.

108. Can you repeat Article (————) of the regulations ? I refer to the article containing the rule for (————).

[The Examiner will repeat this question, naming a different Article each time.]

109. What does the Act of Parliament provide as to the obligation of owners and masters in obeying the regulations respecting lights, fog-signals and steering and sailing ?

Section 419 of the Merchant Shipping Act, 1894, provides that owners and masters shall be bound to obey the regulations, and it also provides that in case of wilful default by the master or owner, he shall be deemed to be guilty of a misdemeanour for each infringement.

110. What do breaches of the regulations imply ?

If an accident happens through non-observance of the regulations, it implies wilful default on the part of the person in charge of the deck at the time, unless it is shown to the satisfaction of the court hearing the case that the special circumstances of the case rendered a departure from the rules necessary.

111. If collision ensues from a breach of the regulations, who is to be deemed in fault for the collision ?

The person by whom the regulations are infringed, unless the court hearing the case decides to the contrary.

112. Is there any special rule for steam-vessels navigating narrow channels ?

In narrow channels every steam-vessel must, when it is safe and practicable, keep to that side of the fairway or mid-channel which is on the starboard side of such vessel.

113. Do the regulations for preventing collisions at sea apply to sea-going vessels in harbours and in rivers ?

Yes; unless there is any rule to the contrary made by a competent authority.

114. Do they apply to British vessels only ?

No, to foreign vessels as well, with the exception of paragraphs (*a*), (*b*), (*c*), (*d*), (*e*), (*f*) and (*g*) of Article 10 of the Order in Council of the 11th August 1884, and Orders in Council of the 30th December 1884, 24th June 1885, and 7th July 1897, which apply only to British vessels.

115. Do you know where the present regulations are to be found ?

Yes, in Article 10 of the Order in Council of the 11th August 1884 and in the Orders in Council of the 30th December 1884, 14th June 1886, 27th November 1896 and 7th July 1897.

116. Is one vessel bound to asist another in case of collision ?

Yes.

117. What is the penalty for default ?

If the master or person in charge of the vessel fails to render assistance without reasonable excuse, the collision is, in absence of proof to the contrary, to be deemed to be caused by his wrongful act, neglect or default.

118 Is there any other penalty attached to not rendering assistance ?

Yes. If it is afterwards proved that he did not render assistance, his certificate may be cancelled or suspended by the court investigating the case.

119. Is it not expected that you should understand the regulations before you take charge of the deck of a vessel ?

It is.

120. Why ?

If I do not understand them and am guilty of default, the consequences will be very serious to me.

121. What would be a serious offence ?

To cause a collision by porting the helm or doing anything not required by the regulations and without due consideration.

AIDS TO MEMORY in four verses, by the late Mr. THOMAS GRAY, C. B.

1. *Two Steam-ships meeting.*

When both side lights you see ahead—
Port your helm and show your RED.

2. *Two Steam-ships passing.*

GREEN to GREEN—or, RED to RED—
Perfect safety—Go ahead !

3. *Two Steam-ships crossing.*

Note. This is the position of greatest danger: there is nothing for it but good look-out, caution, and judgment.

If to your starboard Red appear
It is your duty to keep clear ;
To act as judgment says is proper:—
To port—or Starboard—Back.—or, Stop her.
But when upon your Port is seen,
A Steamer's Starboard Light of GREEN.
There's not so much for you to do.
For GREEN to Port keeps clear of you.

4. *All Ships must keep a good look-out and Steam-ships must stop, and go astern, if necessary.*

Both in safety and in doubt.
Always keep a good look-out
In danger, with no room to turn.
Ease her, stop her, go astern.

APPENDIX F.

SIGNALS TO BE MADE BY SHIPS WANTING A PILOT.

In the daytime.—The following signals, numbered 1 and 2, when used or displayed together or separately, shall be deemed to be signals for a pilot in the daytime, viz. :—

1. To be hoisted at the fore, the Union Jack having round it a white border, one-fifth of the breadth of the flag ; or
2. The International Code pilotage signal indicated by P. T.
3. The International Code flag S with or without the Code pennant over it.
4. The distant signal, consisting of a cone, point upwards, having above it two balls or shapes resembling balls.

At night.—The following signals, numbered 1 and 2, when used or displayed together or separately, shall be deemed to be signals for a pilot at night, viz. :—

1. The pyrotechnic light commonly known as a blue light every fifteen minutes ; or
2. A bright white light, flashed or shown at short or frequent intervals just above the bulwarks, for about a minute at a time.

If a master of a vessel uses or displays, or causes or permits any person under his authority to use or display, any of the pilot signals for any other purpose than that of summoning a pilot, or uses or causes or permits any person under his authority to use any other signal for a pilot, he shall for each offence be liable to a fine not exceeding twenty pounds. [Merchant Shipping Act, 1894, Section 610(3).]

APPENDIX G.

EXAMINATION IN CHART.

For all Grades where the Chart is used (including Home Trade Passenger Ship Certificates).

[The Candidate will be required to work out the following questions on either a "true" or "magnetic" chart,* whichever may be handed to him by the Examiner, and also determine whether the chart is a "true" or "magnetic" one, and whether it is for the northern or southern, and eastern or western hemisphere.]

---

1. Using deviation [card] [curve]† No. find the course to steer by compass from to ; also the distance

Answer.—Compass course .
Distance .
Variation .
Deviation .

2. With the ship's head on the above-named compass course, a point] [lighthouse] bore by compas [and bore by the same compass. find the ship's position.

Answer.—Latitude .
Longitude .

3. With the ship's head as above, a [point] [lighthouse] bore by compass , and after continuing on the same course mile it bore , find the position of ship and her distance from at the time of taking the second bearing.

Answer.—Latitude .
Longitude .
Distance .

All the foregoing questions must be answered, but this does not preclude the Examiner from putting any other questions of a practical character or which the local circumstances of the post may require.

Additional questions for Masters, including Masters of Home Trade Passenger Ships.

4. Find the course to steer by compass from to (*see* Question 1) to counteract the effect of a current which set at the rate of miles per hour, the ship making by log miles per hour; also the distance the ship would then make good in hours towards .

Answer.—Compass course .
Distance .

5. On being off took a cast of the lead; required the correction to be applied to the depth obtained by the lead line before comparing it with the depth marked on the chart.

6. What do you understand the small numbers to indicate that you see placed about the chart, and at what time of tide?

7. What do the Roman numerals indicate that are occasionally seen on the chart near the coasts and in harbours?

8. How would you find, approximately, the time of high water at any place, the Admiralty tables not being at hand, nor any other special tables available?

All the foregoing questions, and those on Form Exn. 9 C., must be answered, but this does not preclude the Examiner from putting any other questions of a practical character or which the local circumstances of the port may require.

---

* The terms "true" and "magnetic" are used for the sake of brevity and convenience, to indicate charts that have compasses delineated upon them showing the "true" or "magnetic" points of the compass respectively.

† A Candidate for an Ordinary Master's Certificate is expected to use either a card of deviations, or a curve of deviations on a Napier's diagram, whichever the Examiner may put before him.

APPENDIX H.

QUESTIONS RELATING TO CYCLONES OR REVOLVING STORMS COMMON IN TROPICAL SEAS.

The Candidate must answer in writing, on paper supplied by the Examiner the following questions, numbering the answers to correspond with the questions :—

Question—

1. The direction of the wind in a cyclone being* _____ state the probable bearing of its centre from the ship in the* _____ Homisphere.
2. And suppose that the wind during the passage of the same cyclone were found to change towards the* _____, what would be the ship's position with reference to the line of progression of the centre of the cyclone, and what action would you take ?
3. Under what conditions would the change in the direction of the wind in the cyclone be the reverse of the above ?
4. What are the usual indications of a ship being on the line of progression of the centre of a cyclone ?
5. What are the usual indications that a ship is (*a*) approaching the centre of a cyclone ; (*b*) receding from it ?
6. Describe the track usually taken by cyclones in the †_____, and state the seasons of the year in which they most frequently occur in that region.

* These spaces to be filled in by the Examiners, and frequently varied.
† The Examiners to fill in whether North Atlantic, Bay of Bengal, China Seas, Indian Ocean, &c., &c.

APPENDIX I.

Questions on the deviation of the Compass used in the examination of Candidates for Certificates as Masters of Foreign-going Ships, as given on examination Form Exn 7 :—

The candidate is to answer correctly such of the following questions as are marked with a cross by the Examiner. At least 12 will be marked.

The Examiner's attention is specially called to the importance of questions, 11, 12, 13, 14, and 39, which must be marked in all cases—

1. State briefly the essentials of an efficient Compass.
2. State briefly the chief points to be considered when selecting a position for your Compass on board ship, and what should be particularly guarded against.
3. What do you mean by Deviation of the Compass, and how is it caused.
4. Describe how you would determine the deviation of your compass—(1) by reciprocal bearings ; (2) by figures on the dock walls ; (3) by bearings of a distant object ; (4) by the bearings of the sun or other celestial body.
5. Having determined the deviation with the ship's head on the various points of the compass, how do you know when it is Easterly and when Westerly ?
6. Why is it necessary, in order to ascertain the deviations, to bring the ship's head in more than one direction ?
7. For accuracy, which is the least number of points to which the ship's head should be brought for constructing a curve or table of deviations ?
8. How would you find the deviation when sailing along a well-known coast ?
9. Name some suitable objects by which you could readily obtain the deviation of the Compass when sailing along the coasts of the Channel you have been accustomed to use.
10. Supposing you have no means of ascertaining the magnetic bearing of a distant object when swinging your ship for deviations, how could you find it, approximately from bearings of the object taken with the ship's head on equi-distant Compass points ; and what distance as a rule should the object be from the ship ?
11. Example :—Having taken the following compass bearings of a distant object, find the object's magnetic bearing, and thence the deviation—

MAGNETIC BEARING REQUIRED :—

Ship's Head by Standard Compass.	Bearing of distant object by Standard Compass.	Deviation required.	Ship's Head by Standard Compass.	Bearing of distant object by Standard Compass.	Deviation required.
1	2	3	4	5	6
North N. E. East S. E.	S. 4° E. South S. 4° W. S. 1° W.		South S. W. West N. W.	S. 13° E. S. 25° E. S. 21° E. S. 11° E.	

12. With the deviation as above, construct a curve of deviations on a Napier's diagram and give the courses you would steer by the Standard Compass to make the following courses magnetic :—

Magnetic courses,—S.S.W., W.N.W., N.N.E., E.S.E.
Compass courses required.

13. Supposing you have steered the following courses by the Standard Compass, find the magnetic courses made from the above curve of deviations :—

Compass courses,—W.S.W., N.N.W., E.N.E., S.S.E.
Magnetic courses required.

14. You have taken the following bearings of two distant objects by your Standard Compass as above ; with the ship's head at W. ½ S, find the bearings, magnetic :—

Compass bearings—W by S. and N. ½ W.
Magnetic bearings required.

15. Do you expect the deviation to change ; if so, state under what circumstances ?

16. How often is it desirable to test the accuracy of your table of deviations ?

17. What is meant by variation of the Compass ; what is it caused by ; and where can you find the variation for any given position ?

18. The earth being regarded as a magnet, which is usually termed the blue, and which the red magnetic pole ?

19. Which end of a magnet (or compass needle) is usually termed the red or "marked" end, and which the blue ?

20. What effect has the pole of one magnet of either name on the pole of another magnet ?

21. What is meant by transient induced magnetism ?

22. Which is the red and which is the blue pole of a mass of soft vertical iron, by induction, and what effect would the upper and lower ends of it have on the compass needle (*a*) in the Northern hemisphere, (*b*) in the Southern hemisphere, (*c*) on the magnetic Equator ?

23. Describe what is usually termed the sub-permanent * magnetism of an iron ship, and state when and how it is acquired, and which is the red and which is the blue pole, and why it is called sub-permanent magnetism ?

24. Describe the meaning of the expression co-efficient A ?

25. Describe the meaning of the exppression co efficient B: its signs and effects,

26. Describe the meaning of the expression co-efficient C : its signs and effects.

27. Describe the meaning of the expression co-efficient D: its signs and effects.

28. Describe the meaning of the expression co-efficient E ; its signs and effects.

29. Would you expect any change to be caused in the error of your compass by the ship heeling over either from the effect of the wind or the cargo, &c. ?

30. The compass of iron ships being more or less effected by what is termed the heeling error, on what courses is this error usually at its minimum, and on what courses at its maximum ?

31. Describe clearly the three principal causes of the heeling error on board ship.

32. State to which side of the ship in the majority of cases is the north point of the compass drawn when ship heels over in the Northern hemisphere.

33. Under what conditions (that is, as regards position of ship whilst building, and the arrangement of iron in the ship) is the north point of the compass needle usually drawn to windward or the high side of the ship in the northern hemisphere, and if not allowed for, what effect has it on the assumed position of the ship when she is steering on northerly and on southerly courses in the Northern hemisphere ?

34. Under what conditions (as in question 33) is the north point of the compas needle usually drawn to leeward or the low side of the ship in the Northern hemisphere, and, if not allowed for, what effect would it have on the assumed position of the ship when she is steering on northerly, and on southerly courses in the Northern hemisphere ?

35 The effects being as you state, on what courses would you keep away, and on what courses would you keep closer to the wind in the Northern hemisphere in order to make good a given compass course (*a*) when north point of compass is drawn to windward or the high side of ship ; and (*b*) when drawn to leeward or the low side ?

36. Does the same rule hold good in both hemispheres with regard to the heeling error ?

* The term sub-permanent magnetism in these questions is used in the original sense as proposed by the late Sir G. B. Airy, to denote the character of the permanent magnetism of an iron ship as distinguished from the permanent magnetism of a magnetised steel bar. The terms "sub-permanent" and "permanent" throughout these questions may, therefore, be considered as synonymous

37. State clearly how that part of the heeling error due to the permanent part of the magnetism of the ship varies as the ship changes her position on the globe, and give the reason for it ?

38. State clearly how that part of the heeling error due to the induction in transverse iron (which was horizontal when ship was upright) and iron vertical to the ship's deck, varies as the ship changes her position on the globe.

39. Your compass having a large error, show by Beall's Compass Deviascope how you would correct it by compensating magnets and soft iron (as usually practised by compass adjusters in the Mercantile Marine) in order to reduce the error within manageable limits. Show also how the heeling error can be compensated.

40. As the co-efficient B (capable of being corrected) usually consists of two parts—one due to the permanent magnetism of the ship, and the other to vertical induction in soft iron, how should each of the two parts, strictly speaking, be corrected when compensating the compass ?

41. If the whole of co-efficient B be corrected by a permanent magnet, as is usually done, what is likely to ensue as the ship changes her magnetic latitude ?

42. Provided the needles of your compass are not so long and powerful, and so near, as to cause the soft iron correctors to become magnetised by induction, would the co-efficient D, if properly compensated, be likely to remain so in all magnetic latitudes and both hemisphere ? If so, state the reason why.

43. State at what distance, as a general rule, the magnets and soft iron correctors should be placed from the compass needles, and what will be the consequence if they are placed too near the needles ?

44. Is it necessary that magnets used for compensating co-efficients B and C should be placed on the deck ? If not state where they may also be placed, and the rules to be observed in placing them into position.

45. Can the compensation of the heeling error be depended upon when the ship changes her latitude ? If not, state the reason.

APPENDIX K.

SYLLABUS of EXAMINATION in the LAWS of the DEVIATION of the COMPASSES of an IRON SHIP, and in the Means of compensating or correcting it.

Candidates for the voluntary examination in compass deviation, and for Extra Master's Certificates will be required to give written answers to 40 of the questions ; these will be marked by a cross by the Examiner. They will also be required to by "Beall's Compass Deviascope"—(1) their knowledge of the tentative method of compass adjustment, and (2) that they understand the practical application of the questions they have answered and of any other questions in the Syllabus that the Examiner may ask. Questions 31, 61, 62, 69, 70, 72, and 92 will be marked by the Examiner in all cases. The other questions will be *constantly* varied :—

1. Describe an artificial magnet, and how a steel bar or needle is usually magnetized.

2. Which end of the compass needle, or a magnet, is commonly termed the red, and which the blue pole ?

3. Which is the red magnetic pole of the earth, and which the blue ; and give their geographical positions.

4. What effect has the pole of one magnet of either name on the pole of the same name of another magnet, and what would be the consequence of the pole of one magnet of either name being brought near enough to effect the pole of contrary name, if in these cases both magnets were freely suspended ?

5. By applying this law to all magnets, natural as well as artificial, describe what would be the result on a magnetic bar or needle, freely suspended, but constrained by weight or by the nature of its mounting to preserve a horizontal position ; and what would be the result, if so mounted, but free to move in every direction ; the earth being regarded as a natural magnet ?

6. What is the cause of the variation of the Compass ?

7. What is meant by the deviation of the compass ?

8. What is ment by the term "local attraction ;" under what circumstances have ships' compasses, from recent careful investigation, been found to be affected by it, and name some of the localities in different parts of the world where this disturbance is to be found, and consequently where increased vigilance is necessary.

9. What do you understand by the term "soft" iron ;and what are its properties as regards acquiring and retaining magnetism ?

10. What do you understand by the term "hard" iron ; and what are its properties as regards acquiring and retaining magnetism ?

11. Describe the meaning of the term 'horizontal force" of the earth ; where is it the greatest, and w ere the least ; and what effect has it in respect to the increase or decrease of the directive force of the compass needle ?

12. Does the magnetic equator coincide with the geographical equator ; if not, state clearly how it is situated ?

13. Where can the values of the magnetic dip, the earth's horizontal force, and the variation, be found ?

14. State in what parts of the globe lying in the usual tracks of navigation the variation changes very rapidly, and what special precautions should be observed when navigating those localities, also why a "variation" chart is then very useful.

15. Why is a knowledge of the magnetic dip and the earth's horizontal force important in dealing with compass deviations ?

16. Describe the meaning of the term "vertical force of the earth; where is it the greatest and where the least?

17. Would you expect a compass to be the more seriously affected by any given disturbing force when near the magnetic equator, or near the poles ? and state the reason.

18. State briefly (*a*) the essentials of an efficient compass; and (*b*) what you would consider a good arrangement of the needles (that is, whether long or short, single or double, &c.) with the view to good compensation

19. In stowing away spare compass cards or magnets, how would you place them with regard to each other, or what might be the probable consequence ?

20. State briefly the chief points to be considered when selecting a position for your compass on board ship, and what should be particularly guarded against.

21. What is meant by transient induced magnetism ?

22. Which is the *red* and which the *blue* pole of a mass of soft vertical iron (for of any soft iron not in a horizontal position) by induction, and what effect would the upper and lower ends of it have on a compass needle in the *Northern* hemisphere.

23. Which is the *red* and which the *blue* pole of a mass of soft vertical iron by induction, and what effect would the upper and lower ends of it have on the compass needle in the *Southern* hemisphere ?

24. What effect would a bar of soft vertical iron have on the compass needle on the magnetic equator ?

25. Describe what is usually termed the sub-permanent* magnetism of an iron ship, and state when and how it is acquired, and which is the sub-permanent red and which is the blue pole, and why it is called sub-permanent magnetism.

26. What is meant by "the composition of forces" and "the parallelogram of forces,' and show how the knowledge of these is valuable in ascertaining and compensating the sub-permanent magnetism of an iron ship ?

27. Describe the nature of the co-efficient B and C plus (+) and minus (—), and the different magnetic forces they represent; also why they are said to produce semicircular deviations.

28. Can semicircular deviations be produced by any other force than the sub-permanent magnetism of the ship ? If so, by what ?

29. On what points by compass bearings of the ship's head does + B give westerly deviation, and on what points does it give easterly ; also on what points does — B give westerly, and on what points easterly ?

30 On what points does + C give westerly deviation, and on what points easterly ; also on what points does — C give westerly, and on what points easterly deviation ?

31. The value of either co efficient B or C being given, also the magnetic direction of the ship's head while she was being built, determine by the traverse tables the approximate value of the other co-efficient C or B and the value of both these co-efficient being given, determine approximately the direction by compass of the ship's head whilst being built, assuming, of course, that these co-efficients resulted altogether from sub-permanent magnetism.

32. Would you expect the greatest disturbance of the needle from the effects of sub-permanent magnetism alone to take place when ship's head is in same direction as when building, or when her head is at right angles to that direction, and in what direction of the ship's head would you expect to find the least disturbance ?

33. Describe quadrantal deviation, and state what co-efficients represent it ; also on what points of the ship's head, by compass, each of these co-efficients gives the greatest amount of deviation, and why it is called quadrantal deviation ?

The term 'sub-permanent" magnetism in the Syllabus is used in the sense proposed by the late Sir G.B Airy to denote the character of the permanent magnetism of an iron ship as distinguished from the permanent magnetism of a magnet sed steel bar. The terms "sub-permanent" and 'permanent" throughout the Syllabus may therefore be considered as synonymous.

34. On what points of the compass will each of the co-efficients, D and E, + and −, give easterly, and on what points westerly deviation?

35. What conditions of the iron of a ship will produce + D and what − D?

36. State clearly which end of horizontal iron running athwartship (such as beams, &c.), and of horizontal iron running fore and aft of a ship, acquires *red* and which *blue* polarity, by induction, when ship's head is at N.E., S.E., S.W., and N.W., respectively.

37. Describe the nature of the deviation represented by co-efficients + A and − A, and describe the errors in the construction of the compass, and other causes, that frequently produce it.

38. What is the object of compensating the compass by magnets, &c., and what are the general advantages of a compensated compass over an uncompensated one?

39. Before adjusting the compass of an iron ship, what it is desirable to do with the view to eliminating, as far as possible, what may be termed the unstable part of the magnetism of the ship?

40. Describe clearly the tentative method of compass adjustment (that is, the compensation of co-efficients B, C, and D, with ship upright) as generally practised by compass adjusters in ships of the Mercantile Marine.

41. State at what distance, as a general rule, the magnets and soft iron correctors should be placed from the compass needles and what will be the consequence if they are placed too near the needles.

42. Is it necessary that the magnets used for compensating co-efficients B and C should be placed on deck? If not, state where they may also be placed, and the rules to be observed in placing them into position.

43 Does the B found on board ship usually arise altogether from sub-permanent magnetism, or does part of it usually arise from some other cause or causes?

44. If the part of B due to induced magnetism in vertical soft iron, as well as the part due to sub-permanent magnetism, are corrected by a magnet alone, as is generally the case, what is frequently the consequence on the ship changing her magnetic latitude and hemisphere?

45. How should each of these two parts of B, strictly speaking, be compensated?

46 Assuming, for the sake of clearness, that your steering compass is unavoidably placed very near to the head of the sternpost (and other vertical iron at the stern), thereby causing a very large—B from induced magnetism; describe briefly any method by which the approximate position for the compensating vertical iron bar (Flinder's or Rundle's) could be estimated in order to reduce the error; describe also how you would proceed, in order to improve, if not, to perfect, its position after observations have been made on the magnetic equator

47. State if standard compasses, as well as steering compasses, are generally subject to this disturbance from induced magnetism in vertical iron; also whether the attraction in all cases is found to be towards the stern; and if not, state the conditions under which it might be towards the bow, and how the compensating soft iron bar should then be placed.

48. Generally speaking, does the magnetism induced in vertical iron usually have any effect in producing the co-efficient C, ship upright, or is it generally produced by sub-permanent magnetism alone? State also your reasons for saying so.

49. Provided the needles of your compass are not so long and powerful, and so near, as to cause the soft iron correctors to become magnetised by induction, would the co-efficient D, if properly compensated as you have described (Ans. 40), be likely to remain so in all latitudes and both hemispheres? If so, state the reason why.

50. Under what circumstances does the character of A and E so change as to render it desirable that these co-efficients should be disregarded or modified?

51. Supposing your compasses were allowed to remain uncompensated, explain clearly what would be the probable changes (ship upright) in the deviations produced separately by (1) the sub-permanent magnetism of the ship alone; (2) by the induced magnetism in vertical soft iron; (*a*) on reaching the equator; (*b*) in the southern hemisphere?

52. Assuming you were able to arrive at the proper proportions to be corrected, and were then to exactly compensate the sub-permanent magnetism of the ship by means of a permanent magnet, and the induced magnetism in vertical iron by a soft iron bar, would you expect any deviation to take place in your compass as the ship changed her latitude and hemisphere? And state your reasons for saying so

53. Supposing the co-efficient D from horizontal soft iron were allowed to remain uncompensated, would you, or would you not, expect the D to differ in name or amount on the ship changing her magnetic latitude and hemisphere? And state the reason.

54. Describe how you would determine the deviation of your compass (1) by reciprocal bearings; (2) by figures on the dock walls; (3) by bearings of a distant object.

55. Describe, in detail, how you would determine the deviation of your compass by the bearings of the sun. Also by a star or planet.

56. Describe the uses to which the Napier's diagram can be applied, and its special advantages.

57. Describe clearly how the Napier's diagram is constructed.

58. For accuracy, what is the least number of points to which the ship's head should be brought for constructing a complete curve of deviations, or a complete table of deviations?

59. Nearing land, and being anxious to check your deviations on a few courses you may probably require to steer, what is the least number of points it will be necessary to steady the ship's head upon, if making use of a Napier's diagram, in order to ascertain the deviation on each of the points, say in a quadrant of the compass and describe clearly how you would do this at sea?

60. Supposing you have no means of ascertaining the magnetic bearing of the distant object when swinging your ship for deviations, how could you find it, approximately, from bearings of the object taken with the ship's head on equi-distant compass points, and how far as a rule, should the object be from the ship when swinging or steaming round?

61. Example:—Having taken the following compass bearings of a distant object, find the object's magnetic bearings, and thence the deviations:—

(*a*) MAGNETIC BEARING REQUIRED:—

Ship's Head by Standard Compass.	Bearing of distant object by Standard Compass.	Deviation required.	Ship's Head by Standard Compass.	Bearing of distant object by Standard Compass.	Deviation required.
1	2	3	4	5	6
North.	S. 75° W.		South.	S. 34° W.	
N. E.	S. 64° W.		S. W.	S. 31° W.	
East.	S. 56° W.		West.	S. 49° W.	
S. E.	S. 50° W.		N. W.	S. 71° W.	

(*b*) Construct a curve of deviations on a Napier's diagram with the deviations as above, and give the courses you would steer by the Standard Compass to make the following courses, magnetic:—

Magnetic courses—N.N.W., S.S.E., W.N.W., E.S.E.
Compass courses required.

(*c*) Supposing you have steered the following courses by the Standard Compass, find the magnetic courses made from the above curve of deviations:—

Compass courses—N.N.E., E.N.E., S.S.W., W.S.W.
Magnetic courses required.

(*d*) You have taken the following bearings of two distant objects by your Standard Compass as above; with the ship's head at N. E. ½ E, find the bearings, magnetic:—

Compass bearings—S. E. by S. and N. N. W.
Magnetic bearings required.

62. Assuming the deviations observed with ship's head by compass to be as follows [or as in question 61, whichever may be given], determine the value of the co-efficients A, B, C, D, and E, and from them construct a complete table of deviations (or for as many points as the Examiner may direct):—

Deviation at North	[ ]	South	[ ]
N. E.	[ ]	S. W.	[ ]
East	[ ]	West	[ ]
S. E.	[ ]	N. W.	[ ]

63. When swinging your ship, if it be required to construct deviation tables for two or more compasses situated in different parts of the vessel, describe the process, and how you would employ the Napier's diagram for this purpose.

64. State your rule for determining whether deviation is easterly or westerly.

65. Is a knowledge of the value of the various co-efficients of any advantage? If so, state why?

66. Describe (*a*) what is commonly known by the term "retentive" or "retained" magnetism, and how the ship acquires it when in port and at sea; (*b*) its effect on the compass needle whilst ship's head continues in the same direction; (*c*) the immediate consequence when the direction of the ship's head is altered, and (*d*) the special precautions to be invariably observed at sea on the alteration of the ship's course.

67. Describe a "Dumb-card" or "Pelorus" and its use (*a*) in compensating a compass, (*b*) in determining the deviation.

68. If you determine the deviation by an azimuth or an amplitude of a heavenly body, it is then combined with variation which together is sometimes called the *correction* for the compass State when the deviation is the difference between the variation

and the *correction*, and when the sum; and when it is of the same name as that of the *correction*, and when of the contrary name.

69. In observing azimuths of heavenly bodies, the best method is by "time azimuths," since these can be observed without an altitude when the ship is in port, or when the horizon cannot be defined from any cause. Given the sun's declination, the hour of the day, and the latitude, to find the true bearing of the sun.*

70. By night, if it be desirable to observe the *correction* of the compass Given the day of the year, and time at ship, also the latitude of the place, to determine what stars will be in good position for this purpose.

71. If your correcting magnets are so mounted that their positions can be altered, describe the process by which on open sea you can place the ship's head magnetic N. (or S.), and magnetic E. (or W.), and can make the correction perfect.

72. Given the name of a star, the time, the place of ship, the variation of the compass, and the bearing of the star by compass. Determine the deviation, and name it east or west.

73. Would you expect any change to be caused in the error of your compass by the ship heeling over either from the effect of the wind or the cargo?

74. Describe clearly the three principal causes of the heeling error on board an iron ship.

75 Towards which side of the ship would that part of magnetism induced in continuous transverse iron (which was horizontal while ship was upright) help to draw the north point of the needle when ship heels over (*a*) in the Northern hemisphere, (*b*) in the Southern hemisphere?

76. Supposing the compass were placed between the two parts of a divided beam or other athwartship iron, towards which side of the ship would iron so situated help to draw the north point of the needle when ship heels over (*a*) in the Northern hemisphere, (*b*) in the Southern hemisphere?

77. Would you expect that part of the magnetism induced in iron exactly perpendicular to the ship's deck, such as stanchions, bulkhead, &c., if below the compass, to cause any part of the heeling error when ship heels over, and if so, towards which side of the ship (*a*) in the Northern hemisphere, (*b*) in the Southern hemisphere?

78. If an ordinary standard compass placed higher than the iron top sides be compensated whilst the ship is upright, what co-efficient will be effected by heeling?

79. Under what conditions (that is, as regards position whilst building and the arrangement of iron in the ship) is the north point of the compass needle usually drawn to windward, or the high side of the ship, in the Northern hemisphere?

80. Under what conditions, as a rule, is the north point of the compass needle usually drawn to leeward, or the low side of the ship, in the Northern hemisphere?

81. State to which side of the ship, in the majority of cases, is the north point of the compass drawn when ship heels over in the Northern hemisphere; and when this is the case, and it is not allowed for, what effect has it on the assumed position of the ship when she is steering on northerly and also on southerly courses?

82. On what courses would you keep away, and on what courses would you keep closer to the wind in both the Northern and Southern hemispheres, in order to make good a given compass course (*a*) when north point of compass is drawn to windward, or the high side of ship, and (*b*) when drawn to leeward or the low side?

83. If a ship is beating to windward, when she tacks, under what circumstances will the heeling error retain the same name, and under what circumstances will it take the contrary name?

84. If a ship is placed on the opposite tack by the change of wind, the ship's course being the same by compass, will the heeling error change its name?

85 In which direction of the ship's head does the heeling error attain its maximum value, and in which direction does it generally vanish?

86. Explain clearly how that part of the heeling error due to the permanent part of the magnetism of the ship varies as the ship changes her geographical position, and what is the reason of this?

87. Explain clearly how that part of the heeling error due to the induction in transverse iron (which was horizontal when ship was upright), and iron vertical to the ship's deck, varies as the ship changes her geographical position.

88. What, then, would be the probable nature of the heeling error, that is, whether to high or low side of the ship, and whether the error would be equal to the sum or difference, &c., of the forces given (1) in high north latitudes, (2) on magnetic equator, (3) in high south latitudes? Assuming the polarity of the sub-permanent magnetism of the ship under, and affecting, the compass, to be as given below; the vertical induction in soft iron, of course, obeying the ordinary laws in the above geographical positions (1), (2), (3)—

(*a*) In cases where the effect of *red* vertical sub permanent magnetism is equal to that of the vertical induction in the soft iron of the ship.

* The process of finding time azimuths by the ordinary formulæ of spherical trigonometry is tedious, and since on board an iron ship these observations should be often repeated, the Candidate will be allowed to use any table or graphic or linear method that will solve the problem within a half of a degree, the altitude of the heavenly body not being given.

(*b*) Where the effect of *red* vertical sub-permanent magnetism is greater than that of the vertical induction in the soft iron.

(*c*) Where the effect of *red* vertical sub-permanent magnetism is less than that of the vertical induction in the soft iron.

(*d*) Where the effect of *blue* vertical sub-permanent magnetism is equal to that of the vertical induction in the soft iron,

(*e*) Where the effect of *blue* vertical sub-permanent magnetism is greater than that of the vertical induction in the soft iron.

(*f*) Where the effect of *blue* vertical sub-permanent magnetism is less than that of the vertical induction in the soft iron.

89. Can the heeling error be compensated? If so, state the means to be employed, and how the compensation may be effected?

90. Can the compensation of the heeling error be depended on in every latitude? If not, state the reason?

91. Do the soft iron correctors used for compensating the coefficient + D have any effect on the compass needle when the ship heels over, and if so, do they draw the needle towards the low or the high side of the ship, and do they counteract, or otherwise, the effect produced by the vertical induction in the soft iron; (*a*) in the Northern hemisphere, (*b*) in the Southern hemisphere; and what is the reason of this?

92. Given the heel, the direction of the ship's head by compass, and the heeling error observed, to find the approximate heeling error, with a greater or less given heel, and with the ship's head on some other named point of the compass, the ship's magnetic latitude being in both cases the same.

93. Describe any instrument to show the ship's heel (generally called a clinometer), and state how and where it should be fixed.

94. Should the clinometer be observed when the ship is swung to determine the deviation when the ship is upright? If so, state the reason why?

95. Would you expect the table of deviation supplied by the compass adjuster from observations made in swinging the ship to remain good during the voyage, or would you expect the deviations to change? If so, state under what circumstances?

96. Is it desirable that a record of your observations for deviations should be kept as a guide for any subsequent voyage in case the ship should be in the same locality, or for further correction of the compass? If so, describe some suitable form for keeping such record.

97. Would you under any circumstances consider it a safe and proper procedure to place implicit confidence in your compasses however skilfully they may have been adjusted? If not, what precautions is it your duty to take at all times?

APPENDIX L.

DEVIATION OF THE COMPASS.

For Masters' Certificates for Home Trade Passenger Ships.

The applicant must answer in writing, on paper given him by the Examiner, all the following questions, numbering his answers to correspond with the numbers of the questions.

1. When taking a meridian altitude, how do you know when the sun is on the meridian; or, in other words, when it is noon?
2. How does the sun bear (*true* and magnetic) when on the meridian of an observer in these latitudes (Home Trade Limits)?
3. What do you mean by deviation of the compass, and how is it caused?
4. Having determined the deviation, how do you know when it is easterly and when westerly?
5. Supposing the sun when on the meridian bore by your compass _____, what would be the deviation of that compass for the direction of the ship's head at the time, the variation given on the chart being_____?
6. How could you find the deviation of your compass when in port, or when sailing along a coast?
7. Name some suitable objects by which you could readily obtain the deviation of your compass, when sailing along the coasts of the channel you have been accustomed to use.
8. The bearing of two objects when in a line with each other was found on the chart to be_____ magnetic; but when brought in a line on board they bore_____ by your compass; required the deviation of your compass for the direction of the ship's head at the time
9. What means are there for checking the deviation of your compass by night?
10. Supposing the North Star (*Polaris*) bore_____ by your compass, what would be the deviation (approximately) of that compass for the direction of the ship's head at the time, supposing the variation given on the chart to be_____
11. Do you expect the deviation to change? If so, state under what circumstances.
12. What is meant by the variation of the compass, and what is the cause of it?

APPENDIX M

COMPASS ADJUSTMENT.

It is of the utmost importance that Masters of ships should thoroughly understand the tentative method of compass adjustment as generally practised in merchant ships, and Examiners are, therefore, directed to fully satisfy themselves that all Candidates for Masters' Certificates have this particular knowledge. It should be tested in connection with the Form Exn. 7 with the aid of Captain Beall's Deviascope, and Candidates will be required to prove —(1) their knowledge of the laws of deviation, and the tentative method of compass adjustment; (2) that they understand the practical application of the answers given by them to any of the other questions on Form Exn. 7 that the Examiner may ask

A concise statement of the present method of tentative compass adjustment is appended for the use of Examiners. It is, however, distinctly to be understood that the Board of Trade are not in any way advocating the correction of that part of co-efficient B which arises from vertical induction in soft iron by a permanent magnet instead of by a soft iron bar. The Board have no authority to interfere with the methods in use amongst compass adjusters for the adjustment of compasses in iron ships, but the Examiners must satisfy themselves that Masters are acquainted with the ordinary method as at present practised.

The TENTATIVE METHOD of COMPASS ADJUSTMENT as generally practised by COMPASS ADJUSTERS in SHIPS of the MERCANTILE MARINE.

Before describing the practice, it will be as well to briefly state the co-efficients used to express the different magnetic forces:—

Co-efficient	A	represents a	constant quantity
,,	B	,,	semicircular deviation due to fore and aft magnetic forces.
,,	C	,,	semicircular deviation due to transverse magnetic forces.
,,	D	,,	quadrantal deviation due to horizontal induction in soft iron.
,,	E	,,	quadrantal deviation due to horizontal induction in soft iron unsymmetrically distributed.

SIGNS AND EFFECTS OF CO-EFFICIENTS A, B, C, D and E.

Co-efficient A represents a constant deviation of the same nature and amount on all points of the compass; + A signifying easterly, and — A, westerly deviation.

Co-efficient + B represents an attraction towards the ship's head, and causes easterly deviations with ship's head in the eastern semicircle of the compass, and westerly deviations in the western semicircle, attaining a maximum value on the east and west points, decreasing to zero on north and south points, by compass.

Co-efficient — B represents an attraction towards the ship's stern, and causes easterly deviations with ship's head in the western semicircle, and westerly deviations with the ship's head in the eastern semicircle, with a maximum value on the east and west points, decreasing to zero on the north and south points, by compass.

Co-efficient + C represents an attraction towards the starboard side of the ship, and causes easterly deviations with ship's head in the northern semicircle, and westerly deviations in the southern semicircle, attaining a maximum value on the north and south points, decreasing to zero on the east and west points by compass.

Co-efficient — C represents an attraction towards the port side of the ship, and causes westerly deviations with ship's head in the northern semicircle, and easterly in the southern semicircle, attaining a maximum value on the north and south points, decreasing to zero on the east and west points, by compass.

Co-efficient + D gives easterly deviations with ship's head between N and E. and S. W.; and westerly deviations between S. and E. and N. and W.

Co-efficient — D gives results exactly the reverse to + D.

Note.—Both + D and — D have a maximum value on the four quadrantal points, and become zero on the cardinal points by compass.

Co-efficient + E gives easterly deviations with ship's head between N. E. and N. W. and S. E. and S. W.; and westerly deviations between N. E. and S. E. and N. W. and S. W.

Co-efficient—E gives results exactly the reverse to + E.

Note.—Both + E and — E have a maximum value on the cardinal points, and become zero on the four quadrantal points, but are usually very small in amount in compasses placed in the middle line of the ship.

Heeling Error.—The heeling error arises partly from vertical induction in transverse iron, and iron vertical to the ship's deck,

and partly from the vertical component of the sub-permanent magnetism of the ship. In the Northern hemisphere in the majority of cases the N. point of the compass needle is drawn to windward or the high side of the ship, with, as a rule, a maximum heeling error on N. and S. points, and zero on E. and W. points by compass. If the compass is not properly placed in the ship, there may be a sensible heeling deviation on E and W. courses.

TENTATIVE CORRECTIONS.

To correct co-efficient C.—With ship's head north or south magnetic place a bar magnet (or more than one if necessary) horizontally and exactly athwartship, either on the deck or on any convenient platform with its centre on the fore and aft line passing through the centre of the compass card, placing its red or marked end to starboard if the N. point of the needle deviates to the starboad side, or to port if it deviates to the port side of the ship, moving the magnet to or from the compass until it points correctly.

Note—The deviation represented by co-efficient C varies inversely as the earth's horizontal force, providing the iron, is symmetrically arranged on each side of the compass.

To correct co-efficient B.—With ship's head east or west magnetic place a bar magnet (or more than one if necessary) horizontally and exactly parallel to the fore and aft midship line of the ship, either on the deck or on any convenient platform, with its centre on the athwartship line passing through the centre of the compass, the red or marked end of the magnet being directed aft if the N point of the compass needle deviates towards the stern, or forward if it deviates towards the bow, moving the magnet to or from the compass until it points correctly.

Note.—The co-efficient B consists of two parts; one is due to the permanent magnetism of the ship, which varies inversely as the earth's horizontal force; the other to vertical induction in soft iron, which varies as the tangent of the dip. As ships in the merchant service are rarely built with a view of providing a satisfactory posit on for the standard compasses, it is very difficult in many ships to find a position for it where it will not be affected by vertical iron. It follows, therefore, that if this deviation be compensated, as is customary, by a fore and aft permanent magnet instead of by a vertical soft iron bar, the poles of the magnet may in some cases require to be reversed in high southern latitudes.

To correct co-efficient + D.—With ship's head on one of the quadrantal points magnetic the + D is generally corrected by boxes of small chain, cylinders of soft iron, or soft iron globes, placed athwartships on the same level, and at equal distances, on the port and starboard sides of the compass, with the centre of their mass on a level with the compass needle, move them to or from the compass till the needle points correctly.

To correct co-efficient — D.—Co-efficient — D, which is of very rare occurrence is corrected by placing the above correctors on the fore and aft sides of the compass

Note.—When once the co-efficient D is properly corrected by soft iron, it is correct for all magnetic latitudes, provided the distribution of the iron in the ship is not materially changed, and provided the magnetism of the soft iron has not been affected by the compass needles. With short needles having small magnetic power, such, for instance, as Sir Wm. Thomson's there will probably be no change; but when a compass with long and powerful needles is employed, soft iron correctors placed very near it become magnetised by induction according to the power of the needles, and the resulting correction will not remain strictly perfect in all latitudes.

To correct Heeling Error.—The heeling error is corrected for any given magnetic latitude by placing a vertical magnet exactly under the centre of the compass card, with its N. or red pole uppermost if the heeling error is to windward or to the high side of ship, or its S. or blue end uppermost if to leeward or to the low side of ship, moving the magnet to or from the compass until the heeling error is corrected

Note.—The heeling error due to the permanent part of the magnetism, varies inversely as the earth's horizontal force, and consequently is greatest in high latitudes, diminishes as the ship approaches the magnetic equator and increases again, still retaining the same name as the ship recedes from the magnetic equator in the Southern hemisphere. The heeling error due to transverse and vertical soft iron decreases as the ship approaches the magnetic equator, where it is zero, and is of a contrary name in the Southern hemisphere. It is probable that the poles of the vertical magnet may require to be reversed in high southern latitudes.

A divided scale should be marked or fitted outside the tube or some other convenient place so as to show the proper position for the correcting magnet as found in any given magnetic latitude, and the same recorded as a guide for approximately placing the magnet in position on any subsequent voyage in the same locality, and especially on the return of the ship to the United Kingdom.

Candidates should understand that the object of tentative adjustment is to bring the deviations within manageable limits and also to equalise the directive force of the needle so far as is practicable on all courses; but no system of adjustment whatever, is sufficiently reliable in character to absolve the navigator from the necessity of using every precaution, and especially of ascertaining the deviation on every available opportunity by observations of the sun by day and the other heavenly bodies by night.

APPENDIX N.

EXAMINATION OF A MASTER OR MATE IN STEAM.

The regulations under which these examinations are conducted are printed at pages 27 to 29

A Candidate for this examination is required to have a thorough grasp of the construction of the steam-engine and boiler, to enable him to understand the nature and importance of any defect which may be reported to him by the engineer, and work in harmony with the engineer, in affording time and facilities for disconnexions, inspections, adjustments, and repairs.

To have a knowledge of what the principal repairs are which are needed in engines and boilers and pipes, and how these repairs are usually accomplished.

To be able to form an independent opinion as to a breakdown and the consequent propriety or impropriety of proceeding under reduced steam with temporarily repaired or defective machinery. To understand how to estimate approximately the reduction of fuel required for reduced speed, and consequently to sanction such reduction of speed as may seem to him to be warranted by the report of the engineer, and to satisfy himself before leaving port that there is sufficient coal for the voyage.

To have an intelligent grasp of the general run of pipes and connexions in the engine-room, the marking of cocks, the opening and closing of cocks and valves, how mistakes of importance may be made in the confusion of an accident, and how best to guard against such mistakes.

To be capable of being left in charge of the feeding of a set of boilers, to understand the working of the water-gauge, and to be able to guard against being misled by false indications of the gauge-glass.

To understand about blowing down and surfacing, the reasons for doing so, and the danger which may result from the neglect of these under certain circumstances. A Master or Mate presenting himself for examination in steam must be understood to have made up for his want of practical experience by reading up about the steam-engine. He ought, therefore, to show that he has given his mind to intelligently understanding the *rationale* of the action of the steam-engine. Under this head he should, therefore, be able to state approximately the quantity of heat required in the formation of steam, the remarkable relation of "latent" heat to "sensible" heat, how much steam can be raised by the combustion of one pound of coal, what horse-power measure is, what indicated horse-power is, what is the action of the slide-valve, the course of the steam through the engine, and the advantage of working expansively, and how the expansive action is shown by the indicator diagram. To know the uses of various parts of the engines and dynamos used for electric lighting, and how they and the cables are fitted in the hull; how wires are jointed, insulated and cased; why it is desirable that they should be led along places which are dry and accessible; what is "sparking" and what are the causes which produce it; what is its danger in coal bunkers and petroleum-carrying steamers; what are the uses of switches and cutouts, and why is it so important to prevent short circuiting taking place.

The Candidate has to answer in writing 16 out of 20 questions selected from the book of Elementary Questions * Selections for this examination are given on the alphabetic sheet for "Steam." Generally, these answers are given by Candidates as learned by rote from a book; the Candidate should, therefore, be asked such *viva voce* questions as will necessitate his giving his answers in different words, so as to discover whether he has the root of the matter in him.

The principal part of the *viva voce* is the examination on board a steamer, preferably one with which he is unacquainted. He is told to look about and try to find out the run of the machinery without the assistance of any one; the Examiner to be in the engine-room to see that this independent examination is properly carried out When the Candidate reports that he thinks he knows the whole arrangement of

* Printed at end of the Regulations relating to the Examinations of Engineer Eng. 1A.

the machinery, the Examiner will then question him on the uses of the parts, get him to point out the different cylinders, pumps, valves, condenser, &c., also the dynamo, its field magnets, armature commutators, brushes, cables, &c. He must show that he understands the run of the pipes in the bilges, not necessarily that he has gone over every one of them, but he ought to be directed to trace, at least, one important range of pipes, and to thoroughly satisfy the Examiner that he could be safely trusted to manipulate the valve or cocks in connection therewith. It will not often be practicable for the Candidate to be asked to actually work engines under steam, but he must satisfy the Examiner that he knows how to do so, and that he is aware what precautions have to be taken in regard to water in the cylinder, &c It is most important that a Candidate should show that, in the event of an accident depriving him of the assistance of engineers, he knows what to do to safely take his vessel to an anchorage, or to stop the engines and proceed under sail alone.

The examination of a Mate in steam is the same as that of a Master. The knowledge required has no reference to the Mate's position A Mate may be examined, but such examination implies that the Mate will one day be a Master, when the possession of the knowledge will be an advantage to him in the discharge of his duties as Master.

APPENDIX O.

THE SIGHT TESTS.

1—Form Vision Test.

(1) The test for Form Vision in the first test which the candidate is required to undergo, and until he has passed this test, he cannot be allowed to proceed further with the examination. (*See* paragraph 10, page 3) — Test for Form Vision to be passed first.

(2) The test to be used are Snellen's Letter Test for Candidates who can read, and the "Dot" tests for those who cannot read. — Tests to be used.

The sets of tests, which have been supplied to the Examiners consist, respectively, of eight sheets of Snellen's letters and two sheets of dots.

(3) The chief object of the tests for Form Vision is to show whether the Candidate possesses eyesight of sufficient strength and range, or, in other words, they are means of discovering whether the Candidate has good or bad sight. — Object of the tests.

They also afford a means of detecting whether a Candidate is suffering from that form of colour-blindness which is caused by the excessive use of tobacco, and by illness of similar affections. All candidates who are suffering from colour-blindness arising from causes of that nature, will be found to be incapable of passing the test for Form Vision.

(4) Candidates may use both eyes or either eye when being tested, but they must not be allowed to use spectacles or glasses of any kind. — General conduct of the tests.

The set of tests is to be hung on the wall, *in a good light*, at a height of about five or six feet from the ground.

(5) If the Candidate can read, he should be placed at the distance of 16 feet from the Letter Test sheets, and exactly opposite them. The distance which should never be varied should be carefully measured, and the Candidate should not be allowed to approach within 16 feet of the test sheets. — Conduct of the Letter Test.

One of the eight sheets of letters should then be exposed, and the Candidate should be asked to read the letters, beginning at the top and going downwards. If he can read correctly three of the five letters in the fifth line from the top (third from the bottom), or four of the letters in either of the two lines below, he may be considered to have passed the test. If he cannot do so, he should be treated as having failed. Candidates should be tested with at least two of the sheets of letters, and the same two sheets should not be used for all Candidates.

(6) The number printed over each row of letters only shows the distance in feet at which a person possessing ordinary or normal sight to be able to read the letters in the row and does not apply to the distance at which a Candidate under examination should be tested. — Meaning of the numbers on the Letter Test sheets.

(7) If the Candidate cannot read, he must be tested with the sheets of dots. For this test he is to be placed at a distance of precisely eight feet from the test sheets, and exactly opposite them. One of the sheets of dots is then to be exposed, and the Candidate should be asked to name the number of dots in one or two of the lines of groups. Lines and groups of dots can be formed by holding a piece of white paper over part of the sheet, but care must be taken that when this is being done, the Candidate's view is not obstructed, or the light on the test sheet in any way obscured. — Conduct of the Dot Test.

The Examiner must make sure that the Candidate understands what he is required to do.

If the Candidate answers the questions put to him by the Examiner with complete or very nearly complete accuracy, he should be treated as having passed. If he does not answer with very nearly complete accuracy, he should be treated as having failed.

Tests to be varied.

(8) The Examiner must take care, by varying the tests in Form Vision, and by every other means, to guard against the possibility of any deception on the part of the Candidates. The distance at which the Candidate must stand, and the standard of the vision required, should, however, never be varied.

Pellet Test.

(9) Every Candidate who fails to pass the Form Vision test is to be examined with the pellet test as follows:—

The pellets should be placed on a white plate, and the first test pellet (which is of the same colour as the first wool test skein) should then be placed at a little distance on another white plate. The Candidate should be required to pick out and lay by the side of the test pellet, all pellets of the same colour. The same should be done with the second and third test pellets, and the examination should proceed in the same way as the wool test.

(10) Should the Candidate pass the pellet test, the Form Exn. 17B together with the remarks of the Examiner, is to be forwarded to the Principal Examiner, for his instructions as to whether the Candidate is or is not be regarded as having failed in Form Vision.

(11) Should, however, the Candidate fail in the pellet test, thus indicating that the defective form sense is due to disease, &c., it will not be necessary to submit the case to the Port Officer, but the Examiner should report the Candidate as having failed in Form Vision, and in forwarding the usual papers, a description of the colours of the pellets incorrectly selected as matches in the respective tests, with any remarks, should be given on the Form Exn. 17C, in the space allotted for the incorrect wools.

Result of test, to be reported.

(12) The result of every test in Form Vision is to be reported to the Government, on the Form Exn. 2, and to the Port Officer on the Form Exn. 14, when the Candidate is up for examination for a certificate and to the Government on the Form Exn. 2*a*, when the Candidate is up for examination in colours only.

All cases of failure to pass the test are also to be reported to the Port Officer on Form Exn. 17B.

2.—*Colour Vision Test.*

Nature of the tests.

(1) The Colour Vision of Candidates is to be tested by means of Holmgren's wools.

The wools are always to be kept in the tins provided for the purpose, except when in use at an examination, in order that they may not become faded or dirty. Each set contains about 135 skeins of wool.

General instructions.

(2) Before the examination commences, the skeins should be separated from one another, but each separate skein should be kept tied up as when first received.

The three test skeins are labelled respectively I (light green), II*a* (pink) and II*b* (red), and they are always to be used in the order mentioned.

Care must be taken that the labels do not get detached.

The Colour Vision Test should be held only by daylight. If a good natural light is not obtainable, and artificial light has to be used, the test must be postponed. When the weather is dark or foggy, and a Candidate cannot be examined in colours before his examination in Navigation commences, he may be allowed to proceed with the examination in Navigation, provided he is examined in colours on the first available opportunity.*

Full instructions as to the conduct of the examination will be fund on pages 97 to 104.

Course to be followed if incorrect selections are made by Candidates.

(3) The Examiner, as the examination proceeds, should carefully place on one side the skeins, the selection of which by the Candidate seems to indicate a defect in Colour Vision, taking care to discriminate between those selected as matching the first test skein, those selected as matching the second test skein, and those selected as matching the third test skein.

The skeins which have been correctly selected, should be returned to the general heap on the completion of each of the three tests.

Pieces of the wools incorrectly selected by a Candidate who fails are to be sent to the Principal Examiner of Masters and Mates

(4) In every case in which the Examiner rejects a Candidate, or is in doubt as to whether he should reject him or not, he is, when the examination is finished, to cut a small piece (say, an inch) off *every one of the actual skeins incorrectly selected by the Candidate*, and to stitch the pieces cut off on to Form Exn. 17*c*, keeping the pieces cut off the skeins selected as matches to the first test skein in one line, the pieces cut off the skeins selected as matches to the second test skein in another line, and the pieces cut off the skeins selected as matches to the third test skein in a third line on the Form. The Form (Form Exn. 17*c*), with the pieces of wool attached to it, is then to be forwarded to the Port Officer, with the Examiner's report, on Form Exn. 17B.

The greatest care must be taken that the pieces forwarded are cut off the actual skeins selected by the Candidate, in order that there may be a reliable record of the actual selections made by the Candidate if any question should subsequently arise.

Pieces need not be cut off the test skeins, but only off the skeins incorrectly selected by the Candidate.

* When the examination in Navigation precedes the Colour Tests, the Candidates should be informed that the examination in Navigation will count for nothing if they should fail to pass the Colour Test.

(5) In cases in which the Candidate passes the test, pieces need not be cut off the skeins he has selected. *If the Candidate passes, pieces of the wools need not be cut*

(6) When the Candidate makes incorrect matches, the Examiner should, after each of the three tests, hold up the skeins selected, and ask the Candidate if he is satisfied that they all match the test skein. If he is not satisfied, he may be allowed to withdraw any of the skeins he pleases. *Candidates should be given the opportunity of correcting their mistakes.*

(7) During the test for colour-blindness the Examiner should avoid naming the colours of any of the wools, and should explain to the Candidate that he does not require them to be named to him. *Candidates are not required to name the colours of the wools.*

In the test for colour ignorance the Candidate has to name three colours. (*See* page 68.)

(8) As soon as any skein becomes discoloured, or unduly reduced in size (say, by one-third), owing to pieces having been cut off it, the matter should be reported to the Government. *Courses to be taken when the skeins of wool become reduced in size or discoloured.*

(9) In the remarks which follow, reference is made to different kinds of colour-blindness (red-blindness and green-blindness), but the Examiner is not required to form any conclusion as to the kind of colour-blindness from which the Candidate suffers, and should not offer the Candidate any opinion on this point. *Examiners are not required to decide from what form of colour-blindness an unsuccessful Candidate is suffering.*

All that is required is that the Examiner shall conduct the examination according to the rules laid down, and from the wools selected judge whether the Candidate is or is not colour-blind, the nature of his colour-blindness being immaterial.

(10) The result of every test should be reported to the Government on the Form Exn. 2, and to the Port Officer on the Form Exn. 14, when the Candidate is up for examination for a Certificate of Competency, and to the Government on the Form Exn. 2*a*, when the Candidate is up for examination in colours only. *Result of tests to be reported.*

All cases of failure should also be reported to the Port Officer on Form Exn. 17*b*, to which should be attached Form Exn. 17*c*, containing the pieces of the wools incorrectly selected by the Candidate. (*See* paragraph 4, page 62.)

HOLMGREN'S METHOD OF TESTING FOR COLOUR.

The method of testing consists in asking the Candidate to select from variously coloured objects those which appear of the same colour as one which the Examiner selects. The most suitable objects and at the same time the most readily obtainable are skeins of wool, which can be procured of almost every desired hue and tone. An advantage of skeins of wool, besides their portability, is that, owing to their want of gloss, they appear of approximately the same tone from whichever side they are viewed. The colours of the skeins to be selected include reds, oranges, yellows, yellowish greens, pure greens, blue-greens, blues, violets, purples, pinks, browns and greys. Several shades of each colour, with at least five gradations of each tint, are provided, from the deepest to the lightest greens and greys. Varieties of pinks, blues, and violets, and of light grey, together with shades of brown, yellow, red, and pink, are well represented The test skeins with which the examinees are to compare the other skeins are three in number:—(1) a light green; (2) a pink; and (3) a bright red. These three colours will suffice to indicate approximately the amount and kind of colour-blindness which may exist. The light green skein, which is a tolerably pure green mixed with a large proportion of white, is chosen as the colour which closely matches the spectrum colour which the red and green-blind distinguish as white or grey. It is chosen of a pale tint, as it then becomes puzzling to the colour-blind to distinguish its colour by luminosity. A light grey or drab skein will present the same brightness to him that this pale colour does, and, although he may be trained to distinguish bright colours by their relative luminosities, in the case of these pale varieties he will be unable to do so. The pink is chosen for similar reasons, and in fact it is nearly a complementary colour to the green. The pink is, according to the Young-Helmholtz theory, a mixture of two fundamental colours, the blue and the red, and, as in the green-blind it excites both the blue and red sensations, it may be confused with grey or with a green. In the red colour-blind it excites in excess the blue sensations mixed with what they call white. A blue or violet may, therefore, be matched with it.

The method of examination is as follows:—

Method of Examination and Diagnosis.

The wools are placed in a heap on a large table covered by a white cloth or white paper, and in broad daylight. The first test skein is taken from the pile, and laid far enough away from the others not to be confounded with them during the examination. The person examined is requested to look carefully at the test skein and then to select other skeins from the pile most nearly resembling it in colour, and to place them by the side of the sample. At the outset, it is necessary that he should thoroughly understand that he is required to search the heap for the skeins which make an impression on his chromatic sense, or sense of

colour, similar to that made by the test-skein, and quite independently of any name he may give the colour. The Examiner should explain that resemblance in every respect is not necessary; that there are no two specimens exactly alike; that the only question is the resemblance of the *colour*; and that, consequently, the Candidate must endeavour to find something similar in shade and something lighter and something darker of the same colour. If the person examined cannot succeed in understanding this by a verbal examination, resort must be had to action. The Examiner should himself pick out the skeins, thereby showing in a practical manner what is meant by a shade, and then restore the whole to the pile, except the sample skein. As it would require too much time to examine every individual in this way, it is advisable, when examining large numbers, to instruct them all at once, and to ask them to attentively observe the examination of those preceding them so as to become more familiar themselves with the process. This saves time, and there is no loss of security, for no one with a defective chromatic sense will be able to find the correct skeins in the heap the more easily from having a moment before seen others looking for and arranging them. He will make the some characteristic mistakes; but the normal observer, on the other hand, will generally accomplish his task much better and more quickly after having seen how it has to be done.

The coloured plate shows the test colours and some of the mistakes likely to be made by colour-blind people. The colours in the plate are of two characters:—

1st.—The *colours for samples* (*test colours*); that is, those which the Examiner presents to the persons examined; and

2nd. The "*confusion colours*"; that is to say, those which the colour-blind may select as matches with the sample.

The first are shown on the plate as horizontal bands, and are distinguished by Roman numerals (I, II*a*, and II*b*), the second as vertical bands, under the test colours, and are distinguished by Arabic figures (1, 2, 3 etc.)

As to the similarity between the confusion colours of the plate and the wools which the colour-blind take from the heap, reliance must be placed simply on the hue, and not their brightness or degree of colour saturation. The confusion colours shown in the plate are only to illustrate the mistakes which the colour-blind may make, and for this purpose they survey perfectly. Having made this explanation, we can pass directly to the test itself. The following are the direction for conducting it, and for making a diagnosis from the results:—

TEST I.—The *green* test skein which is labelled Test No. I in the bundle is exhibited to the Candidate. This sample is the palest shade (the lightest) of very pure green, which is neither a yellow-green nor a blue-green to the normal eye, but fairly intermediate between the two, or at least not verging upon yellowish-green.

Rule.—The examination must continue until the examinee has placed near the test skein several other skeins of the same colour, or else, with these or separately one or more skeins of the class of "confusion colours" such as 1 to 5 in the plate, or until he has sufficiently proved that he can easily and unerringly distinguish the confusion colours, or else has given unmistakeable proof of a difficulty in accomplishing it.

Diagnosis.—An examinee who places with the test skein "confusion colours" such as 1 to 5—that is to say, finds that they resemble the "test colour"—is *colour-blind*, whilst if he evinces a manifest disposition to do so, though he does not absolutely do so, he has a *feeble chromatic sense*, or sense of colour.

Remark.—We might have taken more than five colours for "confusion"; but we must remember that we are not taking into consideration *every* kind of defective colour sense.

TEST II.—The pink or light-purple skein, which is labelled No. II*a*, is shown to the examinee. The colour is midway between the lightest and darkest. It only approaches that given as II*a* of the plate, as the colour of the wool is much more brilliant and saturated and bluer.

Rule.—The trial must be continued until the examinee has placed all of the greater part of skeins of the same colour near the test skeins, or else, together or separately, several skeins of the "confusion colours," such as 6—9. If he is colour-blind, he will probably select either the light or deep shades of blue and violet, especially the deep (6 and 7), or the light or deep shades of one kind of green or grey inclining to blue (8 and 9).

TEST III.—The *red* skein labelled No. II*b* is presented to the examinee. It is necessary to have a vivid red colour, like the red flags used as signals on Railways. The colour should be that of II*b* of the plate, rather towards yellowish-red.

Rule.—This test should be continued until the person examined has placed beside the test skein the greater part of the skeins belonging to this hue, or else several "confusion colours" (10—18).

Remark.—Every case of comparatively complete colour-blindness does not always give precisely the same mistakes. Instances occur of persons who are not completely colour-blind, or of completely colour-blind persons who have been practised in the colours of signals and who endeavour not to be discovered. They usually confound at least green and brown, but even this does not always happen.

Mono-chromatic Vision.—The absence of every colour sensation, except one, will be recognised by the confusion of all the hues, which will appear to be of the same intensity of light or brightness.

Dr. Joy Jeffries in his book on colour-blindness, gives a translation of Holmgren's special directions for conducting the examinations. The examinations to which Holmgren refers were for employés on the Swedish railways, but the remarks which follow are applicable to examinations for officers and seamen in the Mercantile Marine.

Special Directions for Conducting the Test.

The method plays an important part in an examination of this kind, not only from the principles upon which it rests, but also from the manner in which it is used. The best plan for directing how to proceed is by oral instructions and *de visu*, but here we are obliged to accomplish this by description. Now, this is always defective in some respects, especially if we wish to be brief. What has been said would evidently suffice for an intelligent and experienced physician; but it may not be superfluous to enter still further into detail to provide against any possible difficulties and loss of time. The object of the examination is to discover the nature of a person's chromatic sense, or sense of colour. Now, as the fate of the Candidate and that of others depend upon the correctness of the judgment pronounced by the Examiner, and, as this judgment should be based upon the manner in which the Candidate stands the trial, it is of importance that this trial should be truly what it ought to be a trial of the nature of the chromatic sense, and nothing else; an end that will be gained if our directions are strictly followed. It is not only necessary that the Examiner should be carefully observe them which does not seem to us difficult—but that he also should take care that the individual examined does thoroughly what is required of him. This is not always as easy as one might suppose. If it were only required to examine people familiar with practical occupations and especially with colours and with no other interest connected with the issue of the examination than to know whether they are colour-blind or not, the examination would be uniform and mechanical; but it is required to examine people of various degrees of culture, all of whom, besides, have a personal interest in the issue of the examination. Different people act very differently during the examination for many reasons. Some submit to it without the least suspicion of their defect; others are convinced that they possess a normal sense. A few only have a consciousness, or at least some suspicion, of their defect. These last can often be recognised before examination. They will keep behind the others, and attentively follow the progress of the trial, and, if allowed, will willingly remain to the last. Some are quick, others slow. The former approach unconcernedly and boldly, the latter with over anxiety and a certain dread. Some have been, perhaps, already tested and have practised in preparations for the trial; others have never been familiar with colours. Among those already tested, some may be colour-blind. Some of these latter are uncertain about their Colour Vision and act with great care, whilst others again, having been practised in distinguishing signals, conclude that their colour sense is perfect. They make the trial quickly and without thought, of course, regularly making the mistakes characteristic of their special form of colour-blindness.

The majority, however, desire to perform their task as well as possible, that is, to do what the normal eye does. This, of course, assists in testing them, provided it does not lead to too great care, as then the testing is more difficult, the trouble being that much time is wasted.

Only a very small part have a contrary desire, namely, to pass for colour-blind, though normal eyed. We will speak of these later, and now only concern ourselves with those who stand the test in good faith with the desire to appear normal, though perhaps they are colour blind.

The trial generally goes on rapidly and regularly. We will only mention those hindrances and peculiarities which most frequently occur. The Examiner must watch that no mistake is made from not understanding. The names of the colour need never be used, except to ascertain if the name hides the subjective colour sensation, or to find the relation between the name the colour-blind employs and his colour preception.

The person examined who thinks more of names than the test itself (this being generally a sign of school-learning) selects not only the wools of the same hues—that is, those of the same colour to his eye—but all which generally have the name of this colour; for instance in the first test 1, not only the green like the sample, but all that are green; and with the second test, not only the pink (and what are generally called red), but all which *look* reddish, scarlet, cinnabar, or sealing-wax red. This is of no importance, for those who only do this have scarcely such defective chromatic sense as that with which we are concerned.

Under any circumstances it is better to correct the mistakes just mentioned, when arising from misunderstanding, and it is even necessary, in reference to the mistake we explained might occur with the first test. It might be said that it was sufficient if the examinee

confounded the test colour with green only; that it was indifferent whether he distinguishes carefully between the various kinds of green. But, in fact, this is not so unimportant. We must give full weight as to whether the confusion arises from misunderstanding, or lack of practice with colours, or, finally, from a true chromatic defect To include all that is green would render the test tedious and unpractical In fact, no little judgment has been exercised in the selection of the very lightest shade of the green proposed as a test colour, for it is exactly what the colour blind most readily confounds with the colours (1-5) of the plate If the examinee were allowed to depart from the narrow limits, every shade of green could be included, the result of which would be that he would prefer to select all the vivid shades, and thus avoid the dangerous ground where his defect would certainly be discovered. This is why it is necessary to oblige him to keep within certain limits, confining him to pure green specimens, and, for greater security, to recommend him to select especially the lightest shades; for, if he keeps to the darker shades, as many try to do, he readily passes to other tone, and loses himself on foreign ground, too the great loss of time and of the certainty of the test What we have just said of green applies also, of course, to pink. (Test II*a*)

The principle of our method is to force the examinee to reveal, by an act of his own, the nature of his chromatic sense.

Now, as this act must be kept within certain limits, it is evident that the Examiner must direct him to some extent. This may present in certain cases, some difficulty, as he will not always be guided, and does either too much or too little. In both cases the Examiner should use his influence, in order to save time and gain certainty, and this is usually very easily done. This intervention is, of course, intended to put the examinee in the true path, and is accomplished in many ways according to the case in point.

We will here mention some of the expedients we have found useful:—

(A) *Interfering when the Candidate selects too many Colours*

It is not always easy to confine the Candidate within the proper limits. In the first test he easily slips a yellow-green or blue green skein among the others, and as soon as there is *one*, others follow usually; and it thus happens that in a few moments he has a whole handful of yellow-green, a second of blue green, a third of both these shades, at the same time Our procedure has assisted us in more than one case of this kind

(*a*) When the person examined has begun to select shades of one or several other colours than those of the sample, his ardour is arrested by taking from him the handful of skeins he has collected and asking him whether his eye does not tell him there are some which do not match the others, in which case he is told he may restore them to the pile. He then generally proceeds in one of the following manners:—

1. He rejects, one after the other, the incorrect skeins, so that only the correct remain, which is often only the sample skein He is shown what mistake he has made, and he is told only to select skeins of the same hue as the specimen, although they may be lighter or darker. If his first error arose only from a misconception or want of practice in handling colours, he begins generally to understand what he has to do, and to do properly what is required of him.

2. Or else he selects and rejects immediately the test skein itself. This proves that he sees the difference of colour He is then shown the test skein as the only correct one, and is asked to repeat the trial in a more correct manner He is again put on the right track as just before, and the trial proceeds rightly, unless the error arose from a defect in colour sense Many seem, however, to experience a natural difficulty in distinguishing between yellow-green and blue-green, or the dull shades of green and blue. This difficulty is, however, more apparent than real, and is corrected usually by direct comparison. If the method requiring the name of the colour to be given is used, a number of mistakes may be the result If a skein of light green and light blue alone are presented to him, and he is asked to name them, he will often call blue green and green blue. But, if in the first case a blue skein is immediately shown him, he corrects his mistake by saying "this is blue" and "that green." In the last case the same thing happens *mutatis mutandis* This is not the place for an explanation. It must suffice to say that the error is corrected by a direct comparison between the two colours.

(*b*) *Another Process*—If the Candidate place by the side of the sample a shade, for instance, of yellow-green, the Examiner places near this another shade, in which there is more yellow, or even a pure yellow, remarking at the same time that if the first suit the last must also The Candidate usually dissents from this He is then shown, by selecting and classing the intermediate shades, that there is a gradation, which will diverge widely if logically carried out as he has begun. The same course is followed with colours of the blue shades, if the blue-green were first selected. He sees the successive gradations, and goes through with this test perfectly if this chromatic sense is correct.

To ascertain further whether he notices the tints of yellow and blue in the green, we can ourselves take the yellow-green and blue-green

and ask him if he sees any difference in colour between them. We can judge by his answer of his sense with regard to these shades, and the object of this investigation is accomplished.

It results from all this that many who are finally considered to have a normal chromatic sense may occasionally cause embarrassment. In the main, the normal observer of this kind causes greater loss of time than the colour-blind. It is astonishing to see with what rapidity the colour-blind betray their defect. At least it is found, in the majority of the cases examined by us, that the first skein of wool selected from the pile by the colour-blind in the first test was one of the "colours of confusion."

(B) *Interfering when the Candidate selects too few wools.*

Those who evince too great slowness also require the interference of the Examiner in another manner. We can lay aside here those cases in which, at the sight of the complex colours of the heap of wool, the Candidate finds it difficult to select a skein resembling the sample in a collection where all the particular colours seem to differ from each other, and in consequence declares immediately that he can find none resembling the specimen. He is then told that an absolute resemblance is not demanded, and that no one asks impossibilities; that time is limited, many are waiting, etc. But there are people who—from natural slowness, from being unaccustomed to such business, from fear of making mistakes, especially if they have been previously examined and been suspected of colour-blindness, or from many other motives—proceed with the greatest caution. They do not even wish to touch the wool; or they search, select and replace with the greatest care all the possible skeins without finding one corresponding with the sample, or that they wish to place beside it. Here, then, are two cases: on one hand, too much action with the fingers, without result; on the other, too little action. The Examiner is forced to interfere in both cases:—

(*a*) In the case of too much manual action, without corresponding practical result, the Examiner must be careful that the eye and hand of the Candidate act simultaneously for the accomplishment of the desired end.

Some people forget that the hands should be subservient to the eye in this trial, and not act independently. Thus they are often seen to fix their eyes on one side, while their hands are engaged on the other. This should be corrected, so as to save time and avoid further labour. The candidate should be told to cross his hands behind is back, to step back space, and quietly consider all the skeins, and, as soon as his eye has met one of those for which he is looking, to extend his hand and take it. The best plan is to advise him to look first at the sample, and then at the pile, and to repeat this manœuvre until his eyes find what he is looking for.

This plan generally succeeds when nervousness from over anxiety causes his hands to tremble; but it is not always easy to induce him to keep his hands behind his back until the moment for taking the skein in question

(*b*) In cases of great caution the trial is hastened, if the Examiner come to the assistance of the Candidate, by holding above the pile one skein after the other, and requesting him to say whether it resembles the colour of the sample or not.

In cases where any one suspected of colour-blindness has remained some time to see the trial of others, and where, as often happens, he has remarked the skeins belonging to a required shade, he may, of course, profit by it in his own trail. But this can be prevented by shuffling the skeins.

It may be regarded as an advantage of this method that it has at command a great variety of resources We have by no means mentioned all; and yet many who have only read this description will probably reproach us with having devoted ourselves too much to details which seems to them puerile. But we believe that those who have examined the colour sense of a great number of persons, and acquired thereby considerable experience, will think differently.

We are convinced that time is saved by the means we have described and a more certain result obtained; whilst a practised surgeon, who has become to a certain decree a *virtuoso*, will accomplish his object quicker and surer by such means than one who neglects them Recent experience fully confirms this. All those who have familarized themselves with this method, and have had experience with colour-blindness, and of whose competence there can be no doubt, report, without exception, that it is to be fully depended on—the most practical and the best.

An advantage of the method was shown to be that those who were to be examined could be present and see each individual tested, without this interfering in the least with the certainty of the result. The individual test is even hastened thereby. The colour-blind, and even the moral-eyed who are not familiar with colours, are generally rather shy about being tested, in whatever way it is done. As the method, however, is carried out, they have more confidence. The majority are even amused The old adage holds true here, that it is easier to find fault than to do it yourself. The Surgeon, who watches not only the examined, but also those around, can often see from their faces how closely the latter observe the person being tested, when he takes out the wrong colours, as also when he neglects

the right ones under his eye. This gives those looking on confidence and assurance, till their turn comes, when they appear as uncertained as before they were confident. There is something attractive in the process, stimulating the interest and not without benefit.

From this we see that our judgment of a person's colour sense is made, not only by the material result of the examination—the character of the words selected—but often also by the way the examined acts during the test. We should mention a very common manner of persons on trial, which, in many cases, is of great value in diagnosis. Often, in searching for the right colour, they suddenly seize a skein to lay it with the sample, but then notice it does not correspond, and put it back in the heap. This is characteristic; and if an Examiner has often seen it, he can readily recognize and be assured that it is an expression of difficulty in distinguishing the differences in the colours. We frequently see this in the first test, with shades of greenish-blue and bluish-green. Here it means nothing important; but it is quite the reverse, however, when it concerns the grey or one of the confusion colours (1-5). Uncertainty and hesitation as to these colours, which the colour-blind do not distinguish from the test colour, even when directly comparing them, is positive proof of mistake, implying defective chromatic vision of the complete colour-blind type. No doubt the form of chromatic defect which we have called *incomplete* colour-blindness exists in several kinds and degrees This is not the place to further discuss our experience on this point; and, for the practial purpose we have in view, it is not necessary. As we have explained, there are among this class, forms of colour blindness gradually approaching normal colour sense How they are distinguished has been described. We designated them as possessing *feeble colour sense.*

Is is, perhaps, not easy to detect these special forms by any other method, or even by our own ; we, therefore, give the following as a means of so doing. The only way of getting at it is by determining at what distance the Candidate can distinguish a small coloured surface. We have to dtal, in fact with a feeble colour sense, which does not *prevent* the colours from being distinguhished but only renders it difficult We may suppose, in comparison to the normal that the *feeble* colour sense is due either to a weaker response to the stimulation of the colour-perceptive organs of the retina, or else to a stimulation of a relatively smaller number of these organs. In either case this method would give us the same result, judging from our experience in testing the eccentric portions of the field of vision with the perimeter.

The method we here speak of shows us also the effect of habit and practice on the colour perception and it is worth while to dwell on this point. It not unfrequently happens that a person who by test No. I has been noted "incomp etely colour-blind," after they know of their mistake and have practised themselves in distinguishing colours will so comfort themselves at a second trial that we have to simply mark them as of "feeble colour sense" The same will sometimes happen with test No II, and it is explainable by what we have said, namely, that between the complete lack of some one co our sense and the incomplete there is a series of gradations, and that in such cases practice would affect the result of examinations.

All the examples given prove that many seeming trifles and plans are of value in making the examination—amongst others the keeping the sample a little way off from the h ap of worsteds, as also the removal of everything which can cause the examined doubt and uncertainty. We must not, therefore, let them do what many want to do, namely, hold a number of the worsteds in the hand at once. We must make the person being examined place each skein, as he takes it up, either with the sample or else back on the heap. Many who are not clear whether the skein is like the sample or not, instinctively put the shades most resembling the test sample at the side of the heap towards it, and thus gradually form a little bridge, but which for correctness they will not vouch for. No such half measures must, however, be allowed,

Object of test for colour ignorance.

8.—Colour Ignorance Test.

Manner in which the test is to be conducted

1. The object of this test is simply to ascertain whether the Candidate knows the names of the three colours—red, green, and white—which it is important of every seaman to be acquainted with, and the test is to be confined to naming those colours.

2. One or two of the purest red and green skeins should be selected from the set of wools, and the Candidate should be required to name their colours. He should also be required to name the colour of any white object, such as a piece of white paper

Grounds in which Candidates should be treated as having passed or failed.

3 If he answers correctly, he could be considered to have passed the test. If he makes any mistake, he should be tried with the lantern which was formerly used for colour tests, the plain glass and the standard red and the green glasses being employed for the purpose. If he does not name these glasses correctly, he should be reported as having failed to pass the test.

Result of test to be reported.

4. The result of every test should be reported to the Government on Form Exn 2, and to the Port Officer on the Form Exn 14, when the Candidate is up for examination for a Certificate of Competency, and to the Government on the Form Exn. 2*a*, when the Candidate is up for examination in colours only.

All cases of failure should be reported to the Port Officer on Form Exn. 17B.

APPENDIX P

TABLE SHOWING THE REQUIREMENTS AS TO SEA SERVICE NECESSARY TO QUALIFY FOR EXAMINATION FOR CERTIFICATES OF COMPETENCY.

NOTE.

A Candidate for an Ordinary Certificate of any grade who has not previously held an Ordinary Certificate of a lower grade, must prove that he has served twelve months in the Foreign Trade or eighteen months in the Home or Coasting Trade in a square-rigged Sailing Vessel. — Service in square-rigged Sailing Vessel.

Where Foreign-going Certificates are required to be held to qualify Candidates for examination, they may be either the Ordinary Certificates or those for Fore and Aft-rigged Vessels or for Foreign-going Steamships. — Nature of Certificates

Rank.	Minimum Age.	Total Sea service (Years).	Officer's Service in Merchant Vessels		
			Years.	Lowest Capacity.	Lowest Certificate required
1	2	3	4	5	6
ORDINARY CERTIFICATES FOR "FOREIGN GOING SHIPS"					
2nd Mate .	17	4	...	No Officer's service required	None.
Only Mate	19	5	...	No Officer's service required	None
1st Mate	19	5	1	3rd or 4th Mate in Foreign Trade *in charge of Watch*	2nd Mate Foreign going.
				Or	
			1½	Only Mate in Home or Coasting Trade.	2nd Mate Foreign going, or Home Trade Mate
				Or	
			1	Pilot with 1st Class Pilot's Certificate	None.
aster .	1	6	1	Only Mate in Foreign Trade. .	Only Mate Foreign-going
				Or	
			1½	Only Mate in Home or Coasting Trade *And in addition, unless the above service was performed with a first Mate's Foreign-going Certificate, he will also be required to prove one of the following services prescribed for that grade*	Only Mate Foreign-going.
			1	3rd or 4th Mate in Foreign Trade *in charge of Watch*	2nd Mate Foreign-going.
				Or	
			1½	Only Mate in Home or Coasting Trade	2nd Mate Foreign going or Home Trade Mate.
				Or	
			1	Pilot with 1st Class Pilot's Certificate. OR HE MUST HAVE SERVED.	None.
		6½	1	2nd Mate in Foreign Trade	1st Mate Foreign-going.
				(Provided that if this service as 2nd Mate was performed under an additional or Auxiliary 1st Mate it will only be accepted if a 3rd and 4th Mate were also carried.) And in addition.	
			1½	3rd or 4th Mate in Foreign Trade *in charge of Watch* OR HE MUST HAVE SERVED.	2nd Mate Foreign-going
		•	3	Master in Home or Coasting Trade	2nd ate Foreign-going or Master Home Trade for one year of such service.
				Or	
			1	Master in Home or Coasting Trade.	Do.
				And in addition.	
			3	Mate in Home or Coasting Trade.	
Extra Master.		...	...	Same as Master	

CERTIFICATES FOR "FOREIGN-GOING" FORE AND AFT-RIGGED VESSELS.

2nd Mate Only Mate 1st Mate .. Master ...	Same as for Ordinary Certificates, except that no service in *square rigged Sailing Vessels* is required.

* If all the services was in Home or Coasting Trade.

CERTIFICATE FOR "FOREIGN-GOING" STEAMSHIP

2nd Mate Only Mate 1st Mate . Master ... Extra Master.	Same as for Foreign-going Ships, except that the service as *Officer* must have been performed in a *Steamship*, and that no Service in *square-rigged Sailing Vessels* is required.

Rank.	Minimum Age.	Total Sea Service (Years).	Officer's Service in Merchant Vessels.		
			Years	Lowest Capacity.	Lowest Certificate required.
1	7	8	4	5	6

CERTIFICATE FOR HOME TRADE PASSENGER SHIPS.

Mate .	19	4	...	No Officer's service required .	None.
Master .	20	5	1	Only Mate	Mate Home Trade or 2nd Mate Foreign-going
				Or	
			2½	2nd Mate in *charge of Watch*.	Mate Home Trade or 2nd Mate Foreign-going.
				Or	
			1	As Pilot with 1st Class Pilot's Certificate.	None.

APPENDIX Q.

LIST OF MARKS OBTAINABLE IN THE EXTRA EXAMINATIONS.

(*a*) Marks will be awarded according to the degree of precision with which a Candidate does his work, no marks being given for any problem or work, in which the Candidate is wrong in principle.

(*b*) An incorrect figure or incorrect formula will involve the loss of one-third of the marks allotted for the problem in question.

(*c*) Marks, at the discretion of the Examiner, but not in any case to exceed 50, will be given for orderly working and general method, &c.

(*d*) Marks, at the discretion of the Examiner, but not in any case to exceed 50, will be given for the supplementary *vivâ voce* test on problems and written answers.

(*e*) Thirty marks are allotted to each of the following "Ordinary" problems. Only four will be set :—

Multiplication by logarithms.
Division by logarithms.
Day's work.
Latitude by meridian altitude of sun.
Parallel sailing.
Mercator's sailing.
Time of high water.
Amplitude by sun.
Longitude by chronometer and altitude azimuth by sun
Time azimuth by sun
Finding meridian passage of star.
Tables for finding stars' meridian passage.

Meridian passage and altitude of planets
Where meridian passage of planets can be found
Finding name of stars near the meridian
Maps, &c., for finding stars
Computing approximate meridian altitude of star
Latitude by meridian altitude of star.
Longitude by chronometer by a star.
Time azimuth by a star.
Latitude by ex meridian altitude of sun or star
Sumner problem by sun
Latitude by altitude of Polar star.
Latitude by meridian altitude of moon
Chart paper Exn 9'.
Chart paper Exn. 9D.

(*f*) The numbers opposite the following problems represent the full marks obtainable —

Lunar problem by sun star or planet ..	60
Latitude by double altitudes, sun or star ..	30
Finding position, &c., by simultaneous altitudes of two stars ...	40
Error of chronometer with artificial horizon, &c.	25
Explanation in writing re great circle sailing .	20
Showing great circle track, &c, by globe ...	40
Problem in great circle sailing	50
Drawing figure and giving trigonometrical ratios	25
Right angled plane trigonometry (problem) ..	20
Oblique angled plane trigonometry (problem). ..	25
Napier's rules for circular parts	30
Right-angled spherical trigonometry (15 marks for each problem)	30
Compass syllabus (5 marks for each written answer and 10 for each problem)	235
Constructing a Mercator's chart	30
Law of storms	20
Orderly working and general method, &c ...	50
Supplementary *viva voce* test on problems and written answers	50

APPENDIX B.

TEXT-BOOKS TO BE USED IN THE EXAMINATIONS.

FOR BAROMETER, THERMOMETER, AND HYDROMETER —"A Barometer Manual for the use of seamen with an appendix on the Thermometer, Hygrometer, and Hydrometer," issued by the authority of the Meteorological Council, and to be purchased either directly or through any bookseller, from Eyre and Spottiswoode, East Harding Street, Fleet Street, E. C, or Oliver and Boyd, Edinburgh, or Edward Ponsonby, 116, Grafton Street, Dublin —Price three pence.

FOR PREVAILING WINDS AND CURRENTS OF THE GLOBE —"The Principal Winds and Currents of the Globe, &c." compiled from the various Admiralty, Sailing Directions, Weather Charts, &c., by Captain Robert Jackson, R. N, and to be purchased either directly or through any bookseller, from Simpkin, Marshall & Co, Paternoster Row, London; or Henry Lewis, 114 High Street, Portsmouth —Price one shilling.

FOR TRADE ROUTES —"Ocean Passages" compiled from the various Admiralty Sailing Directions, by Captain Robert Jackson, R. N, and to be purchased, either directly or through any bookseller, from Simpkin, Marshall and Company, Paternoster Row, London; or Henry Lewis, 114, High Street, Portsmouth.—Price one shilling.

FOR TIDES —"Tide Tables for the British and Irish Ports," published annually by the Admiralty, and to be purchased, either directly or through any bookseller, from J. D Potter, 31, Poultry, E. C., and 11, King Street, Tower Hill, E. C.—Price one shilling and six pence

[Intending candidates are advised to procure a copy of these books to take to sea with them, so that they may study them during their leisure hours.]

INSTRUMENTS —The Barometer (Kew pattern Marine Barometer), Thermometer, and Hydrometer used in the examinations will be precisely similar to those supplied to shipmasters by the Meteorological Office for making observations on board ship.

APPENDIX S.

TABLE SHOWING the RIVER OR SMOOTH WATER, the PARTIALLY SMOOTH WATER, and the EXCURSION LIMITS of the various PORTS.

Name of Port.	Smooth Water Limits.	Partially Smooth Water Limits.	Excursion Limits.
DISTRICT of the EASTERN COAST of SCOTLAND.			
Aberdeen	Inside the Harbour	Nil	Peterhead or Montrose.
Banff	Nil	Nil	Peterhead or Lossiemouth.
Dundee	Within a line from Dundee and Newport Ferries.	Within a line from Broughty Castle to Tayport.	Montrose or Leith.
Inverness	With a line from Fort George to Chanonry Point to Fort William.	Nil	Lossiemouth or Dunrobin.
Leith	Nil	Within a line drawn from Kirkcaldy to Portobello.	Berwick-on-Tweed or Dundee.
Montrose	Nil	Nil	Dundee or Aberdeen.
Peterhead	Nil	Nil	Aberdeen or Banff.
Queensferry	Above the Forth Bridge.	Within a line from Kirkcaldy to Portobello.	Berwick-on-Tweed or Dundee.
DISTRICT of the NORTH-EASTERN COAST OF ENGLAND.			
Amble	Amble Bar	Nil	St. Abb's Head or Middlesbro'.
Berwick-on-Tweed.	Spittal Point	Nil	North Berwick or Newcastle.
Blyth	Inside the Pier Heads.	Nil	Berwick-on-Tweed or Whitby.
Hartlepool, West	Nil	Nil	Amble or Bridlington.
Hartlepool, East	Harteepool Bar	Nil	Amble or Bridlington.
Newcastle, North and South Shields.	Inside the Tyne Pier Heads.	Nil	Berwick-on-Tweed or Scarborough.
Sunderland	Inside the Sunderland Pier Heads.	Nil	Berwick-on-Tweed or Scarborough.
Stockton	Fourth Buoy.	Nil	Amble or Bridlington.
Seaham	Nil	Nil	Berwick-on-Tweed or Scarb rough.
Whitby	Inside the Whitby Pier Heads.	Nil	Bridlington or New Castle.
DISTRICT of the EASTERN COAST of ENGLAND.			
Boston	Inside the new cut	Nil	Cromer or Hull.
Grimsby	Nil	In winter, nil. In summer within a line from Cleethorpes Pier to Patrington Church.	Lynn or Scarborough.
Goole	In winter, within line from Whitten Ness to Brough. In summer, above Hull and New Holland.	Within a line from New Holland to Paull (in winter). In summer within a line from Cleethorpes Pier to Patrington Church.	Lynn or Scarborough.
Hull	Same as Goole	Within a line from New Holland to Paull (in winter). In summer within a line from Cleethorpes Pier to Patrington Church.	Lynn or Scarborough.
Gainsborough, Lincoln, Nottingham, York.	Same as Goole	Within a line from New Holland to Paull (in winter). In summer within a line from Cleethorpes Pier to Patrington Church.	Spurn Point or Donna Nook.
Scarborough	Nil	Nil	Newcastle or Hull

Name of Port.	Smooth Water limits.	Partially Smooth Water limits.	Excursion limits.

LONDON DISTRICT.

Burnham-on-the Crouch.	Within a line from Hollywell Point to Foulness Point	Within a line form Clacton Pier to Herne Bay Pier.	Dover or Harwic .
Dover . .	Nil	Nil	Nev haven or Sheerness.
Folkestone . .	Nil	Nil	Newhaven or Sheerness.
Harwich or Ipswich.	Inside Languard Fort.	Within a line from Walton-on-the-Naze to Languard Fort.	London or Yarmouth.
King's Lynn .	Inside Lynn Cut .	Nil	Cromer or Hull.
Littlehampton .	Above Littlehampton Pier.	Nil	Poole or Rye.
London . .	Gravesend . .	Within a line from Clacton Pier to Herne Bay Pier.	Dover or Harwich.
Lowestoft . .	* Inside Lowestoft Pier to Norwich.	Within a line from the S. W. Barnard Buoy to the North Cockle Buoy inside the Banks.	Cromer or Walton-on-the-Naze
Norwich or Yarmouth.	* Inside the Piers	Within a line from the S. W. Barnard Buoy to the North Cockle Buoy inside the Banks.	Cromer or Walton on-the-Naze.
Newhaven . .	Nil	Nil	Portsmouth or Dover.
Poole . . .	Inside the Harbour	Nil	Weymouth or the Nab.
Portsmouth. .	Inside Portsmouth Harbour.	St. Helen's and the Needles within the Isle of Wight and to Langston Harbour. *For small launches not carrying boats.* In summer, a line from Ryde to Langston Harbour inside the Isle of Wight to Hurst Castle; in winter, Spithead.	Newhaven or Weymouth.
Rochester . .	Sheerness and Whitstable inside Sheppey.	Within a line from Clacton Pier to Herne Bay Pier.	Dover or Harwich.
Southampton .	Calshot Castle .	Same as Portsmouth .	Newhaven or Weymouth.
Weymouth . .	Nil	Portland Harbour .	Portsmouth or the Start.
Wisbeach . .	Inside Wisbeach Cut.	Nil	Cromer or Hull

SOUTH and SOUTH-WEST of ENGLAND DISTRICT.

Barnstaple . .	Inside the Bar .	Nil	Padstow or Bridwater.
Dartmouth . .	River Dart . .	Nil	Plymouth or Weymouth.
Exeter . .	Inside the Bar .	Nil	Weymouth or plymouth.
Falmouth . .	A line from Zoze Point to Pendennis Point.	Nil	Start Point or Penzance.
Fowey . . .	Inside the Harbour	Nil	Falmouth or Plymouth.
Padstow . .	Padstow Harbour above a line from Gun Point to Brae Hill.	Within a line from Stepper Point to Trebetherick Point.	St Ives or Barnstaple.
Par . .	Nil	Nil	Falmouth or Plymouth.
Penzance . .	Nil. . . .	Nil . . .	Falmouth or St. Ives.
Plymouth . .	Within a line from the inside of Drake's Island to Mount Batten Pier.	Within a line from Cawsand to Breakwater and Breakwater to Staddon Pier.	Exeter or the Lizard.
St. Ives . .	Nil	Nil	Padstow or Penzance.
Teignmouth .	Within the Harbour	Nil	Weymouth or Plymouth.
Torquay . .	Nil	Nil	Weymouth or Plymouth.

* On all the Inland navigation from Norwich to inside the Piers at Yarmouth or Lowestoft.

Name of Port	Smooth Water limits.	Partially Smooth Water limits	Excursion limits.
SOUTH WALES DISTRICT.			
Barmouth	Inside Barmouth Ferry	Nil	Cardigan or Bardsey Island
Barry Docks	Inside Dock	Nil	Milford or Ilfracombe.
Bridgewater	Inside Stert Point	Within the Bar	Ilfracombe or Swansea.
Bristol	Within a line from Avonmouth Pier to Wharf Point.	In winter, nil. In summer, within a line from Lavernock Point to the Flatholm, thence to the Steepholm, thence to Bream Down.	Ilfracombe or Swansea.
Cardiff	Within a line from Lowwater Pier Head to the Lifeboat House near Penarth Dock entrance.	In winter, nil In summer, within a line from Lavernock Point to the Flatholm, thence to the Steepholm, thence to Bream Down	Tenby or Ilfracombe.
Cardigan	Inside the Bar ...	Nil	Portmadoc or Milford.
Gloucester	River Severn or Avon to Sharpness Point *viâ* Gloucester Canal	In winter, nil In summer within a line from Lavernock Point to the Flatholm, thence to the Steepholm, thence to Bream Down.	Watchet or Barry Docks
Milford	Within a line from Hubberston Beach to Angle Point	Within a line from South Hook Point to Thorn Island	Swansea or Cardigan.
Neath	Inside the Bar	Nil	Barnstaple or Milford
Swansea	Nil	Nil	Barnstaple or Milford.
LIVERPOOL DISTRICT.			
Barrow	Inside Walney Island.	Nil	Liverpool or Whitehaven.
Bowness	Anywhere on the Lakes	Nil	Nil
Carlisle	Above Port Carlisle	Within a line from Southerness to Silloth.	Whitehaven or Port Withorn.
Carnarvon	Menai Straits to Aber Menai or Beaumaris	Menai Straits, from Carnarvon Bar to Puffin Island.	Liverpool or Portmadoc or round the Island of Anglesea
Chester	River Dee, not below Connah's Quay	Inside the West Hoyle Bank	Barrow, Holyhead, or Carnarvon
Conway	Within a line from Bwsal Hill to Trevlyd Point.	Nil	Liverpool or Portmadoc or round the Island of Anglesea
Douglas	From Battery Pier to Victoria Pier.	Nil	Round the Island
Fleetwood	Within a line from Low Light to Knoted Pier. Within Fleetwood Harbour for tugs plying as tenders to Belfast and Isle of Man steamers	Nil	Whitehaven or Liverpool
Holyhead	Inside the Breakwater.	Nil	Liverpool or Portmadoc or round the Island of Anglesea
Lancaster	Within a line from Sunderland Point to Chapel Point.	Nil	Whitehaven or Liverpool.
Liverpool	The Rock Light House.	In winter, nil In summer, within a line from Formby Point to Hilbre Point. Special limit for tenders to ocean-going steamers—within a radius of 3½ miles of Formby Lightship—during fine weather only. The Bell Buoy and Bar Lightship for tugs taking passengers from ships outside the Bar.	Barrow, Holyhead, or Carnarvon
Morecambe	In winter, nil. In summer, within a radius of two miles of the Midland Railway Dock and to Grange.	Nil	Same as Barrow.
Portmadoc	Inside the Bar Buoy.	Nil	Cardigan or Carnarvon
Preston	Lytham	Within a from Southport or Blackpool inside the Banks.	Llandudno or Barrow
Whitehaven	Nil	Nil	Barrow or Carlisle.

Name of Port.	Smooth Water limits.	Partially Smooth Water limits.	Excursion limits.
DISTRICT OF THE WESTERN COAST OF SCOTLAND.			
Ardrossan	Nil	Nil	Stranraer or Glasgow.
Ayr	Inside the Bar	Nil	Stranraer or Glasgow.
Campbelton	Inside the Harbour but not outside Davaar Island.	Nil	Glasgow only.
Dumfries	Ins de Aird Point and Glenhowen Point.	Within a line from Southerness to Siloth.	Wigtown or Whitehaven.
Fort William	On the Canal to Inverness.	Nil	Crinan or Tobermory.
Glasgow	Within a line from Clock Lighthouse to Duncon Pier (in winter). In summer, within a line from Bogany Point, Isle of Bute to Skelmorlie Castle and Ardlamont Point inside the Kyles of Bute	Within a line from Skirness to Fairlie Head round the Island of Bute.	Stranraer or Campbeltown.
Oban	Nil	Inside the Island of Kerrera to Dunstaffnage Point.	Crinan, Tobermory, or Fort William.
Stranraer	Inside Cairn Ryan	Loch Ryan, within a line from Kinnard Point and Milleur Point.	Wigtown or Greenock.
Wigtown	Nil	Nil	Stranraer or Dumfries.
IRELAND.			
Bantry Bay	Inside Bear Island, inside Whiddy Island, Glengariff Harbour, inside Corrid Point.	Nil	Galley Head or Valencia Harbour.
Belfast	Within a line from Holywood to Macedon Point.	In summer, within a line from Carrickfergus to Bangor; in winter, nil. A special limit for tenders to ocean steamers only, within a radius of 3 miles from Carrickfergus during fine weather.	Rathlin Island or Killough.
Cork	Within a line from Camden to Carlisle Forts.	Nil A special limit for tenders to ocean steamers only, within a radius of 3 miles from Roches Point during fine weather.	Dungarvon or Galley Head.
Donegal	Inside the Bar	Nil	Sligo or Kathlin O'Birne Island.
Drogheda	Within a line from Crook Point to Burrow Point.	Nil	Dublin or Warren Point. Carlingford Lough.
Dublin	Inside the Pier Heads.	In summer, with a line from Dalkey Island to Bailey Point; in winter, nil.	Drogheda or Arklow.
Enniskillen	Lough Erne	Nil	Nil.
Galway	Lough Corrib	Within a line from Black Rock Beacon to Ellcolgan Point	Kilkieran or Liscanor Bays inside the Arran Isles.
Limerick	Foynes	Within a line from Scattery Lighthouse to Carrig Island.	Loop Head or Kilmore Head.
Londonderry	Within a line from Magilligan Point to Greencastle.	Nil A special limit for tenders to ocean steamers only, within a radius of 3 miles from Innishowen Lighthouse during fine weather.	Buncrana in Lough Swilly or Rathlin Island.
Lough Swilly	Within a line from Buncrana to Muckarnish Point	Within a line from Dunree Head to Port Salon.	Portrush or Tory Island.
Sligo	The Western extreme of Oyster Island.	Within a line from Raghly Point to Black Rock Light.	Donegal or Ballina.
Waterford	Passage	In summer, within a line from Dunmore to Hook Point; in winter, within a line from Geneva Barrack to Dunoannon Light.	Youghal or Wexford.
Wexford	Inside Ely House.	Within a line from Raven Point to Rossclare Point.	Arklow or Waterford.
Youghal	Within a line from Ferry Point to Green Park.	Nil	Waterford or Kinsale.

APPENDIX T.

List of Colonial Certificates issued under Order in Council, which are of the same force as those granted by the Board of Trade.

Colony.	Certificates.		Date of original order in Council.	Date from which order in Council takes effect.
	By whom granted in Colony.	Description.		
1	2		4	5
Victoria	*Marine Board	Master, 1st Mate, Only Mate, 2nd Mate, 1st Class Engineer, 2nd Class Engineer.	30th March 1871	4th January 1870.
Canada	The Minister of Marine and Fisheries.	Master Mate†	19th August ,, .	19th August 1871,
		1st Class Engineer, 2nd Class Engineer ...	0th November 1886 .	1st January 1887.
New Zealand	Governor	Master; 1st Mate; Only Mate 2nd Mate; 1st Class Engineer, 2nd Class Engineer	9th August 1872 .	1st May 1872
New South Wales . ..	‡Department of Navigation.	Master, 1st Mate; 2nd Mate, 1st Class Engineer; 2nd Class Engineer	30th ,, 1873 .	18th June ,,
Malta	The Head of the Government.	Master; 1st Mate; 2nd Mate, 1st Class Engineer; 2nd Class Engineer	12th May 1874	12th May 1874.

The 27th March 1906.

No. 32Marine.—Whereas it appears that the estimated income of the Commissioners of the Port of Calcutta, under the Calcutta Port Act, III of 1890, from the 1st April 1906 to the 31st March 1907, after deducting therefrom the estimated expenditure for the above period, will be insufficient for the payment of the sums which, under the provisions of the said Act, are payable during the year to the Secretary of State for India in Council and to holders of debentures under the said Act, it is hereby notified that from the 1st April 1906, the Port Commissioners will charge upon all goods landed from or shipped into any sea-going vessel lying or being within the limits of the Port, whether such goods shall or shall not be so landed or shipped at any dock, wharf, quay, stage or jetty belonging to the Commissioners; in addition to or other than those prescribed by any scale of tolls, dues, rates and charges for the time being in force, under the provisions of sections 103, 104, 104A and 107 of Act III of 1890, a due which shall approximate four annas per ton, except for export and bunker-coal and manganese ore, the due on which shall be 1½ annas per ton. Until such due shall be altered or revoked in accordance with section 109 of the said Act, goods landed from one vessel and shipped into another vessel in the course of transhipment within the Port are exempt, also ballast, with the exception of dressed stone For the purpose of levying such due on miscellaneous general cargo landed or shipped at the Kidderpore Docks or at the Jetties, the Commissioners will follow the schedules of charges prescribed for the Docks and the Jetties, and charge one-fifth of the rates therein specified; but where the landing or shipping charge is in these schedules levied on the ton by weight, then the due under this notification shall be four annas per ton. For the purpose of levying such due on goods landed or shipped over the Inland Vessels Wharves or otherwise than through the Docks or Jetties, the ton shall be reckoned at the actual weight where such is ascertainable. Where the weight is not declared, then the ton shall be reckoned at the respective weights and measurements given in the schedule in force for the Inland Vessels Wharves.

W. A. INGLIS,
Secy. to the Govt. of Bengal.

BOARD OF REVENUE, L. P., CALCUTTA, *the 26th February 1906.*

No. 2021B.

NOTIFICATION.

CUSTOMS.

THE HON'BLE MR. F. A. SLACKE, I.C.S.

Dated Calcutta, the 26th March 1906.

IN supersession of the Notification No. 7511B., dated the 10th August 1904, and the rules published therewith in Part I, page 1194 of the *Calcutta Gazette* of the 17th August 1904, the following revised rules, framed under sections 9 and 72, clause *b*), of the Sea Customs Act, 1878 (VIII of 1878), for regulating the remuneration of Preventive Officers for overtime work on board ships, loading or unloading in the port of Calcutta, are published for general information, with the sanction of the Lieutenant-Governor:—

(*i*) For all work done by the Preventive Officers before sunrise or after sunset, an overtime fee at the rate of Re. 1 per hour shall be levied from the merchants or ship-owners concerned. If, however, for the purpose of completing the discharge or intake of any particular lot of cargo, it is found necessary to work between sunset and sunrise for a period not exceeding 15 minutes, no fee shall be charged. Should the period of 15 minutes be exceeded, the full fee of one rupee shall be charged for any broken period of the hour.

(*ii*) If a merchant or ship-owner requires the services of Preventive Officers between 6 A.M. and 8 A.M., he shall present his request to that effect to a Preventive Inspector in sufficient time to enable such officer to arrange for the attendance of the necessary staff. Where officers, directed to attend on the request of a

merchant or ship-owner at hours between 6 A.M. and 8 A.M., are subsequently found not to be required, overtime at the ordinary rate shall be paid by the merchant or ship-owner concerned for any such attendance, and such attendance shall not be counted as attendance for Government towards making up the total of 54 hours per week referred to in Rule (*iii*) below.

(*iii*) For every hour in excess of 9, on which an officer works between sunrise and sunset, Government shall pay him an overtime fee of one rupee, provided that no such fee shall be paid unless the officer has worked for a total of 54 hours in the week, or for a number of hours equal to nine times the number of days on which he has been at work during the week.

2. The new rules shall take effect from the 1st April 1906.

By order of the Board of Revenue, L. P.,

S. M. NASIRUDDIN,
Offg. Secretary.

NOTIFICATION No. 1827B.

THE HON'BLE MR. F. A. SLACKE, I.C.S.

THE Central Distillery at Berhampur, in the district of Murshidabad, will be abolished with effect from the 1st April 1906. PART II.

Advertisements.

[N. B.—Advertisements, Notices, &c., intended for insertion in this part of the Gazette cannot be received after Noon on Monday.]

LAND SALE NOTICES.

Advertisement of Sale.

NOTICE is hereby given that the undermentioned plots of land, no longer required by Government, situated along the Eastern branch, T. S. Railway, in the district of Darbhanga, will be put up to sale at 12 noon on the 26th day of April 1906, corresponding with the 17th Baisakh 1313 Fasli, at the Collectorate, Darbhanga.

The purchasers of the several plots of land will be subject to the following conditions:—

1st.—The purchasers will have no power to make any excavations on the land nearer than 15 feet from the railway boundary, or to plough the land nearer than 3 feet from the same.

2nd.—If the amount of purchase-money does not exceed Rs. 100, the whole amount must be paid down at once.

3rd.—If the amount of purchase-money exceed Rs. 100, one-fourth of the amount must be immediately deposited. If the balance be not paid by noon of the fifteenth day after the sale, reckoning the day of sale as one, or if that day be a close holiday, then by noon of the first succeeding office day, the sale shall be cancelled, the sum deposited being forfeited to Government, and the lot again put up for sale at the risk of the defaulting purchaser, after issue of advertisement, as in the case of original sale.

4th.—The plots of land will be sold revenue-free to the highest bidder.

5th.—The purchasers shall be put in possession on receipt by the Collector of the orders of the Board confirming the sale.

INDIAN ELECTRICITY ACT, 1903.

Hooghly River Electric License, 1906.

License to supply electric energy for the purposes herein defined including electric traction proposed to be granted to Killick, Nixon & Co. and John Fleming & Co., of Bombay, in respect of the Hooghly River District of Bengal.

NOTICE is hereby given that Messrs. Killick, Nixon & Co, of 72, Apollo Street, Bombay, and John Fleming & Co., of 19, Elphinstone Circle, Bombay, Merchants, have applied to the Government of Bengal for the grant to them of a License for the right to supply Electric Energy for the purposes defined in paragraph (*c*) hereof, within the undernoted area.

(*b*) The area throughout which it is proposed to supply energy is the area of British Territory on the banks of the Hooghly River, bounded as follows:—

North.—By the Railway known as the Hooghly Bridge Line connecting the Eastern Bengal State Railway Main Line with the East Indian Railway Main Line *viâ* the Hooghly Bridge. *East.*—By the main line of the Eastern Bengal State Railway from its junction with the said Hooghly Bridge Line to the Branch junction at Kankurgachi Cabin Station; thence by the Branch Line of the said Railway known as the Kankurgachi chord to Gobra Cabin Station; thence by the Southern Section of the said Railway to its junction with the Budge-Budge Branch south of Ballygunge Station. *South.*—By the Budge-Budge Branch of the Eastern Bengal State Railway from its junction with the Southern Section to the point where it crosses the Shahpur Road; thence by the said Shahpur Road to its junction with the Budge-Budge Road; thence by the said Budge-Budge Road to Ulubaria Ferry; thence by a line from the said Ferry to the mouth of the Bans Patti Khal; thence by the said Khal to the point where the Bengal-Nagpur Railway crosses it. *West.*—By the Bengal-Nagpur Railway from the point where it crosses the Bans Patti Khal to its junction with the East Indian Railway near the Pilkhana Bazar; thence northward by the main line of the said East Indian Railway to its junction with the Hooghly Bridge Line already referred to.

Excepting only such portion of the said area as may lie within the Municipal area of the Cities of Calcutta and Howrah or within the limits of any Cantonment or of any fortress, arsenal, factory, dockyard or camp, or any building or place in the occupation of Government for Naval or Military purposes.

(*c*) The purposes for and the conditions under which the supply is to be given are as follows:—

I. Energy shall be supplied under this License only

(*a*) to authorised distributors in bulk;
(*b*) to persons requiring a supply for power; and
(*c*) for Electric Traction.

II. The Licensees shall not supply energy for lighting purposes except to authorised distributors, provided that the energy supplied to any person for power may be used by such person for lighting any premises on any part of which the power is utilised.

(*d*) It is proposed to supply energy at first from one Generating Station within the area of supply and to lay down underground mains or erect aerial lines on such system or systems as may be approved by the Local Government. The Licensees ask authority to supply both alternating and continuous current, and the supply will be available to users as detailed in paragraph (*c*) hereof. The scheme provides for the erection of a second Generating Station when required.

The Licensees aim at supplying energy for motive power purposes to mills, factories, &c. and in bulk to authorised distributors and, if required, to any tramways, railways, &c., for electric traction all in the same manner as now being done by the electric power companies at home

(*e*) It is proposed to place electric supply lines on or approximately parallel to the Grand Trunk Road on the Right bank of the River Hooghly and the Barrackpore and Budge-Budge roads on the left Bank and such other routes as may be arranged in consultation with the Local Government.

(*f*) The applicants seek leave to cross the following Canals and navigable rivers, namely:—

On the Right Bank of the River Hooghly; the Mushdahra Khal, the Sarasati Nadi and the creek opposite the Pujali Ferry; and on the left Bank; the Ichapur Khal and the Cherail Khal

The Hooghly River at the following points:—

(1) at the Hooghly Railway Bridge;
(2) at or near Barrackpore;
(3) at or near Budge-Budge Ferry;

and at any other points which the Local Government may subsequently authorize.

(*g*) Copies of the map referred to in Rule 3 (2) under the rules of the Indian Electricity Act, 1903, are deposited for public inspection at the office of Messrs. Killick, Nixon & Co., 135, Canning Street, Calcutta, and

at the offices of the Municipalities of Hooghly and Chinsurah, Bhadreswar, Baidyabati, Serampore, Kotrung, Uttarpara, Bally, Howrah Ulabaria, Naihati, Bhatpara, Garulia, North Barrackpore, South Barrackpore, Titaghur, Panihatti, Kamarhatti, Barnagore, Cossipore-Chitpore, Manicktolah, Calcutta, Garden Reach, Budge-Budge, and also at the Offices of the Collector of Howrah, the Collector of Hooghly, the Collector of the 24-Parganas, and the Port Commissioners of Calcutta, at which places copies of the draft License may be obtained at the price of one rupee per copy.

Every Local authority, Company or person desirous of making any representation to the Local Government or bringing before it any objection respecting this application may do so by letter addressed to the Secretary to the Local Government in the Public Works Department within three months of the date of the newspaper containing the first issue of this advertisement, a copy must at the same time be sent to be undersigned

Per pro KILLICK, NIXON & Co.,
W. H. OGSTON,
135, Canning Street, Calcutta.
(245—1—22)

The Bengal Coal Company, Limited.

NOTICE is hereby given that an Extraordinary General Meeting of the abovenamed Company will be held at the Registered Office of the Company, 5 Fairlie Place, Calcutta, on Wednesday 27th June 1906, at 12 o'clock in the forenoon for the purpose of considering and, if thought fit, passing the following Resolutions:—

Resolution I.

That the Contract of sale to the East Indian Railway of a certain portion of the Company's Giridih property, entered into by the Company's Directors, subject to the Company's confirmation, be and the same is hereby confirmed, and that the Directors be and they are hereby authorised to carry into effect the said Contract with or without modifications.

Resolution II.

That the Contract of purchase from Messrs. Finlay, Muir & Co. of certain Colliery properties at Nowaghur in Jherria, collectively known as the Moorledih Colliery entered into by the Company's Directors, subject to the Company's confirmation, be and the same is hereby confirmed, and that the Directors be and they are hereby authorised to carry into effect the said Contract with or without modification.

Resolution III.

That each of the existing 2,400 shares of Rs 1,000 each be divided into ten shares of Rs. 100 each, and that the capital of the Company be increased to Rs. 27,00,000 by the creation of 3,000 new shares of Rs. 100 each to be offered for subscription in the first instance to the existing shareholders in the Company at the price of Rs. 300 per share in proportion to the number of shares held by them respectively in the Company, and as to any of the said new shares not taken up and subscribed for by the shareholders under the said offer, the same to be disposed of at such price, on such terms and in such manner as the Directors think fit.

Resolution IV.

That the Articles of Association of the Company be altered in manner following:—

(*a*) In Article 3 under the definition "Shares," the figure 100 shall be substituted for 1,000.

(*b*) In Article 8 the figures 27 000 and 100 shall respectively be substituted for the figures 2,400 and 1,000 and the words "all of which are fully paid up" shall be expunged.

(*c*) From the words "after the expiration" to the conclusion of article 33 shall be expunged.

(*d*) The concluding words "previously given at an Extraordinary General Meeting" of article 50 shall be expunged.

(*e*) From the words "and the Meeting" to the conclusion of article 53 shall be expunged.

(*f*) In lieu of article 58 the following shall be substituted:—

> 58. Not less than two weeks' notice of any General Meeting (exclusive both of the day on which the Notice is served or deemed to be served and of the day of the Meeting) specifying the day, hour and place of meeting and the purpose for which it is to be held shall be given by advertisement in the *Calcutta Gazette* and by Notice sent by post or otherwise served to or upon each Member as hereinafter provided.

(*g*) In lieu of Article 59 the following shall be substituted:—

> 59. The accidental omission to give Notice of any Meeting to any of the Members shall not invalidate any Resolution passed at such Meeting, and save by advertisement in the *Calcutta Gazette* it shall not be necessary to give Notice of any adjourned Meeting.

(*h*) In Article 81 the qualification shall be 50 in lieu of 5 shares, and the said Article shall be modified accordingly.

(*i*) In Article 82 the word "fifty" shall be substituted for the word "five."

(*j*) In Article 95 the words "four lakhs" and "two lakhs" shall respectively be substituted for the words "one lakh" and "fifty thousand" and the words "General or" in the said article appearing shall be expunged.

And notice is hereby also given that further Extraordinary General Meeting of the Company will and is hereby convened to be held on the 13th July 1906 at the same time and place for the purpose of receiving a Report of the proceedings at the aforementioned Meeting and of confirming (if thought fit) the above Resolutions and as to No. IV as Special.

H. MACLEOD, Supdt.

5 Fairlie Place, Calcutta, the 26th March 1906.

(289—1 29)

Custom House Notice

IT is proposed to extend the examination made for Customs purposes of goods delivered on the Jetties or Wharves to goods delivered overside in the stream. A large section of such goods have hitherto not been examined, including machinery, stores, iron or steel of all descriptions for Railways, Mills, Steamers, Tea Gardens, Tea Companies, and the workshops of firms of Engineers and Contractors. It is proposed that these goods should be subject to examination within reasonable limits on lines similar to those for goods delivered on the Jetties. The following instructions are therefore being issued, and are published for general information:—

(*a*) When any packages intended to be delivered overside are ordered to be examined, the importer's sircar will take the bill of entry to the Chief Preventive Officer on board the ship, who will at once ascertain whether the packages selected for examination are still on board, or whether they have been discharged into boats.

(*b*) If the packages are still on board or have been discharged into boats and can easily be brought back to the ship, the Chief Preventive Officer will instruct the sircar to arrange for the attendance of a Cooper to have the packages opened and examined either on board, or in the boat as may be most convenient.

(*c*) If the packages in question have left the ship's side, the Chief Preventive Officer will direct the sircar to go to the Division I Inspector, who will depute an officer to accompany the sircar to the boat, and there make the examination.

(*d*) In all the above cases the importer or his sircar may exercise the option of having the packages landed on the Jetties for examination. If he prefers to have them landed, this should be allowed and the sircar should be directed to take the bill of entry to the Chief Examining officer at the nearest examining station

(*e*) If the examination cannot be made in the boat owing to the size or nature of the packages to be examined, or to their being covered by other packages, the Chief Preventive Officer will order them to be landed on the Jetties for examination, unless the importer shall have obtained special permission from the Superintendent of the Preventive Service or from the Assistant Collector in the case of goods to be appraised as well as examined, for the examination to be held on his own premises

(*f*) When an order has been obtained to hold the examination on the importer's premises, a Custom House peon will be placed in charge of the goods until such examination has been completed.

(*g*) Fees will be leviable when the examination is held on the importer's premises at the following rates, namely—

For an Appraiser Rs. 8, for an Examining officer Rs. 4, and for a peon in charge 8 annas respectively for day and night work.

2. Importers will be expected in all cases to make their own arrangements for opening, unpacking, packing, and closing the packages selected for examination.

L. F. MORSHEAD,

Collector of Customs, Calcutta.

Custom House, Calcutta, the 22nd March 1906.

CUSTOM HOUSE NOTICE.

Change of Procedure in the Clearance of Salt.

ON the 1st April 1906 the issue of Rowannahs for sale at the office of the Board of Revenue will be discontinued and salt certificates will be issued in the Salt Section of the Import Department which will take the place of Rowannahs.

2. The certificates will not be given to the party who pays duty, but will be sent direct to the Senior Preventive Officer on board in the case of salt to be discharged from shipboard, and to the Inspectors in charge of the Government warehouses at Sulkea and Kidderpore respectively in the case of salt to be discharged from the golas.

3. Every person wishing to pay duty on salt for consumption either from shipboard or from the golas will be required to submit bills of entry in duplicate on *stout* paper in the form prescribed under the Sea Customs Act, with the following endorsement on the back of the *duplicate* bill of entry:—

TO BE ENTERED BY MERCHANT.	TO BE ENTERED BY CERTIFICATE-WRITERS.	TO BE ENTERED BY PREVENTIVE OFFICERS.		REMARKS.
Quantity of each consignment.	Number and date of certificates.	Date of delivery.	Quantity.	

The documents must be presented with the first column of this endorsement filled in so as to show the different consignments in which it is proposed to take delivery of the salt. When the salt is to be discharged into boats the consignments will be calculated as far as possible, so that the quantity of each consignment will be the quantity to be carried by a single boat. Bill of entry forms with the above endorsements can be obtained on payment of one pice (three pies) in the Salt Section of the Import Department and in the Office of the Superintendent, Preventive Service.

4. Merchants when applying for delivery will be required to produce for the inspection of the Chief Preventive Officer the Agent's delivery order and the Customs cash receipt, or Deposit Account acknowledgement. The Deposit Account acknowledgement will be handed to him in the Accounts Department when salt is cleared on a deposit account.

5. For all salt discharged into boats boat notes will be issued. These boat notes will be valid for 48 hours only They must be shown to any Customs officer on demand.

6 Boats found carrying salt within the limits of the port either without boat notes or with boat notes of which the validity has expired will be detained and dealt with under clause 29, section 167 of the Sea Customs Act.

7. Rowannahs upon which delivery of salt has not been taken before the 1st April will be retained by the Preventive Officers to whom they are presented for delivery and boat notes issued to cover the salt discharged.

8. Any further information can be obtained by applying personally to the Assistant Collector in charge of the Import Department.

L. F. MORSHEAD,

Collector of Customs

Custom House, Calcutta, the 24th March 1906

PART III.

Act of the Bengal Council.

GOVERNMENT OF BENGAL

LEGISLATIVE DEPARTMENT

THE following Act, passed by the Lieutenant-Governor of Bengal in Council, received the assent of His Honour on the 7th March, 1906, and, having been assented to by His Excellency the Viceroy and Governor-General on the 21st idem, is hereby published for general information:—

BENGAL ACT No. I OF 1906.

An Act to amend the Court of Wards Act, 1879.

WHEREAS it is expedient to amend the Court of Wards Act, 1879; Ben. Act IX of 1879.

And whereas the previous sanction of the Governor General has been obtained, under section 5 of the Indian Councils Act, 1892, to the provisions of this Act which affect Acts passed by the Governor General of India in Council, 55 & 56 Vict., c. 14.

It is hereby enacted as follows:—

Short title. 1. This Act may be called the Bengal Court of Wards (Amendment) Act, 1906.

Partial repeal of section 9 of Bengal Act IX of 1879. 2. In section 9 of the Court of Wards Act, 1879 [as amended by the Court of Wards Act (Bengal) Amendment Act, 1892], the words, figures and letters from "And in any case in which the Court has taken charge" to the end of the section are hereby repealed. Ben. Act IX of 1879. IV of 1892.

Insertion of new sections 10A to 10E. 3. After section 10 of the said Court of Wards Act, 1879, the following shall be inserted, namely:— Ben. Act IX of 1879.

"10A. (1) Whenever the Court of Wards assumes charge of any person or property under section 7 or section 10, it shall publish in the manner provided in section 64A a notice calling upon all creditors having claims against the ward or his immovable property to submit the same in writing to the Court, at a place to be named in the notice, within six months from the date of the publication of the notice aforesaid. Notice to creditors.

(2) Every such claim (other than a claim on the part of the Government) not submitted to the Court in compliance with the provisions of sub-section (1), shall, save in the case provided for by section 10E, sub-section (2), clause (c), notwithstanding any law, contract, decree or award to the contrary, cease to carry interest from the date of the expiry of the period aforesaid:

Provided that, if the Court is satisfied that the creditor was prevented by any sufficient cause from complying with the provisions of sub-section (1), it may consider and allow, either wholly or in part, his claim for interest at any time after the date of the expiry of the period aforesaid.

Creditors to furnish full particulars and documents.

"10B. (1) Every creditor submitting his claim in compliance with the provisions of section 10A, sub-section (1), shall furnish, along with his written statement of claim, full particulars thereof, and shall, within such time as the Court may appoint, produce all documents which are in his possession, power or control (including entries in books of account) on which he relies to support his claim, together with a true copy of every such document.

(2) The Court shall, after marking, for the purpose of identification, every original document so produced and verifying the correctness of the copy, retain the copy and return the original to the creditor.

(3) If any document, which to the knowledge of the creditor is in his possession, power or control, is not produced by him as required by sub-section (1), the document shall not be admissible in evidence against the ward, whether during the continuance of the management or afterwards, in any suit brought by the creditor or by any person claiming under him in respect of such claim.

Stay of proceedings of Civil Courts.

"10C. If a Civil Court has directed any process of execution to issue against any immovable property of a ward or the rents thereof or any crops standing thereon, the Court of Wards may, at any time within one year after it assumed charge of such property, apply to the Civil Court to stay proceedings in the matter of such process; and the Civil Court may, on such terms regarding interest or compensation for delay as may appear to it to be just and reasonable, stay such proceedings for such period as it may deem fit.

Adjudication of claims.

"10D. (1) On receipt of all claims submitted in compliance with the provisions of sections 10A and 10B, the Court shall proceed to investigate such claims and shall decide which of them are to be wholly or partly admitted or wholly or partly rejected, as the case may be, and shall communicate its decision in writing to each claimant concerned.

(2) When the Court has admitted any claim under sub-section (1), it may make to the creditor a proposal in writing for the reduction of the claim, or of the rate of interest to be paid in future, or of both; and, if such proposal, or any modification of it, is accepted by the creditor and his acceptance is finally recorded and attested by the Court, it shall be conclusively binding upon the creditor and upon the ward:

Provided that, if when the superintendence of the property by the Court is relinquished or otherwise terminates, any portion of the claim reduced as aforesaid is still unsatisfied, the creditor shall be entitled to recover a sum bearing the same proportion to the original claim admitted under sub-section (1) as the unsatisfied portion bears to the reduced claim.

(3) Subject to the provisions of sub-section (2), nothing in this section shall be construed to bar the institution of a suit in a Civil Court for the recovery of a claim against a ward or his property which has been submitted to the Court of Wards:

Provided that no decision of the Court of Wards under this section shall be proved in any such suit as against the defendant.

(4) In calculating the period of limitation applicable to suits for the recovery of a claim which has been submitted to the Court of Wards, the period from the date of submission of the claim up to the date of the communication of the Court's decision thereon to the creditor shall be excluded.

Relinquishment of inextricably involved estates.

"10E. (1) The Court of Wards may, after making an investigation under section 10D, when it appears to the Court that the estate is involved beyond all hope of extrication, or for any other sufficient reason, by notice published in the manner provided in section 64A, declare that it will, on a date to be fixed by the notice, relinquish charge of the property and person (or of the property as the case may be) of the ward under this section.

(2) On the date so fixed—

(a) such charge shall terminate:

(b) the owner of the said property shall be restored to the possession thereof, subject to any contracts entered into by the Court of Wards for the preservation or benefit of such property; and

(c) the claims for interest barred under section 10A, sub-section (2), shall revive in case the debt or liability in respect of which the interest is claimed be not then barred by any law of limitation.

(3) In calculating the periods of limitation applicable to suits to recover claims for interest revived under this section, the time during which such charge has continued shall be excluded."

Insertion of new section 13A in Bengal Act IX of 1879.

4. After section 13 of the said Act, the following shall be inserted, namely:—

Power of Court to retain charge of property of disqualified proprietor until discharge of debts.

"13A. If, when any disqualified proprietor dies, or ceases to be disqualified within the meaning of this Act, there remain undischarged any debts or liabilities which were incurred by, or are due from, such proprietor, or which are a charge upon his property or any part thereof,

then, notwithstanding anything contained in the foregoing sections, the Court may either withdraw from the charge of such property or retain such charge until such debts and liabilities, as the Court considers necessary to be discharged, together with all interest due thereon, have been discharged:

Provided that, after the death of a proprietor, the Court shall not retain charge on account of any debt or liability which has been declared by a competent Civil Court not to be binding on his representative."

New section 34A.

5. After section 34 of the said Act, the following shall be inserted, namely:—

Recovery of expenses incurred by Collector under sections 31 to 33.

"34A. All expenses incurred by a Collector in taking action under section 31, section 32 or section 33 in respect of any person shall, if the property of such person is not taken under the charge of the Court, be recoverable from such person or from the person whom the Collector finds to be in possession of such property, under the procedure provided by the Public Demands Recovery Act, 1895, for the recovery of public demands." Ben. Act I of 1895.

Partial repeal of section 56.

6. The words from "or to a proprietor" to the end of section 56 of the Court of Wards Act, 1879 [as amended by the Court of Wards Act (Bengal) Amendment Act, 1892] are hereby repealed. Ben. Act IX of 1879. IV of 1892.

Insertion of new section 59A.

7. After section 59 of the said Act, the following shall be inserted, namely:—

Persons employed by Court to be "public servants."

"59A. Every person employed by the Court under this Act shall, for the purposes of the Indian Penal Code, be deemed to be a public servant." XLV of 1860.

Insertion of new section 60B

8. After section 60A of the Court of Wards Act, 1879 [as amended by the Court of Wards Act (Bengal) Amendment Act, 1892], the following shall be inserted, namely :— Ben Act IX of 1879. IV of 1892.

"60B. For the purposes of Part VII and sections 60 and 60A, a person whose property is under the charge of the Court of Wards by virtue of the second clause of section 11, or charge of whose property has been retained under section 13A, shall be deemed to to be a "ward," but only so far as regards such property."

Certain persons to be deemed to be wards.

Repeal of section 62

9. Section 62 of the Court of Wards Act, 1879, is hereby repealed.

New section 64A.

10. After section 64 of the said Act, the following shall be inserted, namely :—

"64A. Any notice required to be published by the provisions of sub-section (1) of section 10A, or of sub-section (1) of section 10E, shall be published—

Publication of notices.

(a) in the English and in the vernacular Official Gazettes;

(b) in at last three issues each of one English and one Vernacular newspaper published in Calcutta;

(c) in two issues of a newspaper (if any) published in the district or Division in which the ward ordinarily resides, or has last resided; and

(d) by posting such notice on the notice-boards in the offices of the Collector and of the Judge of the district in which the place named in the notice is situate."

Proceedings of the Bengal Legislative Council.

GOVERNMENT OF BENGAL.

LEGISLATIVE DEPARTMENT.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal assembled under the provisions of the Indian Councils Acts, 1861 and 1892.

THE Council met in the Council Chamber on Saturday, the 24th March, 1906, at 11 A.M.

Present:

The Hon'ble SIR ANDREW FRASER, K.C.S.I., Lieutenant-Governor of Bengal, *presiding*.
The Hon'ble MR. L. HARE, C.S.I., C.I.E.
The Hon'ble MR. F. A. SLACKE.
The Hon'ble MR. E. W. COLLIN.
The Hon'ble MR. R. W. CARLYLE, C.I.E.
The Hon'ble MR. W. A. INGLIS.
The Hon'ble MR. L. P. SHIRRES.
The Hon'ble MR. T. W. RICHARDSON.
The Hon'ble MR. G. GORDON.
The Hon'ble MR. C. G. H. ALLEN.
The Hon'ble MR. C. F. LARMOUR.
The Hon'ble MR. J. CHAUDHURI, M.A.
The Hon'ble RAJA BAN BEHARI KAPUR, C.S.I.
The Hon'ble BABU JOGENDRA NATH MUKHERJEE, M.A., B.L.
The Hon'ble MR. J. D. NIMMO.
The Hon'ble BABU BHUPENDRA NATH BASU, M.A., B.L.
The Hon'ble MR. SYED SHUBFUDDIN.

NEW MEMBER.

The Hon'ble MR. T. W. RICHARDSON took his seat in Council.

QUESTIONS AND ANSWERS.

GUN-LICENSES IN BENGAL.

The Hon'ble BABU BHUPENDRA NATH BASU, in the absence of the Hon'ble BABU AMBIKA CHARAN MAZUMDAR, said :—

On examining the statement relating to the grant of licenses for firearms, which the Government was pleased to furnish in answer to a question of mine asked at a meeting of the Council held on the 19th August, 1905, it is observed that there has been a visible tendency towards gradual reduction of such licenses every year, so that the total number of such licenses, in Forms VIII to XI, which in 1900 stood at a little over 72,000, came down to nearly 61,000 in 1904, and that the total number of licenses cancelled under section 18 of the Act during these five years amounted to over 12,000.

(*a*) In view of the above facts and figures, will the Government be pleased to inquire as to the reason of this tendency towards reduction of licenses for fire-arms ?

(*b*) Will the Government also inquire why such a large number of licenses which amount to nearly 20 *per cent.* of the licenses granted in Forms VIII to XI was cancelled during this period ?

(*c*) Having regard to the vast unprotected and ever-increasing agricultural population in Bengal, will the Government be pleased to draw the attention of District Officers to the comparatively very small number of licenses granted to these people ?

(*d*) Will the Government be further pleased to facilitate the grant of licenses for guns more freely than at present in the case of sportsmen ?

The Hon'ble MR. RICHARDSON replied :—

"The question of the revision of the present system of granting gun licenses under the Arms Act and of the introduction of general principles upon which they are to be granted for purposes of sport, protection or display has been for some time past under the consideration of the Government of India. At present there is no sufficient evidence that the agricultural population in Bengal is in need of further protection. On the other hand, an increase of population as a general rule implies an increase of security from the ravages of wild animals as well as a disappearance of game in the pursuit of which fire-arms are a necessity."

THE SUBORDINATE JUDICIAL SERVICE.

The Hon'ble BABU BHUPENDRA NATH BASU, in the absence of the Hon'ble BABU AMBIKA CHARAN MAZUMDAR, said :—

(*a*) Having regard to the fact that the Officiating Munsifs as a rule seldom become confirmed in their appointments until after almost three years from their first appointment, and that when so confirmed they are scarcely able to earn their full pension without extension of service, and in view of the congestion which is thus created in the Subordinate Judicial Service, will the Government be pleased to consider whether it is not just and expedient to count the officiating periods of these officers towards their pension ?

(*b*) Is it a fact that Munsifs are required twice to produce health certificates—once when they are enrolled for service and once again when they are confirmed in their appointment ? Is such a rule in force in the case of the Executive Branch of the Provincial or the Subordinate Civil Service ? If not, will the Government be pleased to consider the justice and propriety of removing the disadvantage from which the Munsifs are made to suffer at present ?

The Hon'ble MR. RICHARDSON replied :—

"The answer to the first branch of the question is as follows :—

"The question of amending the rule according to which officiating periods of service cannot be counted towards pension is already under consideration

and the Government hopes to be able to make a definite pronouncement regarding it at an early date.

"The answer to the second branch of the question is as follows:—

"Munsifs are generally appointed from the ranks of practising pleaders, and a considerable period usually elapses between the date of first appointment and confirmation. It is accordingly necessary to ascertain the state of health of candidates for the Judicial Service, not only when first appointed, but also when the time for their confirmation arrives. In the case of the Provincial and Subordinate Executive Services, the period of probation is only six months."

Rabi Crops in Bihar.

The Hon'ble Mr. Syed Shurfuddin asked:—

Is the Government aware that the recent abnormal weather has seriously damaged the standing *rabi* crops in Bihar and that in consequence the prices of food-grains have considerably gone up?

If the Government has no information on the subject, will it consider the advisability of instituting a careful inquiry into the matter and publishing the result of such inquiry?

The Hon'ble Mr. Carlyle replied:—

"The recent abnormal weather did not, on the whole, cause serious damage to the *rabi* crops in Bihar. The general outturn estimated for all the districts of the Patna Division is not less than 75 per cent., and in Darbhanga the estimate amounts to an outturn of 83 per cent. over a larger area than usual.

"Owing to the loss of *bhadai* paddy and other *bhadai* crops through excessive rainfall in the latter portion of the rainy season and bad crops in other Provinces, prices have been ranging very high; but now that the *rabi* crop is being cut there is a tendency for the prices to fall."

Religious training of Prisoners.

The Hon'ble Mr. Syed Shurfuddin asked:—

Will the Government be pleased to state if there is any provision in the management of prisons in Bengal for the reformation of prisoners by moral and religious instructions or by any other method?

If not, will the Government consider the advisability of framing rules under section 60, clause (*e*) of Act IX of 1894, for the above purpose?

The Hon'ble Mr. Richardson, replied:—

"No rules have been framed by the Government for the purpose, nor is it considered desirable to frame any.

"The subject of religious training of prisoners has been under the consideration of the Government on various occasions, and it has been decided that no religious services shall be permitted in jails, as this would, in ordinary jails, lead to confusion and be subversive of jail discipline. The only exception is in the Presidency Jail, where a large number of European prisoners is sometimes collected, and where provision has been made for the performance of the services of the Protestant and Roman Catholic Christian Churches. In all jails, however, prisoners of all classes are allowed to perform their private devotions at suitable times and in suitable places

"Moral training unconnected with any religion seems to be almost impracticable, and is, moreover, in the opinion of the Government not calculated to have the desired effect. Discipline and regular habits of work are practically the only means adopted for reform, and it is not easy to devise any other."

Classification of Prisoners.

The Hon'ble Mr. Syed Shurfuddin asked:—

Will the Government be pleased to state the rules, if any, that it has framed under section 60, clause (*j*) of Act IX of 1894. for the classification and separation of prisoners, under which prisoners convicted for merely technical offences are kept separate from the rest of the jail population?

If there be no such rules, will the Government take early steps to make them?

The Hon'ble MR. RICHARDSON replied :—

"The classification of prisoners is laid down in the Jail Code, rules 517 to 529. Prisoners are divided into two classes, namely, (*a*) Habitual criminals, and (*b*) Non-habitual criminals.

"It is not clear what is meant by technical offences. The Courts decide whether a prisoner has been guilty of an offence which should be punished by rigorous imprisonment. When the Courts consider the offence to be of such a nature that simple imprisonment is sufficient, the prisoner is kept apart from the ordinary convicts."

WORKING OF SECTIONS 562 AND 563 OF THE CODE OF CRIMINAL PROCEDURE, 1898.

The Hon'ble MR. SYED SHURFUDDIN asked :—

Will the Government be pleased to lay on the table a statement showing the working in Bengal of sections 562 and 563 of the Code of Criminal Procedure, 1898, since their introduction?

The Hon'ble MR. RICHARDSON replied :—

"The Hon'ble Member was requested to state clearly what information he desired; and a statement prepared in accordance with his wishes is laid on the table."

Statement referred to in the above answer.

THE BENGAL FINANCIAL STATEMENT FOR 1906-07.

The Hon'ble MR. SHIRRES laid on the table the Bengal Financial Statement for 1906-07, with explanatory notes, He said :—

"Sir, I have the honour to lay upon the table the Financial Statement for 1906-07, together with the usual appendices and accounts.

"The past year has been a prosperous one, and the revenue has considerably exceeded the estimates. From the commencement of next year a new and more advantageous Financial Settlement with the Government of India will come into force. The transfer of 15 districts to another Province necessitated a revision of the existing settlement; and in making the revision the Government of India have dealt liberally with us.

"The usual comparison between the budget and the revised estimates for the current year is rendered difficult, owing to the transfer of the districts to the new Province having taken place in the middle of the year. The budget estimates of 1905-06 are for the undivided Province for the whole year, whereas the revised estimates are for the undivided Province for rather more than half of the year, and for the reduced Province for the remainder of the year.

"The simplest way in which to make a comparison is in the first instance to eliminate altogether the receipts and charges for the transferred districts, and afterwards to make whatever adjustment may be necessary on account of those districts.

"This comparison is made in paragraphs 4 to 8 of the Financial Statement It will be seen that if we look only to the present Province of Bengal, and omit various assignments and adjustments, there has been a net increase of revenue amounting to Rs. 8,00,000. This is the net result of improvements under certain heads aggregating Rs. 12,04,000 and of decreases under others aggregating Rs. 4,04,000. On the expenditure side there have been very large savings amounting to Rs. 28,34,000 due chiefly to the failure to spend the large special grants for police and education reforms and to lapses in the Public Works Department.

"The reason why it is necessary to make an adjustment on account of the transferred districts is that in them, as in all districts outside Calcutta, the Provincial receipts exceed the Provincial expenditure. The surplus accruing from those districts in fact formed part of the revenues assigned to this Province from which the expenditure outside those districts was to be met. Moreover while the expenditure in the districts in question proceeds more or less uniformly throughout the year, the greater part of the revenue is collected in the last quarter; with the result that there is an actual deficit in the first part of the year and a large surplus in the last half. In the budget we estimated for a surplus for the whole year of Rs. 9,27,000, but after the budget had been passed we transferred an additional sum of Rs. 2,34,000 to the Public Works Department for expenditure in Eastern Bengal, thus reducing the anticipated surplus to Rs. 6,93,000. The adjustment allowed to us is the difference between the actual receipts and the actual expenditure in Eastern Bengal from the 16th October to the close of the year, and this is estimated at Rs. 5,61,000; but as the expenditure up to the date of transfer exceeded the income by Rs. 2,95,000 the adjustment for the whole year comes to only Rs. 2,66,000. In the transferred districts the receipts have exceeded the estimates but so also has the expenditure; and the amount which is being made over to us is the actual surplus.

"When the budget of the current year was prepared the closing balance of 1904-05, and therefore also the opening balance of 1905-06, was underestimated by Rs. 5,14,000. This sum is carried forward and increases the closing balance of 1905-06 and the opening balance of 1906-07. In calculating the closing balance of the current year and the opening balance of next year we must likewise add the amount by which the receipts have exceeded the estimates in Bengal proper and the savings in expenditure; and we must deduct the loss on the adjustment for Eastern Bengal. The net result is to place the opening balance of next year at Rs. 1,17,98,000.

"In preparing our budget estimates for next year, we have at our disposal the opening balance of Rs. 1,17,98,000, the assignment of revenue made to us by the Government of India under the new settlement which comes to Rs. 4,72,73,000, and an additional sum of Rs. 19,69,000 by which that revenue is expected to expand next year. There are also certain special grants, aggregating Rs. 4,30,000, which bring the total up to Rs. 6,10,70,000. Of this however we must carry forward at least Rs. 70,00,000, namely the minimum provincial balance of Rs. 20,00,000 and the grant of Rs. 50,00,000 for the improvement of Calcutta, so that the amount actually available for expenditure is Rs 5,40,70,000.

"A few words of explanation may be given regarding the new settlement. It would have been easy for the Government of India, to have continued the settlement made in 1904 after modifying it to suit the new Province. They might have said "We take away from you the receipts and expenditure of certain districts: those districts have hitherto yielded you a surplus and their removal means a net loss to you: we shall therefore make you a permanent grant equal to the surplus, but otherwise we shall leave the existing settlement untouched." Fortunately the Government of India elected to make an altogether fresh settlement.

"Now when making a financial settlement the Government of India scrutinise the estimates, decide what total expenditure may fairly be taken as the

necessary expenditure of the Province, and make over receipts sufficient just to meet that expenditure. On previous occasions the revised estimates were made the basis of the scale of expenditure so that all anticipated savings were eliminated before the scale was calculated. The new settlement however has been based on the budget estimates, and is therefore much more favourable to us. Moreover in our budget for the current year we proposed to reduce the opening balance by Rs. 42,37,000. The Government of India before adopting our budget as the new scale of expenditure might have cut out the whole of this amount on the ground that it is non-recurring expenditure met from the opening balance, but the total deduction they made from the budget came to only Rs. 37,86,000. Thus they practically treated about 4½ lakhs of non-recurring expenditure as though it were recurring and made over to us recurring revenue to meet it. They also left our Public Works grant untouched, although the separation of East Bengal relieved us of charges amounting to Rs. 5,22,000.

"We have also been allowed a larger share of the divided heads of revenue. In other words, a larger proportion of the revenue made over to us is expanding revenue, and the non-expanding assignment has been reduced from Rs. 73,70,000 to Rs. 5,72,000. The following are the changes which have been made:—We now receive ½ instead of $\frac{7}{16}$ of Excise, ½ instead of ⅛ of Forests, ½ instead of ¼ of Assessed Taxes, the whole instead of ¼ of the receipts from Government estates, and ½ instead of ¼ of the remainder of Land Revenue The effect of these changes has been to add about 1¼ lakhs to our net annual increment of revenue.

"I may mention also that subsequent to the settlement of 1904, the Government of India have, owing to the improved state of their finances made large grants to us for Agriculture, Education, Police, etc., and these grants are continued under the new settlement.

"If the new settlement had been in force for the last five years there would have been an average annual increase of revenue over the revenue of the preceding year of Rs. 8,97,000. The whole of this could not however have been available for new expenditure because there must first be deducted the normal increase of necessary expenditure due, *e.g.*, to increase of superannuation charges, increments of salary, expenditure necessary to obtain the increased revenue, &c. This increment of necessary expenditure amounts to about Rs 5,37,000 a year.

"To return to our budget for next year. As already stated the amount actually available for expenditure is Rs. 5,40,70,000. Of this sum we propose to carry forward Rs. 19,76,000 and to spend Rs. 5,20,94,000. The amount which we budget to spend next year is therefore Rs. 5,20,94 000; and this is made up of Rs. 28,22,000 taken from the opening balance and Rs. 4,92,72,000 the revenue of the year.

"In paragraph 16 there is a list of items of non-recurring expenditure amounting to Rs. 47,28,000. As the reduction in the opening balance is only Rs. 28,22,000 the remainder of this non-recurring expenditure amounting to Rs. 19,06 000 is met from the revenue of the year. In other words there is a margin between recurring income and recurring expenditure of Rs. 19,06,000. This it may be noted is altogether apart from the special grants made by the Government of India.

"The reforms and improvements which it is proposed to carry out will be apparent from the lists in paragraphs 16 and 17. I need not comment on them in detail, but shall be glad to furnish any further information regarding them which Hon'ble Members may desire. I need only explain that the reforms and improvements indicated in those lists are in addition to those under Agriculture, Education and Police, which are to be met from the special grants from the Government of India. Those are referred to under the appropriate heads in the Financial statement.

"The budget will not come up for discussion until the 7th April so as to allow Hon'ble Members ample time to examine it, and I shall be greatly obliged if notice can be given to me a week before the debate of any points which it is proposed to raise or any information which is required in order that the matter may receive sufficient attention."

THE BENGAL FINANCIAL STATEMENT FOR 1906-07.

PART I.—General Review.

(1) ACCOUNTS FOR 1904-1905.

WHEN the revised estimate for 1904-1905 was laid before the Council on the 25th March 1905, the closing balance for that year, which was also the opening balance for the current year was estimated at Rs. 1,24,86,000. The accounts of last year are now finally closed and show that the actual closing balance came to Rs. 1,30,00,101, or in round numbers to Rs. 1,30,00,000, which is Rs. 5,14,000 more than the revised estimate. The receipts were better by Rs. 1,90,000 chiefly under Marine on account of larger pilotage receipts; while the charges were also less by Rs. 3,24,000 partly under Jails and partly under the heads of "Minor Works and Navigation," and "Civil Works" in charge of the Public Works Department.

(2) REVISED ESTIMATE, 1905-1906.

2. The budget estimate for 1905-1906 as passed by the Government of India provided for receipts aggregating Rs. 5,64,33,000 and an expenditure of Rs. 6,06,70,000, thus reducing the accumulated balance at the commencement of the year by Rs 42,37,000. In consequence of the transfer, from the 16th October 1905, of fifteen districts to the new province of Eastern Bengal and Assam, and the addition of the Sambalpur district to this province by transfer from the administration of the Central Provinces, the receipts and charges for the last five months and a half in the districts transferred to the new province have been incorporated in the revised estimate of that province, while those in the added area have been included in the revised estimate of this province. The revised estimate for 1905-1906 as now presented therefore includes the actuals of the transferred districts for the first six months and a half and that of the added area for the last five months and a half.

3. In order, however, that the finance of this province might not be materially affected by these readjustments of accounts in the middle of the year it has been decided that any loss to this province arising therefrom should be made good through the adjusting head of Land Revenue. Thus the surplus of revenue over expenditure in the districts transferred to Eastern Bengal and Assam, which but for the separation would have been available to meet in part the cost of the central administration at the Presidency, and which is now estimated at Rs 5,61,000, as well as the estimated deficit in the added area amounting to Rs. 91,000, have been credited in favour of Bengal.

4. To make a proper comparison of the revised estimates of new Bengal with that of the sanctioned budget estimates for the current year it is necessary in the first instance to eliminate the receipts and charges for the transferred districts, as included in the original consolidated estimates for undivided Bengal, and add to the net results the revenue and expenditure for the added area in Sambalpur as estimated for the last five months and a half of the year. The following table which is an abstract of Appendix C shows the result of this comparison:—

	Original estimate for undivided Bengal	Sanctioned estimate for the districts transferred to Eastern Bengal and Assam	Difference between columns (2) and (3).	Estimate for the added area in Sambalpur for the last 5½ months.	Total of columns (4) and (5).	Revised estimate for new Bengal.	Actuals of the first 6½ months of transferred districts.	Total of columns (7) and (8)
1	2	3	4	5	6	7	8	9
Total Receipts	Rs. 5,64,33,000	Rs 1,19,30,000	Rs 4,45,03 000	Rs. 88,000	Rs. 4,45,91,000	Rs 4,54,53 000	Rs. 54,55,000	Rs 5,09,08,000
Adjustments for transfer of districts ...			.....	.....		6,52,005	...	6,52,000
Total ..	...	...	..		.	4,61,05 000	54,55,000	5,15,60,000
Expenditure...	6,06,70,000	1,10,03,000	4,96,67,000	1,79,000	4,98,46,000	4,70,12,000	57,50,000	5,27,62,000
Surplus (+) or Deficit (—)	—42,37,000	+9,27,000	—51,64,000	—91,000	—52,55,000	—9,07,000	—2,95,000	—12,02,000

5. Columns (6) and (7) of the preceding table show that the receipts in Bengal (proper) are expected to be better by Rs. 8,62,000, while the expenditure is likely to be less by Rs. 28,34,000.

6. The increase in receipts is accounted for partly by increase in revenue, and partly by the following assignment and adjustments under Land Revenue:—

	Rs.
(*a*) Assignment for grants to University and private Colleges	1,10,000
(*b*) Special grant from Imperial revenues for the improvement of Dalhousie Square in Calcutta	1,38,000
(*c*) Ditto for Cantonment Police taken over from the Cantonment Funds	10,000
(*d*) Ditto for the development of Agricultural and Veterinary Department	3,50,000
	6,08,000
Deduct—	
Contribution to Imperial for redistribution of charges under "2—Assignments and Compensations" ...	1,15,000
Special grant for the improvement of the Port of Chittagong transferred to Eastern Bengal and Assam ...	4,31,000
	5,46,000
Net increase under Adjustments	62,000

7. The increase in revenue is the net result of improvements under some heads and of decreases under others. The improvements aggregate Rs. 12,04,000, which are expected chiefly under the following heads:—Stamps (Rs. 1,41,000) chiefly from Court-fee stamps, Excise (Rs. 2,97,000), mainly for better settlements, Assessed Taxes (Rs. 38,000), Registration (Rs. 41,000), Marine (Rs. 3,45,000) under Pilotage receipts, Medical (Rs. 1,14,000), chiefly for the allotment of Rs. 90,000 to the Medical College Hospital made by His Royal Highness the Prince of Wales out of the donation of one lakh made by the Maharaja of Darbhanga on the occasion of the Royal visit; Irrigation Works (Rs. 1,80,000), chiefly for water-rates in the Sone Canals. On the other hand the decreases aggregate Rs. 4,04,000, and are principally under Interest (Rs. 30,000) owing to smaller loans having been taken by the local bodies than were provided for in the budget, Courts of Law (Rs. 38,000), Police (Rs. 54,000), Miscellaneous (1,54,000) and Civil Works in charge of the Public Works Department (Rs. 78,000).

8. On the expenditure side the revised estimate shows a net decrease of Rs. 28,34,000. The decrease is partly due to the failure to obtain the sanction before the close of the year to the scheme for an increase in the number of Deputy Collectors, partly to the non-utilization in full of the grants for the increase of salaries of Ministerial officers and the development of the Veterinary and Agricultural Department, partly to savings in the special and other grants for the Police and Education Departments amounting to about 7 and 9½ lakhs respectively, and partly to lapses in the grants for Civil Works (7¾ lakhs) which have been regranted next year for the completion of the works in question. On the other hand there have been increases under General Administration, Jails, Medical, Miscellaneous and Irrigation Minor Works. The increase under Medical is for larger grants to Hospitals and Dispensaries, grants to the Jheriah Plague Committee and Purulia Leper Asylum, and for the payment of fees and allowances of Dr. Gilbert Fowler, deputed to report on septic tanks in Bengal. The increase under Miscellaneous is especially due to the special grants of Rs. 45,000 to the Lady Dufferin Victoria Hospital, Calcutta, and of Rs. 12,500 to the Calcutta Female Nurses' Institution. The increase under Irrigation Minor Works and Navigation is for the payment of Rs. 3,90,000 for a portion of the cost of the Suction Dredger indented for from England.

9. The closing balance of the current year was estimated in March last at Rs. 82,49,000. To this must now be added Rs. 5,14,000, the excess of the opening balance over the estimate. Rs. 8,62,000, by which the receipts of

the current year have improved, and Rs. 28,34,000 the net decrease of expenditure. But from the total of these should be deducted Rs. 2,95,000 the excess of expenditure over receipts in the Eastern districts during the first six months and-a-half of the year and the loss in the estimated surplus in the Eastern districts amounting to Rs. 9,27,000—Rs. 5,61,000=Rs. 3,66,000. The net result of these additions and deductions will bring the balance to Rs. 1,17,98,000. In the revised estimate, therefore, the closing balance of the current year is placed at Rs. 1,17,98,000.

NEW FINANCIAL SETTLEMENT.

10. In consequence of the transfer of fifteen districts of Bengal to the Government of Eastern Bengal and Assam, a new Provincial settlement has been made which will come into force from the 1st April 1906, and will be of a quasi-permanent nature. In framing the terms of the revised settlement it has been necessary (1) to determine the standard of revenue and expenditure in Bengal as previously constituted; (2) to deduct the revenue and expenditure incurred in the districts transferred to Eastern Bengal and Assam; (3) to make similar changes in connection with the transfer of Sambalpur from, and of certain Native States to, the Central Provinces; (4) to distribute the special grants given to Bengal as previously constituted for Police reorganization, Primary education and District Boards; and (5) to make an addition on account of a special grant-in-aid of agricultural improvements.

11. For the standards of revenue and expenditure the Government of India have adopted the budget figures for 1905-06, except under the head of "45—Civil Works" for which the standard of 45 lakhs has been taken as suitable to the requirements of the reduced province. In revising the terms the receipts under the heads of Land Revenue, Excise, Assessed Taxes and Forests have been divided equally between Provincial and Imperial, while the collections from Government estates have been made wholly Provincial. The Bengal Government will now get one-half of the increased receipts under the divided heads mentioned above, including Stamps, while those under Registration will continue to be wholly Provincial as settled in 1904.

BUDGET ESTIMATE, 1906-07.

12. The opening balance for 1906-07 corresponds with the closing balance of the current year, and is therefore taken at Rs. 1,17,98,000.

13. The estimate shows receipts aggregating Rs. 4,92,72,000, an expenditure of Rs. 5,20,94,000, and a closing balance of Rs. 89,76,000.

14. The ordinary Provincial minimum closing balance is Rs. 20,00,000, but in addition to that amount the Government of Bengal must keep the special grant for improvements of Calcutta untouched, so that under the present conditions the minimum closing balance is 20+50=70 lakhs. The estimated closing balance is therefore Rs. 19,76,000 in excess of the present minimum.

15. The budget estimate for next year as passed provides for receipts aggregating Rs. 4,92,72,000. The amount assigned to the Local Government in the new Financial settlement is Rs. 4,72,73,000, and owing to ordinary expansion it is estimated that the revenue made over will yield next year Rs. 4,88,42,000. To this must be added the special assignments of Rs. 4,30,000 for the following:—

	Rs.
For charges on amount of Cantonment Magistrates which have been reprovincialized	29,000
For grants to University and private Colleges	1,60,000
For Technical education	35,000
For additional reforms in Police	4,00,000
For abolition of Patwari cess in Sambalpur	26,000
	6,50,000
Deduct—Balance of the Zamindari Dâk Fund transferred to Imperial on the abolition of the Fund, a corresponding credit having been afforded to Provincial under "Contribution from Local"	2 20,000
Net assignment	4,30,000

These will bring up the total receipts to Rs. 4,92,72,000.

16. The expenditure of the year is estimated at Rs. 5,20,94,000 and exceeds the income by Rs. 23,22,000 and the settlement assignment, by Rs. 48,21,000. The estimate includes provision for non-recurring charges aggregating Rs. 47,28,000 as shown below:—

	Rs.
Sundarbans reclamation	1,00,000
Initial outlay in bringing up records-of-rights in Orissa ...	1,31,000
Grant for improvements in record-rooms	50,000
Grain Compensation Allowance	2,00,000
Survey of Sundarbans Forest (Provincial share)	45,000
Collection of Sanitary Statistics proposed by the Sanitary Commissioner with the Government of India ...	7,000
Expert Sanitary Engineer for Septic Tank installation ...	16,000
Acquisition of land for the extension of Buxar Central Jail ...	20,000
Purchase of furniture and apparatus and models for the Mining Department, Civil Engineering College ...	10,000
Initial outlay on the establishment of Central Weaving School at Serampore	1,00,000
Purchase of works of Art for Government Art Gallery ...	29,000
Laboratories, fittings and other charges for Patna College	1,00,000
Steam Launch for the Commissioner of the Presidency Division	20,000
Civil Works in charge of the Public Works Department—	
Extension of High Court	1,00,000
Presidency Jail and Surgical Ward, Medical College ...	2,00,000
Lunatic Asylum, Ranchi	4,50,000
District Judge's Residence, Darbhanga	33,000
Judge's House, Gaya	50,000
Purchase of Bungalows in Cuttack	81,000
Improvements in Darbhanga	24,000
Cholera Ward in Medical College, Calcutta	53,000
Paying patients' block for Indians in Medical College, Calcutta	1,00,000
Construction of Cadet School, Ranchi	1,75,000
Land and buildings at Kharagpur and Jhargram for the division of the Midnapore District into two	4,00,000
Acquisition of Haritola bustee, near Campbell Hospital ...	1,00,000
Land and buildings for Ranchi Model College and School and Civil Engineering College	6,00,000
Land and buildings for officers' quarters, etc., in Howrah ...	3,90,000
Double-storied block in Campbell Hospital	60,000
Civil Works in charge of Civil officers—	
Calcutta Municipality for Incinerator	35,000
Bhagalpur Municipality for Water-works	25,000
Nadia Municipality for repairs to Embankments	6,000
Monghyr Municipality for Water-supply	75,000
Berhampore Municipality for Drainage	20,000
Titaghur Municipality for Drainage	10,000
Puri Municipality for drainage	25,000
Ditto for Sanitary Improvements	50,000
Acquisition of Post Office Bustee in Patna	24,000
Police Buildings in the Mufassal	85,000
Water-works and sanitary improvements in Darjeeling ...	1,00,000
Initial outlay for the division of Patna into two	64,000
Suction Dredger	4,50,000
Bhairab Valley Drainage	75,000
Sugarcane irrigation in Otter	40,000
Total ...	47,28,000

17. The estimate also provides, besides the normal growth in administration such as increase in salaries, supernumeration charges, etc., for the following recurring outlay in addition to the scale of expenditure allowed for in the settlement:—

		Rs.
(1)	For increase of pay of ministerial officers in addition to the special grant made by the Government of India	1,50,000
(2)	„ reorganization of the Registration Department ...	90,000
(3)	„ Additional District and Sessions Judges and their establishments	40,000
(4)	„ additional establishment for the separation of the Patna Division into two	10,000
(5)	„ an Additional Secretary, Legislative Council ...	5,000
(6)	„ an Additional Professor of Sanskrit in the Presidency College	6,000
(7)	„ an Additional Professor of Physiology in the Medical College	14,000
	Total ...	3,15,000

PART II.—Detailed remarks on the Budget for 1906-07.

[THE remarks in the following paragraphs refer to Bengal as it now stands after the transfer of East Bengal to the new Province.]

RECEIPTS.

18. *Land Revenue.*—The total collections under this head in 1904-05 amounted to Rs. 2,87,82,526, and the estimate for 1906-07, as passed by the Government of India, is Rs. 2,93,61,000. The estimate includes Rs. 5,00,000 for recoveries of the survey and settlement charges in Purnea (Rs. 4,00,000) and Ranchi (Rs. 1,00,000) About Rs. 50,000 will be recovered in the Sonthal Parganas, but they are to be adjusted under "Advances Recoverable" and not credited in the general account.

The estimated Provincial share of land revenue is arrived at as follows:—

	Estimate, 1906-07. Rs.
Gross Land Revenue	2,93,61,000
Deduct estimated collections from Government estates (now wholly Provincial)	32,38,000
Deduct recoveries of Survey and Settlement charges (Imperial)	5,00,000
Total deduction ...	37,38,000
Net amount divisible between Imperial and Provincial Funds	2,56,23,000
Provincial share of above (one-half) ...	1,28 11,000
Add collections from Government estates	32,38,000
Total Provincial ...	1,60,49,000
Add Adjustments as in Appendix A	10,02,000
Total Provincial share ...	1,70,51,000

19. *Stamps.*—The actual receipts in 1904-05 were Rs. 1,35,03,882. The actuals in the first eleven months of the current year, exclusive of those from one anna Receipt Stamps, show an increase of Rs. 7,28,000 over those in the corresponding period of last year. In view of these figures the revised estimate for the current year has been passed for Rs. 1,42,00,000 and the estimate for

1906-07 placed at Rs. 1,45,00,000. The Local Government gets one-half of these amounts

20. *Excise.*—The actuals for the first eleven months of 1905-06 show an increase of Rs. 11,15,000 over those in the corresponding period of the preceding year, and as Rs. 1,40,69,166 were realized in 1904-05, the revised estimate for the current year has been passed for Rs. 1,52,50,000. The estimate for next year allows for an increase of 4½ lakhs, and has been placed at Rs. 1,57,00,000. The Provincial share (one-half) amounts to Rs. 78,50,000.

21. *Provincial Rates.*—The actual collections of Public Works cess in 1904-05 amounted to Rs. 35,20,337, and the estimate for next year has been taken at Rs. 35,90,000. An increase is anticipated on the completion of the work of revaluation in certain districts. Under General Rates for the management of private estates the estimate of receipts is Rs. 1,30,000, and this added to the estimate of receipts from Public Works Cess makes up the sum of Rs. 37,20,000, which is the total estimate for the year

22. *Assessed Taxes.*—The budget estimate of receipts from Income-tax for 1905-06 was Rs. 43,97,000. The actual collections in the first eleven months of the year amounted to Rs. 42,15,000. For the remaining month of the year the receipts have been put at Rs. 3,35,000, and the revised estimate has been placed at Rs. 45,50,000. The estimate for next year allows for an increase of Rs. 1,00,000 and stands at Rs. 46,50,000. The Provincial share (one-half) amounts to Rs. 23,25,000.

23. *Forests.*—The total receipts under this head for 1906-07 are estimated at Rs 10,00,000 against Rs. 8,98,000, the budget estimate for 1905-06, and Rs. 8,80,905, the actuals of 1904-05. The Provincial share under the new settlement is one-half.

24. *Registration.*—The budget estimate under this head for 1905-1906 was Rs. 10,22,000. The collections of the first eleven months of the current year show an increase of Rs. 46,000 over those of the corresponding period of the preceding year; and as the actuals of 1904-05 were Rs. 10,18,261, the revised estimate has been placed at Rs. 10,64,000, while the estimate for 1906-07 has been passed for Rs. 10,50,000. The receipts under this head are not expected to be as high as in the current year because a considerable decrease is expected in the Chota Nagpur Division owing to the operation of the Chota Nagpur Tenancy Amendment Act V of 1903 The receipts of this Department are wholly Provincial.

25. *Law and Justice—Courts of Law.*—The actuals of last year amounted to Rs. 5,61,378, and the revised estimate for the current year has been taken at Rs. 5,40,000 with reference to the actuals of the first ten months of the year. During the current year there has been a falling off under general fees, fines and forfeitures, but this is not expected to continue, and the receipts for next year have been estimated at Rs. 5,60,000.

26. *Jails.*—The actuals of the twelve months ending 31st January 1906 show an increase of Rs. 31,000 over those of the corresponding period of last year; and as the actuals of 1904-1905 were Rs. 12,31,117, the revised estimate has been placed at Rs. 12,60,000. The budget estimate for the current year, Rs. 12,50,000, has been repeated as the estimate for next year.

27. *Police.*—The estimate under this head amounts to Rs. 1,67,000 against Rs. 1,30,000, the revised estimate for 1905-1906, and Rs 1,68,016, the actuals of 1904-1905. No recoveries are to be made for Cantonment Police from 1st April 1905, while the fines for the prevention of cruelty to animals now appear under Law and Justice instead of under this head, as in 1904-1905. The budget includes Rs. 22,000 for fines imposed on the Calcutta and Subarban Police Force which were formerly credited to the Police Superannuation Fund which has now been abolished.

28. *Marine.*—The budget estimate for the current year was Rs. 13,05,300. This has been raised to Rs. 16,50,000 in the revised estimate with reference to the actuals of the first eleven months of the current year. The estimate for next year has also been passed for a like amount.

29. *Education.*—The estimate under this head is Rs. 6,40,000 against Rs. 6,10,000, the revised estimate for 1905-1906, and Rs. 5,78,646, the actuals of 1904-1905. The increase is expected mainly from rent of boarding houses for students of private Colleges in Calcutta.

30. *Medical.*—The estimate under this head is Rs. 2,60,000 against Rs. 2,46,387, the actuals of 1904-1905, and Rs. 5,46,000, the revised estimate for the current year. The revised estimate includes a contribution of two lakhs from the Calcutta Hospital Port Dues Fund towards the maintenance of the Presidency General Hospital and an allotment of Rs. 90,000 made by His Royal Highness the Prince of Wales to the Medical College Hospital out of the donation of one lakh made by the Maharaja of Durbhanga on the occasion of the Royal visit.

31. *Scientific and other Minor Departments.*—The total receipts for 1906-07 are estimated at Rs. 2,94,000 against Rs. 2,74,454, the actuals of 1904-05. The revised estimate for 1905-06 based on the actuals of the nine months of the year has been placed at Rs. 2,78,000. The budget includes larger provision for the sale of sulphate of quinine.

32. *Receipts in aid of superannuation.*—The budget estimate for 1906-07 has been passed for Rs. 57,000 against Rs. 60,000, the revised estimate for 1905-06, and Rs. 59,730, the actuals of 1904-05.

33. *Miscellaneous.*—The receipts under this head are of a fluctuating character. The estimate for next year has been placed at Rs. 5,76,000 against Rs. 6,80,000 and Rs. 5,26,000, the budget and revised estimates, respectively, for the current year, and Rs. 5,95,684, the actuals of last year.

34. *Irrigation, Major Works (Direct Receipts).*—The estimate under this head amounts to Rs. 20,72,000 against Rs. 20,00,000, the budget estimate for the current year. The actuals of last year were Rs. 20,46,167. During the current year there have been larger receipts under Water-rates from the Orissa and Sone Canals and under Navigation from all the canals and the revised estimate has been placed at Rs. 21,50,000.

35. *Irrigation, Minor Works and Navigation in charge of the Public Works Department.*—The estimate for the current year is Rs. 6,50,000 which has been raised to Rs. 6,80,000 in the revised estimate owing to larger navigation receipts in the Calcutta and Eastern Canals. It is doubtful if the increase will continue in next year, and a lower figure has been adopted for the budget. The budget includes Rs. 5,000 which is anticipated from sugarcane irrigation in Bihar.

36. *Civil Works.*—The details of the receipts under this head are given in Appendix A.

EXPENDITURE.

37. *Refunds and Drawbacks.*—The estimate for 1906-1907 is Rs 1,15,000 against Rs. 1,09,000 and Rs. 99,093, the revised estimate for the current year and the actuals of 1904-1905, respectively. The increase is due to the increase in the Provincial share in some of the principal heads of revenue.

38. *Assignments and Compensations.*—The Government of India have decided that the charges under Land Revenue compensations should be divided in the same proportion as the receipts under that head with effect from 1st April 1905. The charges under the head Pensions in lieu of resumed lands, which were wholly Imperial before 1905-1906, and Malikana, which were wholly Provincial, are the only two heads which have been affected by this decision. The details are shown in Appendix B.

39. *Land Revenue.*—The total Provincial expenditure for next year is estimated at Rs 38,01,000 against Rs. 34,61,696, the budget estimate for the current year, as shown below :—

	1904-1905.		1905-1906.
	Budget. Rs.	Revised. Rs.	Budget. Rs.
(1) Charges of District Administration ...	26,23.195	23,57,000	29,20,000
(2) Charges on account of Land Revenue collections ...	1,401	1,000	1,400
(3) Management of Government estates	5,09,918	4,82,000	4,17,000
(4) Survey and Settlement ...	2,52,500	3,00,000	2,00,000
(5) Land Records and Agriculture	74,683	92,000	2,82,000
For rounding ...	...		600
Total ...	34.61 696	32,32,000	38,01,000

The increase under (1) is due to provision having been made for (*a*) the full sanctioned strength of officers and establishment, (*b*) for increase in the number of Deputy Magistrates and Deputy Collectors, (*c*) for the pay of muharrirs and peons of Additional Deputy Magistrates, (*d*) for grain compensation allowance to menial officers during dearness of food-grains, (*e*) for increase of salaries of Ministerial officers, and (*f*) for increased grant for improving the record-rooms of Collectorates. Under (3) a provision of one lakh has been made for the Sunderbans reclamation work, while the increase under (5) is for the provision of Rs. 1,31,000 for initial expenditure for bringing up the records-of-rights in Orissa and Rs. 36,000 for the maintenance of Record-of Rights in Sambalpur.

40. *Stamps.*—The estimate for 1906-1907 is Rs. 3,70,000 against Rs 4,27,000, the budget grant for 1905-1906. The decrease is chiefly under "Stamp paper supplied from Central Stores," the estimate under this head being Rs. 1,90,000 against Rs. 2,28,000, the budget estimate for 1905-1906. The provisional share (one-half) is Rs. 1,85,000.

41. *Excise.*—The total expenditure for next year is estimated at Rs. 7,32,000 against Rs. 7,23,000, the budget grant for 1905-1906. The increase is due to a provision of Rs. 15,000 for establishment in Sambalpur. Under the new settlement the Provincial share is one-half and amounts to Rs. 3,66,000.

42. *Assessed Taxes.*—The expenditure for next year is estimated at Rs 1,45,000 against Rs. 1,30,000, the sanctioned estimate for the current year. The increase is due to an increase in horse allowance of assessors and to an increase of establishment sanctioned for the Office of the Collector of Income-tax, Calcutta. The estimate for next year includes provision for two additional temporary assessors.

43. *Forests.*—The total budget grant for next year is Rs. 6,50,000 against Rs. 5,65,000, the estimate for 1905-1906. The increase is chiefly due to a provision for the detailed survey of the reserved forests in the Sunderbans, and for the payment of the profits in the working of the Porahat reserves in the Singhbhum Division for the five years ending 1905-1906. The budget also includes a larger provision for the construction of roads required for the opening out of Singhbhum, Angul and other divisions. The Provincial share (one-half) is Rs. 3,25,000.

44. *Registration.*—The estimate for next year is Rs. 6,92,000 against Rs. 6,01,000, the grant for the current year. The increase is due to a provision having been made to give full effect to the scheme of the reorganisation of the Department sanctioned by the Secretary of State.

45. *General Administration.*—The estimate for 1906-1907 is Rs. 17,32,000 against Rs. 17,27,196 the actuals of 1904-05. The buget includes Rs. 20,000 for increase of pay of Ministerial establishment, Rs. 20,000 for the balance of the cost of the steam-launch for the Commissioner of the Presidency Division which will have to be paid to the Dockyard authorities, and Rs. 10,000 for additional establishment that may be required, when the Patna Division is divided into two Commissionerships. Provision has also been made for the appointment of an additional Secretary to the Legislative Council and for additional temporary establishment in that Department.

46. *Law and Justice—Courts of Law.*—The budget estimate under this head for 1905-1906 was Rs. 73,13,295, but in the revised estimate this has been reduced to Rs. 70,54,000 with reference to the known actuals of the year. The estimate for 1906-1907 has been passed for Rs. 74,00,000, which includes provision for a District and Sessions Judge for Darbhanga, an Additional Judge for the 24-Parganas for five months, and an Additional Sub-Judge for that district. Larger provision has also been made for increase of salaries of ministerial officers, remuneration to copyists, diet and travelling allowances to witnesses, and allowances to Jurors and Assessors, and Additional Deputy Magistrates and their establishment.

47. *Jails.*—The estimate for the current year was Rs. 22,17,147 against Rs. 19,02,245 the actuals of last year. The actuals of the first nine months of the year, however, show an increase of three lakhs as compared with the figures of last year, and the revised estimate for the year has accordingly been raised to Rs. 23,33,000. The increase is chiefly under Jail Manufactures and is due to larger expenditure on the purchase of raw materials. The estimate for next year is Rs. 22,71,000, and includes a provision of Rs. 20,000 for the acquisition of land for the Buxar Central Jail.

48. *Police.*—The following table compares the estimates under this head:—

	1904-1905. actuals.	1905-1906. Budget.	1905-1906. Revised.	1906-1907. estimate.
	Rs.	Rs.	Rs	Rs.
(1) Presidency Police ...	8,62,316	8,70,000	9,08,000	10,06,600
(2) Municipal „ ...	42,700	52,000	61,000	54,000
(3) Superintendence ...	1,85,253	1,63,000	1,94,000	2,01,000
(4) District Executive Force ...	37,47,168	48,78,600	42,30,000	47,10,700
(5) Village Police ...	52,883	51,800	47,000	51,000
(6) Special „ ...	94,861	1,13,600	85,000	63,000
(7) Railway „ ...	1,53,428	2,01,000	1,66,000	2,17,500
(8) Cattle-pounds ...	1,767	1,000	1,000	1,000
(9) Refunds	16,786	30,000	11,000	12,200
(10) Grain compensation allowance	.. ...	.....	.....	50,000
Total ...	51,57,102	63,61,000	57,03,000	63,67,000

The budget for the current year included a lump provision of Rs. 12,00,000 for reforms recommended by the Police Commission. A portion of this (3 lakhs) will go from next year to the New Province The estimate for next year includes the distribution of the remainder of the grant in full between different heads as well as a special lump grant of four lakhs under District Executive Force for additional expenditure on reforms.

49. *Marine* —The budget provides for a total expenditure of Rs. 10,97,000, against Rs. 11,07,604, the sanctioned estimate for 1905-1906. The estimate for the current year included the delivery charges of steam cruiser *Fraser* which will not recur next year.

50. *Education.*—In order to have a correct idea of the growth of expenditure under Education, it is necessary to show the disbursements both in the Provincial and District Fund accounts, since most of the expenditure under the latter is met from grants from the Provincial Revenues. The following table shows the charges from 1903-1904:—

	Account.		Revised estimate, 1905-1906.	Budget estimate, 1906-1907.
	1903-1904.	1904-1905.		
Provincial.	Rs.	Rs.	Rs.	Rs.
Direction	90,000	90,000	82,000	91 300

Schools	73,000	76,000	88,000	88,000
Grants-in-aid	7,70,000	8,09,000	8,47,000	9,56,000
Scholarships	21,000	26,000	35,000	35,000
Miscellaneous	42,000	29,000	21,000	21,000
Refunds	.....	,000	.....	.....
Total Local ...	11,37,000	11,82,000	12,20,000	12,00,000
GRAND TOTAL ...	40,27,000	42,50,000	43,37,000	53,00,000

The above table shows that the expenditure under this head is increasing year after year. The Provincial budget for 1906-1907 includes the following provisions:—

	Rs.
Grant to Calcutta University for administration, inspection and travelling charges	30,000
Grant to Calcutta University for building purposes ...	50,000
Grant to private colleges for hostels, etc.	80,000
Pay and allowances of Sub Inspectors of Schools transferred from District Boards to Education Department ...	1,67,000
An Additional Professor of Sanskrit in the Presidency College	6,000
Electric lights and fans and the maintenance of hydraulic lift in the Presidency College	3,000
Salary of Professors and Instructors for the Mining Class at the Civil Engineering College	19,360
Travelling allowance and house allowance of ditto ...	6,700
Mining Models	5,000
Furniture and apparatus for Mining class	5,000
High School at Sambalpur	12,000
Purchase of works of Art for Government Art Gallery ...	28,764
Starting Training Colleges at Hooghly and Bhagalpur ...	75,000
Establishment and maintenance of a Central Weaving School at Serampur	1,35,000
For laboratories fittings and other charges for Patna College	1,00,000

51. *Medical.*—The budget grant for next year is Rs. 21,89,000 against Rs. 20,45,000, the revised estimate for the current year, and Rs. 19,91,050 the actuals of last year. The estimate provides Rs. 90,000 for preventive measures against plague, Rs. 20,000 for anti-malarial measures, Rs. 16,100 for fees and allowances of Dr. Gilbert Fowler on deputation to report on septic tanks in Bengal, Rs. 7,000 for collection of sanitary statistics proposed by the Sanitary Commissioner with the Government of India, and a reserve provision of Rs. 9,000 for grants to Leper Asylums.

52. *Scientific and other Minor Departments.*—The expenditure under this head is estimated at Rs. 10,76,000 against Rs. 7,50,000, the revised estimate for the current year Provision has been made for the development of the Veterinary and Agricultural Departments.

53. *Superannuation.*—The charges under this head show a progressive increase year after year owing to the increase in the claims to pension. The estimate for 1906-1907 is Rs. 25,37,000 against Rs. 23,94,000, the revised estimate for 1905-1906 and Rs. 22,93,065 the actuals of 1904-1905.

54. *Stationery and Printing.*—The estimate for 1906-1907 is Rs. 10,29,000 against Rs 10,34,000 and Rs. 10,71,500, the revised and budget estimates for 1905-1906. The decrease is under stationery supplied from Central Stores.

55. *Miscellaneous.*—The revised estimate for the current year is Rs. 3,60,000 against Rs. 2,79,000, the original budget estimate for the year. The increase is due to the special payment of Rs. 45,000 to the Lady Dufferin Victoria Hospital in Calcutta, and of Rs. 12,500 to the Calcutta Female Nurses' Institution. The estimate for next year is Rs. 2,7[illegible],000, and pretty closely follows the budget estimate for 1905-1906. The variations in the estimates are shown in Appendix B.

56. *Irrigation—Minor Works and Navigation in charge of the Public Works Department.*—The actual charges in 1904-1905 were Rs. 16,86,998. The budget estimate for 1905-1906, inclusive of Rs. 3,75,000 on account of Government contribution for the Magra Hât drainage scheme, was Rs. 20,04,000. The revised estimate for the year is Rs. 22,30,000 and includes Rs. 3,90,000 for payment required in the current year on account of a suction dredger indented for from England, but excludes Rs. 1,40,000 surrendered from the grant for the Magra Hât drainage scheme which, however, has been regranted for expenditure in 1906-1907. The budget estimate of expenditure for 1906-1907 is Rs. 21,85,000 and includes Rs. 4,50,000, the balance to be paid for the suction dredger, Rs. 1,40,000 for Magra Hât drainage, as stated above, Rs. 75,000 for the Bhairab Valley drainage in the district of Jessore, Rs. 40,000 for a pumping installation in Bihar required for sugarcane irrigation, and Rs. 49,500 for the Dudhai Canal.

57. *Civil Works.*—The estimate of expenditure in charge of the Public Works Department for next year has been placed at Rs. 73,25,000, which is distributed thus :—

	Rs.
Original Works	48,69,000
Repairs	15,00,000
Establishment	9,23,825
Tools and Plant	32,175
Total ...	73,25,000

The allotment for original works includes the following items :—

	Rs.
Land and buildings in Kharagpur and Jhargram for the division of Midnapore into two districts	4,00,000
Construction of Munsifs' Court	75,000
Ditto of Residences	40,000
Removing the Plassey Monuments to the site of the battlefield, &c.	15,000
Extension of High Court	1,00,000
New Presidency Jail	1,00,000
Construction of a Police-station at Taltollah	49,000
Ditto of a Cadet School, Ranchi	1,75,000
Construction of a Hostel for Hindu students, Ravenshaw College	19,000
Removal of the Lunatic Asylum to Ranchi	4,63,800
Construction of a Model and Engineering College at Ranchi ...	6,35,000
Barracks for Students, Pathological Museum in Temple Medical School	27,000
Construction of Surgical ward, Medical College	1,00,000
Ditto of Cholera ward, ditto	53,500
Ditto of Nurses' quarters, ditto	49,000
Ditto of Paying Patients' block for Indians in ditto ...	1,00,000
Remodelling the central portion of the Campbell Hospital ...	20,000
Construction of a double-storied ward in the Campbell Hospital	60,000
Acquisition of Haritollah Bustee adjoining ditto ...	1,00,000
Construction of Residence for the District Judge, Darbhanga ..	33,300
Ditto ditto, Gaya ...	50,000
Purchase of bungalows in Cuttack	81,000
Land and buildings for Subjail, offices, and housing of officials, at Howrah	3,89,800
Residences of Government officials in mufassal	86,000
Extension of the Veterinary Institution, Belgachia ...	1,20,000
High-Level Tista Valley Road	93,800
Improving the drainage of the south-east corner of Calcutta Maidan	15,000
Improvement of Civil Station, Darbhanga	24,000
Total ...	34,74,200

58. *Civil Works in charge of the Civil Department.*—The estimate for next year is Rs. 11,30,000 and includes provision for grants to Municipalities and Excluded Local Funds which are adjusted under this head, Rs. 85,000 for Police buildings in addition to the provision in the Public Works Department budget; one lakh for Water-works and Sanitary improvements in the town of Darjeeling, and Rs. 64,000 for initial expenditure for the division of Patna into two Commissionerships.

59. *Contributions from Provincial to Local.*—The original estimate for the current year amounting to Rs. 25,12,000 has been reduced to Rs. 23,66,000 in the revised estimate as the special reserve kept under this head has been transferred to Public works and other Departments to meet pressing demands in those departments, while Rs. 4,80,000 has been added for grants to District Boards for Primary School buildings. The estimate for next year is Rs. 19,10,000 and includes a provision of 9 lakhs for grants to District Boards being equivalent to one-fourth of the road-cess collections in those districts.

Jail manufactures	12,11,437	12,31,000	12,40,000	12,30,000	
Total	12,31,117	12,50,000	12,60,000	12,50,000	The budget is based on the normal receipts of the preceding four years. The revised is based on the actuals of 12 months ending January 1906.
Eastern Bengal ...	1,55,595	1,50,000	68,000	... ..	
GRAND TOTAL ...	13,86,712	14,00,000	13,28,000	12,50,000	

XVII—Police—

Police supplied to Municipal, Cantonment and Town Funds	10,258	10,000	2,000	.....	No recoveries are made for Cantonment Police from 1st April 1905. The revised includes arrears.
Police supplied to Public Departments, private companies and persons	25,946	36 000	32,000	26,000	
Presidency Police	1,00,760	1,00,000	60,000	1,10,000	The decrease in the revised and budget is due to no credit having appeared on account of fines for prevention of cruelty to animals. Smaller realizations of fees, fines and forfeitures are anticipated in 1905-1906 while the budget provides for normal receipts on these accounts. It includes Rs. 23,000 for fines imposed on police forces which were hitherto credited to the Police Superannuation Fund.
Recoveries on account of village police	443	1,000	1,000	1,000

PART V.

Acts of the Governor General's Council assented to by the Governor General.

GOVERNMENT OF INDIA

LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of the Governor General on the 21st March 1906, and is hereby promulgated for general information :—

ACT NO. IV OF 1906.

An Act further to amend the Presidency Small Cause Courts Act, 1882.

XV of 1882

WHEREAS it is expedient further to amend the Presidency Small Cause Courts Act, 1882; It is hereby enacted as follows —

Short title

1. This Act may be called the Presidency Small Cause Courts Act, 1906.

XV of 1882.

Amendment of section 28, Act XV, 1882.

2. In section 28 of the Presidency Small Cause Courts Act, 1882, after the words "such decree" the words "and for the purpose of deciding all questions arising in the execution of such decree" shall be inserted.

Amendment of section 39 of same Act.

3. In section 39 of the said Act, for sub-section (*2*) the following shall be substituted, namely :—

"(*2*) Unless the Judge is of opinion that the application has been made solely for the purpose of delay, the applicant shall be entitled to such order as of right:

Provided that the removal directed by such order shall, unless the Judge otherwise directs, be conditional upon the applicant giving security, to the approval of the Judge, within a reasonable time to be prescribed in the order, for the payment of the amount claimed and of the costs which may become payable by him to the plaintiff in respect of the said suit."

Substitution of new section for section 69 of same Act.

4. For section 69 of the said Act the following shall be substituted, namely :—

Reference when compulsory.

"69. (*1*) If two or more Judges of the Small Cause Court sit together in any suit, or in any proceeding under Chapter VII of this Act, and differ in their opinion as to any question of law or usage having the force of law or the construction of a document, which construction may affect the merits, or

if in any suit or any such proceeding, in which the amount or value of the subject-matter exceeds five hundred rupees, any such question arises upon which the Court entertains reasonable doubt, and either party so requires,

the Small Cause Court shall draw up a statement of the facts of the case and the point on which there is a difference of opinion or on which doubt is entertained, and refer such statement with its own opinion on the point for the opinion of the High Court; and the provisions of sections 619 to 621 of the Code of Civil Procedure shall, so far as they are applicable, be deemed to apply as if such XIV of 1882.

reference had been made under section 617 of the said Code.

(*2*) When the Small Cause Court refers any question for the opinion of the High Court as provided in sub-section (*1*), it shall either reserve judgment or give judgment contingent upon such opinion."

5. In No. 11 of the second schedule to the Indian Limitation Act, 1877, after the words "the Code of Civil Procedure," the following shall be inserted, namely :—"or section 28 of the Presidency Small Cause Courts Act, 1882."

Amendment of second schedule, Act XV, 1877.

XV of 1877.

J. M. MACPHERSON,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of the Governor General on the 21st March 1906, and is hereby promulgated for general information :—

ACT NO. V OF 1906.

An Act further to amend the Indian Stamp Act, 1899.

WHEREAS it is expedient further to amend the Indian Stamp Act, 1899; It is hereby enacted as follows :— II of 1899.

1. This Act may be called the Indian Stamp (Amendment) Act, 1906. Short title.

2. In section 2, clause (*19*), of the Indian Stamp Act, 1899 (hereinafter referred to as "the said Act"), sub-clause (*c*), and the word "and" prefixed thereto, are hereby repealed. II of 1899. Repeal of part of section 2, Act II, 1899.

3. In section 11, clause (*a*), section 32, proviso, clause (*c*), section 35, proviso, clause (*a*), section 40, section 41, section 69 and section 74, of the said Act, after the words "one anna," wherever they occur, the words "or half an anna" shall be inserted. Amendment of sections 11, 32, 35, 40, 41, 69 and 74, Act II, 1899.

4. For section 29, clause (*b*), of the said Act, the following shall be substituted, namely :— Substitution of new clause for clause (*b*) of section 29, Act II, 1899.

"(*b*) in the case of a policy of insurance other than fire-insurance—by the person effecting the insurance;

(*bb*) in the case of a policy of fire-insurance —by the person issuing the policy;".

5. To section 30 of the said Act the following paragraph shall be added, namely :— Addition to section 30, Act II, 1899.

"Any person receiving or taking credit for any premium or consideration for any renewal of any contract of fire-insurance, shall, within one month after receiving or taking credit for such premium or consideration, give a duly stamped receipt for the same."

6. In section 51 of the said Act, after the word "instruments" the words "by any banker or," and after the word "said" the word "banker," shall be inserted. Amendment of section 51, Act II, 1899.

7. In Schedule I of the said Act, the following amendments shall be made, namely :— Amendments of Schedule I, Act II, 1899.

(*1*) For clauses (*b*) and (*c*) of the exemptions from Article No. 24 the following shall be substituted, namely :—

"(*b*) Copy of, or extract from, any register relating to births, baptisms, namings, dedications, marriages, deaths or burials."

(*2*) In clause (*b*) of Article No. 41, for the words "one year" the words "eighteen months" shall be substituted.

(*3*) For divisions A and B of Article No. 47 the following shall be substituted, namely :—

	If drawn singly.	If drawn in duplicate, for each part.
"A.—SEA-INSURANCE (*see* section 7)—		
(1) for or upon any voyage—		
(i) where the premium or consideration does not exceed the rate of two annas or one-eighth per centum of the amount insured by the policy;	One anna.	Half an anna.
(ii) in any other case, in respect of every full sum of one thousand rupees and also any fractional part of one thousand rupees insured by the policy;	Two annas.	One anna

	If drawn singly.	If drawn in duplicate, for each part.
(2) for time—		
(iii) in respect of every full sum of one thousand rupees and also any fractional part of one thousand rupees insured by the policy—		
where the insurance shall be made for any time not exceeding six months;	Two annas.	One anna.
where the insurance shall be made for any time exceeding six months and not exceeding twelve months.	Four annas.	Two annas.

"B.—FIRE INSURANCE—

(1) in respect of an original policy—	
(i) when the sum insured does not exceed Rs. 5,000;	Eight annas.
(ii) in any other case;	One rupee.
and	
(2) in respect of each receipt for any payment of a premium on any renewal of an original policy.	One-half of the duty payable in respect of the original policy in addition to the amount, if any, chargeable under No. 53."

(4) To Article No. 53 the following note shall be added, namely:—

"*See also* POLICY OF INSURANCE [No. 47-B (2)]."

J. M. MACPHERSON,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Governor General of India in Council received the assent of the Governor General on the 21st March 1906, and is hereby promulgated for general information:—

ACT NO. VI OF 1906.

An Act further to amend the law relating to merchant seamen.

WHEREAS it is expedient further to amend the law relating to merchant seamen; It is hereby enacted as follows:—

1. This Act may be called the Indian Merchant Shipping (Amendment) Act, 1906.

Short title.

2. To section 23 of the Indian Merchant Shipping Act, 1859, the following shall be added, namely:—

I of 1859.

Amendment of section 23, Act I, 1859.

"Notwithstanding anything in this section, in the case of any such foreign-going ship as aforesaid, being a ship—

(*a*) registered in British India under the Merchant Shipping Act, 1894, or

57 & 58 Vict., c. 60.

(*b*) registered in the United Kingdom under the said Merchant Shipping Act, 1894, but not employed in trading with any port in the United Kingdom,

a running agreement with the crew may be made to extend over two or more voyages so that it shall terminate either within six months from the date on which it was executed or on the first arrival of the ship at her port of destination in British India after the expiration of that period, or on the discharge of cargo consequent upon such arrival, whichever of these dates shall be the latest:

"Provided that no such agreement shall continue in force, if, after the expiration of such period of six months as aforesaid, the ship proceeds on a voyage from a port out of British India to any other such port which is not on the direct road or a customary route to her port of destination in British India:

"Provided also that every such agreement shall, in addition to any other particulars required by law, contain such stipulations for the discharge of the crew and payment of their wages, for securing their return to the port at which they were shipped or to some other port in British India, and for other purposes on the termination of the agreement at a port out of British India under the foregoing proviso, as the Governor General in Council may direct."

3. In section 24A of the said Indian Merchant Shipping Act, 1859, as amended by section 2 of the Indian Merchant Shipping Law Amendment Act, 1891, after the word "December" the words "or, as the case may be, after the expiration of a period of six months from the date on which it was executed," shall be inserted.

Amendment of section 24A, Act I, 1859.

I of 1859.

VI of 1891.

J. M. MACPHERSON,
Secretary to the Government of India.

APPENDIX TO

The Calcutta Gazette.

WEDNESDAY, MARCH 28, 1906.

NOTICES TO MARINERS.

THE following Notices are published for general information.

W. A. INGLIS,
Secretary, Marine Department.

CALCUTTA, *the 26th March 1906.*

AFRICA, EAST COAST.

Pungue river entrance—Shoal to the eastward

No 102 (first publication).—The British Admiralty has given notice (No. 173 of 1906) that the Master of the S S. *Logician* reports having obtained soundings of 4½ and 5 fathoms to the eastward of the Pungue river entrance on the parallel of latitude 19° 57′ S., extending from the meridian of 35° 12′ to that of 35° 5′ E. longitude.

This Notice affects the following Admiralty Charts :—Delagoa bay to cape Guardafui, No. 597, Delagoa bay to river Zambesi, No. 648: Also, Africa Pilot, part III, 1905, page 224

AFRICA, NORTH-EAST—RED SEA WESTERN SHORE.

Shaab Shakhs—Light established.

No 103 (first publication).—With reference to Notice to Mariners No 149, dated 7th May 1904, issued by this office, the British Admiralty has given further notice (No. 175 of 1906) that, on 15th February 1906, a *white flashing* light *every five seconds*, visible in clear weather from a distance of 18 miles, would be established in a metal tower, surmounting a tripod painted white with one black band, erected on a point known as Shaab Shakhs.

Approximate position, lat. 14° 38′ 15″ N., long. 41° 5′ 40″ E.

This Notice affects the following Admiralty Charts :—Red sea, Nos. 2523, 8d and 8e, Jebel Tier to Perim island, No. 143. Also List of Lights, part V, 1906, No. 1451, part VI, No. 152 ; Red sea, &c., Pilot, 1900, page 197, and Supplement, 1904, page 20.

PACIFIC OCEAN, NORTH—Caroline islands.

Uluthi islands—Shoal reported.

No. 104 (first publication).—The British Admiralty has given notice (No. 181 of 1906) of the existence of a shoal, with a depth of 3¼ fathoms over it, in the channel between Thoroilen and Paguieth islands, Uluthi.

Approximate position, lat. 10° 2′ N., long 139° 38′ E.

As no definite position is assigned to this shoal, "3¼ fathoms reported" has been placed upon the plan of Uluthi on chart No. 772, instead of "Large passage apparently without dangers."

This Notice affects the following Admiralty Chart:—Plan of Uluthi on chart No. 772: Also, Pacific Ocean, vol. I, 1900, page 434; and Supplement, 1903, page 41.

CHINA—Shantung, north coast.

Chifu time-ball—Standard time adopted.

No. 105 (first publication).—The British Admiralty has given notice (No. 182 of 1906) that, on 20th September 1905, the time-ball at Tower hill, Chifu, was dropped at 0, h. 0, m. 0s Standard time of the 120th meridian of East longitude, or 0h. 5m. 34s local mean time, corresponding to 16h. 0m. 0s. Greenwich mean time.

It is assumed from the above that Standard time has been adopted at Chifu.

Approximate position, lat. 37° 32′ 56″ N., long. 121° 23′ 30″ E.

This Notice affects the following Admiralty Charts:—Chin tau Shan to Chifu bluff with plan of Chifu or Yen-tai harbour, No. 1260. Also, List of Time Signals, 1904, No.; 175 and China Sea Directory, vol. III, 1904, pages 41, 568.

PACIFIC OCEAN—New Guinea, north coast, Admiralty islands.

San Gabriel island—Reef to the northward.

No. 106 (first publication).—The British Admiralty has given notice (No. 185 of 1906) of the existence of a reef, with a depth of 3¾ fathoms over it, northward of San Gabriel island, situated in a position from which the western extremity of that island bears S. 5° E., distant 3¾ miles, and the north-eastern point of the same island S. 63° E. This reef is connected with the island.

Approximate position, lat. 2° 2′ S., long. 147° 32½′ E.

(*Variation 5° Easterly in 1906.*)

This Notice affects the following Admiralty Charts:—North-east coast of New Guinea, No. 2766; Admiralty and Hermit islands on chart No. 769: Also, Pacific Islands, vol. I, 1900, page 407.

AUSTRALIA, NORTH-WEST COAST.

Cape Bertholet—Shoal to the westward.

No. 107 (first publication).—The British Admiralty has given notice (No. 186 of 1906) of the existence of a shoal, with a depth of 2 fathoms over it at low water, situated about 11 miles W.N.W. from cape Bertholet, or in approximately lat. 17° 13′ S., long. 122° 1′ E. P.D. has been placed against this shoal on the charts.

(*Variation 1° Easterly in 1906*)

This Notice affects the following Admiralty Charts:—North-west coast of Australia, No. 475; Buccaneer Archipelago to Bedout island, No 1048; Hall point to cape Bertholet, No. 1052: Also Australia Directory, vol. III, 1895, page 254; and Supplement, 1902, page 15.

PACIFIC OCEAN—HAWAIIAN OR SANDWICH ISLANDS.

Hilo Bay—Dispersal of wreck.

No. 108 (first publication).—With reference to Notice to Mariners, No. 490, dated 12th December 1905, issued by this office, the British Admiralty has given further notice (No. 187 of 1906) that the wreck of the barque *Martha Davis*, which sank in a depth of 20 feet in the anchorage in Hilo bay, is being dispersed; the floating tripod, from which a red flag was shown by day and a *red fixed* lantern light by night, formerly marking the wreck, and situated at a distance of 6¼ cables N. 59° E. from Hilo Roman Catholic Church, has in consequence been withdrawn.

Approximate position, lat. 19° 44′ N., long. 155° 5′ W.

(*Variation 9° Easterly in 1906.*)

This Notice affects the following Admiralty Chart:—Plan of Hilo bay on Chart No. 1377: Also, Pacific Islands, vol. III, 1900, page 201; and Supplement, 1903, page 13.

CHINA SEA—TONG KING GULF—HAILONG BAY APPROACH.

Norway islands—Shoal to the westward.

No. 109 (first publication).—The British Admiralty has given notice (No. 188 of 1906) respecting the existence of a rock, with a depth of 4 feet over it at low water, situated about 1½ cables to the westward of the north-westernmost of the Norway islands in the approach to Hailong bay, at a distance of 1 1/16 miles N. 87° W. from Norway island lighthouse.

Approximate position, lat. 20° 37½′ N., long. 107° 6¾′ E.

(*Variation 2° Easterly in 1906.*)

This Notice affects the following Admiralty Charts:—Kua Lacht to Kao Tao shan islands' No 1965; approaches to port Courbet, No. 1169: Also, China Sea Directory, vol. II, 1899' page 437; and Supplement, 1901, page 15.

NEW ZEALAND—SOUTH ISLAND.

Otago harbour entrance—Channel closed during dredging.

No. 110 (first publication).—The British Admiralty has given notice (No. 189 of 1906) that during the dredging of the flat to the southward of Harrington point, Otago harbour entrance, Mariners must only use the main channel when entering or leaving the harbour.

Approximate position, lat. 45° 48′ S., long. 170° 44′ E.

This Notice temporarily affects the following Admiralty Chart:—Otago harbour, No. 2411: Also, New Zealand Pilot, 1901, page 295.

EASTERN ARCHIPELAGO—SUMATRA, WEST COAST—KONINGINNE BAY APPROACH.

Pulo Pisang light—Character altered—Emma haven light.—Intended alteration in—.

No. 111 (first publication).—With reference to Notice to Mariners No. 77, dated 27th February 1906, issued by this office, the British Admiralty has given further notice (No. 190 of 1906), that the character of Pulo Pisang light has been altered from fixed to *occulting every twelve seconds*, thus:—light, *six seconds*; eclipse, *six seconds*, the red sector being discontinued; the light is produced by acetylene gas.

Approximate position, lat. 1° 0′ S., long. 100° 20′ E.

Also, that it is intended to discontinue the white sector in the light (*fixed*) exhibited from the breakwater head, Emma haven.

Further notice will be given when this alteration has been made.

This Notice affects the following Admiralty Charts:—Aceh head to Tyingkok, No. 2760; Ujong Masang to Ujong Indrapura, No. 709; Koninginne bay, No. 212: Also, List of Lights, part VI, 1906, Nos. 457, 460; China Sea Directory, vol. I, 1896, pages 299, 302; and Supplement, 1899, page 21.

BAY OF BENGAL—Orissa coast.

Dhamra river.—Changes in buoys.

No. 95 (second publication.)—The Port Officer, Cuttack and Balasore ports, has given notice, dated 10th March 1906 that the "B" buoy has been removed from its old position in the Dharma river and placed higher up. It is now a starboard hand buoy, painted red and will in future be called the "A" buoy, and the old "A" buoy will now be called the "B" buoy. The bearings of the "A" buoy in its new position is given below :—

Chandipal mark N. N W. ½ W.
Kalibhanj mark W. ½ N.
The bearings are magnetic.

EASTERN ARCHIPELAGO—Flores sea.

Flores, Komodo, and Tanah Jampea Islands—Existence and Non-existence of shoals.

No. 96 (second publication).—The British Admiralty has given notice (No. 148 of 1906) of the existence of the undermentioned shoals off the north-west coast of Flores island :—

(*a*) A shoal, with a least depth of 1¾ fathoms over it, situated at a distance of 3½ miles South from the summit of Sabolan Besar.

Approximate position, lat. 8° 27½′ S., long. 119° 48′ E.

(*b*) A shoal, with a least depth of 1½ fathoms, situated in approximately lat. 8° 23½′ S., long. 119° 53½′ E.

Also, that investigation shows that the breakers shown on the chart at a distance of 4 miles S. 15° W. from Sabolan Besar, and the shoal in lat. 8° 19′ S., long. 119° 51½′ E., do not exist ; they have therefore been expunged from the chart.

Komodo Island. A small shoal compos d of coral and rock, with a least depth of 1¾ fathoms over it, exists to the nor hward of this island in approximately lat. 8° 25¾′ S., long. 119° 34′ E.

Tanah Jampea. A pinnacle rock, with a least depth of 1½ fathoms over it, exists on the western side of this island, situated in a position from which the western extremity of Sambio island bears N. 22° W., distant 8 cables, and the eastern extremity of Guru N. 47° E.

Approximate position, lat. 7° 3½′ S , long. 120° 36½′ E.

Note.—The latitude given on plan of Sungi Menasa road on chart No. 2466 should be 7° 3′ 40″ S., not 7° 35′ 40″ S.

(*Variation 2° Easterly in 1906.*)

This notice affects the following Admiralty Charts :—Lombok to Flores, No. 1696 ; plans of Molo strait, and Sungi Menasa road on chart No. 2466 : and Eastern Archipelago, part II., 1904, pages 222, 217, 256.

EASTERN ARCHIPELAGO—Sumatra, West Coast.

Tabekat and Silugui bays and Sipora island shoals

No. 97 (second publication).—The British Admiralty has given notice (No. 152 of 1906) of the existence of the following shoals in the undermentioned localities off the west coast of Sumatra :—

Siberut Island.

(*a*) Tabekat bay. A reef on which there is a depth of 7 feet extends in a N. 10° W. direction for a distance of 2½ cables from the north-western point of Carolina island.

Approximate position on chart 2284, lat. 1° 2½′ S., long. 98° 57′ E.

(*b*) Silugui bay. A reef, with a least depth of 1¾ fathoms over it, exists in a position from which the south-eastern point of Togga Tesebukan bears S. 47° W., distant 6¾ cables, and the nothern point of the bay N. 4° E.

Approximate position, lat. 1° 23′ S., long. 99° 6¾′ E.

SIPORA ISLAND.

A shoal, with a depth of 5 fathoms over it, exists off the east coast of Sipora island in approximately lat. 2° 10′ S., long. 99° 42¾′ E.

(Variation Nil in 1906.)

This Notice affects the following Admiralty Charts:—Tyingkok bay to straits of Sunda, No. 2761; plans of Tabokat and Silugui bay on chart No. 2284: Also China Sea Directory, Vol. I., 1896, pages 328, 326, 329; and Supplement, 1899, page 33.

AUSTRALIA, SOUTH—HOBART APPROACH.

Tasman island light—Date of exhibition.

No. 98 (second publication).—With reference to Notice to Mariners No. 338, dated 1st September 1905, issued by this office, the British Admiralty has given further notice (No. 162 of 1906) that, on 2nd April, a *white flashing light every five seconds*, thus:—*flash*, half a second; *eclipse*, four and-a-half seconds. It will be elevated 907 feet above high water, and visible in clear weather from a distance of 36 miles, and will be established in a lighthouse constructed on the south-eastern part of Tasman island, in the approach to Hobart. The light will be of the 1st order.

Approximate position, lat. 43° 14½′ S., long. 148° 2′ E.

This notice affects the following Admiralty Charts:—Pacific, No. 788; Australia, No. 2759b; Tasmania, No. 1079; Also, List of Lights, part VI, 1906, No. 1565a; and Australia Directory, vol. I., 1897, page 727.

JAPAN—NORTH-WEST COAST.

Shiro se, Wakamiya, Okai no shima—Lights established.

No. 99 (second publication).—The British Admiralty has given notice (No. 169 of 1906) that, on 1st January 1906, the undermenticned lights would be established on the north-west coast of Japan:—

1. SHIRO SE. A *fixed* light, elevated 115 feet above high water and visible in clear weather from a distance of 11 miles, would be exhibited in a square white wooden lighthouse, about 15 feet high, erected on Shiro se, Goto islands it would show the following sectors:—*red* from the bearing of N. 45° E. to N. 67° E., *white* from N. 67° E., through east and south, to S. 75° W., *red* from S. 75° W. to S. 88° W., and *white* from S. 88° W., through west and north, to N. 45° E., the light power being 140 candles.

   Approximate position, lat. 33° 11′ N., long. 128° 48′ E.

2. WAKAMIYA. A *red fixed* light, elevated 351 feet above high water, and visible in clear weather from a distance of 6 miles from the bearing of S. 67° E., through south and west, to N. 4° E., would be exhibited from a white staff about 35 feet high erected on Wakamiya, Iki shima.

   Approximate position on chart No. 359, lat. 33° 52′ N., long. 129° 40¾′ E.

3. OKI NO SHIMA. A *white fixed* light, elevated 816 feet above high water, and visible in clear weather from a distance of 8 miles, would be exhibited from a white staff about 36 feet high, erected on Oki no (Kotsu) shima, Tsu shima straits.

   Approximate position, lat. 34° 14½′ N., long. 130° 6′ E.

(Variation 4 Westerly in 1906.)

This Notice affects the following Admiralty Charts:—Shantung promontory to Nagasaki, No. 3480; China sea, No. 1263; Nipon, &c., No. 2347; Hirado no seto to Shimono skiei, No. 127; Korean archipelago, No. 104; Iki shima, No. 3224; Kiusiu, &c., No. 358; Nagasaki to Karasut, No. 359: Also List of Lights, part VI., 1906, page 161; and Sailing Directions for Japan, &c., 1904, pages 569, 605, 510.

BAY OF BENGAL—Chittagong coast.

Kurnafuli river—Depth of water in the channels

No. 100 (second publication).—The Officiating Port Officer, Chittagong, has given notice that the following depth of water, reduced to Indian spring low water mark, was found in the channels on the 12th March 1906:—

	Ft.	in.
Track No. 1—Outer bar—		
Diso on diamond	13	0
Track No. 2—Inner bar—		
Diso on diamond	11	9
Batten beacon on pillar	12	6
Track No. 3—		
Triangle on cross and ball	18	0
Track No. 4—Guptakhally crossing—		
Tripod on diamond	19	0
Cross and ball on diamond	20	0

AFRICA, SOUTH-EAST COAST—Natal.

Port Shepstone light-house to be removed.

No. 101 (second publication).—The following Notice to Mariners, dated January 1906 is republished:—

The Government of Natal gives notice that on the 1st March 1906, the existing light at Port Shepstone will be removed and replaced by a 4th Order Occulting Light, showing a flash of 9 seconds with an eclipse of 1 second.

The focal plane of the new Light will be 78 feet above H. W. O. S. T.

The elevation of the base on which the tower stands is 53 feet above H. W. O. S. T.

The position of the new tower is 30 deg. 44 min. 45 sec. South latitude, 30 deg. 27 min. 45 sec. East longitude.

The iron tower will be painted in black and white, chequered, with the lantern painted white.

The new light will be visible between the true bearings North, 35½ degrees East to South, 28 degrees West, or assuming the magnetic variation to be 23 degrees West; between the magnetic bearings North, 58½ degrees East to South, 51 degrees West.

The new Light should be visible from the distance of about 15 nautical miles in clear weather.

BAY OF BENGAL—Burma coast.

Rangoon river—Lower Hastings black buoy in a sinking condition.

No. 90 (third publication).—The Bombay Government has given notice (No. 19 of 1906) that the Lower Hastings black buoy is in a sinking condition, and will be replaced as early as possible.

This Notice affects Aamiralty Chart No. 833, Rangoon River and approaches (plan, Port of Rangoon); also Bay of Bengal Pilot, 3rd edition, 1901, page 353.

BAY OF BENGAL—Burma coast.

Rangoon river—Spit Light-vessel replaced,

No. 91 (third publication).—The Bombay Government has given notice (No. 20 of 1906) that the Spit Light-vessel will be brought up to town on the 7th or 8th instant, and the Light-vessel *Martaban* put approximately in the place of the Spit Light-vessel as on former occasions, *i.e.*, the line of the two lights in one will be on the same bearing as before. The temporary light consists of two mast-head lights back to back.

This Notice affects the Admiralty Chart Nos. 833, Koronge Island to White Point, 833, Rangoon river and approaches, and Bay of Bengal Pilot, 3rd edition, 1901, page 348; also List of Lights, part VI, 1905, No. 369.

INDIA, WEST—Sind coast.

A derelict off Kori creek.

No. 92 (third publication).—The Bombay Government has given notice (No. 23 of 1906) that the Commander of S.S. *Lama* reports that he passed a bungalow floating on her side yesterday at 0-20 P.M. (Standard time), with no one on board of her, off Kori creek in latitude 23° 20′ 45″ N., longitude 68° 3′ E., tide half flood.

This affects Admiralty Charts Nos. 826, Karachi to Vengurla, 42, Coasts of Sind and Kutch, and 118, Kediwari Mouth to Nirani Creek; also West Coast of Hindustan Pilot, 4th edition, 1898, page 297.

AFRICA, NORTH-EAST—Red Sea, Western shore.

Shab Shanks—Feux Eclaires light established.

No. 93 (third publication).—With reference to Notice to Mariners No. 149, dated 7th May 1904, issued by this office, the Bombay Government has given notice (No. 24 of 1906) that the new light Feux Eclaires will be exhibited on the extremity of the Shab Shank reef from the 15th February 1906, and will be visible, in clear weather, for a distance of 18 miles.

Approximate position :—Latitude 14° 40′ N.; longitude 41° 06′ E.

This Notice affects the following Admiralty Charts :—Red Sea, Sheets IV and V, Nos. 8d and 8e, Jebel Tier to Perim Island, No. 148; also Admiralty List of Lights, Part VI, 1906, page 23, No. 152; also Red Sea and Gulf of Aden Pilot, fifth edition, 1900, page 197, and Supplement 1904, page 20.

AUSTRALIA, SOUTH—Gulf of St. Vincent.

Entrance to Port Wakefield—White and red lights placed.

No. 94 (third publication).—The President, Marine Board, Port Adelade, has given notice (No. 2 of 1906) that a White light, eight feet high, has been fixed on the south end of the wharf; also a red light, twenty feet high, has been placed on the wharf 360 feet north of the white light.

The above lights in line lead up to the outer red beacon, but do not show Mid Channel inside of that.

E. J. Beaumont, Comdr., R.I.M.,
Port Officer of Calcutta.

LIBERALITY OF THE LATE BABU ABHOY CHARAN MULLICK.

Extract from a letter No. 1166, dated Calcutta, the 13th March 1906, from MR. G. GORDON, *Officiating Secretary to the Government of Bengal, General Department, to the Director of Public Instruction, Bengal.*

I AM directed to acknowledge the receipt of your letter No. 2053, dated the 20th February 1906, in which you report that the executrix and executors to the estate of the late Babu Abhoy Charan Mullick have made over to you, under the terms of the will of the deceased, the sum of Rs. 3,000, in currency notes, for founding Scholarships tenable at the Sanskrit College, Calcutta. The Scholarships are to be called Abhoy Charan Mullick's Scholarships, after the name of the donor, and to be awarded to deserving Brahmin boys reading in that College. You recommend that the offer may be accepted and that steps may be taken for the creation of a Fund, the Principal of the Sanskrit College being appointed administrator.

2. In reply I am to say that the Lieutenant-Governor is pleased to accept the legacy. The Accountant-General, Bengal, will be requested to open a Trust Fund to be styled Abhoy Charan Mullicks' Scholarship Fund and the Principal of the Sanskrit College will be the administrator of the Fund.

RESOLUTION REVIEWING THE REPORTS ON THE WORKING OF MUNICIPALITIES IN BENGAL (EXCEPT CALCUTTA) DURING THE YEAR 1904-1905

MUNICIPAL DEPARTMENT—MUNICIPAL.

Calcutta, the 23rd March 1906.

RESOLUTION—No. 1300M.

READ—

The Reports from the several Commissioners of Divisions on the working of Municipalities in Bengal (except Calcutta) during the year 1904-05.

Read again—

The Resolution reviewing the Divisional Commissioners' Reports on the working of Municipalities during the year 1903-04.

No new Municipalities were created during 1904-1905, and the present Resolution reviews the statistics of 161 municipalities, the same number as in the previous year.

2. *Vital Statistics.*—The total number of births registered in Municipalities in 1904 was 98,600 against 90,281 in 1903, the ratio to population being 34·7 per mille which is the highest yet recorded. The number of deaths reported was 102,739, which represents a ratio of 36·1 per mille. Apart from the high mortality from plague in the Patna and Bhagalpur Divisions, the year appears to have been a healthy one. The general health of Municipal towns in Bengal has undoubtedly improved during the last few years. Greater attention is given to the sources of water-supply, and in this connection it may be noted that the average death-rate from cholera declined from 4·15 in the seven years ending 1897 to 2 8 in the septennium which closed in 1904. The towns which are supplied with filtered water all show a marked improvement in this respect, and, except in Howrah and Dacca, the decrease of the mortality from dysentery is almost equally noticeable. Pure water is unfortunately no protection against malaria and the introduction of a regular supply where the surface drainage is defective may even result in an increased fever mortality. The death rate from fever in the Municipal areas has however steadily declined for the last five years, and in 1904 was only 15·3 per mille against 21·8 in 1900; but this result is probably largely due to better diagnosis. A further improvement may be expected when the numerous drainage schemes now in contemplation are actually carried out. Special arrangements will be made to ascertain the effect of these works on the public health by a careful examination of the death rate before and after their introduction. In addition to the general Drainage Schemes systematic operations to remove the breeding grounds of mosquitos are necessary in many towns to combat the ravages of malaria. It is intended to carry out experiments in this direction in one or two selected Municipalities at the expense of Government in order to provide an object lesson.

3. *Collections.*—During the last three or four years no feature of the municipal administration of the Province has been more satisfactory than the improvement which has taken place in collections. The high standard already reached was maintained in 1904-05, and in some respects the results were even better than those of the previous year. The percentage of total collections on the current demand declined from 98·6 to 97·5, which is due to the fact that the realisable arrears have been steadily reduced for some years past and are now very small. The percentage of current collections on current demand rose from 92·9 to 93·5, and this improvement was shared by all Divisions except Dacca and Orissa. The percentage of total remissions on the current demand rose from 3·5 to 4·1. It was highest in the Burdwan Division (8·5). This high percentage was due to very large remissions in Burdwan, Asansol, Hooghly, Chinsura, Serampore, Howrah and Bally. The outstanding balance has now been reduced to Rs. 2,17,145, which is

only 5·9 per cent. of the current demand. Twenty-three municipalities collected cent. per cent. of the current demand or more, and the same number had a closing balance of Rs. 10 or less. In Vishnupur, Sonamukhi, Garulia, Kotchandpur, Maheshpur and Lalganj both results were attained. The results attained in the Bhagalpur Municipality are particularly satisfactory, the percentage of collections on current demand having risen from 89·05 to 104·5. Cuttack is to be congratulated on closing the year with no balance outstanding.

4. *Number of rate-payers.*—The total number of rate-payers was 4,94,533, and the percentage to population 17·2 against 17·17 in 1903-1904. As in the previous year, the percentage was highest at Katwa in the Burdwan district (30·3) and lowest at Titaghar in the 24-Parganas (6·8). The low percentage in the latter Municipality and in Garulia is due to the assessment being made on the owner for each block of huts instead of separately on the occupiers who are mostly migratory mill operatives. The same cause may partially account for the low ratio of rate-payers to population in Naraingunge (9·5), but the Commissioner has not alluded to the matter. In the Dacca Division as a whole the percentage continues very low, only two out of seventeen Municipalities giving results above the provincial average.

5. *Results of elections held during the year.*—General elections were held during the year only in Cossipore-Chitpur and Manicktola. In Manicktola and in two wards of Cossipore-Chitpur there were no contests. In the two remaining wards of the last mentioned municipality the elections were contested, and more than half the voters went to the polls.

6. *Constitution of Committees and attendance at Meetings.*—The total number of Commissioners was 2,217, or 19 less than in the previous year. This is due to the reduction of the number of members in Santipur and Nadia from 25 and 12 to 9 each. The number of meetings held was 2,828, of which 199 had to be adjourned. These figures disclose very little variation from those of the previous year. The Cossipore-Chitpur Municipality again held the largest number of meetings (44) and was followed by Sherpur in Mymensingh (41) and Murshidabad (39). Twelve municipalities failed to hold one meeting a month, and in Jamalpur, Dumka and Kendrapara only eight meetings were held. The average attendance at a meeting fell from 59·6 to 53·6. The number of municipalities in which half the Commissioners were ordinarily present was 109 against 118. The average attendance was best in the small Municipality of Rajpur in the 24-Parganas (90·14). It exceeded three-fourths of the number of Commissioners in Nadia, Bhadreswar, Buxar, Garulia, Dainhat, Maheshpur and South Barrackpore. The worst attendance was at Jalpaiguri where it was only 30·3 per cent.

7. *Assessment and Taxation.*—As in the previous year, the rate on holdings was in force in 47 Municipalities and in certain wards of Bhadreswar, South Dum-Dum and Deoghur, the alternative tax on persons being levied elsewhere. The enforcement of the rate on holdings has, however, been sanctioned in six more Municipalities, viz., Kotrung, Bhatpara, Garulia, Rangpur, Noakhali and Cuttack. This will leave only eight Municipalities with a population exceeding twenty thousand, viz, Bankura, Berhampore, Rampur-Boalia, Sirajganj, Arrah, Sassaram, Bettiah, Darbhanga and Balasore, in which the tax on persons will continue to be levied. The need for the change is urgent in Berhampore, Arrah and Darbhanga, the state of things in the two former Municipalities being rendered still more anomalous by the fact that both the water and latrine rates are in force, and are levied on the annual value of holdings. Latrine fees are levied in 112 Municipalities, the water rate in fourteen and the lighting rate in two (Darjeeling and Howrah). The imposition of a water rate has been sanctioned in Tollygunge, and will come into force as soon as the water is supplied, and the levy of a lighting rate has been sanctioned in Cossipore-Chitpur and Maniktala. In 15 Municipalities the rate on holdings was levied at less than the legal maximum. Of the four Municipalities in which the legal maximum has been raised to ten per cent., only Dacca and Darjeeling have availed themselves of their powers, the rate in Howrah and Patna being seven and-a-half per cent. The average incidence of the taxation per head of the population has been gradually increasing since 1889-90, and during the past year it rose from Re. 1-3-11 to Re. 1-4-4. If the two hill Municipalities, Darjeeling and Kurseong, whose circumstances

are exceptional, are excluded, Howrah is, as might be expected, the town most heavily taxed, the average payment per head being Rs. 3 6 4. The lowest point is touched at Ramjibanpur in Midnapore where each person pays only 4 annas and 5 pies. There are twenty-six other towns in which the incidence is less than eight annas per head.

8. *Revision of assessment.*—In many Municipalities general or partial revisions of the assessments were made. The revision of the assessment in Chittagong resulted in an increase of about Rs. 7,000 in the house-tax and of Rs. 4,000 in the latrine-tax. In Bhagalpur, the assessment was revised by a Sub-Deputy Collector deputed by Government, a survey of the town having been previously made by the Survey Department. The Commissioner reports that the result has been an increase of nearly 20 per cent., which may however be reduced on appeal. The survey of Monghyr town was completed, and the revision of the assessment was taken up during the current year. In the following towns also the financial results were satisfactory:—

	Rs.
Mymensingh	8,006
Bhatpara	7,848
Darjeeling	7,175
Santipur	5,859
Bally	5,824
Kurseong	5,722
Patna	5,330
Nadia	4,652
Howrah	4,104

Action was taken under Section 111A to remedy inadequate and inequitable assessments in Halisahar, Baduria, Chapra and Revelganj.

The new procedure for the appointment of appellate Committees, to which reference was made in last year's Resolution, has now been adopted by a large number of Municipalities, and steps are about to be taken to incorporate it in the substantive law. A scheme for the employment of a permanent staff of trained assessors was also drawn up and placed before the Municipalities; but it was found to be too expensive, and only a small proportion of them were ready to join in it. The scheme has accordingly been abandoned for the present, but Commissioners of Divisions have been instructed to keep a list of persons qualified to act as assessors whose services will be placed at the disposal of such Municipalities as may require them.

9. *Fresh imposts levied during the year.*—The tax on carriages and animals was introduced into the Sherpur Municipality. In Darjeeling, the rate on holdings was increased by one per cent. Section 263 was extended to the Hooghly-Chinsura Municipality, while in eight municipalities license fees under section 261 were imposed on various trades (chiefly kerosine oil depôts and lodging-houses) Cart registration fees were newly imposed in Nawabganj and were levied at an increased rate in Bogra; and the Hackney Carriage Act was extended to Deoghur. The water rate was levied for the first time in Kurseong and Daltonganj and latrine fees under Part IX in Santipur and Nadia and parts of six other Municipalities The provisions of Part X of the Act relating to markets were extended to Tollygunge, Rajpur, Baraipur, Halisahar, Bhatpara, Ranaghat, Kamarhati, Chakdah and Sherpur.

10. *Income and expenditure.*—The total income of the Municipalities including the opening balance was Rs. 67,21,637 or Rs. 3,91,398 more than in the previous year. The total expenditure was Rs. 57,93,338 against Rs. 53,85,903 in 1903-04.

11. *Closing balances of Municipalities (Rs. 9,28,299).*—The aggregate closing balances of the municipalities diminished by Rs. 16,037. This is due probably to the fact that the amount borrowed during the year fell from Rs. 2,41,850 to Rs. 2,17,235. Where the balance is large, it is due, as in Howrah (Rs. 1,41,384), to the inclusion of unspent loans from Government or, as in Chapra (Rs. 33,547), to the accumulation of funds for a market or

other work of public utility. Some municipalities still neglect to maintain a sufficient working balance. This was most noticeably the case in Meherpur (Rs. 112), Debhatta (Rs. 92), Arrah (Rs. 14) and Roserah (Rs. 9). The attention of the Divisional Commissioners concerned is invited to these figures which are not creditable to the administration of the abovementioned towns.

12. *Income* (*Rs. 57,77,275*).—The aggregate income of the Mufassal Municipalities is less than that of Calcutta alone. It is however, growing steadily; and there was a gain during the year of Rs. 2,79,113 or 6 per cent. This is the more satisfactory as there was a falling off of Rs. 9,672 under Extraordinary and Debt. About a lakh was derived from taxation, and nearly a lakh and-a-half from grants and contributions. All divisions, except Dacca, contributed to this general result; but the increase was greatest in the Presidency Division where it amounted to nearly a lakh.

13. *Tax on houses and lands* (*Rs 12,99,830*).—The revenue from the rate on holdings increased by Rs. 37,206. The improvement was marked in Bhagalpur (Rs. 8,615) due mainly to an improvement in collections, in Darjeeling (Rs. 7,662) owing to the enhancement of the rate of taxation, in Hooghly-Chinsura and in Chapra. A decrease in Darbhanga is ascribed to the fact that certain assessments which had been revised under section 93 of the Act, could not be collected pending the disposal of objections. Short collections in Puri and large arrear collections in the previous year in Purulia account for a falling off in those municipalities. In last year's Resolution special attention was drawn to an extraordinary diminution in the income under this head in the Naihati Municipality. In the year under review there was a further slight decrease which, however, has not been explained by the Commissioner. In Berhampore the occupants of Government buildings have hitherto been assessed to the tax on persons, instead of to the rate on holdings, as they should have been under section 89 of the Act. In certain other municipalities where the tax on persons is in force the rate on Government buildings is wrongly shown under that head. The attention of Commissioners is invited to these points.

14. *Tax on animals and vehicles* (*Rs. 2,72,877*).—The receipts under this head increased by Rs. 11 516, Rs. 1,170 was collected in Nawabganj where the tax was levied for the first time. A marked improvement took place in Purulia (Rs. 1,918), Howrah (Rs. 1,910) and Deoghur (Rs. 1,337), and in so far as the increase is the result of closer supervision it is satisfactory, but there is some ground for thinking that the income in some municipalities is unduly swelled by the registration of carts which cannot be said to be used "in the ordinary course of business" within the municipality. The attention of Municipal Commissioners should again be called to the provisions of the law and to the necessity of avoiding the harassment of persons whose carts only occasionally visit the municipality. The arrangement by which the cart registration fees in certain Suburban Municipalities are collected by the Calcutta Corporation and the surplus proceeds divided has not worked satisfactorily. The expenses of the registration staff swallow up nearly all the receipts and there is hardly any surplus to distribute. A separate enquiry will be made with regard to this matter.

15. *Tax on Professions and Trades* (*Rs. 65,323*).—This tax is levied in 139 Municipalities out of 161. The receipts increased by Rs. 970, but they nowhere constitute a substantial portion of the Municipal income.

16. *Tolls on Roads and Ferries* (*Rs. 1,44,891*).—Tolls on roads are not levied in Bengal. The receipts from ferries show a net decrease of Rs. 456. In Saran a decrease of Rs. 1,335 is ascribed to the re-settlement of ferries at reduced rentals, but the cause of the reduction is not explained. The falling off in Monghyr (Rs. 2,000) is due to an advance collection of Rs. 1,000 in 1903-1904, and to the failure to collect Rs. 1,000 in 1904-1905. A decline of Rs. 934 in Cuttack is due to similar causes. The largest increases were obtained in Chandpur (Rs. 2,396) and Burdwan (Rs. 1,445); the former was due mainly to the realization of the previous year's arrears.

17. *Water-rate* (*Rs. 2,97,903*).—A water-rate is now levied in fourteen municipalities, having been levied for the first time during the year in Kurseong and Daltonganj. In these two municipalities the proceeds amounted

to Rs 3,842 and Rs. 469, while in the other municipalities they increased from Rs. 2,85,248 to Rs. 2,93,592. There was an increase of Rs. 2,513 in Darjeeling due to better collections; of Rs. 1,914 in Mymensingh, owing to revision of assessment and the raising of the rate; and of Rs. 4,874 in Bhagalpur, owing to a larger demand and better collections.

18. *Lighting Rate (Rs. 87,308).*—The proceeds of this rate, which is levied only in Howrah and Darjeeling, increased by Rs. 3,310. The increase is said to be due to better collections in Darjeeling, but fuller information should have been given by the Commissioner.

19. *Conservancy including scavenging and latrine-rate (Rs. 8,62,715).*—The revenue improved in all Divisions except Burdwan, where there was a falling off of Rs. 2,349. The large increase of Rs. 24,106 in the Presidency Division is due mainly to the extension of Part IX to the Santipur and Nadia Municipalities, where the receipts amounted to Rs. 12,222 and Rs. 4,235 respectively. The improvement was also marked in the Chittagong, Bhagalpur and Cuttack Divisions, and in the district of the 24-Parganas. The usual reasons are assigned for a rise in receipts, viz, revision of assessment, assessment of new holdings and better collections. No progress was made in the leasing out of trenching-grounds. The Commissioner of the Presidency Division remarks that, while the general repugnance of Bengal cultivators to use night-soil as manure will take time to disappear, the land is often so badly trenched that in any case no one would care to till it.

20. *Tax on persons according to their circumstances and property (Rs. 6,12,119).*—The income under this head shows a small increase of Rs. 1,424. There was a rise of Rs. 8,498 in the Presidency Division, but in the Patna Division the temporary exodus of residents from certain Municipalities on account of plague caused a decline of Rs. 5,805, or 4·2 per cent.

21. *Grants from Provincial and Local Funds and Contributions from private individuals (Rs. 4,88,234).*—The increase of Rs. 1,38,311 under this head is accounted for by larger Government subventions for medical purposes, including special grants for hospitals and dispensaries and grants-in-aid of preventive measures against plague. Contributions for general purposes amounted to Rs. 1,08,792, for education to Rs. 10,473, and for medical purposes to Rs. 3,68,969.

22. *Gifts, etc., by private individuals.*—The Commissioners have, as usual, recorded in their reports many instances of private liberality. The most prominent of the public benefactors during the year was the Maharani of Hatwa, who gave Rs. 25,000 for the construction of a new female ward and operation room for the Chapra hospital, and contributed Rs. 5,000 towards the cost of reconstructing the Bourdillon Market in the same town. Babu Dhanpat Singh Nowlakha subscribed Rs 16,000 towards the construction and equipment of a Charitable Dispensary at Azimganj. The names of these and other donors will be recorded in a separate Resolution.

23. *Expenditure.*—The aggregate expenditure of the mufassal municipalities amounted to Rs. 57,93,338, against Rs. 53,85,903 in 1903-04 and Rs. 40,67,711 ten years ago. The ordinary expenditure (*i.e.*, excluding loans, advances and the like) rose from Rs. 45,04,960 to Rs. 48,34,702. The main heads under which this increase has occurred are Roads (Rs. 2,80,554), Lighting (Rs. 87,424), Conservancy (Rs. 53,662) and Drainage (Rs. 34,411). On the other hand, the expenditure on water-supply was less than in the previous year by Rs. 1,21,872, and that on buildings by Rs. 39,281. The distribution of the expenditure over the principal heads is still on the whole much the same as it was ten years ago.

24. *Office and Collection Establishment (Rs. 4,47,340).*—The expenditure increased in five Divisions and diminished in four, the net result being a decrease of Rs. 9,975. The expenditure under this head was about one-tenth of the total ordinary expenditure. In the Burdwan Division, it fell from 10·4 to 9·4 per cent., and in the Patna Division from 11·5 to 10·0, but in the Rajshahi Division it rose from 8·5 to 10·5 per cent. The highest percentage (26·3) was recorded in the Gobardanga Municipality in the 24-Parganas, and the lowest (4·7) in the Mymensingh Municipality. Constant watchfulness is required to check the unnecessary growth of expenditure of this kind, and it is satisfactory that an actual reduction should have been effected during the past year.

25. *Prevention of fire* (*Rs. 30,275*).—The outlay under this head increased by Rs. 2,694. Almost the whole of it was incurred in the Burdwan and Presidency Divisions, and four-fifths of it in the two Municipalities of Howrah and Cossipore-Chitpur which contribute towards the up-keep of the Metropolitan Fire Brigade. In the rest of the Province the charges were trifling. There were ten fires during the year, involving a loss of 5¼ lakhs of rupees. The most serious fires were those at the Ghoosery Cotton Mills and the Sulkea jute press.

26. *Lighting* (*Rs. 3,29,835*).—The expenditure under this head shows an increase of no less than Rs. 87,124 or 27 per cent. This is almost wholly accounted for by heavy expenditure in Darjeeling on the electric lighting scheme, the charges for which exceeded those of the previous year by Rs. 79,045, the capital outlay amounting to Rs. 75,949. There has also been a general, though slight, increase in expenditure throughout the Province.

27. *Water-supply* (*Rs. 3,14,498*).—The expenditure on maintenance increased by Rs. 12,580, but the capital outlay diminished by Rs. 1,34,452, the net result being a decrease of Rs. 1,21,872. The capital charges in 1903-04 were exceptionally high and the falling off was not unexpected.

Eight Municipalities maintain complete Water work installations of their own. Of these the Howrah Water-works are entitled on all accounts to the first place. Their management was most efficient and the cost of maintenance was reduced from 1·3 to 1·1 anna per thousand gallons. In Burdwan the Commissioners have maintained the high standard which they reached for the first time in the previous year. The cost of maintenance was reduced from 2·7 to 1·7 anna per thousand gallons, and by the advice of the Civil Surgeon, Lieutenant-Colonel ffrench-Mullen, a successful experiment was made in the use of ferro-sulphate of alumina to remove the silt from the river water. The other water-works have had greater difficulties to contend with and have not always succeeded in overcoming them. At Berhampore, Dacca, Arrah and Bhagalpur the recession of the main current of the river from the intake has occasioned great trouble and expense. At Arrah a channel was scraped through the sand-banks, while in the other three towns centrifugal pumps in the bed of the river had to be used to bring the water to the intakes. The management of the Berhampore Water-works was far from satisfactory. According to the Sanitary Engineer's estimate the rate-payers received a supply of only 2·8 gallons per head of the population, while the maintenance charges amounted to 10½ annas per thousand gallons. For forty-eight days the supply was cut off altogether, serious irregularities occurred in the accounts and grave discrepancies were found in the coal used. In these circumstances it is regrettable that the Commissioners have abandoned the intention previously expressed to adopt the Government rules for the appointment of a Committee of management. They have been warned that unless a very marked improvement is effected the management will be taken out of their hands altogether. At Dacca the condition of the works is not satisfactory, but the Commissioners adhere to their determination not to impose a water-rate. In Darjeeling the supply was insufficient during the hot-weather months, and arrangements have been made to link up a spring which has hitherto been untapped. At Arrah a very large amount of the water pumped is lost owing to the leaks in the settling tanks and filters. The result is a serious reduction in the supply and heavy maintenance charges in proportion to the water supplied. In Bhagalpur the position became so serious that a Special Committee was appointed to examine the water-works and suggest means for their improvement. The Committee met at the end of the year and have submitted recommendations involving a capital outlay of about a lakh and-a-half of rupees. Towards this amount Government has undertaken to contribute, and it is hoped that the Municipality will be able to provide the balance

Certain towns are in the fortunate position of being able to obtain their water from an external source and are thus saved the expense and trouble of keeping up an installation of their own. Daltonganj now gets a daily supply of 40,000 gallons from the Railway at two annas per thousand gallons, while Garulia, Tittaghar and Bhatpara are supplied with water by the Mills free of cost. Several of the Suburban Municipalities draw water from the Calcutta mains; but owing to the shortness of filtered water in the town have been

unable to get the full promised supply. The Corporation have recently arranged to increase their supply by about six million gallons daily, and are now in a position to comply with their engagements.

The management of a water-works installation particularly when the supply is drawn from a river which is liable to desert its channel presents problems of peculiar difficulty which are apt to prove too complex for solution by the unaided energies of Municipal bodies. The financial burden they entail is heavy, and Government assistance has often to be invoked. Nevertheless a considerable measure of success has been obtained in combatting the difficulties that present themselves, and the Lieutenant-Governor can congratulate more than one Municipality on most creditable work. Towns of moderate size that are content with unambitious projects may obtain very satisfactory results from a filter such as that which has been established at Faridpur, which is designed to supply ten thousand gallons a day. Similar filters have been set up at Patuakhali and Jessore, and sanction has been accorded to a scheme of the same kind at Khulna.

28. *Drainage* (*Rs. 2,01,584*).—The expenditure exceeded that of the previous year by Rs 34,411, of which Rs. 15,198 was due to larger capital outlay and Rs. 9,213 to increased charges for maintenance In Howrah Rs. 24,431 was spent on the construction of the Sibpur section of the drainage scheme. In Burdwan Rs. 3,928 was expended on the preliminary survey and levelling operations, and Rs. 2,603 in Serampore for similar work. The expenditure of Rs. 5,145 in Narainganj was due chiefly to the completion of the Sutarpara drainage work, joining all the ditches and cess-pools in that mahalla with the river by the construction of a masonry culvert.

The expenditure on drainage works may be expected to increase steadily for some years to come. In nearly all the important Municipalities in the Province schemes are at various stages of preparation and some of the smallar towns also are awaking to their responsibilities in this matter. A complete enumeration of the various projects would occupy too much space, and only the more prominent schemes can be referred to For drainage purposes Howrah has been divided into four sections. Work is already in progress on the Sibpur section, and the Southern Foreshore is about to be taken up. In the 24-Parganas district particular attention is being given to drainage. Schemes have already been completed for Baranagar, Titagarh and Garulia and these will shortly be commenced, while the projects in Cossipur-Chitpur, Budge Budge and Garden Reach are nearing completion. The Arathoon Jute Mills Company are about to take up the drainage of the salt water from Ward No. 3 in South Dum Dum. The Lieutenant-Governor has learned with regret that the Commissioners of the Berhampore Municipality have adopted the short-sighted and wasteful policy of adding new lengths to their pucka drains, although no proper scheme has been prepared. The Commissioner must see that his order forbidding such expenditure is obeyed. The preparation of a well thought-out scheme based on a careful survey may involve some delay in commencing work, but in no other way can the waste of public money on useless works be prevented The comprehensive drainage scheme for Monghyr is still in preparation, and the Puri drainage scheme was sanctioned after the close of the year. Owing to the exceptional position of Puri as a pilgrim centre, the sanitary improvement of the town is a matter of more than local importance, and every effort must be made to press on the work. It is hoped that an Assistant Sanitary Engineer will be appointed shortly, whose chief duty will be to assist Municipalities in preparing their drainage schemes.

29. *Conservancy, including road cleaning and road watering and latrines* (*Rs. 13,60,642*).—The outlay on conservancy increased in all Divisions except Burdwan. It now amounts to 30 6 per cent. of the aggregate Municipal expenditure. The progress in this direction during the last five years has been rapid, and is no doubt due largely to the advent of plague. The difficulties in connection with the existing system for the removal of night-soil are however almost insuperable, and it is only natural that many Municipalities should turn to the bacteriological methods of night-soil disposal for a solution of their difficulties. It is reported that the biological filters in Howrah continue to work well, and the sewage filter at Nayasarak in Dacca is also said to be satisfactory. No information has been given with regard to the septic

tank constructed in the same town in 1903-04. The septic tank at Muzaffarpur, which was completed towards the close of the year, was not actually brought into use. It is not likely however that rapid progress in this direction will be made unless some means can be devised for disposing of the effluent in a satisfactory manner, or of securing an effluent which shall not only be chemically but bacteriologically pure. Recent experiments indicate that a high standard of purity can be obtained by the treatment of the effluent with chlorine.

Of the net increase of Rs. 53,662 in the expenditure in the whole Province the Presidency Division is responsible for Rs. 31,726. The outbreak of plague in some of the towns near Calcutta resulted in increased attention being given to the cleaning Department. Many of the suburban towns are alive to their responsibilities and are taking energetic action to put things right. In his report for the year 1904 the Sanitary Commissioner draws attention to the excellent work which is being done in Bhatpara, Tittaghar, Maniktala and Garden Reach in the way of improving insanitary bastis. Roads are being cut through them, tanks filled up and insanitary latrines abolished. The example is one that might well be followed, for in these Municipalities, gratifying results have been obtained with a comparatively small outlay.

30. *Hospitals and Dispensaries* (*Rs. 5,05,060*).—The expenditure on Hospitals and Dispensaries exceeded that of 1902-1903 by Rs. 35,741 but was less by Rs. 5,269 than that of 1903-04. The total expenditure for medical purposes, inclusive of plague charges which are separately shown, was Rs. 5,46,549, but the contributions received from Government, local bodies and the public amounted to Rs. 3,68,969. The actual contributions by Municipalities from their own resources amounted, however, to more than the difference between these two sums, because the Government grants for 1904-05, which were exceptionally large, were not fully spent. According to the Dispensary Report for 1904 the net expenditure in that year came to Rs. 2,32,056, or 5·2 per cent. of the ordinary expenditure. The important point is that this figure is less by Rs. 51,978 than the amount contributed in the previous year, and as it was not intended that the appointment of separate Dispensary Committees should lead to a reduction of this nature, special instructions have been issued to Commissioners to make a fuller use of their power of budget control, and to see that the needs of the Dispensaries are fairly provided for. The proportionate expenditure is noticeably small in the Burdwan and Presidency Divisions.

31. *Vaccination* (*Rs. 21,795*).—The total expenditure on vaccination has hardly varied during the last four years but the actual work done has diminished. The number of infants under one year of age successfully vaccinated fell from 45,817 in 1903-04 to 44,069. It is to be hoped that better results will be obtained during the current year.

32. *Markets, slaughter-houses, etc.*—The necessity of preventing the spread of disease through the public food supply is now receiving fairly general attention. The provisions of Part X of the Act were extended to nine municipalities; new markets were opened at Vishnupur and Barh, and are under construction at Chapra and Puri. The total expenditure on markets and slaughter-houses rose from Rs. 38,753 to Rs. 43,680, of which Rs. 16,314 was spent on improving the Municipal market in Howrah. The work of inspecting the food supply is carried out in some cases by special Sanitary Inspectors and in others by the Overseers, but in most of the smaller Municipalities this duty is performed by the Commissioners themselves. The need for close supervision is shown by the fact that in Bankura and Cuttack persons affected with leprosy were found selling food.

33. *Public Works* (*Rs. 10,21,869*).—The expenditure on public works rose from Rs. 7,74,284 to Rs. 10,21,869. This is accounted for by an increase of nearly three lakhs in the outlay on roads, of which again Rs. 2,24,180 represents the contribution made by the Howrah Municipality to the East Indian Railway as their share of the cost of strengthening the Buckland Bridge, in order to enable it to bear the weight of electric tram-cars.

34. *Public Instruction* (*Rs. 1,52,392*).—The expenditure on education increased by Rs. 7,653. The amount spent on primary education rose from Rs. 81,789 to Rs. 83,903. This represents 2·8 per cent. of the aggregate ordinary income of the Municipalities. The percentage was highest in the

Orissa Division (4·1) and lowest in the Burdwan Division (2·1). The prescribed standard of 3·2 per cent. has not yet been reached in the aggregate, but it is largely exceeded in many of the smaller towns. The general ratio is kept down by the fact that in the larger towns primary education can be provided for by a smaller proportionate expenditure. The above figures have been compiled from those given in the Municipal reports. The returns of the Education Department place the expenditure from Municipal funds on primary education in the year under review at Rs. 1,00,033. An attempt will be made to reconcile the discrepancy.

35. *Loans.*—Thirty-nine Municipalities were in debt to Government at the close of the year, their total indebtedness amounting to Rs. 34,77,735. Against this however must be set off Rs. 1,51,235, the amount accumulated in the sinking funds of the Burdwan, Howrah and Bhagalpur Municipalities to pay off their debenture loans, which are outside the Government account, and also a sum of Rs. 8,370 payable to the Chittagong Municipality by the Port Commissioners of that town. The net indebtedness is therefore only Rs. 33,18,080, more than half of which represents the debt of the Howrah Municipality. Five new loans aggregating Rs 2,17,235 were granted during the year, while the payments on account of the principal of existing loans amounted to Rs. 1,28,319, the increase in the net indebtedness being Rs. 88,916. Howrah received Rs. 1,50,000, the balance of the loan for the reconstruction of the Buckland Bridge. Tollygunge received Rs. 16,000 for its filtered water-supply and South Barrackpur and Panihati Rs. 1,500 and Rs. 3,750 to meet their share of the cost of improving the Kharda Khal. Darjeeling drew Rs. 43,985, the balance of its loan for the improvement of the electric-light installation, and Monghyr Rs. 2,000 for the cost of the survey of the town.

On the 31st of March 1905, the outstanding liabilities of all the Municipalities in the Province on account of unpaid bills and unfinished works were Rs. 1,44,894, which is more than 15 per cent. of the closing balance. In twelve towns these liabilities exceeded the closing balance and in seven it exceeded 15 per cent. of the current demand. Commissioners should impress on all Municipalities the necessity of meeting all demands as they fall due and not allowing them to accumulate until they become unmanageable.

The financial condition of the Berhampore Municipality continues to be very unsatisfactory. Its closing balance amounted to Rs. 9,498, but in addition to the outstanding balance of the Government loan, which amounts to Rs. 12,449, the Municipality is still in debt to its Chairman to the extent of Rs. 3,700, and the Commissioner reports that the liabilities on account of unpaid claims amount to Rs. 1,808 and the credit balance of the latrine fund to Rs. 3,491. The financial embarrassments of the Municipality are due in part to the burden of maintaining their water-works, but the Lieutenant-Governor cannot acquit the Commissioners of mismanagement and finds it necessary to warn them that the present state of affairs is one which cannot be allowed to continue.

36. *Audit of accounts and embezzlements.*—There were fewer cases of embezzlement than in the previous year, only two such instances being reported. In Daudnagar the Head-clerk was found to have embezzled more than Rs. 800, and in Bhagalpur a similar fraud was committed by a collecting sircar. The office of the Cossipore-Chitpur Municipality was broken into, and Government Promissory notes, cheques and cash to the value of Rs. 68,181 were stolen. Fortunately almost the whole amount was recovered. In Chapra the accounts of the Municipality were found to have fallen into a state of great confusion, and a special officer was appointed to examine and report on them.

37. *Working of the Porters and Dandiwalias Act.*—This Act, which was previously in force only in Darjeeling, was extended to Kurseong during the year. The number of porters and dandiwallas registered in Darjeeling declined from 400 and 459 to 187 and 297 respectively. The decrease was, no doubt, due to the Tibet Mission. There were 25 prosecutions against 12 in the previous year. In Kurseong the number of porters and dandiwallas registered was 106, and there were 14 prosecutions.

38. The Howrah Municipality demands special notice. In the last Resolution it was the pleasant duty of the Lieutenant-Governor to endorse the

cordial commendations bestowed on the work of the Municipal Commissioners by Sir James Bourdillon in the previous year, and His Honour is glad to find that the progressive improvement in the various branches of the administration is still maintained. The results in the Collection Department are particularly good. The percentage of the total collections to the current demand has indeed fallen from Rs. 99·1 to 97·8, but this is due not to any deterioration in the work, but to the fact that the realizable arrears have been reduced to a nominal amount. The outstanding balance which in the year 1898-99 amounted to 50·9 per cent. of the current demand, and in 1903-04 to 12·4 per cent., has now been reduced to 4·5 per cent. The percentage of total collections to the total demand rose from 84·6 in 1903-04 to 87·6 per cent. in the year under review and that of the current collections to the current demand from 88·7 to 93 per cent. This improvement is attributed by the Chairman to the fact that the taxes are now collected by the Municipal staff and not through the agency of a Contractor.

Other branches of the administration are no less satisfactory. The Lieutenant-Governor recently paid a visit to the water-works and was highly pleased with the way in which they are managed. The only defect connected with the water-supply is in the distribution mains, for which the present staff are not responsible. The working expenses have been reduced to about one anna per 1,000 gallons which is the lowest ever recorded in the history of the Municipality. The Sibpur section of the drainage scheme was completed during the year and is working satisfactorily; good progress has been made with the preparation of the detailed estimates for the other sections. As the drainage scheme is extended, steps will be taken to cleanse or fill up the numerous insanitary tanks which are scattered throughout the Municipality. The Commissioners are also dealing with the insanitary and congested *bastis*, which form a standing menace to the health of the community. A regular programme has been drawn up for improving these *bastis* at the rate of five or six a year. The Conservancy branch line from Lillooah to Belgachia is nearing completion, and should prove a great relief to the overworked trenching ground at Nandibagan. An arrangement has been made with the Calcutta Tramways Company for the introduction of an Electric Tramway Service in Howrah, and it is expected that trams will be running in two years' time. This will no doubt give a great impetus to building in the outskirts of the town, and will relieve the areas which are now congested. It is of the utmost importance that the Commissioners should make provision for this beforehand by a careful alignment of the roads in what are now rural areas, and by laying out the sites of the *bastis* which will soon spring into existence.

39. In the foregoing paragraphs the various branches of municipal activity have been successively brought under review. The method of treatment is dictated by the form which, under the orders of the Supreme Government, has been adopted for many years past. Each question is viewed mainly from its financial and statistical side, and only so much of the municipal life as is capable of expression in figures finds an assured place in the annual review. A complete account of the municipal history of the year would contain much which has necessarily been omitted either from considerations of space or as lying outside the scope of the Resolution.

In some respects a detailed history of a single Municipality would be at once more instructive and more interesting than the summarised narrative of a whole Province, where local colour is rigorously suppressed and individual features are lost in the general mass. But in some cases the figures themselves are the most eloquent witnesses to progress, and this is especially the case in the Collection Department on the satisfactory condition of which particular stress has been laid. The collection of revenue is not an end in itself, and the prompt realisation of the municipal taxes deserves recognition mainly because the work of the Collection Department is a barometer from which the condition of the whole administration can be accurately gauged. It may not be true that good collections are an infallible proof of sound administration, but it is quite certain that bad collections mean slovenly management in every Department. A Municipality which cannot collect its dues is not likely to manage its water-works efficiently or to provide adequately for the drainage of the town. It is therefore satisfactory to find that in this

Department the improvement is steady and continuous, and the Lieutenant-Governor does not doubt that the interest in public affairs and close attention to detail which have produced good results in one Department will not fail of their effect when applied to the important problems of water-supply, drainage and conservancy. What has been said on these matters should suffice to show that there has been much of honourable achievement in the past and much which is of good promise for the future. In the course of the next few years a fair-sized Municipality which has not a regular system of drainage will have cause to blush at its backwardness. The problems of conservancy are more difficult, and it would be idle to pretend that the solution of many of them is yet in sight. But the septic-tank latrine should go far to get rid of the perpetual nuisance of the trenching-ground.

In conclusion the Lieutenant-Governor desires to congratulate the Municipalities on the good work that has been accomplished and to express to the many gentlemen who devote their time and labour to the service of the community as Municipal Commissioners his warm appreciation of their devotedness and public spirit.

By order of the Lieutenant-Governor of Bengal,

L. P. SHIRRES,

Secretary to the Govt. of Bengal.

FORM No. I.

STATEMENT SHOWING THE CONSTITUTION OF THE MUNICIPALITIES IN BENGAL

DURING

1904-1905.

FORM No. I.—*Statement showing the Constitution of the Municipalities in Bengal during the year ending 31st March 1905.*

*The difference of Rs. 40 in the opening balance is due to adjustment during the year 1904-1905 of the amount which was erroneously debited in excess under the two heads "Conservancy establishment" and "Road repairs" in the accounts of 1903-04.

† The decrease of Rs. 166 is due to the exclusion of the amount of permanent advance which has hitherto been included in the closing and opening balances of the Municipality.

and contribution from the Municipal Fund.

FORM No. II.—*Statement showing the Income of the Municipalities*

1	2	3	4	5										
				Municipal Rates and Taxes.										
ME OF DISTRICT.	Serial number of Municipality.	Name of Municipality.	By balance in hand at the close of last year.	Tax on houses and lands.	Tax on animals and vehicles.	Tax on professions and trades. RESOLUTION REVIEWING THE REPORT ON THE ADMINISTRATION OF THE CALCUTTA MUNICIPALITY FOR THE YEAR 1904-05.

MUNICIPAL DEPARTMENT—MUNICIPAL.

Calcutta, the 27th March 1906.

RESOLUTION No. 1369M.

READ—

The report of the Chairman of the Calcutta Corporation on the Administration of the Municipality for the year 1904-05.

Read also—

The reviews of the report recorded by the Corporation and the General Committee. The Resolution of this Government reviewing the Chairman's Report for the year 1903-04.

The Chairman's Report on the Municipal Administration of Calcutta is due to Government with the review by the Corporation on the 1st July, but this year it was not received until the 14th September, while the review did not reach the Secretariat until the 16th March 1906.

2. The present report is a record of sustained progress in all departments of the administration and of the zealous discharge of onerous duties on the part both of the Municipal Commissioners and of their executive officers. The average attendance at meetings of the Corporation was slightly less than in the previous year, but the number of such meetings rose from 30 to 44. The General Committee met as usual about once a week. There was a marked increase in the number of Special Committees of the Corporation, and they held in all 164 meetings against only 89 in 1903-04. The Sub-Committees of the General Committee, however, held only 125 meetings compared with 170 in the previous year. Standing, Special and Sub-Committees have as yet been appointed only for the more important branches of the municipal administration, such as water-supply, drainage, markets, public squares and the like. They are reported to have done excellent work; and the Lieutenant-Governor is glad to learn that the system has been extended since the close of the year. It is desirable, alike in the interests of efficiency and despatch, that all matters should, in the first instance, be dealt with by small Standing Committees, instead of first going before the whole Corporation, or the General Committee, and then, as now frequently happens, being referred to Committees appointed *ad hoc*.

3. *District system.*—The decentralisation of work by the division of the town into four districts has made considerable progress. Each district has now been equipped with an amalgamated Engineering and Conservancy Department under a District Engineer, a Building Department under a Building Surveyor, and a Health Department under a Health Officer. Mr. Greer inaugurated the District Councils; but they ceased to meet during the year 1904-05. They had not legal existence or powers; and this was probably why the system did not work satisfactorily. Mr. Greer saw this defect, and proposed a scheme for giving them definite legal status. The scheme, however, did not seem to commend itself to the public; and Mr. Greer's ill health prevented him from pressing the matter. During the current year the Corporation has appointed District Special Committees under section 96 of the Act. These meet regularly; and the system as thus modified seems to be working well. It must be tried for a longer period, however, before a definite opinion can be pronounced. It would be interesting if, in future reports, figures were given showing for each district separately the demand, collections, remissions and balances and the expenditure incurred under the different heads of account. The statistics collected by the Health Department are already shown separately.

4. *Assessment.*—The gross assessed valuation of the town slightly exceeded 268 lakhs, or about 20 lakhs more than in the previous year. The

valuation of all municipal properties was included for the first time; but even after deducting this and a few similar items, the increase still exceeds 13½ lakhs, or far more than in any previous year. The average annual increment during the last decade has been rather more than five lakhs. The work of revision appears to have been well done, and objections were preferred for less than half the amount by which the previous valuations were enhanced. The objections received were dealt with promptly, and the result of subsequent appeals to the Courts would seem to show that the orders passed on them were generally equitable. In their review of the Chairman's report, however, the Corporation express dissatisfaction with the existing methods of assessment, and ask for the appointment of a special Commission to examine the whole question with a view to the amendment of the Act. They also indicate six particular points in which, in their opinion, the Act requires amendment. The Lieutenant-Governor is unable to hold out any hopes of the appointment of such a Commission or of the early amendment of the Act; but the recommendations of the Corporation will be fully considered when the Act next comes before the Legislature for revision. Meanwhile His Honour sees no reason why notice of increased assessment should not under the existing law be given to the occupier as well as to the owner, or why the notice should not contain a complete statement of the grounds upon which the increase is based. The Chairman will be asked to see that this is done in future.

5. *Collection of taxes.*—No less than 99·4 per cent. of the net demand was collected within the year. The improvement in this other respect has been continuous ever since the present Municipal Act came into force. The Lieutenant-Governor has much pleasure in endorsing the approval which the Corporation has given to the work of the Collector's Department.

6. *Income and Expenditure.*—The total income of the year, excluding loans, exceeded the expenditure by about 2 lakhs. The receipts were better than had been estimated by rather more than 2½ lakhs, while the expenditure was less than the estimate by about the same amount. The expenditure has gone up 22 per cent. in the last four years. Much of this has been due to the introduction of necessary reforms, which have added greatly to the efficiency of the work; but, in view of the operations of the Improvement Trust, it is important that the Corporation should, as far as possible, avoid committing themselves to any further material increase in recurring expenditure during the next few years.

7. *Loan Funds.*—During the last three years the Corporation have borrowed 90 lakhs, and their net indebtedness, or the excess of their loans over the amount to their credit in the sinking funds, has risen by about 60 lakhs. Their borrowing capacity has diminished by 21½ lakhs; but they can still borrow more than a crore before reaching the statutory limit. The consolidated rate moreover is still levied at a rate considerably below the maximum allowed by law. Their financial position is thus thoroughly sound; and the public appreciation of this fact is shown by the success attending the flotation of their last 4 per cent. debenture loan, which was issued at a premium of 1 per cent. At the same time, in view of the liabilities which the Corporation will incur in connection with the Improvement Scheme, it is essential that all new projects for Capital expenditure should be very closely scrutinized; and the Corporation have, therefore, been requested to postpone all street improvements from loan funds except those already in progress. They have also been requested to discontinue the practice of diverting loan funds which have been raised with the sanction of Government for particular works to other works which have not been so sanctioned; more than 2½ lakhs was spent from loan funds on unsanctioned works in 1904-05. There has also, in the past, been a tendency to debit Capital with expenditure which ought to be charged against Revenue, and the report of the Auditors on the accounts for the year under review discloses in this respect a state of affairs which can only be described as very unsatisfactory. The whole of the continuous water supply establishment and expenses has again been charged to Capital, although under section 105 of the Calcutta Municipal Act such expenditure should clearly have been met from Revenue. One-third of the cost of the general establishment and expenditure

(Rs. 60,18,05 ·.)

and of the Chief Engineer and his establishment has been debited to Capital, which has thus been saddled with more than a lakh of rupees, or nearly four times the average of the previous five years. On the other side of the accounts the whole of the proceeds from the sale of surplus lands in Lansdowne Road has been credited to Revenue and not merely the profits on the transaction. The Auditors object to this; but the explanation was probably unknown to them, namely, that the acquisition of land for this road was originally paid for from revenue not from capital. The sale proceeds were therefore credited to revenue, in accordance with an opinion recently received from the Advocate-General.

8. The Lieutenant-Governor is glad to find that in reviewing the Chairman's report the Corporation have condemned the existing practice in this respect. It is possible that reasons may be adduced in support of the procedure which has been followed; but His Honour is constrained to say that *primâ facie* it appears to be very unwise. The point of view from which this important question should be regarded is not so much whether the expenditure can fairly be considered as debitable to Capital, though even on this point the procedure adopted is in some cases incorrect, but rather whether the charges are of such a character as to justify their being met from loans fund, thereby increasing the indebtedness of the Corporation and hypothecating the income of future years. The principle of borrowing money to carry out large schemes which will benefit not only the present generation but also its successors is, of course, perfectly sound. On the other hand it is equally clear that the greater the indebtedness of the Corporation the more difficult it will be to carry on the administration satisfactorily in the future; and for this reason alone, as much of the expenditure as possible should be met from current revenue. Moreover, if the revenue head is relieved of charges which it would otherwise have to incur by debiting them to Capital, or is inflated by crediting it with fortuitous receipts such as the sale proceeds of waste lands, there will undoubtedly be a tendency for the Corporation to increase their recurring expenditure in other directions. It will thus become difficult for them hereafter to meet their obligations on account of the charges of which the revenue head is now being relieved at the expense of Capital or which are now being met by means of casual receipts. At the present time the impending improvement scheme makes it specially necessary to be cautious in this matter of finance; and the Lieutenant-Governor thinks therefore that the Corporation should carefully and even anxiously consider how far they should meet from their current revenue the charges on account of their permanent establishment; the expenses in connection with the maintenance of the continuous water-supply; the expenditure on advertisements, stamps and commission in connection with the raising of loans; and also the expenditure on petty improvements, the cost of which does not exceed at least 1,000 rupees. His Honour is also of opinion that it would be politic to follow the procedure in vogue prior to 1903-04 in respect of the sale-proceeds of waste lands and to credit the whole of such receipts to the Capital account.

The changes in the law as regards the debiting of certain charges to loan funds suggested by the Corporation in paragraph 8 of their review will be considered when the Act next comes under amendment.

9. *Accounts.*—A qualified Chief Accountant on adequate pay has been appointed with effect from the 1st April 1905, and it is said that the accounts have now been brought up to date and that a detailed audit of income has been instituted. The Auditors, however, have submitted their report on the accounts for the year under review; and although it shows that, in the actual book-keeping, there has been very great improvement, some of the worst defects of system brought to notice in the previous year are still apparent. This report was not received, it is said, in final form until October last. It is still under consideration of the General Committee. The Lieutenant-Governor awaits information as to how it is being dealt with.

10. Another matter calling for action is the necessity of overhauling the stock of all kinds with a view to the elimination of the large discrepancies which were brought to notice by the Auditors in their report for the previous year. The Lieutenant-Governor is informed that since last October

a special staff of the Licensed Measurers' Department of the Bengal Chamber of Commerce has been employed in taking stock of all the stores belonging to the Corporation, and that the work is now almost completed It is imperative that, after a careful stock-taking, a proper system of registering all issues and receipts should be introduced.

The Lieutenant-Governor is glad to notice that the expenditure in excess of budget grants was less than Rs. 9,000 against nearly one lakh and a quarter in 1903-04, and that adequate arrangements have been made to prevent a repetition of the circumstances under which, early in the year under review, the Corporation suddenly ran short of funds and was compelled to raise a temporary loan of five lakhs.

11. *Drainage Scheme.*—The large drainage operations on which the Corporation have been engaged for some years past are now within measurable distance of completion. Although all these works are usually referred to as the suburban drainage scheme, some of them are provided for the benefit of the town proper, *i.e.*, the area west and north of the Lower Circular Road. To this category belong the new engines at Palmer's Bridge the installation of which was completed in June 1904. The sewage from this pumping station now passes through the new town high level sewer to the combined town and suburban sewage channel, and thence by the suburban storm-water and sewage outfall reservoir and the Byntolla sluice into the Bidyadhari river. Good progress has been made with the town storm-water outfall reservoir which is designed to hold 52 million cubic feet; and though not quite complete, it has already been brought into use. At present its only exit is through the Makalpotta sluice, which was completed last May, but a second sluice at Byntolla will also shortly be brought into operation.

12. The suburban drainage scheme proper has also been pushed on vigorously. Out of a sanctioned length of 39,136 feet of main sewers, less than one-fifth remained to be constructed at the close of the year. Of a sanctioned length of 129,683 feet of branch sewers, about one-fourth was constructed during the year; but nearly one-half still remains to be built. All the main sewers converge on the Ballygunge Pumping Station, by which the sewage is raised to the suburban high level sewer. Most of the work on this station has been completed, and it is expected that it will be ready very shortly. From this point the sewage will be carried eastwards in the suburban high level sewer to the point of junction with the town high level sewer. Reflux gates were completed during the year at the point where the combined town and suburban sewage channel discharges into the suburban storm-water and sewage outfall reservoir, so as to prevent the back-flow of the sewage to Ballygunge.

13. The suburban area is divided into two parts of unequal size by Tolly's Nala. East of the Nala parts of two main and many branch sewers have still to be constructed. West of it the sewers were all completed some time ago; and the Budge-Budge Pumping Station, by which the sewage of the low-lying land in the neighbourhood of the Docks at the western extremity of the system is lifted, was begun and practically completed within the year. But while the sewers east of the Nala can be brought into use as soon as the Ballygunge Pumping Station is finished, those to the west of it cannot be utilized until certain lengths of sewer which collapsed have been reconstructed and some means of transferring the sewage across the Nala has been provided. It was intended to do this by means of a syphon. The work was undertaken by a firm of contractors, but unexpected difficulties were met with, chiefly owing to the nature of the soil; and eventually the attempt was abandoned. The dispute which resulted was referred to an arbitrator, who decided that the contract for the work should be determined, that the contractors should retain the money already paid to them (Rs. 34,450-15-10), and that the Corporation should not be liable for any further sum. It now rests with the Corporation to prepare a new project and to carry it through at the earliest possible date. The matter is one of great urgency; and no time should be lost in pushing it to a successful issue. Until some arrangement is completed for carrying the sewage across the Nala, the whole of the sewers to the west of it are useless;

and the money expended on them is bringing no return. With this single, but most important, exception the progress made with the scheme during the year was very satisfactory and reflects credit on the staff responsible for it.

14. *Water-supply.*—The average consumption of filtered and unfiltered water per head during the year was 21·7 and 22·5 gallons, respectively. The consumption of filtered water was about the same as in the previous year, while that of unfiltered water showed a considerable diminution. During the hot weather the supply of filtered water was insufficient in many quarters of the town. New machinery has since been erected at a cost of one lakh of rupees to put pressure on the main at Palta, and so increase the daily supply by about six million gallons.

Owing to the short supply of filtered water, the work of replacing the intermittent by a continuous supply was in abeyance from March till October and was only resumed at the beginning of the cold weather. At the close of the year the population under continuous supply was 304,305—an increase of 93,447 on the figures of 1903-04. The continuous supply should have been extended to the whole city by the 1st April 1905; but the Corporation have applied for and obtained an extension of two years.

With the additional water now available, more rapid progress should be made in the extension of the continuous system. Every effort should be made by the Corporation to fulfil their engagements to supply water to some of the Suburban Municipalities. Their failure to do so in the past has been productive of great inconvenience and hardship to the inhabitants of the Municipalities concerned. The average consumption per head in the area under constant supply varied from 28·1 gallons in July to 24·6 gallons in January. Even the latter figure is above the average consumption per head in the whole town; but it must be remembered that the immediate effect of the introduction of a continuous supply into a new area is a great increase in consumption owing to the waste which takes place. This is especially the case where the pressure is insufficient to make the supply continuous—in fact as well as name—and taps are left open to make sure of getting water when it comes.

The only actual breakdown in the supply occurred in February 1905, when the mains laid in the Kidderpore Docks were broken by a passing steamer. A temporary main was laid across the swing bridge; and the Water-works Department deserves great credit for the promptitude with which the supply was restored.

15. The condition of the pumps at Mallik's Ghat Pumping Station continued to cause trouble in connection with the unfiltered water-supply. A larger trunk main is being provided along the Strand Road. This will improve the pressure in the northern wards; while the new main across the Maidan, which will link up the Watgunge and Mallik's Ghat Pumping Station, will relieve the latter considerably. One hundred and thirty-one privy connections were transferred from the filtered to the unfiltered mains, making a total up to date of 1,664.

16. The Corporation have now before them a scheme for distributing filtered water by gravitation from one central reservoir instead of by direct pumping into the mains from four separate pumping stations. It is proposed to erect at Talla a large reservoir capable of holding nine million gallons and to construct an aqueduct from Palta to Talla. The scheme was originally estimated to cost about 85 lakhs of rupees; and it was claimed that sufficient water would be provided by it to enable the use of unfiltered water to be discontinued altogether; but the Lieutenant-Governor understands that it has been considerably modified, and that the estimate has been greatly reduced. His Honour would like to have a clear report as to how the case now stands. The expediency of abandoning a system which is already in use and embarking on a new and costly project at a time when an expensive improvement scheme is contemplated, is a question that demands and will no doubt receive most careful examination at the hands of the Corporation.

17. *Basti Improvement and Building Report.*—The Corporation were compelled during the year to stay their hand in acquiring *bastis*, pending the decision of an appeal against an adverse ruling of the Special Judge

regarding the method of assessing compensation. Standard plans were, however, prepared for the improvement of a large number of *bastis* by their owners; and in ten improvements in accordance with these plans were actually made. The demolition of plague-infected huts was checked owing partly to the high awards made by the Courts to the owners and partly to the fact that no satisfactory arrangements have yet been devised for housing the evicted population. In the absence of such arrangements, demolition may do more harm than good, since it must merely lead to the occupants seeking shelter in other *bastis* and so increasing the overcrowding there.

The Building Department dealt with a large number of applications, and there was some improvement in the despatch of business, but in this respect much is still to be desired.

18. *Public Health and Sanitation.*—The Departmental Report of the Health Officer is full of interest. The reported birth-rate of 17·9 per mille, though higher than in any previous year, is still admittedly inaccurate; even after allowing for the great deficiency of females in the town, the true birth-rate is probably not far short of 30 per mille. The employment of an improved reporting agency in District No. 1 produced an increase of 50 per cent. over the figures for previous years; and there can be little doubt as to the desirability of introducing a similar reform in other districts also. Thanks to the diminished prevalence of plague, the reported death-rate, which is very nearly accurate, was only 32·2 per mille, or less than in any year since plague first broke out and considerably below the estimated death-rate for Bengal as a whole. The relative healthiness of Calcutta is ascribed to its comparative freedom from malarial fever. The mortality recorded from bowel-complaints was the lowest of any year in the decade. It will doubtless be still further reduced with the extension of the filtered water-supply in the suburban tracts, where the death-rate from this cause is considerably higher than it is in the heart of the town. The number of plague deaths fell to 4,689, or less than three-fifths of that in 1903; but there has unfortunately been a recrudescence of the disease in the current year. Its virulence as usual was greatest in the Northern Division. It is said that the people are beginning to appreciate the work done by the Plague Department. Medical Officers report cases more freely and applications for disinfection are becoming more common. The officers of the special plague department have as usual rendered excellent service. They now enquire into the causes of all deaths reported.

19. The remarks of the Health Officer regarding tuberculosis, which now accounts for 8 per cent. of the total mortality, deserve careful consideration. It is largely a disease of crowded rooms; and the prevention of overcrowding is one of the most difficult problems that the Improvement Trust will have to face. Tetanus, which is due almost entirely to bad midwifery, is another fertile source of preventible mortality. Dr. Cook lays stress on the importance of bringing home to the people a few simple principles connected with the prevention of infectious diseases, and points out that this is a matter which depends very largely on the example set by the educated classes. Possibly something could be done by the distribution of leaflets, such as those recently prepared by the Sanitary Department on the care of children and the treatment of plague, etc.

There was a marked improvement during the year in vaccination work, both in the number of operations and in the substitution of glycerinated lymph for the old method of arm-to-arm vaccination. Frequent examinations were made of the filtered water-supply, which, on the whole, gave excellent results, though bacteria of the colon group were still present in relatively large numbers. A large amount of useful work was done by the Sanitary and Food Inspectors. The most important problem in respect of the food-supply now awaiting solution is the improvement of the quality of the milk sold in Calcutta. This is at present most unsatisfactory. Some steps have already been taken to improve the condition of certain dairies, but very much still remains to be done.

20. It is not possible within the limits of this Resolution to deal with more than a few of the many departments of municipal activity; nor can

the numerous recommendations made in the review submitted by the Corporation be referred to in detail. Many of the criticisms it contains are thoroughly justified, and all deserve, and will no doubt receive, the serious attention of the executive. What is said in the review with regard to such important matters as conservancy, road repairs, and lighting is especially worthy of notice; and the Lieutenant-Governor has no doubt that where real defects have been pointed out, the officers responsible will do their utmost to effect an improvement, and that they will receive the cordial co-operation of the whole body of the Commissioners His Honour cannot endorse the charge of want of interest which the Corporation has brought against those of its own members who are nominated by Government or by public bodies; but he gladly acknowledges the devotion and energy which many of the Commissioners, both elected and nominated, have displayed. The excellent results which may be obtained when the Commissioners themselves take an active part in the municipal business are nowhere more evident than in the admirable management of the municipal markets by a Committee which is ably presided over by a nominated Commissioner.

21. Mr. C. G. H. Allen acted as Chairman from the commencement of the year until the return from leave, on the 15th November 1904, of Mr. R. T. Greer, the permanent incumbent, who held charge for the remaining months. Mr. H. P. Duval was Deputy Chairman up to the 27th October 1904, when he was succeeded by Mr. C. F. Payne. Babu Nilambar Mukerjee was Vice-Chairman throughout the year, and performed his duties with marked ability, his work in the Accounts Department being specially valuable. The Lieutenant-Governor greatly regrets the very serious illness which has removed Mr. Greer from his work, but considers himself fortunate in having secured a successor with the zeal and energy of Mr. Allen. To all the officers who have been named and to their subordinates the Lieutenant-Governor desires to accord his heartiest thanks for the manner they have discharged duties in many cases of a most arduous and responsible character. The labours of the members of the Corporation and of the General Committee are equally worthy of praise; and His Honour cannot too highly commend the spirit in which several members have devoted themselves to the performance of their public duties.

By order of the Lieutenant-Governor of Bengal,

L. P. SHIRRES,

Secretary to the Govt. of Bengal.

APPOINTMENT OF A COMMITTEE TO ENQUIRE INTO THE DRAINAGE SCHEMES IN THE PRESIDENCY DIVISION IN CONNECTION WITH THE PREVALENCE OF MALARIA.

MUNICIPAL DEPARTMENT—MEDICAL.

Calcutta, the 26th March 1906.

RESOLUTION No. 1379Med.

In a speech delivered at a meeting of the Bengal Legislative Council on the 31st March 1905 the Hon'ble Babu Bhupendra Nath Basu drew attention to the prevalence of malarial fever in Bengal and asked that a Commission or Committee of Enquiry might be appointed to investigate the causes of death from malaria in Bengal and their remedies. It was stated in reply by the Hon'ble Mr. Shirres on behalf of Government that there had not been time to obtain the opinion of the Medical Advisers of Government with regard to this request, but that the suggestion would in due course be submitted for His Honour's orders.

2. The matter has been carefully examined by the Lieutenant-Governor in consultation with Commissioners of Divisions and the Medical Advisers of Government. It is not considered that much advantage would be derived from the appointment of a Commission or a Committee with a mandate of so general a character as that suggested by the Hon'ble Member. The causes of malarial fever are already known with a fair amount of accuracy and where knowledge is still incomplete further progress must be looked for from expert bacteriological investigation rather than from enquiries of a less specialized nature. A general enquiry regarding the remedies to be adopted would also tend to be infructuous But the Lieutenant-Governor thinks that on one particular matter the appointment of a Committee of Enquiry might be attended with important results.

3. It is an undoubted fact that over a large part of Bengal and particularly in the Presidency Division the main cause of malaria is the obstruction of drainage. This state of affairs has been caused by the gradual rise of the delta, owing to which the rivers have in many cases abandoned their beds and sought new courses elsewhere. A complete remedy for this is not within the sphere of practical effort; but it is certain that in many places the conditions could be greatly ameliorated by the execution of drainage projects which could be carried out at not excessive cost. From time to time schemes of this nature have been suggested but have usually been abandoned because the necessary funds were not forthcoming. Two important projects however have already been determined on. In the 24-Parganas the Magra Hât Drainage Scheme is already in course of construction; and in the district of Jessore the drainage of the Bhairab Valley will shortly be undertaken. What is now necessary is that the whole of the Presidency Division should be examined and that a list should be prepared of all practicable drainage schemes, so that a definite programme of action may be drawn up.

4. The Lieutenant Governor has decided that for this purpose a small Committee should be appointed consisting of the following officers:—

The Hon'ble Mr. Inglis, *Member and President.*
Captain W. W. Clemesha, I.M.S., *Member.*
Mr. H. Wheeler, I.C.S., *Member and Secretary.*

The Committee will meet at once and will commence by collecting information and examining the records of such drainage schemes as may have been put forward in the past. From October 1906 the Committee will travel over the districts of the Presidency Division to examine the local conditions on the spot. During the course of the preliminary enquiries it will not be necessary to place the members of the Committee on special duty; but this can be done if necessary from the beginning of the cold weather.

5. It will be the duty of the Committee—

(1) to ascertain in what areas malaria is now prevalent;

(2) to investigate the causes of the disease, and in particular to determine whether it is due to obstructed drainage;

(3) where malaria has been caused by obstructed drainage to decide whether a drainage scheme is practicable; and

(4) to prepare a list of practicable drainage schemes in the Presidency Division arranged in order of urgency.

It is hoped that the Committee will be able to submit their report before the end of March 1907.

ORDER.—Ordered that a copy of this Resolution be forwarded to the Hon'ble Mr. W. A. Inglis, Captain W. W. Clemesha, I.M.S., and to Mr. H. Wheeler, I.C.S., and that the Resolution be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

L. P. SHIRRES,

Secretary to the Government of Bengal.

LIBERALITY OF ORISSA CHIEFS.

Extract from a letter No. 1168, dated Calcutta, the 13th March 1906, from MR. G. GORDON, *Officiating Secretary to the Government of Bengal, General Department, to the Director of Public Instruction, Bengal.*

I AM directed to acknowledge the receipt of your letter No. 2052 dated the 20th February 1906, in which you report that a sum of Rs. 1,500, being the contribution of the Orissa Chiefs for the institution of the Ravenshaw College Improvement Fund, was made over to the Principal of the College by Mr. Growse, late Commissioner of the Orissa Division, some months ago, and that the money has been kept in the Post Office Savings Bank. You recommend that the offer be accepted, that steps be taken for the creation of a Fund, the Principal of the Ravenshaw College being appointed administrator, and that the interest of the Fund should be utilized in making from time to time such improvements in the College as may be considered necessary by the Director of Public Instruction, Bengal, on the recommendation of the administrator.

2. In reply, I am to say that the Lieutenant-Governor is pleased to accept the offer and to request that the thanks of Government may be conveyed to the Chiefs concerned for their liberality. The Accountant-General, Bengal, will be requested to open a Trust Fund to be styled the Ravenshaw College Improvement Fund and the Principal of the College will be the administrator of the Fund. The interest of the Fund will be utilized in the manner suggested by you.

WEATHER AND CROP REPORT.

For the week ending the 26th March 1906

Burdwan.—Rainfall at Sadar 0·28, Kalna 0 58, Katwa 0 68, Raniganj 0 59. Standing crops doing well. Pressing of sugarcane going on. Cattle-disease reported from three thanas in the Kalna subdivision. Fodder and water sufficient. Common rice sells as follows :—

	Srs.	ch.	
Sadar	11	6	per rupee.
Kalna	10	5	
Katwa	11	6	
Raniganj	11	12	

Birbhum.—Rainfall at Sadar 0·92, Rampur Hât 0 76. Weather seasonable. Sugarcane-pressing continues. Fodder and water sufficient. Common rice sells as follows :—

	Srs.	ch.	
Sadar	12	0	per rupee.
Rampur Hât	11	8	

Bankura.—Rainfall at Sadar 1·66, Vishnupur 0 47. Weather cloudy. Pressing of sugarcane continues. No cattle-disease. Fodder and water sufficient. Common rice sells as follows :—

	Srs.	ch.	
Sadar	12	8	per rupee.
Vishnupur	13	0	

Midnapore.—Rainfall at Sadar 3·29, Contai 0 43, Tamluk 0·57, Ghatal 1·31. Weather in unsettled condition. Condition of standing crops good. Prospects favourable. Common rice sells as follows :—

	Srs.	ch.	
Sadar	11	0	per rupee.
Ghatal	11	0	
Contai	12	0	
Tamluk	9	8	

Hooghly.—Rainfall at Sadar 1·58, Serampore 0·72, Arambagh 0·92. Weather cloudy. Lands are being ploughed for *aus* and jute. No cattle-disease. Fodder and water sufficient. Common rice sells as follows :—

	Srs	ch	
Sadar	9	0	per rupee

Murshidabad.—Rainfall at Sadar 1·23, Lalbagh 1·28, Kandi 1·65, Jangipur 0 14. *Rabi* crops are being reaped. Lands are being cultivated. No cattle-disease Fodder and water sufficient condition of cattle generally good. Common rice sells as follows :—

	Srs ch.	
Sadar	10 8	per rupee.
Lalbagh	10 4	
Kandi	12 0	
Jangipur	10 8	

Jessore.—Rainfall at Sadar 0·08, Bangaon 1·32, Jhenida 1 11, Narail 0· 8, Magura 1·16. Character of weather seasonable. Prospect of standing crops favourable. Fodder and water sufficient condition of cattle generally good. Common rice sells as follows :—

	Srs. ch.	
Sadar	10 0	per rupee
Bangaon	9 2	
Jhenida	8 8	
Narail	8 14	
Magura	8 1½	

Khulna.—Rainfall at Sadar 0·11, Bagerhat 0 21, Satkhira 1 32. Weather seasonable Lands being prepared for jute Sowings estimated at 25 per cent Outturn of winter rice and rape and mustard estimated at 78 and 83 per cent, respectively No cattle-disease. Fodder and water sufficient. Common rice sells as follows :—

	Srs. ch	
Sadar	8 8	per rupee
Bagerhat	9 0	
Satkhira	10 0	

Patna.—Rainfall at Sadar 0·03, Barh 0 2⁴, Bihar 0 09 Bikram 0·05. Hilsa 0.35. Weather hot. Harvesting of *rabi* continues. Collection of opium almost complete. No cattle-disease. Fodder and water sufficient Common rice sells as follows :—

	Srs ch	
Sadar	11 12½	per rupee.
Barh	11 0	
Bihar	11 0	

Gaya.—Rainfall at Sadar 0 28, Jehanabad 0·11, Aurangabad 0 55 Weather cloudy. Pressing of sugarcane and harvesting of *rabi* continue Planting of sugarcane and lancing of poppy going on. *Rabi* crops damaged by rain in Aurangabad subdivision. Fodder and water ample. Average price of common rice is 11¾ seers a rupee.

Shahabad.—Rainfall at Sadar 0 21, Sasaram 0·67, Bhabua 0·32, Buxar 0·16, Dehri 0·31 Harvesting of *rabi* in progress. Cattle-disease reported from Kharghar thana. Fodder and water sufficient Common rice sells at 12 seers a rupee.

Saran.—Rainfall nil. Weather cloudy. Harvesting of *rabi* crops going on. Standing crops doing well. No cattle-disease. Fodder and water sufficient. Common rice and maize sell at 11 and 13 seers a rupee, respectively, at Sadar.

Champaran.—Rainfall at Sadar 0·03, Bettiah nil. Harvesting of *rabi* and opium collection continue. Prospects good. Sugarcane being planted Lands are being prepared for *bhadoi* paddy. No cattle-disease. Fodder and water sufficient. Common rice and maize sell at 11½ and 12½ seers a rupee, respectively.

Muzaffarpur.—Rainfall at Sadar 0·07, Hajipur 0·49, Sitamarhi 0·03. Prospect of crops good. *Rabi* crops are being harvested. No cattle-disease reported. Fodder and water sufficient. Common rice and maize sell at 10 and 12 seers a rupee, respectively, at Sadar.

Darbhanga.—Rainfall at Sadar 0·04, Samastipur 0·10, Madhubani 0·03 Weather seasonable. Prospect of standing crops good. Harvesting of *rabi* crops going on. Fodder still insufficient in Dalsingsarai thana Water sufficient. No cattle-disease reported. Common rice sells as follows —

	Srs ch	
Sadar	11 0	per rupee
Samastipur ...	11 8	
Madhubani	11 1	

Monghyr—Rainfall at Sadar nil, Begusarai 0·11, Jamui 0·07. Weather seasonable. Pressing of sugarcane and lancing of poppy going on. Harvesting of *rabi* commenced in places. No cattle-disease Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	0	per rupee.
Begusarai	10	0	
Jamui	10	0	

Bhagalpur.—Rainfall at Sadar 0·01, other subdivisions nil. Weather seasonable. Harvesting of *rabi* commenced. Some cases of cattle-disease reported. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	10	12	per rupee.
Banka	10	10	
Madhipura	12	8	
Supaul	12	0	

Purnea.—Rainfall at Sadar 0·18. *Rabi* is being reaped in some places. Fields are being prepared for *bhadoi* paddy. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	9	0	per rupee.
Kishanganj	8	8	
Araria	9	8	

Darjeeling.—Rainfall at Sadar 1·03. Weather seasonable. Hills—Wheat, barley and mustard are in fair condition. Terai—Ploughing going on well. Coarse rice sells as follows:—

	Srs.	ch.	
Hills	7	0	per rupee.
Terai	8	0	

Maize sells at 8 and 10 seers a rupee at Darjeeling and Kalimpong respectively.

Santhal Parganas.—Rainfall at Sadar 0·10, Godda 0·22, Jamtara 0·76, Pakour 0·48, Rajmahal 0·9 . Weather seasonable. Sugarcane pressing still continues at Sadar. Prospects of *rabi* and *mahua* not favourable. Insufficiency of fodder is felt at pargana Majhua Rajmahal. Water sufficient. Common rice sells at 10 seers a rupee.

Cuttack.—Slight rainfall. Cotton, tobacco and *mung* growing *Dalua* being harvested No cattle-disease. Fodder and water sufficient. Common rice sells at 12 seers and 7chitaks per rupee.

Balasore.—Rainfall at Sadar 0·40. Ploughing of fields, threshing of *saradh*, and pressing of sugarcane continue Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	13	0	per rupee.
Bhadrak	14	0	

Angul.—Rainfall at Sadar nil, Chulbaria 1·88. Weather hot. Lands being ploughed Fodder and water available. The mango has failed in Angul Common rice sells as follows:—

	Srs.	ch.	
Sadar	12	0	per rupee.
Khondmals	12	0	

Puri.—Rainfall at Sadar nil, Khurda 0·85. Weather seasonable. *Dalua* ripening in some places and in ear at others. *Mung* approaching maturity. Sugarcane being crushed in some places and cuttings planted in others. Cotton thriving well Land being ploughed for the ensuing *saradh* paddy Miscellaneous crops doing well. Fodder and water sufficient. Common rice sells at 13 seers and 2 chitaks per rupee.

Sambalpur.—Rainfall 0·67. Weather getting warm. Sugarcane fields are being ploughed for plantation of sugarcane. Cattle in healthy condition Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch	
Sambalpur	14	0	per rupee.
Bargarh	15	12	

Hazaribagh.—Rainfall at Sadar 0·67, Giridih 0·19 Prospect of *mahua* and mango not favourable Fodder and water sufficient. No cattle-disease reported. Result of poppy cultivation unsatisfactory. Common rice sells at 10 seers a rupee at Giridih. Prices at Sadar are as follow:—

	Srs.	ch.	
Common rice	11	4	per rupee.
Indian-corn	18	0	
Marua	19	8	

Ranchi.—Rainfall at Sadar 0 59. Weather cloudy. Ploughing continues Some damage has been done to the standing crops by hailstorms in thana Kurdeg Cattle-disease reported from three thanas. Fodder and water sufficient. Common rice sells as follows:—

	Srs.	ch.	
Sadar	11	0	per rupee.
Khunti	13	0	
Gumla	14	0	

Palamau.—Rainfall at Sadar 0·43. Weather cloudy. Harvesting of *rabi* in progress Fields are being prepared for sugarcane. A few cases of cattle-disease reported. Fodder and water sufficient. Common rice sells at 12¼ seers a rupee.

Manbhum.—Rainfall at Sadar 0·44, Gobindpur 1·57. Weather seasonable. Prospects of crops fair. Fodder and water sufficient. Cattle-disease reported from two thanas. Common rice sells as follows —

	Srs.	ch.	
Sadar	12	0	per rupee.
Gobindpur	11	0	

Singhbhum.—Rainfall at Sadar 0·29. Prospects of crops fair. Cattle-disease reported from thana Chakradharpur. Fodder and water sufficient. Common rice sells at 12 seers a rupee.

The average fall of the corresponding period for 24 years, Surveyor General's Office	2·68

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from eye observations.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified, and the readings have been corrected to a standard constructed and verified at the Kew Observatory They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground

The barometer readings are corrected to those of the standard, Newman's No 86, formerly at the Surveyor-General's Office

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph

The mouth of the rain-gauge is one foot above the ground Rainfall reported on any day is for 24 hours preceding 8 A M. of that day.

d, dew; d, drizzling rain; o, overcast; -, strong wind; t, thunder; <, lightning; p, passing temporary showers; K, thunderstorm.
